1. Overview

Founded in 1997 Overstock.com initially sold exclusively surplus and returned merchandise over online e-commerce marketplace platform, providing liquidation to the inventories of nearly 15 failed and unsuccessful companies, by retailing their product below-wholesale prices; furthermore, it expanded and started to sell new merchandise also. Overstock deals in bedding, home decor, furniture, and many other goods that are closeout as well as new merchandise.

CedCommerce Overstock-Magento Integration extension interacts with the Overstock Marketplace to integrate the synchronized product listing between Magento and the overstock.com retailers. It enables the admin to manage the Overstock orders on the vendor's Magento stores without making any significant changes to operational functionalities.

The merchant can create Overstock Categories and its dependent attributes on the Magento store. The process enables the merchant to configure the desired product category in the Magento store for automatic submission of the selected product to the same Category on overstock.com. Synchronizing orders, products, pricing, and inventory is possible through establishing the communication between Overstock APIs and the Overstock-Magento 1 Integration extension.

Key Features are as follows:

- **Profile-based product Upload:** Admin can create a profile and map the category and attributes to the Magento 2 category and attributes. Then, after assigning the products to the profile, the admin can easily upload products.
- **Synchronized Product Edit:** Whenever an already-uploaded product is edited on Magento 2 store, then it gets updated on Overstock by making use of the available feature. Products get updated individually as well in bulk.
- **Bulk Upload System:** The merchant has the flexibility to upload any number of products on overstock.com using bulk product upload feature.
- **Synchronized Inventory:** Auto synchronization of the inventory at regular intervals and the listing of the products along with all the details is established between Magento 2 and overstock.com.
- **Product Category Mapping:** Follows many-to-one category mapping philosophy. Admin can map many categories of the Magento 2 store to the single category of Overstock.
- **Low Stock Notifications:** Whenever Stock diminishes lower than threshold, notification is sent informing the status
- **Creation of Magento Orders:** The newly placed orders on overstock.com are automatically created in the Magento 2 store with all the required details as it is on overstock.com.
- **Rejected Products Notification:** If any product containing some invalid details is rejected by overstock.com, then its information is fetched from the automatically synchronized requests along with the error due to which it is rejected.
- **Shipment Automation:** Admin can automate the shipment process with Shipstation, Shipwork, Stamps.com, Linnworks, Xtento, ShipRush.

2. Overstock Integration Extension Installation

To install the extension:

1. Log in the **ftp**, and then go to Magento 2 root folder (generally present under the *public_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
 - a. Upload or Drag and Drop *app/code/Ced/Houzz* directory.
 - b. After successfully uploading the directory, the extension will be installed/upgraded.
 - c. Now run the following upgrade command in *cmd*
php bin/magento setup:upgrade.

3. Create Seller Account on Overstock.com

The admin has to create a seller account on the seller panel of the Overstock marketplace before starting the process of integration. The created username and password are used while setting up the configuration settings.

To create a seller account

1. Go to the <https://www.suppleroasis.com/Pages/UserRegistration.aspx> (<https://www.suppleroasis.com/Pages/UserRegistration.aspx>) link.

The page appears as shown in the following figure:

The screenshot shows the 'Supplier Oasis' registration page. At the top, the logo consists of three red circles of varying sizes to the left of the text 'Supplier Oasis' in a bold, sans-serif font, with 'an overstock.com company' in a smaller font below it. The main heading 'Create Your Account' is in a large, blue, sans-serif font. Below the heading are several input fields: 'Username' with a note '(Limit 20 characters)', 'First Name', 'Last Name', 'Company Name', 'Email Address', 'Phone Number' (with a placeholder '000-000-0000'), 'Password', and 'Repeat Password'. At the bottom, there are two buttons: a blue 'Create Account' button and a white 'Go Back' button. Below the buttons, there is a link: 'You can review our [privacy policy here](#)'.

2. Enter the values in the Username, password, and other required fields.
3. Click the **Create** button.
The account is created. After account creation, the account needs approval for further use.

4. Configuration Settings

Once the extension is successfully installed on the Merchant's store, the Overstock tab appears in the Magento Admin Panel.

The admin has to set up the configuration settings for establishing the connection between the Magento store and the overstock marketplace.

To set up the configuration settings in the Magento Admin panel:

1. Go to the **Admin** panel.
2. On the left navigation bar, you will find **Overstock Integration** option.

1. Click **Configuration**.

The **Overstock Configuration** page appears as shown in the following figure:

2. Click on **Overstock API settings**, you will find the following window:

5. Manage Overstock Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento attributes to the Overstock attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add new profile
- Edit the existing profile

- Delete the profile
- Submit Actions on the Overstock Profile Listing Page
- Product Manager

5.1. Add New Profile

To add a new profile

1. Go to the **Magento Admin** panel.
2. On the left navigation bar, click the **Overstock Integration** menu.
The menu appears as shown in the following figure:

3. Click the **Manage Profiles** menu.

The **Overstock Profile Listing** page appears as shown in the following figure:

4. Click the **Add New Profile** button.

The page appears as shown in the following figure:

Search

Overstock / Magento Attribute Mapping (Required/Optional mapping)

Overstock Attribute	Magento Catalog Attribute	Default Value
<input type="text" value="productId"/>	<input type="text" value="productId"/>	
<input type="text" value="productName"/>	<input type="text" value="productName"/>	
<input type="text" value="productVariationName"/>	<input type="text" value="productVariationName"/>	
<input type="text" value="vendorSku"/>	<input type="text" value="vendorSku"/>	

10. In the right panel, under **Category Mapping**, do the following steps:

- In the **Root Level Category**, select the preferred Overstock category that the admin wants to map.
- In the right panel, under **Overstock / Magento Attribute Mapping (Required/Optional mapping)**, do the following steps:
 - a. In the **Magento Catalog Attribute** column, select the required Magento attribute to map it with the corresponding Overstock attribute.
 - b. Repeat the mapping of all the required or optional Magento attributes listed with the corresponding Overstock attributes.

c. Click the **Add Attribute** button to add more attributes.

11. Click **Save and Continue Edit**.

12. In the left navigation panel, click the **Profile Products** menu. The page appears as shown in the following figure:

<input checked="" type="checkbox"/>	Product Id	Product Name	Type	Vendor Status	Attrib. Set Name	SKU	SKU
Yes	From To						From To USD

Since no products are assigned to the profile, there are no products listed in the table.

13. Click the **Reset Profile** button.

5.2. Edit the Existing Profile

To edit the existing profile

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, click the **Overstock Integration** menu. The menu appears as shown in the following figure:

3. Click the **Manage Profiles** menu.

The **Overstock Profile Listing** page appears as shown in the following figure:

The screenshot shows the 'Manage Profile' page. At the top right, there is a search icon, a notification bell with '56', and a user profile 'admin'. Below this is a header bar with an 'Add New Profile' button. The main content area contains a table with the following data:

ID	Profile Code	Profile Category	Profile Name	Status	Product Count	Action
1	overstock		overstock	Enabled	17	Select

Additional UI elements include a 'Filters' button, 'Default View' and 'Columns' dropdowns, an 'Actions' dropdown, and pagination controls showing '1 records found' and '20 per page'.

4. On this page, all the available profiles are listed.

5. Click the required row of the profile that the admin wants to edit. The **Edit Profile** page appears as shown in the following figure:

OR

In the **Action** column, click the arrow button, and then click **Edit Profile**.

The screenshot shows the 'New Profile' page. At the top right, there is a search icon, a notification bell with '56', and a user profile 'admin'. Below this is a header bar with buttons: 'Back', 'Delete', 'Reset', 'Save and Continue Edit', 'Save and Manage Product', and 'Save Profile'. The main content area is divided into two sections:

- PROFILE INFORMATION** (left sidebar):
 - Profile info
 - Mapping
 - Profile Products
- Profile Information** (main form):
 - Profile Code ***: (For internal use. Must be unique with no spaces)
 - Profile Name ***:
 - Profile Status ***: (Specific store view information of products will send to overstock)

6. Make the changes as per requirement.

7. Click the **Save** button.

The changes are saved and listed on the **Overstock Profile Listing** page.

Or

8. Click the **Save and Continue Edit** button to save the created profile and continue editing, if required.

Or

9. Click the **Save and Upload Product** button to save the profile and make ready to upload the product on Overstock.

The assigned products are listed on the **Product Manager** page.

5.3. Submit Actions on the Overstock Profile Listing Page

Admin can delete the selected profiles and also can change the status of the profiles in bulk.

To delete the selected profiles in Bulk

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, click the **Overstock Integration** menu.
The menu appears as shown in the following figure:

3. Click **Manage Profiles**.

The **Overstock Profile Listing** page appears as shown in the following figure:

4. On this page, all the available profiles are listed.
5. Click on the checkboxes of the profiles you want to delete.
6. On the Actions tab click on the drop down. Click on **Delete** in order to remove the profiles.

A pop up displays to confirm your choice. Select OK to Delete the profile.

To change the status of the selected profiles:

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, click the **Overstock Integration** menu.
The menu appears as shown in the following figure:

3. Click **Manage Profiles**.

The **Overstock Profile Listing** page appears as shown in the following figure:

4. On this page, all the available profiles are listed.

5. Click on the checkboxes of the profiles you want to change the status of.

6. On the Actions tab click on the drop down. Click on **Disable/Enable** in order to change status of the profiles. the profiles. When the status change is successfully performed a success message displays on the screen.

5.4. Delete the Profile

To delete the existing profile

1. Go to the **Magento Admin** panel.
2. On the left navigation bar, click the **Overstock** menu. The menu appears as shown in the following figure:

3. Click the **Manage Profiles** menu.
The **Overstock Profile Listing** page appears as shown in the following figure:

Click **OK** to confirm and the selected profile will be deleted.

5.5. Product Manager

On this page, admin can view, edit, and upload the individual product. Also, the admin can view the error message if any error exists in any product details. The admin can also submit certain actions on the selected products available on the **Product Manager** page.

Thus, on the Product Manager page, the user can perform the following three tasks:

- **Upload Single Product:** The user can upload the products that are listed on the **Product Manager** page, to the Overstock website.
- **View the Error Log:** If the product is invalid, then an **Invalid** button appears, and the admin can view the error log using the **Invalid** button.
- **Edit Product Information:** Edit the information of the product that the user wants to upload on the Overstock website.
- **Submit Actions:** The user can submit the respective action on the selected product before uploading it to the Overstock website.

To upload single product

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, click the **Overstock Integration** menu. Click on **Manage Profiles**. The following window will appear:

Manage Profile 🔍 56 👤 admin ▾

[Add New Profile](#)

2. Select the check box associated with the required product.

3. In the **Action** list, select the required action.

4. Click the **Submit** button.

6. Manage Product Feeds

After uploading the product on Overstock or after updating the product inventory, the user can check the products feed details on the **Overstock Feed Details** page.

To view product feeds details

1. Go to **Magento Admin Panel**.
2. On the **Overstock Integration** menu, click on **API Feeds**. you will see the page shown below:

Overstock Feeds admin

Sync Feeds

Actions 0 records found 20 per page 1 of 1

<input type="checkbox"/>	Feed id	Feed Status	Feed Type	Feed Records	Processed Records	Feed Date	Feed File	Feed Response	Actions
We couldn't find any records.									

3. The admin can

- view all the products feed details,
- check the error log of the feed, or
- delete the feed

3. To check the product feed details, click the **Error** button. The error log appears.

To delete the feed, do the following:

1. Select the checkboxes associated with the required feeds.
2. In the Actions list, select **Delete Feeds**.
3. Click the **Submit** button.
A confirmation dialog box appears. Click OK and confirm if you want to delete the feeds.

7. Overstock Orders

Admin can view the following details from the **View Overstock Orders** menu as shown in the following figure:

- View **Overstock Orders**
- View **Overstock Failed Orders**

7.1. View Overstock Orders

The user can fetch and view all the order details fetched from Overstock. Also, later on, can proceed further for shipment.

To view Overstock Orders

1. Go to **Magento Admin** panel.
2. Click the **Overstock Integration** menu, and then click **Overstock Orders View**.The menu appears as shown in the following figure:

Overstock Orders 🔍 📢 admin

4. In the left navigation menu, click **Overstock**. Fill in the required fields:

- **Shipping Provider:** Select a carrier from the drop-down menu.
- **Service Level Code:** Select the appropriate service level code from the drop-down menu provided.
- **Tracking Number:** Enter the tracking number for the shipment.
- **Ship Date:** Select the ship date from the calendar.

- **Quantity to Ship:** Enter the quantity of the product that has to be shipped.

5. Click the **Submit Shipment** button.

Notes:

1. Order **Shipment** is sent to Overstock.
2. Order **Invoice** and **Shipment** is created automatically in Magento.
3. Order **Status** changes to **Complete** on Overstock.
4. The **status** of order changes to **Completed** on Magento.

7.2. View Overstock Failed Orders

The users can view the list of failed Overstock orders on the **Failed Imported Orders** page.

Note: To clear all the failed import order logs at once, click the **Delete Orders** button.

Orders are not imported from Overstock due to the following conditions:

- If any product in the Overstock Order is Out of Stock in Magento.
- If any product in the Overstock Order is disabled in Magento.
- If any Product does not exist in Magento or is deleted from Magneto after uploading on Overstock.
- If the selected Payment Method in Overstock System Configuration Setting is not available in Magento.

To view, Overstock failed orders

1. Go to **Magento Admin Panel**.
2. On the **Overstock Integration** menu, click on **View Overstock Orders**, and then click **Failed Imported Orders**.

The **Failed Imported Orders** page appears as shown in the following figure. If there are any failed orders they would be displayed in this window.

To cancel Overstock failed orders

1. Go to the **Failed Imported Orders** page.
2. Select the check-boxes associated with the failed orders that the admin wants to cancel.
3. In the **Actions** list, select **Cancel Order**, and then click the **Submit** button.
A confirmation dialog box appears.
4. Click the **OK** button.
A success message appears.

To delete Overstock failed orders

1. Go to the **Failed Imported Orders** page.
2. Select the check-boxes associated with the failed orders that the admin wants to delete.
3. In the **Actions** list, select **Delete Order**, and then click the **Submit** button.
The order is deleted and a success message appears.

8. Overstock Cron

Overstock-Magento Integration, an extension developed by CedCommerce, is a one-stop integration that establishes a synchronization of inventory, price, other details for product creation and its management between Magento® store and Overstock with the help of Crons.

The user can view the following details:

- Sears Cron Details
- Cron Status

8.1. Overstock Cron Details

The **Cron Logs** page displays all the Cron details scheduled in Overstock.

To view the Overstock Cron details

1. Go to **Magento Admin Panel**.
2. On the **Overstock Integration** menu, click **Cron Logs**.
The **Cron Logs** page appears as shown in the following figure:
