1. Overview

Catch is one of Australia's leading e-commerce marketplaces, with an exceptional growth record that has seen its two core brands become household brands over the past 10 years.

Catch has been successful in giving its customers innovative shopping experiences regularly. As a result, more and more people turn to this ecommerce platform to purchase their favorite products. This commitment has made its two major brands – Catch and Scoopon highly lucrative in every year of operation.

By building accomplishing relationships with suppliers, developing a world class IT platform and investing in their supply chain, Catch has invariably delivered results in a competitive marketplace.

Catch Integration offers Management of your products on a centralized platform, wherein you can easily list your products on Catch directly from existing Magento marketplace. Management of inventory and price is synchronous and gets updated followed by any activity. Furthermore, tracking and order fulfillment can be achieved through CedCommerce integration.

Integration also offers management of inventory, with greater flexibility, providing you with several ways to manage it at discrete levels with Catch.com.au. Order cancellations from the customer's end are retrieved simultaneously to cancel the order ensuring that you don't ship items that were canceled.

Key Features of Catch Integration Extension by CedCommerce:

- **Stock Update:** Stocks are updated automatically on both ends as stock status updated in your local shop or as an order is marked shipped by Catch.
- **Catch Order Management:** The orders can be easily acknowledged or canceled through centralized order management system.
- **Profile-based product upload:** It allows the admin to upload their product to profile based on Catch Marketplace.
- **Synchronization:** Auto synchronization of the product listing, order, inventory, return and refund, and pricing at regular intervals is established between Magento and Catch.com.
- **Bulk Upload System:** Bulk product upload service from cedcommerce is your ultimate solution to be spared from hassles of operational overload in product uploading.
- **Notification Errors:** If any error occurs, there is a feed error feature helping you to know what the error is.
- **Cons:** Crons automate the process of Price, Inventory and Order management.
- **Rejected Products Notification:** If any product containing some invalid details is rejected, then its information is fetched from the automatically synchronized requests along with the error due to which it is rejected.
- **Return And Refunds:** Refunds are processed back to the original payment method used to purchase the order. Refund is also possible through extension.

2. Catch Integration Extension Installation

To begin with, the installation of the extension follow the given steps:

1. Go to the **Magento Admin Panel**.
2. On the top, you will find a navigation bar. Point to the **System** menu. You will see a drop-down menu like this,

3. Point to the **Magento Connect** menu, and then click on **Magento Connect Manager**.
The page then appears as shown in the following figure:

The screenshot shows the Magento Connect Manager interface. At the top, there's a header with the logo and navigation links for 'Extensions' and 'Settings'. Below this, the 'Settings' section is active, showing options to put the store on maintenance mode and create a backup. The 'Install New Extensions' section follows, with instructions to search via Magento Connect or paste an extension key. Below that is the 'Direct package file upload' section with a file upload button. The 'Manage Existing Extensions' section is at the bottom, showing a table of installed extensions and a 'Commit Changes' button.

Settings

☒ Put store on the maintenance mode while installing/upgrading/backup creation

☐ Create Backup Database

Install New Extensions

1 Search for modules via [Magento Connect](#).

2 Paste extension key to install: **Install**

Direct package file upload

1 Download or build package file.

2 Upload package file: **Browse...** No file selected. **Upload**

Manage Existing Extensions **Check for Upgrades**

Channel: **Magento Community Edition** **Commit Changes**

Clear all sessions after successfull install or upgrade: ☐

Package Name	Installed	Actions	Summary
Cm_RedisSession	1.9.2.4 (stable)	<input type="text"/>	Redis session
Interface_Adminhtml_Default	1.9.2.4 (stable)	<input type="text"/>	Default interface for Adminhtml
Interface_Frontend_Base_Default	1.9.2.4 (stable)	<input type="text"/>	This is a Magento themes base
Interface_Frontend_Default	1.9.2.4 (stable)	<input type="text"/>	Default interface for Frontend

4.Scroll down to the **Catch_Integration** Package.

5.In the **Actions** column, select the **Install** option from the list.

6.Click the **Commit Changes** button.

7.Auto-scroll console contents screen appears and the extension is installed after the process.

3. Catch Configuration Settings

After obtaining the **API credentials** from the Catch Seller account, the Magento store owner has to paste them in the respective fields displayed on the **Catch Configuration** page of the admin panel.

To set up the configuration settings in the Magento Admin panel

- Go to the **Magento Admin** panel.

- On the top navigation bar, point to the **Catch** menu.
The menu appears as shown in the following figure:

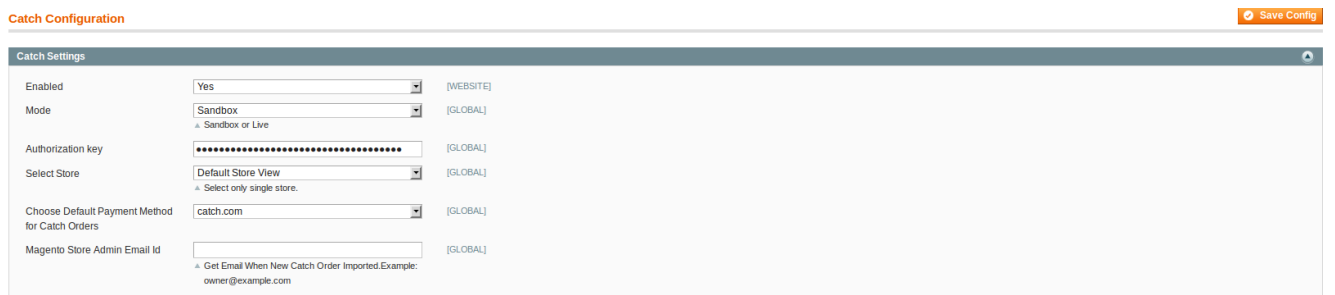

Click **Configuration**.

The Catch **Configuration** page appears as shown in the following figure:

Click the **Catch Settings** tab.

The tab is expanded and the relevant field appears under the **Catch Settings** section.

Under **Catch Settings**, do the following steps:

- In the **Enabled** list, select **Yes** to enable the extension features.
- In the **Mode** field, select **Live/Sandbox** to start Catch Integration in the live mode or debug mode.
It captures the log for the debug process.
- In the **Authorisation key**, enter the key that you are provided by Catch once you register yourself with its seller panel.
- In the **Select Store**, choose the store from where you want your products to be integrated on Catch marketplace.
- In the **Choose Default Payment Method for Catch Orders** list, select **catch.com**.

- In the **Magento Store Admin Email Id** box, enter the email Id on which you want to receive a mail whenever an order is placed for your product, on Catch.
- Click on **Save Config** to save the details that you have entered.

Click the **Catch Product Settings** tab.

The tab is expanded and the relevant fields appear under the **Catch Product Settings** section as shown in the following figure:

- Under **Catch Product Settings**, do the following steps:
 - In the **UPC Alternate Attribute** list, select **alternate Magento Attribute** for catch product UPC.
 - In the **Item ID Alternate Attribute** select an alternate Magento attribute for catch product item id.

Next, click on **Product Price Settings** and you'll come across the following:

From the drop down menu here, you may come across many options that are discussed below:

- **Increase by Fixed Price:**

If selected, then the **Enter Amount** field appears as below:

If you enter a particular amount here, your product will be featured on Catch by adding that amount to the amount of your product on your own store. For example, if you enter 10 here and your product on Magento is for 100, your product will be featured on Catch with the price of 110.

- **Increase by Fixed Percentage:** If selected, then the **Enter Percentage** field appears as below:

Enter the numeric value to increase the price of the Catch product price by the entered value % of Magento price
For Example: Magento price + 5% of Magento price.

Magento Price = 100

Select **Increase By Fixed Percentage** option

Enter Percentage = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Catch Product Price = 105

- **Decrease by Fixed Price:** If selected, then the **Enter Amount** field appears as below:

Catch Product Price Settings

Catch Product Price: Decrease By Fixed Price [GLOBAL]
▲ Select to send different product price to catch.com

Enter Amount: [] [GLOBAL]

If you enter a particular amount here, your product will be featured on Catch by decreasing that amount from the amount of your product on your own store. For example, if you enter 10 here and your product on Magento is for 100, your product will be featured on Catch with the price of 90.

- **Decrease by Fixed Percentage:** If selected, then the **Enter Percentage** field appears as below:

Catch Product Price Settings

Catch Product Price: Decrease By Fixed Percentage [GLOBAL]
▲ Select to send different product price to catch.com

Enter Percentage: [] [GLOBAL]
▲ Numeric value Required for Add % on Magento price
 5 for Example: Magento price + 5% of Magento price.
 Off % on Magento price
 5 for Example: 5% off on Magento price.

Enter the numeric value to decrease the price of the the Catch product price by the entered value % of Magento price

For Example: Magento price – 5% of Magento price.

Magento Price = 100

Select **Decrease By Fixed Percentage** option

Enter Percentage = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Catch Product Price = 95

Click **Cron Settings** tab to view the following fields.

Cron Settings

Cron Settings Override	Yes	[WEBSITE]
Enable Order Cron	Yes	[WEBSITE]
	▲ Order Cron Enable/Disable	
Enable Order Sync Cron	No	[WEBSITE]
	▲ Order Sync Cron Enable/Disable	
Order Cron	*/30 *	[GLOBAL]
	▲ Please Enter number in minutes for execute cron	
Enable Inventory Cron	Yes	[WEBSITE]
	▲ Inventory Cron Enable/Disable	
Enable Feed Sync	Yes	[WEBSITE]
	▲ Price Cron Enable/Disable	
Feed Sync Cron	0 0 *	[GLOBAL]
	▲ Please Enter number in minutes for execute cron	

- Select if you want to enable/disable the cron for **orders/ order sync/inventory/feed/feed sync** and **enter the desired values for the respective cron's execution.**

- Click **Save Config** to save the entered details.

Click the Order Settings now and appears as below:

Order Settings	
Enable Order Auto Accept/Reject	No [WEBSITE]
Create Order if product is disabled	No [WEBSITE]
Create Order if product is OutOfStock	No [WEBSITE]
Catch Order Customer Group	NOT LOGGED IN [GLOBAL]

- Here, you may enable the auto acceptance or rejection of an order placed for your product on the Catch marketplace by clicking either **Yes** or **No**.
- Create order if product is disabled in the next section by selecting **Yes**, otherwise select **No**.
- Next, select **Yes** or **No** for the order creation if the order is Out of Stock.
- In **Catch Order Customer Group**, select a group in which your customers who order your products on Catch will be listed.
- Save the configuration now by clicking on **Save Config** button on the top right of page.

Now click on the Developer Settings tab and it will be expanded as:

Developer Settings	
Catch Debug Mode	Yes [GLOBAL] <small>» Enable catch debug mode for logging.</small>
Product Chunk Size	25 [WEBSITE]
Attribute Sync Chunk Size	50 [WEBSITE]
Category Sync Chunk Size	10 [WEBSITE]
Feed Sync Chunk Size	100 [WEBSITE]

- In **Catch Debug Mode** click on **Enable/Disable** depending on whether you want to log the data or not.
- In **Product Chunk Size** enter the value which would be the number of products in one batch.
- In **Attribute Sync Chunk Size** enter the value which would be the number of attributes to be synced in one batch.
- In **Category Sync Chunk Size** enter the value which would be the number of categories to be synced in one batch.
- In **Feed Sync Chunk Size** enter the value which would be the number of feeds to be synced in one batch.
- Click on **Save Config** to save the entered details.

4. Manage Catch Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento attributes to the Catch attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Syncing the Categories
- Syncing the Attributes
- Add new profile

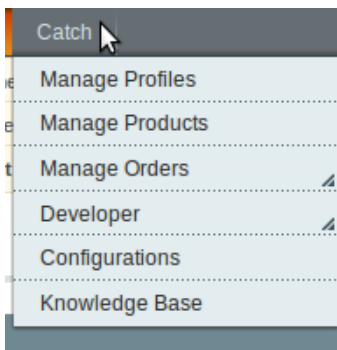

- Edit the existing profile
- Delete the profile
- Submit Actions from the Catch Profile Listing Page

4.1. Syncing the Categories

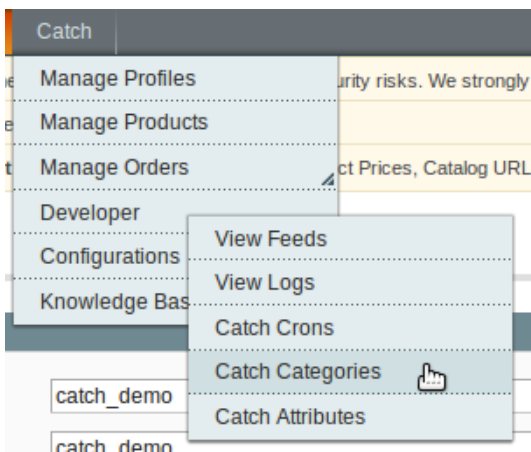

Before creating a new profile, a seller needs to sync the categories available on Catch marketplace to the Magento admin panel.

To do so, the admin needs to:

- Go to the Magento admin panel.
- Place the cursor on Catch on the top navigation bar and it will appear to you as below:

- Now move the cursor to developers and it gets expanded as below:

- Now click on the **Catch Categories** and on the same page, click on the **Sync Categories** button and the page will appear to you as below:

Catch Category Listing

Page 1 of 175 pages | View 20 per page | Total 3488 records found

[Sync Category](#)
[Reset Filter](#) [Search](#)

ID	Catch Category Code	Catch Category Label	Magento Category Id	Level	Actions

4	apparel & footwear > boys > apparel > coats & jackets	Coats & Jackets		4	Sync
5	apparel & footwear > boys > apparel > hoodies & sweatshirts	Hoodies & Sweatshirts		4	Sync
6	apparel & footwear > boys > apparel > jeans	Jeans		4	Sync
7	apparel & footwear > boys > apparel > leggings	Leggings		4	Sync
8	apparel & footwear > boys > apparel > other	Other		4	Sync
9	apparel & footwear > boys > apparel > overalls	Overalls		4	Sync
10	apparel & footwear > boys > apparel > pants	Pants		4	Sync
11	apparel & footwear > boys > apparel > shirts	Shirts		4	Sync
12	apparel & footwear > boys > apparel > shorts	Shorts		4	Sync
13	apparel & footwear > boys > apparel > suits	Suits		4	Sync
14	apparel & footwear > boys > apparel > sweaters	Sweaters		4	Sync
15	apparel & footwear > boys > apparel > tees & tops	Tees & Tops		4	Sync
16	apparel & footwear > boys > apparel > vests	Vests		4	Sync
17	apparel & footwear > boys > costumes	Costumes		3	Sync
18	apparel & footwear > boys > costumes > costume sets	Costume Sets		4	Sync
19	apparel & footwear > boys > costumes > other	Other		4	Sync
20	apparel & footwear > boys > footwear	Footwear		3	Sync

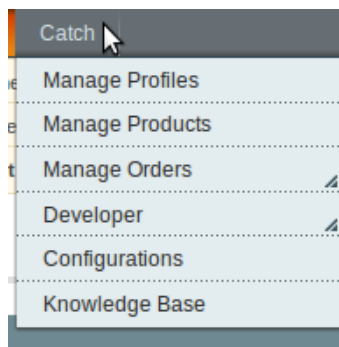

- All the categories will be synced to your Magento admin panel.

4.2. Syncing the Attributes

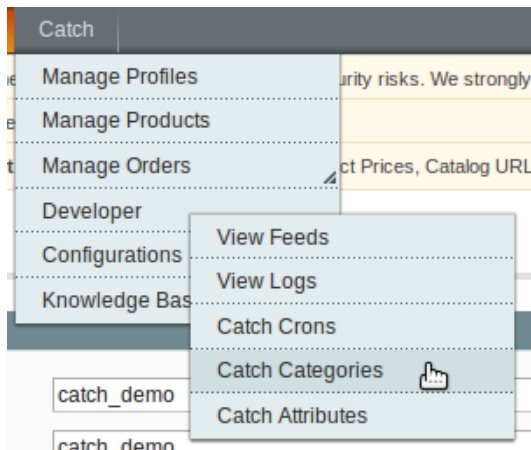

After the Categories have been synced to the seller's admin panel, the Attributes need to be synced before the creation of a new profile.

To do so:

- Go to the Magento admin panel.
- Place cursor on the top navigation bar of Catch and it will appear as:

- Move the cursor to Developer and it gets expanded as below:

- Click on Catch Attributes and on the page that you get navigate to, click on the Sync Attribute button on the top right, and all the Catch Attributes get listed as shown in the figure below:

Attribute Management

Page 1 of 49 pages | View 20 per page | Total 972 records found

[Sync Attribute](#)
[Reset Filter](#)
[Search](#)

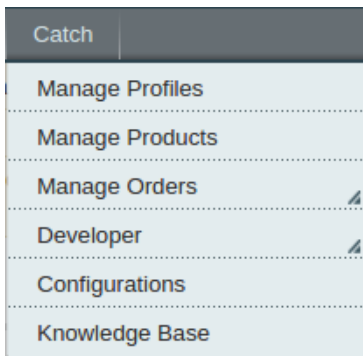

ID	Catch Attribute Code	Catch Attribute Label	Description	Hierarchy Code	Type	Required	Variant	Magento Attribute Code	Default	Actions
1	category	Category			TEXT	Yes	No			Map

18	width	Width (cm)			DECIMAL	No	No			Map
19	length	Length (cm)			DECIMAL	No	No			Map
20	height	Height (cm)			DECIMAL	No	No			Map

- Now all the Catch attributes get successfully synced to you Magento admin panel, and you may proceed to create a new profile.

4.3. Add Profile

To add a new profile

- Go to the **Magento Admin** panel.
- On the top navigation bar, move the cursor over the Catch tab, and then point to the **Manage Profiles** menu.
The menu appears as shown in the following figure:

3. Click **Manage Profiles**. The **Catch Profile Listing** page appears as shown in the following figure:

4. Click the **Add New Profile** button. The **Add Catch Profile** page appears as shown in the following figure:

5. In the right panel, under **Profile Information**, do the following steps:

1. In the **Profile Code** box, enter a profile code.
Note: It is only for the internal use. Use the unique profile code with no spaces. Start with small letters.
2. In the **Profile Name** box, enter the name of the profile.
Note: Use the unique name to identify the profile.
3. In the **Status** list, select **Active** to enable the profile.
Note: The Inactive option disables the profile.

1. Click the **Save and Continue** button.

6. In the left navigation panel, click the **Catch Category Mapping** menu. The page appears as shown in the following figure:

1. In the right panel, go to the **Catch Category Mapping** section.
2. In the **Category** list, select the required **Catch** category that the admin wants to map.
Depending upon the selected category, the **Catch** and the **Magento** attributes appear under the **Catch / Magento Attribute Mapping (Required/ Optional mapping)** section, if exist.
3. Go to the **Catch / Magento Attribute Mapping (Variant attribute mapping)** section. Map the configurable attributes to Magento attributes.
4. Click **Save and Continue Edit** button.

7. In the left navigation panel, click the **Profile Products** menu. The page appears as shown in the following figure:

1. Since no products are assigned to the profile, there are no products listed in the table.

8. Click the **Reset Filter** button. All the products are listed in the table.

1. Select the check boxes associated with the required products to assign them to the new profile.

Note: Admin can assign the product to only one profile.

9. Click the **Save** button. The created profile is saved and listed on the **Catch Profile Listing** page.

Or

Click the **Save and Continue Edit** button to save the created profile and continue editing, if required.

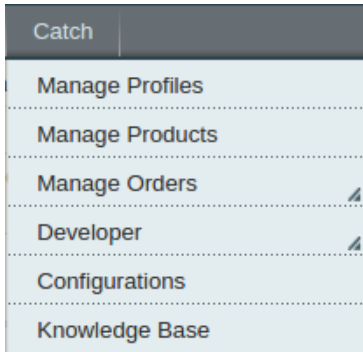

Or

Click the **Save and Upload Product** button to save the profile and make ready to upload the product on Catch. The assigned products are listed on the **Product Manager** page.

4.4. Edit an already existing profile

To edit the existing profile

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the **Catch** tab, and then point to the **Manage Profiles** option and click on it. The menu appears as shown in the following figure:

3. The **Catch Profile Listing** page appears as shown in the following figure:

4. Click the required row of the profile that the admin wants to delete.

OR

In the **Action** column, click the arrow button, and then click **Delete**. Confirm your action in the dialog box by

clicking ok.

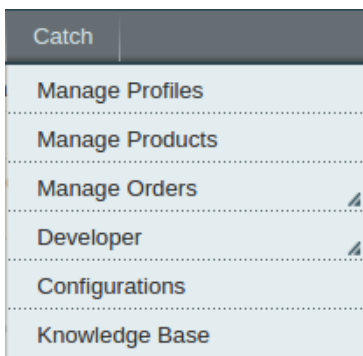

5.The profile is deleted.

4.6. Change status for selected profiles

To change status of the existing profile

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the **Catch** tab, and then point to the **Manage Profiles** option and click.

The menu appears as shown in the following figure:

3.The **Catch Profile Listing** page appears as shown in the following figure:

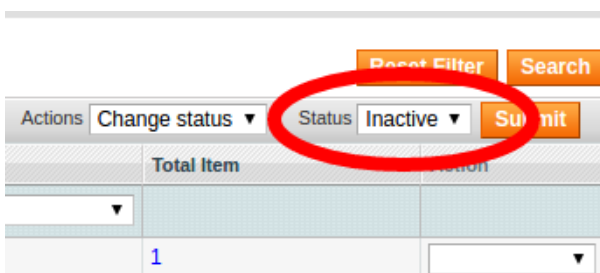

1. On this page, all the available profiles are listed.

4.Click the required row of the profile that the admin wants to change status of.

OR

In the **Action** column, click the arrow button, and then click **Change Status**. After which the below menu will be available.

5. Pick status from the drop-down as **Inactive/Active** and then click **Submit**.

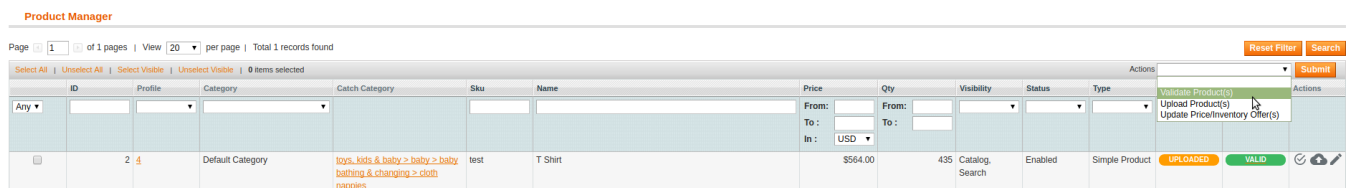

5. Manage products assigned to the profile

On the **Product Manager** page, the admin can perform the following tasks:

- View and edit the product information
- Upload a single product
- View the error log if any error exists in any product details
- Submit certain actions on the selected products

5.1. Submit actions on the selected products of the same profile

Actions on the Product Manager page

The screenshot shows the 'Product Manager' interface. At the top, there are filters for 'Select All', 'Unselect All', 'Select Visible', and 'Unselect Visible', with '0 items selected'. Below this is a table with columns: ID, Profile, Category, Catch Category, Sku, Name, Price, Qty, Visibility, Status, Type, and Actions. A single product is listed: 'T Shirt' with a price of '\$564.00' and status 'Enabled'. In the 'Actions' column, there are three buttons: 'Validate Product(s)', 'Upload Product(s)', and 'Update Price/Inventory Offer(s)'. The 'Validate Product(s)' button is highlighted with a mouse cursor.

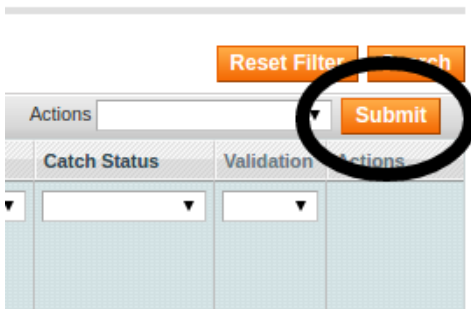

ID	Profile	Category	Catch Category	Sku	Name	Price	Qty	Visibility	Status	Type	Actions
2	4	Default Category	toys, kids & baby > baby > baby bathing & changing > cloth nappies	test	T Shirt	\$564.00	435	Catalog, Search	Enabled	Simple Product	Validate Product(s) Upload Product(s) Update Price/Inventory Offer(s)

The admin can perform the following actions on the selected products available on the **Product Manager** page:

- **Validate Selected Product(s)**: Validates the product before uploading it to the Catch website. It displays the corresponding validation error if any. If there is no error, it confirms that the product is ready to upload.
- **Upload Product(s)**: Uploads all the validated products on Catch at one time. It means, the user can upload all the validated products in one click.
- **Update Price/Inventory Offer(s)**: Update the price or inventory offers in an instant.

To Submit an Action

1. Go to the **Product Manager** page.
2. Select the check boxes associated with the required products.
3. In the **Action** list, select the required action.
4. Click the **Submit** button.

5.2. View the Error Log and Validation Error

To View the error log

1. Go to the **Product Manager** page.

The **Product Manager** page appears as shown in the following figure:

Product Manager

Page 1 of 1 pages | View 20 per page | Total 1 records found

Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected

6. Manage Catch Orders

Using the **Manage Orders** menu, the admin can perform the following tasks:

- View Catch Orders
- View Failed Orders

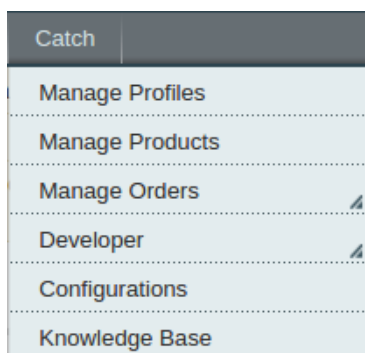

6.1. View Catch Orders

The user can fetch and view all the order details fetched from **Catch**.

To fetch and view Catch Orders

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the **Catch** menu, and then point to the **Manage Orders** menu.

The menu appears as shown in the following figure:

3. Click **View Catch Orders**.

The **Catch Orders Details** page appears as shown in the following figure:

4. Click the **Fetch Latest Catch Orders** or **Sync All Catch Orders Info** button.

If the order is imported successfully then, a new record is found in the **Catch Order Details** table as shown in the above figure.

Notes:

- Orders are automatically imported through CRON in every 10 minutes.
- Whenever the latest orders are imported from **Catch**, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported into the Magento admin panel.
- If no Order is imported, then check the Failed order log on the **Failed Catch Orders Import Log** page.
- Order are auto-rejected on **Catch** in the following conditions:
 - When **Catch** Product SKU does not exist in Magento.
 - When Product is Out of Stock in Magento.
 - When a product is disabled in Magento.

6.2. View Failed Orders

The users can view the list of failed Catch orders on the **View Failed Orders** page.

In the following conditions, Orders are not imported from Catch:

- If any product in the Catch Order is Out of Stock in Magento.
- If any product in the Catch Order is disabled in Magento.
- If any Product does not exist in Magento or is deleted from Magneto after uploading to Catch.
- If the selected Payment Method in Catch System Configuration Setting is not available in Magento.

To view Catch failed orders

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the **Catch** menu, and then point to the **Catch Orders** menu.

The menu appears as shown in the following figure:

3. Click **View Failed Orders**.

The Failed Catch Orders Import Log page appears as shown in the following figure:

This page displays the failed orders with the order id and the reason for the failure.

7. Developer

Under the developer section the admin will be able to perform the following actions:

- View Logs
- View Feeds
- Catch Crons
- Catch Categories
- Catch Attributes

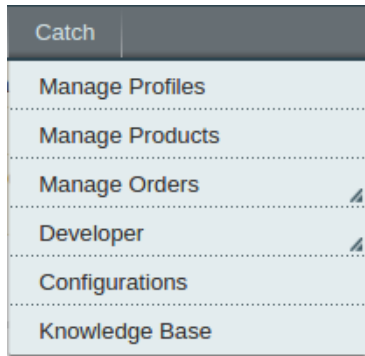

7.1. View Logs

Admin can view and delete the Catch log details on the **Catch Log Details** page.

To view the Catch log details

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the **Catch** menu, and then point to the **Developer** option. Click on **View Logs**.

The menu appears as shown in the following figure:

3. Click **View Logs**.

The **Catch Log Details** page appears as shown in the following figure:

Note: To clear all the failed import order logs at once, click the **Truncate** button.

To delete Catch log details

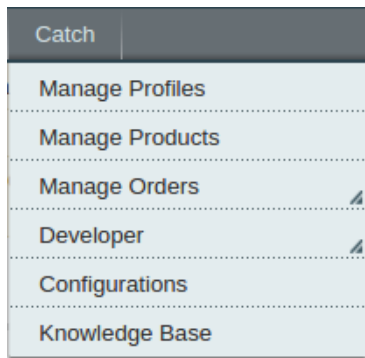

1. Go to the **Catch Log Details** page.
2. Select the check-boxes associated with the logs those are no more required.
3. In the **Actions** list, select **Delete Records**, and then click the **Submit** button.
The log records are deleted and a success message appears.

7.2. View Feeds

After uploading the product on Catch.com or after updating the product inventory or the product price, the user can check the status of the feed from the **Catch Feed Details** page.

To view the product feeds status

1. Go to the **Magento Admin Panel**.
2. On the top navigation bar, move the cursor over the **Catch** menu and then point to the **Developer** option.
The menu appears as shown in the following figure:

3. Click **View Feeds**.

The **Catch Feed Details** page appears as shown in the following figure:

4.

Do the required one of the following tasks:

- View the status of the feed in the **Feed Status** column.
- To synchronize the feeds between Catch and Magento, click the **Sync Feeds** button.
Or
Select the checkbox associated with the required product and submit the **Sync Feeds** action.
- To delete the feed, select the check box associated with the product and submit the **Delete Feeds** action.
- To view the product feed error, click the **Error**

button or to view the details of the feed, click the

button.

Note: If the feed detail is not available, then the

button appears.

- To download the **Feed File**, click the **Download** link appearing in the **Feed File** column.

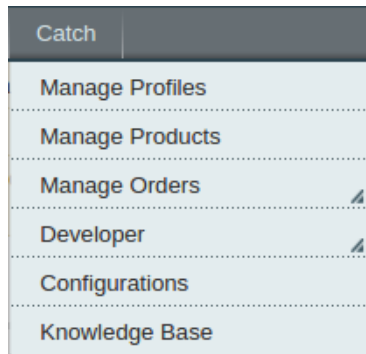

7.3. Catch Crons

The Catch Crons page displays all the **Cron** details scheduled in Catch.

To view the Catch Cron details:

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the Catch menu.

The menu appears as shown in the following figure:

3. Click **Catch Crons**.

The **Catch Cron Details** page appears as shown in the following figure:

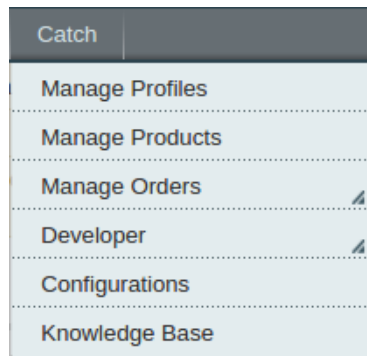

Catch Cron Details							
Page 1 of 1 pages View 20 per page Total 0 records found Reset Filter Search							
ID	Job Code	Status	Messages	Created At	Scheduled At	Executed At	Finished At
No records found.							

7.4. Catch Categories

As already mentioned in the profile section, the admin has to Map the Catch Category to the Magento Category to upload products on Catch.com.

To map the Catch categories to the Magento categories

1. Go to **Magento Admin Panel**.
2. On the top navigation bar, move the cursor over the **Catch** menu, and then point to the **Developer** menu.
The menu appears as shown in the following figure:

3. Click **View Catch Category**.
