1. Overview

MageNative Mobile App Magento® 2 extension provides a flexibility and an easiest way to build the mobile app. With the help of the MageNative app, the admin can convert the Magento® 2 website into a featured mobile app consisting of all the website functionalities.

MageNative is the Application Development Platform that enables to present the website in the Mobile Application Environment. The admin can customize the app to match the brand image and publish it to meet the requirements of the front-end users.

The app displays the product information in an interactive way and uses the less data to show the product related information.

This application is compatible with the following operating systems:

- Windows
- Android
- ios

Note : It is available with the free trial version for the Ninety days.

The key features of the MageNative Mobile App extension are as follows:

- **Attractive and User-Friendly Layout:** Provides an attractive and user-friendly layout that makes the users to instinctively experience, how to use the interface.
- **Multi Lingual and RTL Support:** It supports multiple languages and the right to left theme. In the right to left theme, writing starts from the right of the page and continues to the left.
- **Native App:** An application program, developed for the use on a specific platform or device.
- **Synchronization:** The app is synchronized with the website.
- **Supports all product type:** It supports all type of the products available in the Magento 2 store.
- **Search:** Enhanced search feature available to search the required product in the app based Name, description, Category of the product.
- **Barcode And QR Code Reader and Scanner:** **QR Code Reader** is used for Product sharing and easy product search. **Barcode Scanner** is used for the Real world product search.
- **Push Notification:** Using **Push Notification** the MageNative App sends the user a notification message regarding any new offer or any other app related messages without the user actually opening the app. The notification is pushed to the mobile to draw the user's attention towards the latest happening in the app, even when the screen of the tab or mobile is locked, and the app that is pushing the notification is closed.
- **Social Login:** A single sign-on technology is used that allows users to authenticate themselves on MageNative App by connecting through a social media such as Facebook and Google. Thus, offering an option to register, log in with their regular social login ID and password rather than going through the regular process of registration for using the App.
- **Native Payment Gateway:** Will provide the NATIVE PAYMENT GATEWAYS that will make the application run smoothly and even faster on the transactions performed by the users.
- **Voice Search:** You can search the product with your own voice.

Other Efficient Features are as follows:

- Support all the payment method available on the Magento 2 store.
- Homepage Promotional Banner
- Promotional Deals
- Product Social Sharing
- Google Maps
- Google Analytics

- Customize App Design
- Filters
- Sort

2. Mobicconnect Menu

After the successful app building and the connector installation, the Admin can view the **MOBICONNECT** menu on the left navigation bar of the Admin panel.

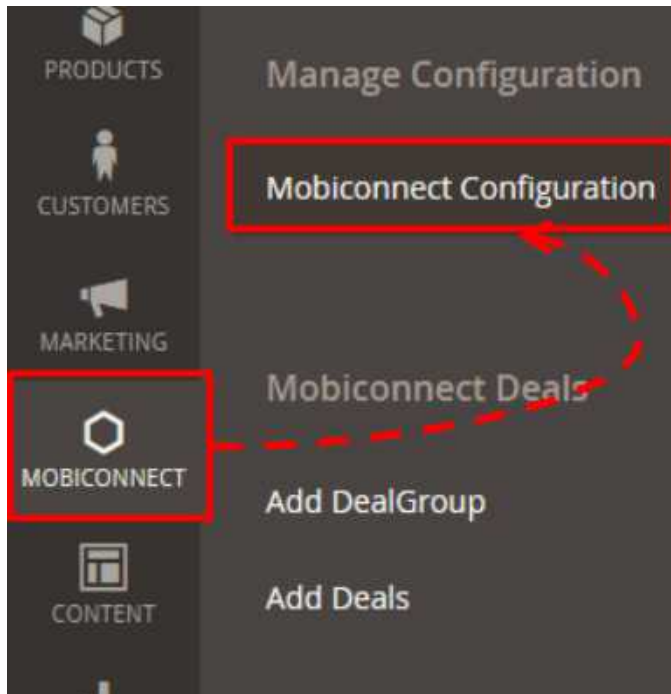

2.1. Mobiconnect Configuration

After App building and connector installation, the admin has to configure the various features of the app through the Admin panel. The Admin has rights to enable or disable the features of the extension.

To set up the configuration settings

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **MOBICONNECT** menu, and then click **Mobiconnect Configuration**.

The **Configuration** page appears.

Configuration

Search, Notifications, admin

Store View: Default Config

Save Config

The screenshot displays the configuration interface. On the left is a navigation menu with categories: GENERAL, CATALOG, CUSTOMERS, SALES, MAGENATIVE, SERVICES, and ADVANCED. The MAGENATIVE menu is expanded, showing sub-items: Installed Extensions, Mobiconnect, Mobiconnect Advance, Mobiconnect Store, Mobiconnect Social Login, Mobiconnect Wishlist, Mobiconnect Deals, Mobiconnect Review And Rating, Mobiconnect Notification, and Mobiconnect Checkout. A red box highlights the MAGENATIVE menu and its sub-items, with an arrow pointing to a text box that reads "The MAGENATIVE menu in the left navigation panel".

On the right, the configuration content area shows the "General" tab selected. Below it are sections for "Banner Settings" and "Homepage Products". A red box highlights these sections, with an arrow pointing to a text box that reads "Mobiconnect Configuration Settings".

Note : While setting the configuration, admin can click the **Save Config** button, to save the settings at any point.

3. In the right panel, click the **General** tab.

The **General** tab is expanded and the relevant fields appear as shown in the following figure:

2.3. Import or Export EAN

EAN

(European Article Number) is a numeric only barcode system used in global trade. It is used to identify a specific retail product type, in a specific packaging configuration, from a specific manufacturer. **EAN** barcodes can also be used as numbers for wholesale order or account maintenance.

With the Barcode Scanner the front-end user can capture image of a barcode of the required product. The Barcode reader then uses the advanced digital image processing techniques to decode the **EAN** barcode, which is then converted into the matching numbers.

The admin can maintain the records of **EAN** barcodes provided with the corresponding product, to facilitate the users to search their product by using the required barcodes.

The Admin can perform the following tasks:

- Import EAN
- Export EAN

To Import or Export EAN

1. Go to the **Admin**
2. On the left navigation bar, click the **Mobicconnect** menu, and then click **Import/Export EAN**.
The **Import and Export Product EAN** page appears as shown in the following figure:

Import and Export Product EAN

Choose Product CSV File No file selected.

Import Product EAN

Export Product EAN

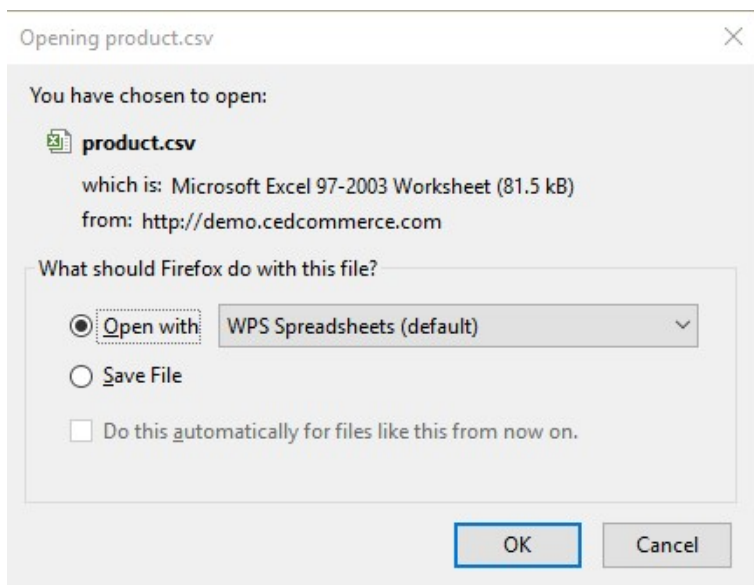

Export Product EAN

3. To import, follow [step 4](#). To export, follow [step 5](#).
4. To import Product EAN, do the following steps.
 - a. Click the **Browse** button associated with the **Choose Product CSV File** field.
 - b. Select the file from the local system.
The file is uploaded on the Magento 2 store.
 - c. Click the **Import Selected CSV file** button associated with the **Import Product EAN** field.
The EAN numbers are assigned to the corresponding product Ids.

5. To export Product EAN, do the following steps:

- a. Click the **Export Product EAN CSV file** button associated with the **Export Product EAN** field. A dialog box appears as shown in the following figure:

- b. Click **Save File**, and then click the **OK** button. The CSV file is save on the local system.

2.4. Manage Home Page Banner Widget

The admin can assign the available banner images to the Banner widget while creation of the widget. Only the assigned banner images are displayed on the app home page. If the admin creates the multiple widgets, then the widget with highest priority is displayed on the home page. If two or more widgets have the same priority, then all of them are displayed on the home page.

Admin can perform the following tasks:

- Add Banner Widget(#AddBannerWidget)
- Edit Banner Widget(#EditBannerWidget)
- Delete Banner Widget(#DeleteBannerWidget)

To add a banner widget

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **Mobicconnect** menu, and then click **Manage Home Page Banner**. The **Manage Home Page Banner Widget** page appears as shown in the following figure:

6. Click the **Enable**

icon to switch to the enable or disable mode.

Tips

:

- : Resembles the **Enable** mode.

- : Resembles the **Disable** mode.

7. Click the **Upload** button, next to the **Image** field, to upload the image relevant to the deal.
8. In the **Store View** list, select the required website.
9. In the **Choose Link Type** list, select one of the following options:

- **Product in app:** To redirect the user to the Products page available on the Front-end view of the app.
Note: When the admin selects the **Product in app** option, then the **Choose Product** field appears below the field.
 - In the **Choose Product** list, select the product to redirect the user to the selected product page.
 - **Category in app:** To redirect the user to the Category page available on the Front-end view of the app.
Note: When the admin selects the **Category in app** option, then the **Choose Category** field appears below the field.
 - In the **Choose Category** list, select the category to redirect the user to the selected category page.
 - **Website Page:** To redirect the user to the specific link provided.
Note: When the admin selects the **Website Page** option, then the **Static Link** field appears below the field.
 - In the **Static Link** box, enter the required link to redirect the user to that particular page.
10. Click the **Save Deal** button.
 The new deal is saved and the **New Deal** page is closed.

To edit the existing deal

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **Mobicconnect** menu, and then click **Add Deals**.
 The **Deal(s)** page appears as shown in the following figure:

The screenshot shows the 'Deal(s)' page in an admin interface. At the top right, there are icons for search, notifications, and a user profile labeled 'admin'. Below these is a large orange 'Add Deals' button. Underneath the button are 'Filters' and 'Columns' dropdown menus. A summary bar shows 'Actions' with a dropdown arrow, '3 records found', and pagination controls for '20 per page' and '1 of 1'. The main content is a table with the following data:

ID	Deal Name	Offer Text	Status	Action
1	Deal 1	offer 1	Enabled	Select
2	Deal 2	offer 2	Enabled	Edit
3	Deal Title	Upto 50% Off	Enabled	Delete

3. In the **Actions** column, click the arrow next to the **Select** link associated with the required deal, and then click **Edit**.
 The selected deal page appears for editing.
4. Make the required changes, and then click the **Save Deal** button.
 The changes made in the selected deal are saved and the page is closed.

To delete the existing deal

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **Mobicconnect** menu, and then click **Add Deals**.
The **Deal(s)** page appears as shown in the following figure:

3. In the **Actions** column, click the arrow next to the **Select** link associated with the required deal, and then click **Delete**.
A confirmation dialog box appears as shown in the following figure:

4. Click the **OK** button.
The selected deal is deleted and a success message appears.
Note : Admin can also delete the selected deal from the editing page.

2.6. Deal Groups

After creating the various deals, the admin can assign all the deals to the different deal groups.

Note: Until and unless the deal is assigned to any deal group, it is not available on the app home page.

Admin can perform the following tasks:

- Add Deal Groups(#AddDealGroups)
- Edit Deal Groups(#EditDealGroups)
- Delete Deal Groups(#DeleteDealGroups)

To add deal groups

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **Mobicconnect** menu, and then click **Add DealGroup**.
The **Deal Group(s)** page appears as shown in the following figure:

Notification1	Notification Sample Message Added.	Enabled	Select

- Click to select the required check box associated with the corresponding notification.
 - In the **Actions** list, select **Delete**.
A Confirmation dialog box appears.
 - Click the **OK** button.
The notification is deleted and a success message appears.
- Note** : Admin can also delete the selected deal group from the editing page.

2.8. Delete Device ID From the Device Listing Page

Admin can delete the device Id, which is not required, from the Device Listing Page.

To delete the device Id

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **Mobicconnect** menu, and then click **Send Notifications**.
The **Device Listing** page appears.

3. Follow one of the following steps:
 - In the **Action** column, click the arrow next to the Select link associated with the required deal, and then click **Delete**.
 - OR
 - Click to select the required check box associated with the corresponding device Id, and then in the **Actions** list, select **Delete**.
A Confirmation dialog box appears.
4. Click the **OK** button.
The notification is deleted and a success message appears.

2.9. Enable or Disable

Admin can enable or disable the following options from the respective pages:

- Banners
- Home Page Banners
- Deal Groups
- Deals
- Notifications

Note : This Guide covers the procedure of enabling or disabling the selected notification. Similarly, the admin can enable or disable the other listed options from the respective pages.

To enable or disable the selected notification

1. Go to the **Admin**
2. On the left navigation bar, click the **Mobicconnect** menu, and then click **Add Notifications**.

The **Notifications Listing** page appears as shown in the following figure:
