1. Overview

Catch Integration for the Magento® 2 Stores enables the admin to manage the Catch orders in their Magento® 2 stores without making any significant changes to the operational functionalities.

The Magento® 2 store owners can get integrated their Magento® 2 stores with the Catch marketplace with the help of CedCommerce and provide more benefits to the seller of your store and thus increase the sale of your business.

Admin gets the authority to create Catch Categories and the dependent attributes on the Magento® 2 store. It also enables the store owners to establish a mapping of the desired product category on the Magento® 2 stores for automatic submission of the selected product to the same category on the Catch marketplace.

Catch Integration is an amazing API integration that helps Magento® 2 store owners to synchronize inventory, price, and other product details for product creation and management between Magento® 2 stores and the Catch marketplace.

Hence, this extension interacts with the Catch Marketplace to integrate the synchronized product listing between Magento® 2 store and the Catch retailers.

Key Features of Catch Integration Extension by CedCommerce:

- **Real-Time Synchronization of Inventory and Price:** Auto synchronization of the inventory and Price at regular intervals and product listings along with all the details is established between Magento® 2 store and Cdiscount.com.
- **Crons:** Cron job automates the process for Inventory, Price, and Order management.
- **Notifications:** Whenever a new order is fetched from Catch, or whenever Stock diminishes lower than the threshold, or If any product containing some invalid details is rejected by Catch, then the admin receives the corresponding notifications.
- **Automated Shipment Process:** Admin can automate the shipment process with Shipstation, Shipwork, Stamps.com, Linnworks, Xtento, Shiprush.
- **Auto Acknowledgement of Order:** Admin receives an acknowledgment of Orders automatically as soon as orders are created.
- **Bulk Upload System:** Admin has the flexibility to upload any number of products on Catch using the bulk product upload feature.
- **Profile Based Products Upload:** Enables the admin to create a profile based on single category and then assign the products to the profile to automate the product upload.
- **Product Category Mapping:** Follows many-to-one category mapping philosophy. Admin can map many categories of the Magento® 2 stores to the single category of Catch.
- **Creation of Magento 2 Store Orders:** The newly placed orders on Catch are automatically created in the Magento® 2 store with all the required details as it is on Catch.
- **Low Stock Notifications:** Whenever the stock diminishes lower than the threshold, a notification is sent informing the status of the same.
- **New Order Notifications:** Whenever a new order is fetched from Cdiscount.com, the admin receives a notification.
- **Rejected products notification:** If any product containing some invalid details is rejected, then its information is fetched from the auto synchronization request along with the error due to which it is rejected.

2. Catch Magento 2 Store Integration Extension Installation

To install the extension

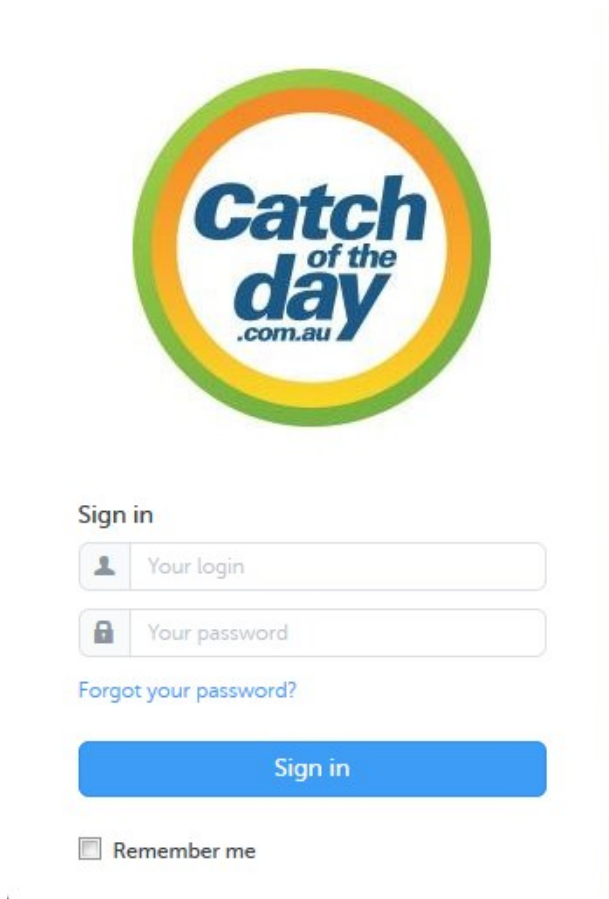

1. Log in the **ftp**, and then go to Magento 2 root folder (generally present under the *public_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
 - a. Upload or Drag and Drop *app/code/Ced/Catch* directory.
 - b. After successfully uploading the directory, the extension will be installed or upgraded.
 - c. Now run the following upgrade command in *cmd*
php bin/magento setup:upgrade.

3. Retrieve API Credentials from the Catch Seller Account

Once the extension is successfully installed in the Magento 2 store, the **CATCH INTEGRATION** menu appears on the left navigation bar of the Admin Panel. The store owner has to fill out the retrieved the **API Key** value in the respective field displayed on the **Catch Configuration** page of the admin panel.

To retrieve the API Key from the Catch Seller Account

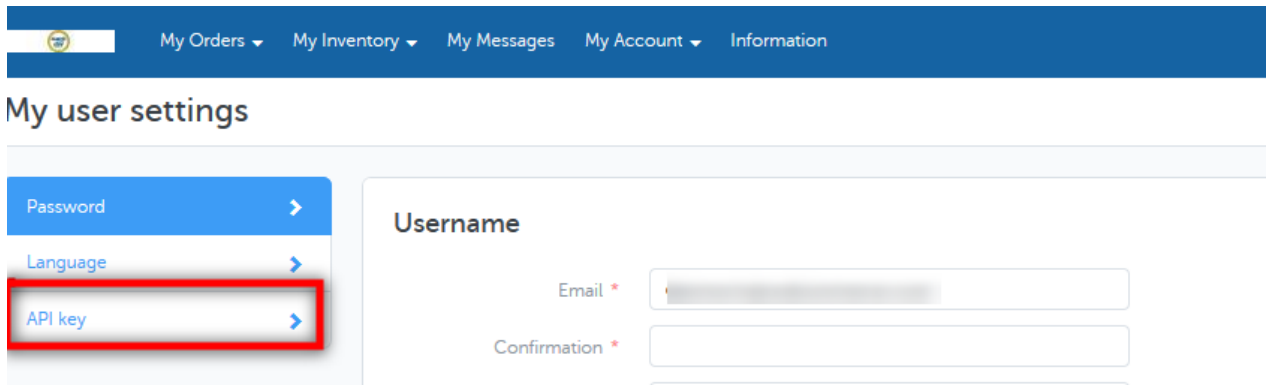

1. Go to the <https://catch-dev.mirakl.net>(<https://catch-dev.mirakl.net>) link.
The Login page appears as shown in the following figure:

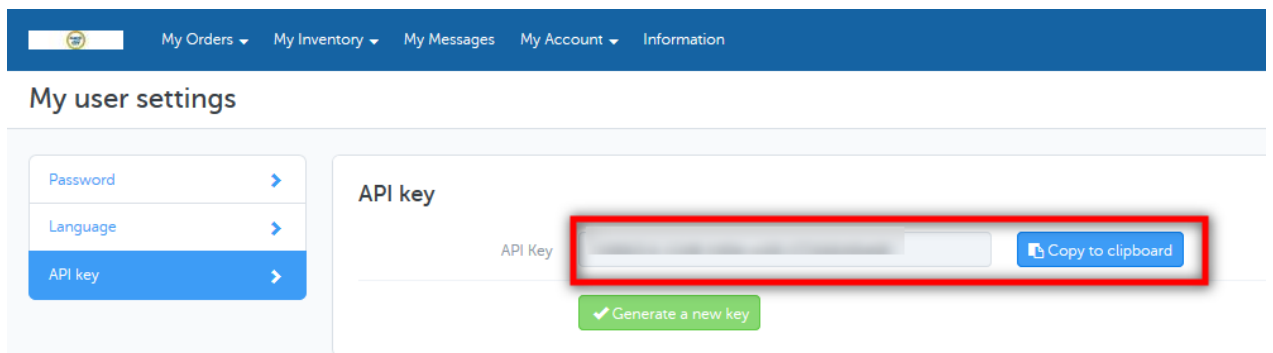

2. Enter the login credentials, and then click the **Sign In** button.
The page appears as shown in the following figure:

- Click the username as highlighted in the figure.
The page appears as shown in the following figure:

- In the left navigation panel, click the **API Key** menu.
The **API Key** value appears in the right panel as shown in the following figure:

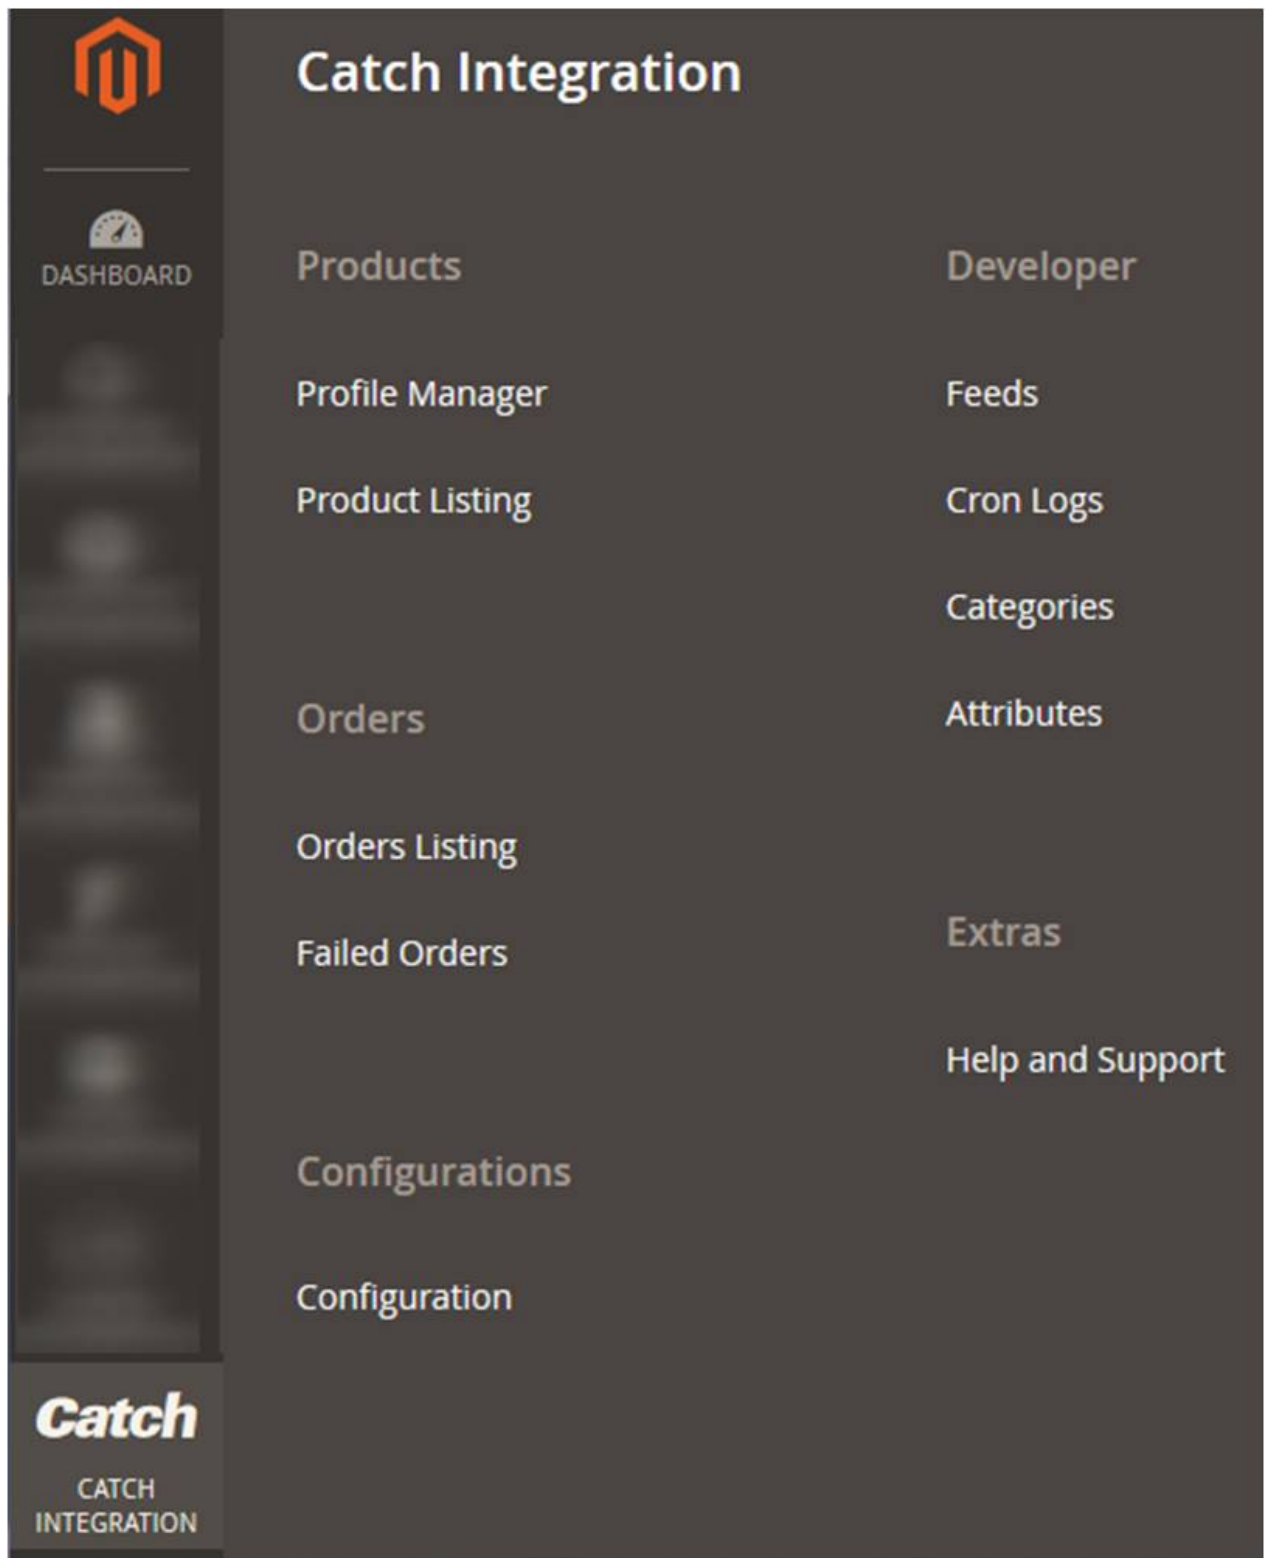

- Click the **Copy to clipboard** button to copy the API key value.
- Save the corresponding value in some text editor or the in Word file to use it later on while setting up the configuration in the Magento 2 store admin panel.

4. Catch Configuration Settings

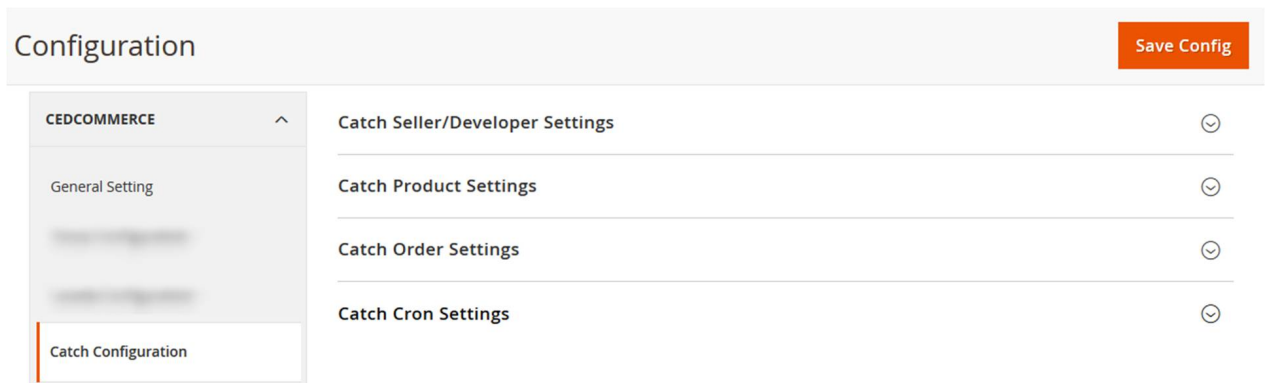

Once the extension is successfully installed in the Magento 2 store, the **CATCH INTEGRATION** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the Catch seller panel. Once the seller account is created and is approved by Catch, the Magento 2 store owners have to obtain the API Key value from the Catch Seller account, and then the Magento® 2 store owners have to paste it in the respective field displayed on the **Catch Configuration** page of the admin panel.

To set up the configuration settings in the Magento 2 Admin panel

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Configuration**.
The Configuration page appears as shown in the following figure:

4. In the right panel, click the **Catch Seller/Developer Settings** tab.
The **Catch Seller/Developer Settings** tab is expanded and the relevant fields appear as shown in the following figure:

Catch Seller/Developer Settings

Enabled <small>[global]</small>	Yes	▼
Version <small>[store view]</small>	1.0	
Mode <small>[global]</small>	Sandbox	▼
Default Service Url <small>[global]</small>	Sandbox API URL	▼
Api Key <small>[global]</small>	[REDACTED]	
Select Store <small>[global]</small>	Default Store View	▼
Product Reference Type <small>[global]</small>	EAN	▼
Product Reference Value <small>[global]</small>	EAN	▼

5. Under **Catch Seller/Developer Settings**, do the following steps:
- In the **Enabled** list, select the **Yes** option.
 - In the **Mode** list, select the **Sandbox** option.
 - In the **Default Service Url** list, select the **Sandbox API URL** option.
 - In the **Api Key** box, enter the **API Key value** copied from the Catch seller account.
 - In the **Select Store** list, select the required store.
 - In the **Product Reference Type** list, select the required option.
 - In the **Product Reference Value** list, select the corresponding value.

6. Click the **Save Config** button to save the entered values.
7. Scroll down to the **Catch Product Settings** tab, and then click the tab.
The **Catch Product Settings** tab is expanded and the expanded section appears as shown in the following figure:

8. Under **Catch Products Settings**, do the following steps:
 - a. Click the **Catch Price Settings** tab.
The **Catch Price Settings** tab is expanded and the section appears as shown in the following figure:

⌵ **Catch Price Settings**

- b. Under **Catch Price Settings**, do the following step:
 - i. In the **Product Price** list, select one of the following options:
 - Increase by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.
 - Increase by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.
 Enter the numeric value to increase the price of the **Catch**, product price by the entered value % of Magento 2 price.

⌵ **Catch Price Settings**

For Example,
 Magento 2 price + 5% of Magento 2 price.
 Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

Modify by Percentage Price = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Catch Product Price = 105

Decrease by Fixed Price: If selected, then the **Modify by Fix Price** field appears.

Decrease by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the **Catch** product price by the entered value % of Magento 2 price

For Example,

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

Modify by Fix Price = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Catch Product Price = 95

- ii. Click the **Catch Inventory Settings** tab.

The **Catch Inventory Settings** tab is expanded and the section appears as shown in the following figure:

⊖ Catch Inventory Settings

Set Inventory on Basis of Threshold [global]

Disable

Choose yes to send inventory on mpcatch by condition

- iii. Under **Catch Inventory Settings** tab, do the following steps:

- i. In the **Set Inventory on Basis of Threshold** list, select the **Enable** option if required to set the inventory based on a threshold.

Note: Only when the admin selects **Enable**, the other fields appear. Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock.

The section appears as shown in the following figure:

- ii. In the **Inventory Threshold Value** box, enter the required value.
 iii. In the **Send Inventory for Lesser Than Threshold Case** box, enter the required value.
 iv. In the **Send Inventory for Greater Than Threshold Case** box, enter the required value.

9. Click the **Save Config** button to save the entered values.

10. Scroll down to the **Catch Order Settings** tab, and then click the tab.

The tab is expanded and the section appears as shown in the following figure:

Catch Order Settings

Catch Order Id Prefix [global]
Prefix for Catch Increment ID

Order Notification Email [global]

Auto Cancel Order [global] ▲

Enable Default Customer [global] ▼

11. Under **Catch Order Settings**, do the following steps:
 - a. In the **Catch Order Id Prefix** box, enter the required order Id prefix.
 - b. In the **Order Notification Email** box, enter the required email Id.
 - c. In the **Enable Default Customer** list, select the **Yes** option to enable the default customer.
The field appears as shown in the following figure:
 - d. In the **Default Customer** list, select the required customer name.

Default Customer [global] ▲

12. Click the **Save Config** button to save the entered values.
13. Scroll down to the **Catch Cron Settings** tab, and then click the tab.
The tab is expanded and the section appears as shown in the following figure:

Catch Order Settings

Catch Order Id Prefix [global]
Prefix for Catch Increment ID

Order Notification Email [global]

Auto Cancel Order [global] ▲

Enable Default Customer [global] ▼

14. Under **Catch Cron Settings**, do the following steps:
 - a. In the **Order Cron** list, select the **Enable** option to enable the fetch order cron.
 - b. In the **Inventory |Price Cron** list, select the **Enable** option to enable the Inventory & Price Sync cron.
15. Click the **Save Config** button to save the entered values.

5. Manage Catch Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 attributes to the Catch attributes. These attributes are applicable to all the products that are assigned to the profile.

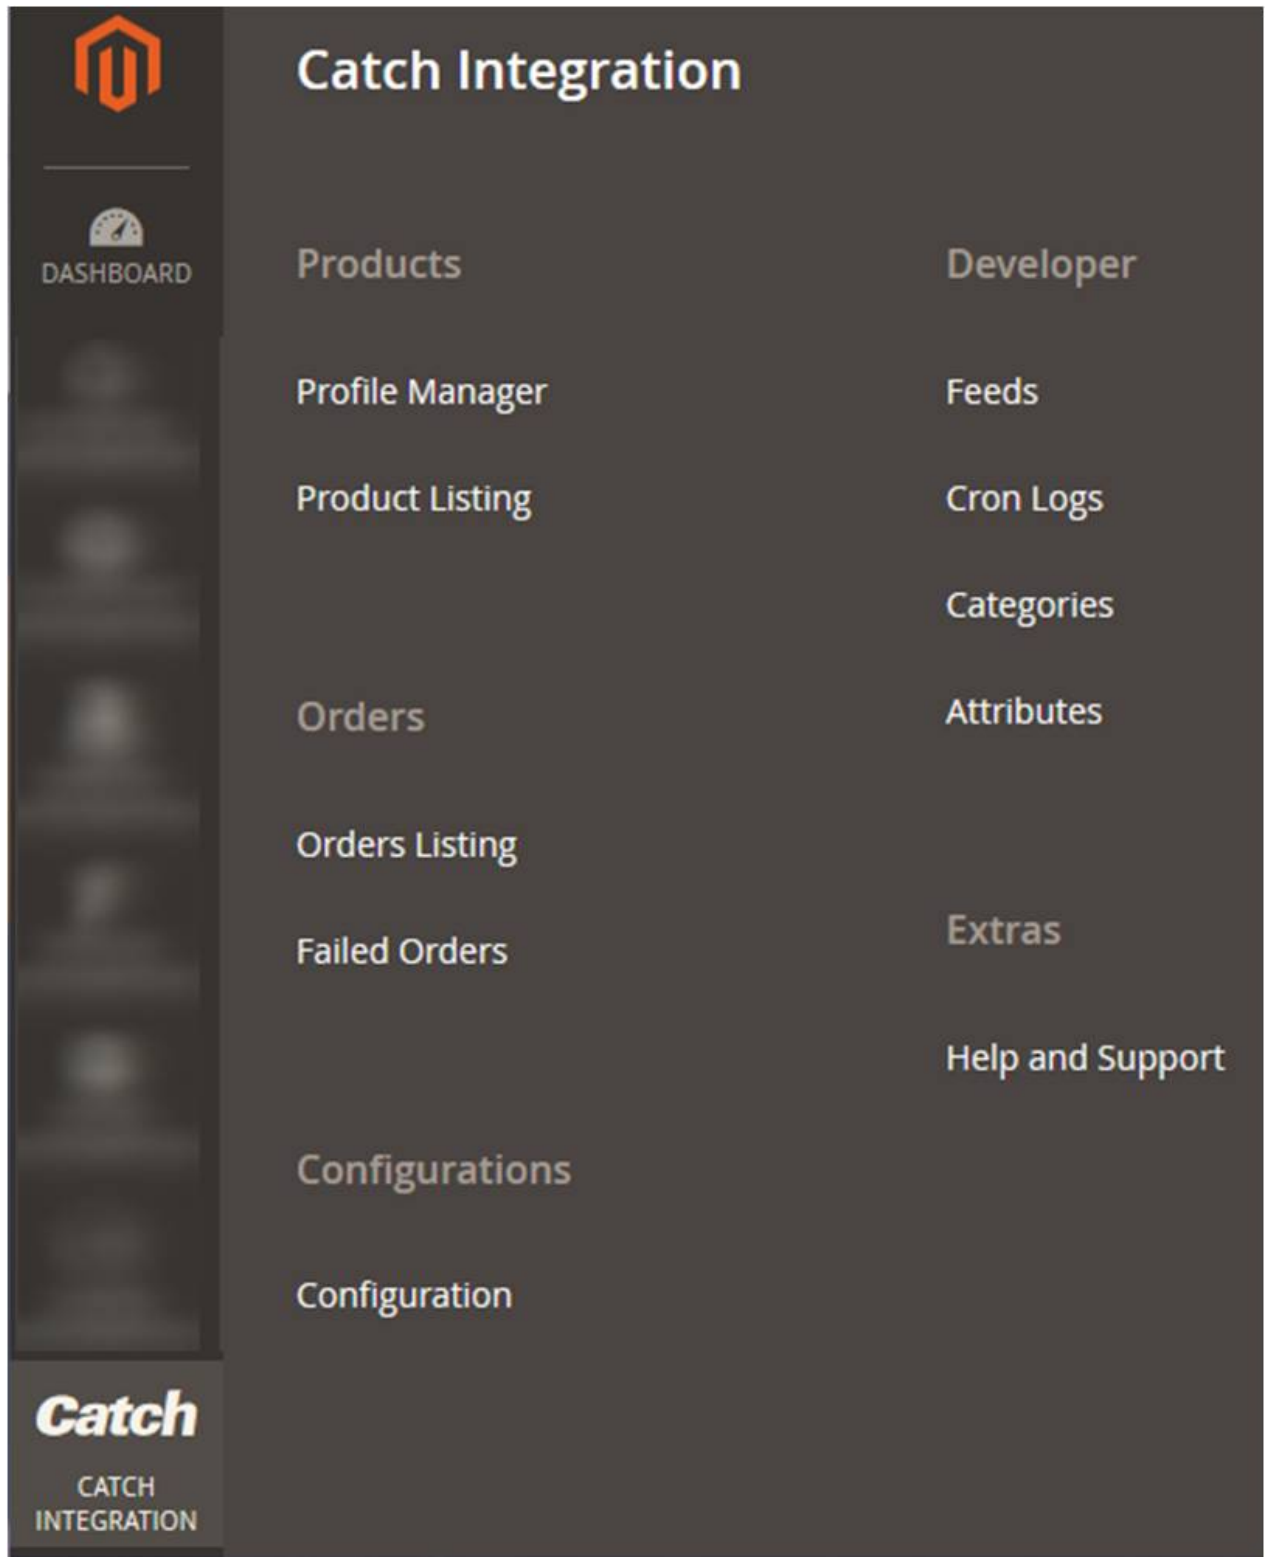

Admin can do the following tasks:

- Add new profile(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=add-a-new-profile-28>)
- Edit the existing profile(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=edit-the-existing-profile-38>)
- Bulk Action on the Selected Profiles(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=submit-bulk-action-on-the-selected-profiles-6>)

5.1. Add a New Profile

To add a new profile

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.
A menu appears as shown in the following figure:

3. Click **Profile Manager**.

The **Manage Profile** page appears as shown in the following figure:

4. Scroll down to the required product row.

5. In the **Action** column of the respective row, click the **Validate**

icon.

If the product is validated successfully and a success message appears on the top of the page.

If there is an error, then an **INVALID** button appears in the Validation column of the respective product row.

6. To view the cause of product invalidation, click the respective **INVALID** button.

A dialog box appears as shown in the following figure, which displays the errors related to the product.

Sl. No.	SKU	Errors
24-MB02	24-MB02	brand : Required attribute empty or not mapped. [brand]

7. Correct the issues and then again click the **Validate** icon to validate the product.

6.4. Submit Bulk Action on the Selected Products

Admin can perform the following tasks through the Bulk Action feature:

- **Validate Product:** To validate the selected products before uploading to the Catch website. It displays the

corresponding validation error if any. If there is no error, it confirms that the product is ready to upload.

- **Upload Products:** To validate and upload the selected products to the Catch website. It displays the corresponding validation error if any. If there is no error, then the selected products are validated and uploaded, and a success message appears.
- **Update Inventory & Price:** To update the inventory and price of the selected products on Catch. This action completes the entire job related to the product inventory and also it manages the quantity related issues. *For example*, if the user has changed the product price on the Magento 2 store and also wants to change the price on Catch then this action is applicable. The price is updated when the user submits this action for the selected product.

To submit the selected bulk action on the selected products

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Product Listing**.

The **Catch Product Listing** page appears as shown in the following figure:

A confirmation dialog box appears.

d. Click the **OK** button.

The selected products inventories and prices updating process is executed and the page appears as shown in the following figure:

The prices and the inventories of the selected products are updated on the Catch website.

e. Click the **Back** button to go back to the **CatchProduct Listing** page.

7. Manage Catch Orders

Admin can do the following tasks while managing the Catch orders:

- Fetch, View, Ship, and delete the Catch Orders(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=ship-and-delete-the-cdiscount-orders-2>)
- View and delete the Failed Orders(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=view-and-delete-the-failed-orders-4>)

7.1. Ship and Delete the Cdiscount Orders

The Magento 2 store owners can fetch the new orders and view all the order details fetched from Catch. They can also ship the required orders and can delete the orders those are no more required.

To fetch and view new orders

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Order Listing**.
The **Catch Order List** page appears as shown in the following figure:

<input type="checkbox"/>	CATCH--000000016	C17026331-A	2018-03-11	Accepted	 

4. Click the **Fetch Catch Orders** button.

If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.

Notes:

- Orders are automatically imported through CRON in every 10 minutes.
- Whenever the latest orders are imported from Catch, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento 2 store admin panel.
- If no Order is imported, then check the Failed orders listed on the **Catch Failed Order** page.
- Order are auto-rejected on Catch in the following conditions:
 - When Catch Product SKU does not exist in Magento 2 store.
 - When Product is Out of Stock in Magento 2 store.
 - When a product is disabled in Magento 2 store.

To ship the Catch order

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu, and then click **Order Listing**.
The **Catch Order List** page appears as shown in the following figure:

3. To delete the single order, do the following steps:
 - a. Scroll down to the order row no more required.
 - b. In the **Action** column of the respective row, click the **Delete** icon.
A confirmation dialog box appears.
 - c. Click the **OK** button.
The order is deleted from the Catch Marketplace.
4. To delete the selected Catch orders in bulk, do the following steps:
 - a. Select the check boxes associated with the orders those are no more required.
 - b. Click the **Arrow** button next to the **Actions** list.
A menu appears as shown in the following figure:

- c. Click **Delete Order(s)**.
A confirmation dialog box appears.
- d. Click the **OK** button.
The selected orders are deleted from the Catch Marketplace.

7.2. View and Delete the Failed Orders

The users can view the list of failed Catch orders on the Catch Failed Orders page.

In the following conditions, Orders are not imported from Catch:

- If any product in the Catch Order is Out of Stock in the Magento 2 store.
- If any product in the Catch Order is disabled in the Magento 2 store.
- If any Product does not exist in Magento 2 store or is deleted from the Magneto 2 store after uploading on Catch.
- If the selected Payment Method in Catch System Configuration Setting is not available in the Magento 2 store.

To view Catch failed orders

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Failed Orders**.

The **CatchFailed Order** page appears as shown in the following figure:
