1. Overview

The **Appointment Booking System** add-on allows admin to enable online appointment bookings for different business, such as, Doctors, Movie and Event Tickets, Car or Bike Renting, and so on.

The key features of the Appointment Booking System add-on are as follows:

- Admin can create non-working rules.
- Admin can create the Appointment Booking type of products for definite interval of time.
- Admin can manage Appointment Booking orders.
- Admin can manage Appointment Booking Settings.
- Allows customer to book Appointment Booking type of products online.

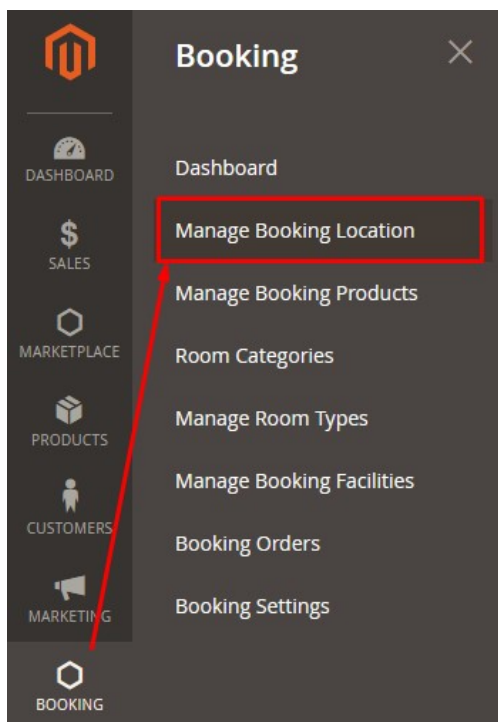

Note

: For more information on Marketplace Booking and Reservations System, see the corresponding Admin Guide.

2. Manage Booking Location

The admin can manage the location details for creating appointment booking type of products.

Thus, the admin can perform the following tasks from the **Booking Location** page:

- Adding location(<http://docs.cedcommerce.com/testing/?section=add-a-new-appointment-booking-products>)

- Editing location(<http://docs.cedcommerce.com/testing/?section=edit-the-location>)
- Deleting location(<http://docs.cedcommerce.com/testing/?section=delete-the-location>)

2.1. Add a New Location

The admin can add new locations that is used while creating the appointment booking type products. The front-end user can use one of the created locations while booking the appointment booking type products.

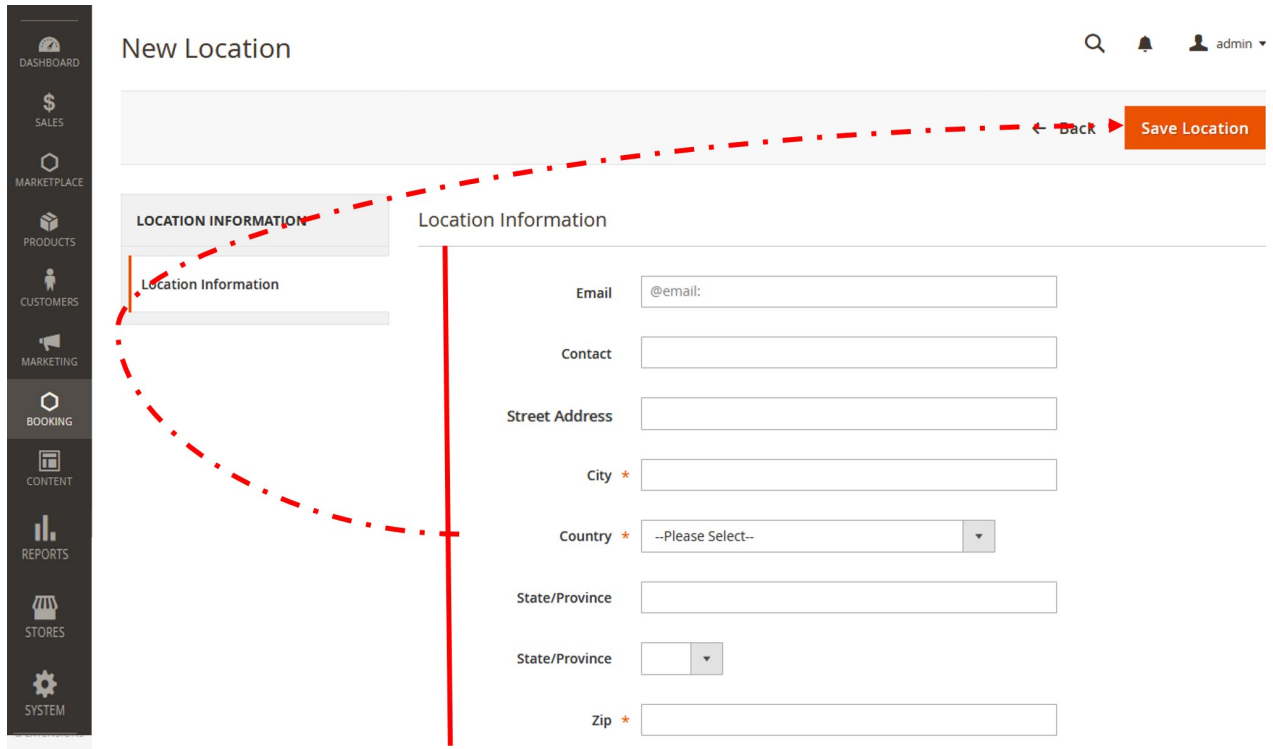

To add new location details

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **Booking** menu, and then click **Mange Booking Location**.
The **Booking Location** page appears as shown in the following figure:

The screenshot displays the 'Booking Location' admin interface. It features a sidebar with navigation options: DASHBOARD, SALES, MARKETPLACE, PRODUCTS, CUSTOMERS, MARKETING, and BOOKING (selected). The main content area includes a search bar, a user profile 'admin', and an 'Add New Location' button. Below this is a table with 2 records found. The table has columns for Id, Email, Street Address, City, State, Country, Contact, Zip, and Action. The first record has Id 4, and the second has Id 6, Email test@gmail.com, Street Address uhjnkimo, City lucknow, State uttar pradesh, Country India, Contact 12, and Zip 226020. There are also filters, default view, and columns settings visible.

| Id | Email | Street Address | City | State | Country | Contact | Zip | Action |
|----|----------------|----------------|---------|---------------|---------------|---------|--------|----------------------|
| 4 | | | gh | California | United States | | 8541 | Edit |
| 6 | test@gmail.com | uhjnkimo | lucknow | uttar pradesh | India | 12 | 226020 | Edit |

3. Click the **Add New Location** button.
The **New Location** page appears shown in the following figure:

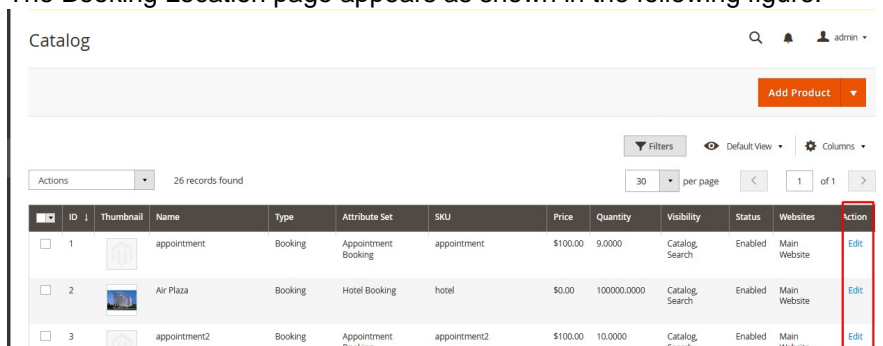

4. Enter the values in all the required fields, and then click the **Save Location**
5. The newly added location is saved and the view moves back to the **Booking Location** page, where the success message appears.
The admin can add another required location.

2.2. Edit the Location

The admin can make changes in the existing locations.

To edit the existing location details

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **Booking** menu, and then click **Mange Booking Location**.
The Booking Location page appears as shown in the following figure:

3. In the **Action** column, click the **Edit** link associated with the required location that admin wants to edit.
The page appears as shown in the following figure:

6. Booking Settings

The admin has rights to enable or disable the features of the add-on to the front-end users.

To define the booking settings

1. Go to the **Admin** panel.

2. On the left navigation bar, click the **BOOKING** menu, and then click **Booking Settings**.
The **Configuration** page appears.
3. On the left navigation panel, click the **CedCommerce Extensions** menu, and then click **Booking System**.
The page appears as shown in the following figure:

The screenshot displays the 'Configuration' page for the Appointment Booking System. On the left is a vertical sidebar with icons for various system areas: Marketplace, Sales, Products, Customers, Marketing, Booking, Content, Reports, and System. The main area is titled 'Configuration' and shows a 'Store View: Default Config' with a 'Save Config' button. The 'Booking Settings' section is expanded, showing various configuration options such as 'Enable in frontend', 'Booking Address', 'Show Calendar', 'Max Map Zoom', 'Map API Key', 'Show Hotel Top Link', 'Hotel Top Link Title', 'Show Daily Booking Top Link', 'Daily Top Link Title', 'Show Hourly Top Link', 'Hourly Top Link Title', 'Show Appointment Top Link', and 'Appointment Top Link Title'. Below this is the 'Filter Settings' section, which includes 'Enable Top Filter', 'Enable Side Filter', and a 'Select Side Filters' dropdown menu with options like 'Browse By Facilities', 'Browse By Star Rating', and 'Browse By Price'. The 'Notification Settings' section is collapsed. The 'Banner Settings' section includes 'Hotel Banner', 'Appointment Banner', 'Daily Banner', and 'Hourly Banner', each with a 'Browse...' button and a 'Delete Image' checkbox. Below these are fields for 'Banner Image Width' and 'Banner Image Height'.

4. In the right panel, click the **Booking Settings** tab to expand the associated fields.
5. Under the **Booking Settings** tab, do the following steps:
 - a. Enter the corresponding values in the required fields.
 - b. In the **Show Appointment Top Link** list, select **Yes**, to enable the appointment top link at the front-end.
 - c. In the **Appointment Top link Title** box, enter the title for the **Appointment Top link**.
6. In the right panel, click the **Filter Settings** tab to expand the associated fields.
7. Under the **Filter Settings** tab, do the following steps:
 - a. In the **Enable** filter list, select **Yes**, to enable filter at the customer front-end.
 - b. In the **Product Attribute** box, select required attribute.
8. In the right panel, click the **Notification Settings** tab to expand the associated fields.
9. Under the **Notification Settings** tab, enter the required values in the corresponding fields.
10. In the right panel, click the **Banner Settings** tab to expand the associated fields and enter the required values.
11. Under the **Banner Settings** tab, browse the **Appointment Banner** image.
12. Click the **Save Config** button.
The defined configuration is saved.
