1. Overview

The Walmart Marketplace is a kind of shopping website that offers significant discounts over other e-commerce Web sites such as eBay, Amazon. Walmart provides a rich set of APIs related to many other features such as sending product information, importing order, and refund generation.

Being a TRUSTED Walmart Partner, CedCommerce provides the best and flawless API Integration services. It provides an excellent support and an expert training to upload your Prestashop store products to Walmart through the **Walmart Prestashop Integration** extension.

This extension is an establishment of a real-time channel to feed product critical data directly to Walmart.com through API communication.

Hence, it helps the admin to bypass the complex procedure of uploading products on Walmart through CSV and affords the handy mechanism to upload products directly on Walmart with some simple steps directly from your Prestashop Store through APIs.

It synchronizes the inventory, price, and other details of the product and order management between the Prestashop store and Walmart.com.

It provides you an easy process of creating the Walmart Categories and its dependent attributes on the Prestashop store. It also enables you to establish a mapping of the desired product category on the Prestashop store for automatic submission of the selected product to the same category on Walmart.com.

Key features are as follows:

- User friendly Interface: Provides user friendly interface that delivers bulk management such as Product feed, Inventory feed, and Price feed.
- Order Management: Provides Automated order acknowledgement, Auto Reject order, and imports Walmart orders automatically and converts it into regular Prestashop Orders.
- **Inventory Synchronization:** Synchronizes product stock between the Prestashop store and the Walmart marketplace.
- Easy Product Listing: Provides Bulk product upload feature with synchronized product edits. It means, admin can upload the number of products through one-step process.
- **Synchronized Product Edits**: Product details altered in the Prestashop store causes the same changes in the corresponding products available on Walmart.com.
- Refund: Provides easily manageable refund creation process.
- **Promotion of Product**: Admin can create Promotional prices of product on walmart on festivals and different occassions. The prices can vary with percent or fixed amount on walmart from store.

2. Retrieve API Credentials from the Walmart Seller Account

The Prestashop store owner has to fill in the API credentials on the **Walmart Integration** page of the admin panel.

The user has to log in the Walmart Seller account to retrieve the following API credentials:

- Consumer Id
- Private Key

After retrieving the **Consumer Id** and the **Private Key**, the merchant has to copy all of them one by one from the Walmart Seller account and paste it one by one to the **Walmart Integration** page of the admin panel of the merchant.

To copy the API Credentials from the Walmart Seller account

- 1. Open the Walmart Seller account.
- 2. Click the Settings

icon.

The General Settings menu appears as shown in the following figure:

		‡ ?	* - ·
CarShoez	Manage Items @ Filter your items, make quick updates or download your entire catalog into an Excel template.	General Settings ⑦ Partner Profile Company Info

	Cancel Yes, Regenerate Key	Click here to generate Secret Key
-		

6. Click the **Yes**, **Regenerate Key** button. The key is generated. Copy the generated key.

3. Walmart Integration Configuration

After obtaining the **Consumer Id** and the **Private Key** from the Walmart Seller account, the Prestashop store owner has to paste them on the **Configure Walmart Integration** page of the admin panel of the merchant.

To Set up the Walmart Integration settings in the Prestashop Admin panel

- 1. Go to the **Prestashop Admin** panel.
- 2. On the left navigation bar, click the **Modules and Services** menu. The menu appears as shown in the following figure:

÷.	Modules and Services	Modules and Services
	Shipping	Modules & Themes Catalog
0	Localization	Positions
۶	Preferences	Payment

3. Click Modules and Services.

The List of modules page appears as shown in the following figure:

Modules and Services List of modules		C	O	0

- 6. Click the Yes button next to the Live mode field to use the module in the live mode.
- 7. In the **API URL** box, enter the API URL of Walmart Seller.
- 8. In the **CRON SECURE KEY** box, enter the configuration secure key.
- 9. Paste the corresponding values of the **CONSUMER ID**, **PRIVATE KEY**, and **CHANNEL TYPE ID** fields copied from the Walmart seller account.
- 10. Enter the required options or values in the following fields:
 - **CUSTOMER ORDER EMAIL**: Enter the email Id to intimate that the orders created in the store are imported from Walmart.
 - **CUSTOMER ID**: Enter the Customer Id to intimate that the orders created in the store are imported from Walmart.
 - Order Status: In the list, select the required Order Status while importing order.
 - Order status when Acknowledge: In the list, select the required Order Status after order acknowledgment.
 - Order status when Shipped: In the list, select the required Order Status after the order Shipment.
 - Order Carrier: In the list, select the required Order Carrier while importing order.
 - Order Payment: In the list, select the required Order Payment while importing order.
 - **Tax Code For All Products:** Enter 7 digit product tax code. For more information, see Walmart Tax Codes.
 - **Fullfillmentlag Time:** Enter the number of days to fulfill the inventory when the product is out of stock.
 - **PRICE VARIANT AMOUNT**: Enter the amount to vary on the basis of Increment or Decrement value.
 - Map All Category to Walmart Parent Category: Select the required root category.
 - Map All Category to Walmart Children Category: Select the required sub category.
- 11. Click the Yes or No button to enable or disable the corresponding features:
 - Auto Order Acknowledge/Reject: Enables to automatically acknowledge or reject the order based on fulfillment status.
 - Auto Sync Inventory and Price By Cron: Enables the auto synchronization of quantity and price of the products based on Cron settings.
 - **Remove Free Shipping**: Removes free shipping from walmart products.
 - **Update Price on Product Edit**: Updates product price on Walmart after the changes are made in the product price listed in the store.

- **Update Inventory on Product Edit**: Updates product quantity on walmart after the changes are made related to the product quantity avialable in the store.
- **Update Product Data on Product Edit**: Updates PRODUCT DATA on Walmart after the changes are made in the product data available in the store.
- Debug: Logs data while request sends on walmart.
- 12. Click the Save button.

4. Manage Walmart Category

The Prestashop store owner can perform the following tasks:

- Map the Walmart Categories to the Prestashop Categories
- View the Walmart Attributes and the Variant Attributes of the selected category
- Set the default value of the attribute of the selected mapped category for all products

To map the Walmart categories to the Prestashop categories

- 1. Go to the Prestashop Admin panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** menu, and then click **Walmart Category**.

The **Walmart Category** page appears as shown in the following figure:

Walmart Category	€ Help
Select Parent Category	

- 3. In the **Parent Category** list, select the required Walmart category.
 - All the sub-categories of the selected parent category appear on the page as shown in the following figure:

				Help
Name	Description	Level	Group	Туре
shortDescription	Overview of the key selling points of the item, marketing content, and highlights in paragraph form. For SEO purposes, repeat the product name and relevant keywords here.	Required	Basic	string
keyFeatures	Key features will appear as bulleted text on the item page and in search results. Key features help the user understand the benefits of the product with a simple and clean format. We highly recommended using three or more key features.	Recommended	Basic	
brand	Name, term, design or other feature that distinguishes one seller's product from those of others. This can be the name of the company associated with the product, but not always. If item does not have a brand, use "Unbranded".	Required	Basic	string
manufacturer	Manufacturer is the maker of the product. This is the name of the company that produces the product, not necessarily the brand name of the item. For some products, the manufacturer and the brand may be the same.	Optional	Basic	string
manufacturerPartNumber	MPN uniquely identifies the product to its manufacturer. For many products this will be identical to the model number. Some manufacturers distinguish part number from model number. Having this information allows customers to search for items on the site and informs product matching.	Optional	Basic	string
modelNumber	Model numbers allow manufacturers to keep track of each hardware device and identify or replace the proper part when needed. Model numbers are often found on the bottom, back, or side of a product. Having this information allows customers to search for items on the site and informs product matching.	Recommended	Basic	string
multipackQuantity	The number of identical, individually packaged-for-sale items. If an item does not contain other items, does not contain identical items, or if the items contained within cannot be solid individually, the value for this attribute should be "1." Examples: (1) A single bottle of 50 pills has a "Autipack Quantity" of "1." (2) A package containing two identical bottles of 50 pills has a "Autipack Quantity" of 2. (3) A bpack of soda bibelled for individual sale connected by pills basis frings has "Autipack Quantity" of "1." (4) A bpack of soda in a box whose cans are not marked for individual sale has a "Multipack Quantity" of "1." (5) A gift basket of 5 different items has a "Multipack Quantity" of "1."	Recommended	Basic	integer
count ^p erPack	The number of identical items inside each individual pack given by the "Multipack Quantity" attribute. Examples: (1) A single bottle of 50 pills has a "Court Per Pack" of "50." (2) A package containing two identical bottles of 50 pills has a "Court Per Pack" of 50. (3) A 6-pack of soda labelled for individual sale connected by plastic rings has a "Court Per Pack" of "1." (4) A 6-pack of soda in a box whose cans are not marked for individual sale has a "Court Per Pack" of "6." (5) A gift basket of 5 different items has a "Court Per Pack" of "1."	Recommended	Basic	integer
count	The total number of identical items in the package or box; a result of the multiplication of Multipack Quantity by Court Per Pack. Examples: (1) A single bottle of 50 pills has a "Total Court" of 10. (2) A package containing two identical bottles of 50 pills has a "Total Court" of 1.	Recommended	Basic	string
mainImageUrl	Main image of the item. Image URL must end in the file name. Image URL must be static and have no redirections. Preferred file type: JPEG Accepted file types: JPEG JPIKS GIF, BMP Recommended image resolution: 3000 > 3000 pixels at 300 ppi. Minimum image size requirements: Zoom capability: 2000 x 2000 pixels at 300 ppi. Non-zoom minimum: 500 x 500 pixels at 72 ppi. Maximum file size: 2 MB.	Required	Images	anyURI

Note: Admin can also view the attributes from **Walmart Attribute** page link available on the Walmart Integration menu.

3. To view the **Walmart Variant Attribute**, click the **variant Attribute** link associated with the sub required category.

The page appears as shown in the following figure:

Walmart Integ	art Option		() Help
Name	Description	Level	Type
flavor	The distinctive taste or flavor of the item, as provided by manufacturer. This is used for a wide variety of products, including food and beverages for both animals and humans. This may also apply to non-food items that come in flavors, including dental products, cigars and smoker wood chips.	Recommended	string
size	Overall dimensions of an item. Used only for products that do not already have a more specific 'x size' attribute, such as ring size or clothing size.	Recommended	string
countPerPack	The number of identical items inside each individual pack given by the "Multipack Quantity" attribute. Examples: (1) A single bottle of 50 pills has a "Count Per Pack" of "50." (2) A package containing two identical bottles of 50 pills has a "Count Per Pack" of "50." (3) A spack of soda labeled for individual safe connected by plastic intigs has a "Count Per Pack" of "1." (4) A S-pack of soda in a box whose cans are not marked for individual safe has a "Count Per Pack" of "50." (3) A package containing two identical bottles of 50 pills has a "Count Per Pack" of "50." (4) A S-pack of soda in a box whose cans are not marked for individual safe has a "Count Per Pack" of "50." (5) A pit basket of 5 different items has a "Count Per Pack" of "1."	Recommended	integer
count	The total number of identical items in the package or box; a result of the multiplication of Multipack Quantity by Count Per Pack. Examples: (1) A single bottle of 50 pills has a "Total Count" of 50. (2) A package containing two identical bottles of 50 pills has a "Total Count" of 100. (3) A gift basket of 5 different items has a "Total Count" of 1.	Recommended	string

Note: Also can view from **Walmart Option** page link available on the Walmart Integration menu.

To set the default value of the attribute of the selected mapped category for all products

- 1. Go to the Walmart Category page.
- 2. In the **Parent Category** list, select the required category.

All the sub-categories of the selected parent category appear on the page as shown in the following figure:

Walmart Integration / Walmart	t Category				
Walmart Categ	orv				
0					н

3. Select the check boxes associated with the required Products to enable or disable them at Walmart.

4. Click the **Bulk action** button.

- 5. To enable the selected products on the walmart.com, click the **Enable selection** button.
- 6. To retire the selected products from the walmart.com, click the **Disable selection** button.

7.1. Map Product Fields

The product field mapping feature enables the store admin to map the Store Product Field to the Walmart Field.

To map the Store Product Field to the Walmart Field

- 1. Go to the Prestashop Admin panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** menu, and then click **Map Product Fields**.

The Map Product Fields page appears as shown in the following figure:

Map Product Fields				
Store Option		Walmart Attribute		SAVE MAPPPING
Short Description	~	shortDescription	~	Remove
Name	~	productName	~	Remove
Meta Keyword	~	keywords	~	Remove
Manufacturere	~	manufacturer	~	Remove
Manufacturere	~	brand	~	Remove
Reference	~	sku	~	Remove
Weight	~	ShippingWeight	~	Remove
UPC	~	UPC	~	Remove
EAN13	~	EAN	~	Remove
				MAP ATTRIBUT

3. Click the **MAP ATTRIBUTE** button.

Both the Store Option list and Walmart Attribute list appear to select the respective store attributes and the Walmart attributes for the attribute mapping.

- 4. In the Store Option list, select the required store option (attribute) to map.
- 5. In the **Walmart Attribute** list, select the required Walmart attribute to map.
- 6. Repeat the procedure to map more attributes, if required.
- 7. Click the SAVE MAPPING button.

8. Manage Walmart Orders

The store admin can manage the orders from the Walmart Order page and can perform the following tasks:

- Fetch Orders from Walmart(#fetchorders)
- Acknowledge the order status on Walmart(#acknowledgeorders)

- View the Order details and ship the order(#vieworders)
- View the rejected orders(#rejectedorders)

To fetch the orders from Walmart

- 1. Go to the **Prestashop Admi**n panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** menu, and then click **Walmart Order**.

The Walmart Order page appears as shown in the following figure:

Walmart	ntegration / Walma	rt Order r							Fetch Order	? Help
WALMART	ORDER									
ID	Purchase Order ID	Reference	Delivery	Customer	Total	Payment	Status	Date		
21	1577914061094	KMRTINMTL	United States	J. DOE	\$21.91	Bank wire	Awaiting check payment	09/18/2017 10:28:34	Q View	•

3. In the top-right corner, click the **Fetch Order** button.

The new order is fetched from the Walmart Web site and listed in the Walmart Order grid. An order Id of the fetched order appears on the page.

To acknowledge the order status on Walmart

- 1. Go to the Prestashop Admin panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** menu, and then click **Walmart Order**.

The Walmart Order page appears such as shown in the following figure:

Walmart	Integration / Walma mart Orde	rt Order ľ							Fetch Order	? Help
WALMAR	ORDER									
21	1577914061094	KMRTINMTL	United States	J. DOE	\$21.91	Bank wire	Awaiting check payment	09/18/2017 10:28:34	Q View	

- 3. Scroll down to the required order.
- 4. In the row of the required order, click the Arrow button next to the View button.
- 5. Click **Acknowledge**. The order acknowledgement is updated on Walmart.

To view the Order details and ship the order

- 1. Go to the **Prestashop Admin** panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** menu, and then click **Walmart Order**.

The Walmart Order page appears as shown in the following figure:

Walmart	Integration / Walma mart Orde	rt Order							Fetch Order	? Help
WALMART	ORDER									
ID	Purchase Order ID	Reference	Delivery	Customer	Total	Payment	Status	Date		
21	1577914061094	KMRTINMTL	United States	J. DOE	\$21.91	Bank wire	Awaiting check payment	09/18/2017 10:28:34	Q View	•

3. Scroll down to the required order.

4. In the row of the required order, click the **View** button. The **Order Details** page appears such as shown in the following figure:

This is page where admin can view all the details of the order and also ship the order if required.

5. Scroll down to the **Order shippingInfo** section.

The page appears as shown in the following figure:

Order shippingInfo		
postalAddress		
Tracking Number		
Tracking URL		
Shipping Date Time		
Carrier Name	UPS	~
Method Code	Standard	~
SHIP		

- 6. In the Tracking Number box, enter the tracking number.
- 7. In the Tracking URL box, enter the tracking URL.
- 8. In the Shipping Date Time box, click the box to enter the required date of shipment.
- 9. In the **Carrier Name** list, select the required option.
- 10. In the Method Code list, select the required option.
- 11. Click the SHIP button.

A success message appears.

To view the rejected orders

- 1. Go to the **Prestashop Admi**n panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** menu, and then click **Rejected Order**.

The Rejected Order page appears as shown in the following figure:

Walmart Integration / Rejected Order Rejected Order			() Help

ID ▼▲ purchaseOrderId ▼▲	SKU 🔽 🔺	Reason 🔨	
			Q Search
1		MERCHANT SKU DOES NOT EXIST	Q View
2		MERCHANT SKU DOES NOT EXIST	Q View
3		MERCHANT SKU DOES NOT EXIST	Q View

A list of all the rejected orders appear.

3. To view the order details, click the **View** button.

9. Walmart Tax Codes

The store owner can view the tax codes. A tax code is a federal government document provided by the Internal Revenue Service and enforced on American citizens. Tax codes provide strict guidelines and the rules those have to meet in terms of taxation. The tax code is used as a source by tax lawyers who bear the responsibility of interpreting it for the public.

Admin can also view the available Tax Codes while configuring the Walmart Integration settings.

To view the Tax Codes

- 1. Go to the **Prestashop Admin** panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** menu, and then click **Walmart Tax Codes**.

The Walmart Tax Codes page appears as shown in the following figure:

10. Walmart Feed

After uploading the product on Walmart or after updating the product inventory or the product price, the user can check the status of the feed and sync the selected feeds or all the feeds from the **Walmart Feed** page.

To view product feeds status

- 1. Go to the **Prestashop Admin** panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** tab, and then click **Walmart Feed**.

The Walmart Feed page appears as shown in the following figure:

Walmart Integration / Walmart Feed									-
Walmart Feed								G	?
								Fetch Feed	Hel
WALMART FEED 2								02>	100

- 3. Do the following tasks if required:
 - View the status of the feed in the **feedStatus** column.
 - To synchronize the feeds between Walmart and Prestashop, click the **Fetch Feed** button. The feed is fetched and a success message appears.
- 4. To update the feed status, click the **Update** button that appears in the row of the required Feed Id. The feed is updated and a success message appears.

11. Walmart Refund

If a front-end user returns the product or order directly to the store admin without the involvement of walmart.com, then the store admin has to send a request on walmart.com for completing this type of return.

To complete this type of return the store admin has to generate a new refund.

To generate a refund

- 1. Go to the **Prestashop Admin** panel.
- 2. On the top navigation bar, move the cursor over the **Walmart Integration menu**, and then click **Walmart Refund**.

The Walmart Refund page appears as shown in the following figure:

Walmart Integr Walma	ation / Walmart Refun	ld			Add Refund Help
WALMART REFU	IND 1				022

- 6. In the **refundComments** box, enter the comment if required.
- 7. In the refundReasons list, select the required reason for refund.
- 8. Click the **CREATE REFUND** button.

12. Walmart Promotion

The promotion that supplements or coordinates product advertising, generating sales, and creating brand loyalty. With this Promotion feature, store owners can promote their products on Walmart through adding some promotional offers.

To add a promotion

- 1. Go to the Prestashop Admin panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** menu, and then click **Walmart Promotion**.

The Walmart Promotion page appears as shown in the following figure:

Walmart	Integration / Walmart Promotion						
Walı	mart Promotion					O	0
						Add Promotion	Help
-							
WALMART	PROMOTION						
ID	Product ID	reference	Offer Price	processMode	current Price Type		.

- 4. In the SKU box, enter the SKU of the required product to add a promotion on Walmart for it.
- 5. In the Replace All list, select one of the following options:
 - Yes: Replaces all the previous promotional offers with the current one.
 - No: Retains all the previous promotional offers.
- 6. In the Process Mode list, select one of the following options:
 - ADD: Adds the promotional offer on Walmart.
 - **DELETE**: Removes the promotional offer from Walmart.
- 7. In the **comparisonPrice** box, enter the required value.
- 8. In the **currentPrice** box, enter the current price of the product.
- 9. In the CurrentPriceType list, select one of the following options:
 - CLEARANCE: Clearance sales offer customers a way to access the products at a lower price point. Adds a Clearance badge, the price (the actual sale price), and a comparison price on the item page.
 - **Reduced**: Works the same as clearance, but with a Reduced badge on the Product page.
- 10. In the effectiveDate box, click to select the required date from the calendar.
 - It is the date from the offer starts.
- 11. In the **expirationDate** box, click to select the required date from the calendar. It is the date by when the offer ends.
- 12. Click the Save button.

To edit the promotion offer

- 1. Go to the **Prestashop Admin** panel.
- 2. On the left navigation bar, move the cursor over the **Walmart Integration** menu, and then click **Walmart Promotion**.

The Walmart Promotion page appears as shown in the following figure:
