1. Overview

Jet-Magento Integration is an extension, developed by CedCommerce, establishes a synchronization of inventory, price, other details for product creation and its management between the Magento store and Jet.com.

This extension interacts with Jet Marketplace to integrate the synchronized product listing between the Magento and the Jet.com retailers. After installing the extension, merchant can create the Jet Categories and the dependent attributes on the Magento store.

The process enables merchant to configure the desired product category into Magento for automatic submission of the selected product to the same Category on Jet.com.

Jet Magento Integration extension provides following features:

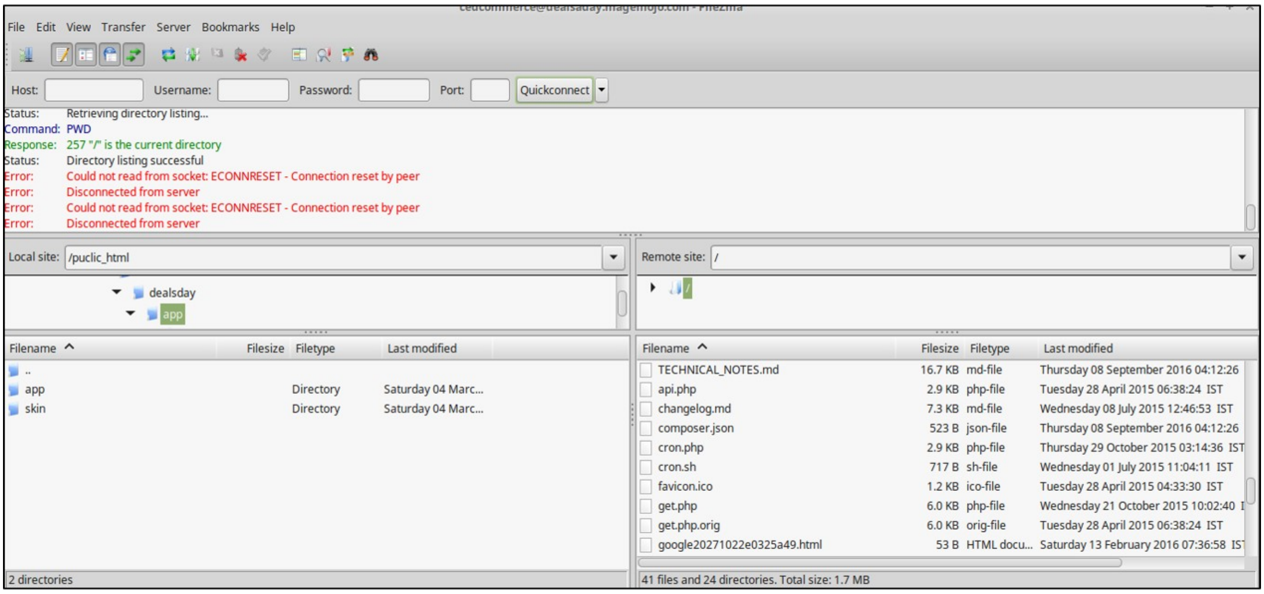
- Profile based product upload
- Easy Jet Category and Attribute mapping
- Manage Jet Product and Upload Product (directly from grid and bulk upload all products)
- Product Synchronization
    - Automatic process on each product edit
    - Manual synchronization process
- Review Product Upload Errors
- Automated Order Import and Acknowledgement
- Shipment and Cancellation of Orders
- Automated Shipment with Shipworks and Shipstation
- Multiple Shipment of an Order
- Fetch and Submit Return
- Create Refund
- Upload Configurable Product
- Upload simple Product
- Archive Selected Product
- Archive Products in Bulk
- Unarchive Selected Product
- Unarchive Products in Bulk
- Shipping Exception
- Return Exception
- CRON Facility
- Knowledge Base
- Map Magento Global variant attributes

Caution: Extension is heavily dependent on Crons for running various automated processes. So, make sure that Cron Job is properly configured and working on the server.

2. Jet Integration Extension Installation

To install the extension

1. Log in the **ftp**, and then go to Magento root folder (generally present under the *public_html* folder).



```
Status:     Retrieving directory listing...
Command:    PWD
Response:   257 "/" is the current directory
Status:     Directory listing successful
Error:      Could not read from socket: ECONNRESET - Connection reset by peer
Error:      Disconnected from server
Error:      Could not read from socket: ECONNRESET - Connection reset by peer
Error:      Disconnected from server
```

41 files and 24 directories. Total size: 1.7 MB

2. Overwrite the *app, skin, js* and *var* folders in the same sequence as illustrated in the following steps:
    a. Drag and Drop the *app/code*, *app/design*, *js*, *skin* and *var* directories.

    b. Finally, upload the *app/etc* directory.
    After the folders are loaded successfully, the extension is installed or upgraded.

3. Jet Configuration Settings

Once the extension is successfully installed on the Merchant's store, the Jet menu appears on the top navigation bar dispalyed in the Magento Admin Panel. The merchant has to fill-in the API credentials in the **Jet Configuration** page of the admin panel.

The user has to log in the https://partner.jet.com/(https://partner.jet.com/)
to obtain the following API credentials:

- Jet API key
- API Secret
- Fulfillment Node Id

After obtaining the API credentials, the merchant has to copy all of them one by one from the Jet Partner account and paste it one by one to the Configuration page of the admin panel of the merchant.

To follow the process of copying and pasting of the API credentials,

- Open the Jet Partner account and the Magento Admin Panel in two different tabs or windows of the browser. Thus, copy the keys from the Jet Partner account and paste them one by one to the Magento Admin Panel.

OR

- Use the **Get Jet Credentials** button available on the Jet Configuration page of the admin panel of the merchant.

To Copy the API Key details from the Jet Partner account

1. Go to thehttps://partner.jet.com/ (https://partner.jet.com/) login.
   The page appears as shown in the following figure:

Select to send different product price to **jet.com**

Brand: jet_brand [GLOBAL]
Attribute type - Text or
1 to 100 characters

Multipack Quantity: [GLOBAL]
Attribute type - Numeric value: 1 to 128 (For Simple & Configural Products default value is 1)
Number of items with the given Standard Product Code that makes up your merchant SKU (product offer).

Manufacturer part number: mfr_part_number [GLOBAL]
Attribute type - Select or Text
Part number provided by the original manufacturer of the merchant SKU - 50 characters

Manufacture: country_of_manufacture [GLOBAL]
Attribute type - Select or Text
Manufacturer of the merchant SKU - 100 characters

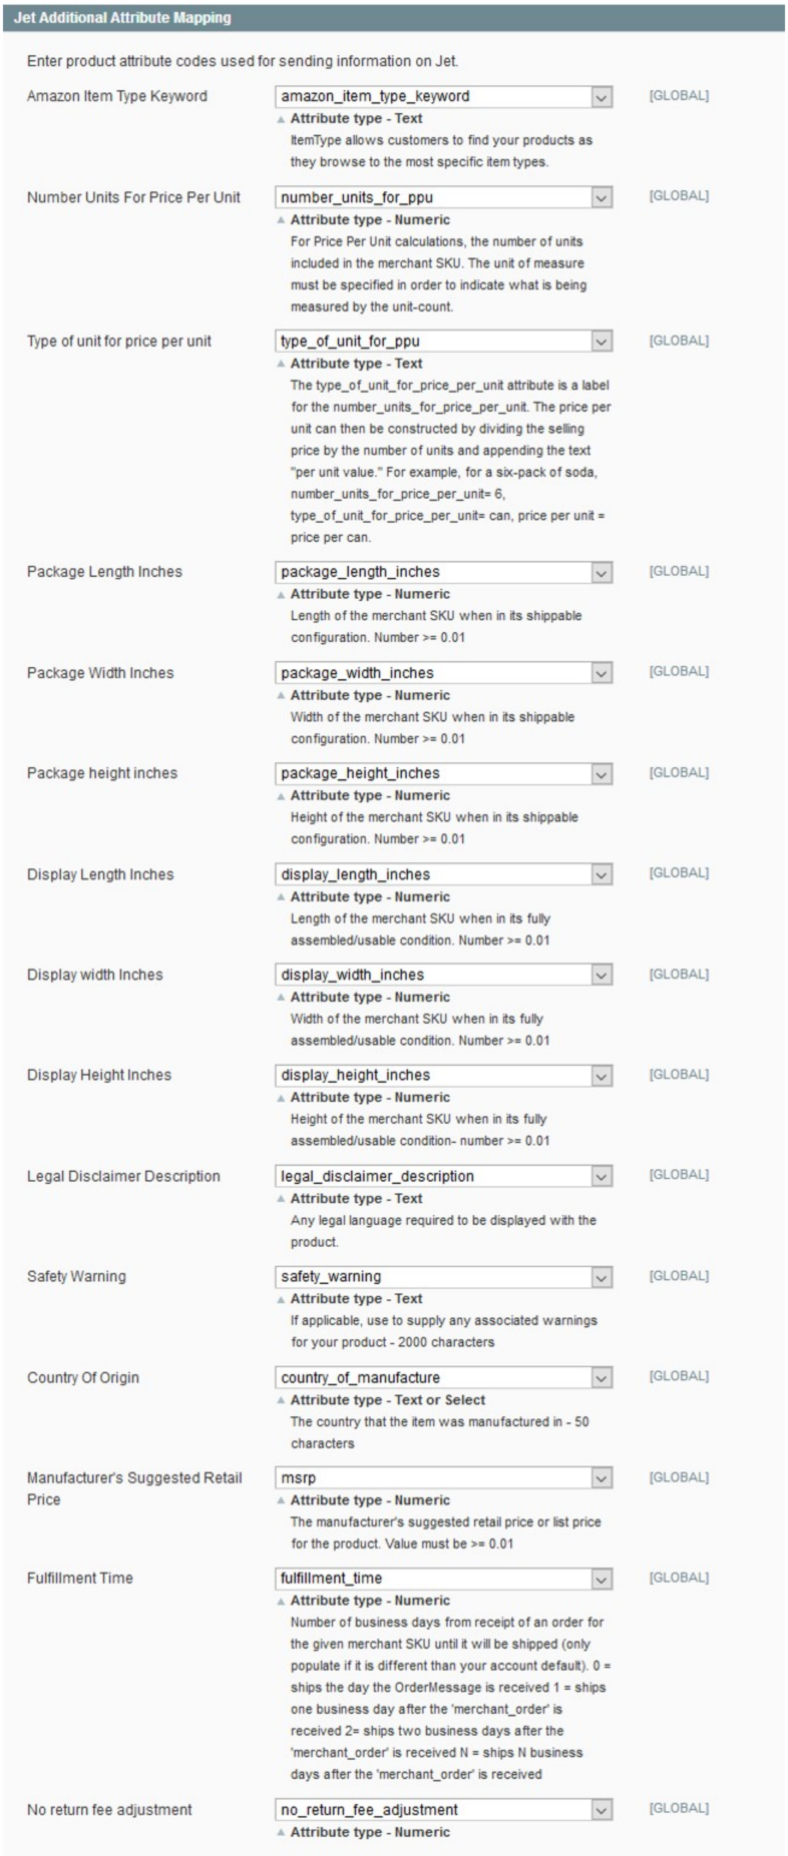
Bullets: bullets [GLOBAL]
Attribute type - Text
Merchant SKU feature description. Jet currently allows for up to 5 bullets points up to 100 characters

Shipping Weight Pounds: shipping_weight_pounds [GLOBAL]
Attribute type - Numeric
Weight of the merchant SKU when in its shippable configuration. Must be >= 0.01

Map Price: map_price [GLOBAL]
Attribute type - Numeric
Minimum Advertised Price (MAP) for the product. This price is used as the display or reference price when price policy value 102 is used via the map_implementation field. Must be >= 0.01

12. Under **Minimum Jet Attribute Mapping to List Mapping on Jet.com**, do the following steps:
    Note: Attributes are preselected. Admin can change as per the requirement.

    a. In the **Variant Attribute** field, select the corresponding **Jet Attribute** from the list to map it with **Magento Attribute**.
    b. Under **Identifier Mapping**, select the corresponding existing **Magento Attribute** from the list to map it with **Identifier**.
    c. In the **Product Title** list, select the required attribute.
    Note: Select the Text-Type attribute. Limitation on the attribute value is 5 to 500 characters.
    d. In the **Product Description** list, select the required attribute.
    Note: Select the Text-Type attribute. Limitation on the attribute value is 1 to 2000 characters.
    e. In the **Jet Product Price** list, select the required option.
    f. In the **Brand** list, select the required attribute.
    Note: Limitation on the attribute value is 1 to 100 characters.
    g. In the **Multipack Quantity** box, enter a required numeric value.
    Note: Valid Numeric Value is from 1 to 128. Default value for the Simple and Configurable Products is 1.
    h. In the **Manufacturer part number** list, select the required attribute.
    Note: Select the Text-Type or the Select-Type attribute. Part number provided by the original manufacturer.
    i. In the **Manufacture** list, select the required attribute.
    Note: Select the Text-Type or the Select-Type attribute.
    j. In the **Bullets** list, select the required attribute.
    Note: Select the Text-Type attribute. Currently, Jet allows 5 bulleted points and the limitation of 100 characters.
    k. In the **Shipping Weight Pounds** list, select the required attribute.
    Note: Select the Numeric-Type attribute. The allowed attribute value is >= 0.01.
    l. In the **Map Price** list, select the required attribute.
    Note: Select the Numeric-Type attribute. The allowed attribute value is >= 0.01. Minimum Advertised Price (MAP) of the product.
13. Click the **Jet Additional Attribute Mapping** tab.
    The tab is expanded as shown in the following figure:



Jet Additional Attribute Mapping

Enter product attribute codes used for sending information on Jet.

Amazon Item Type Keyword	amazon_item_type_keyword **Attribute type - Text** ItemType allows customers to find your products as they browse to the most specific item types.	[GLOBAL]
Number Units For Price Per Unit	number_units_for_ppu **Attribute type - Numeric** For Price Per Unit calculations, the number of units included in the merchant SKU. The unit of measure must be specified in order to indicate what is being measured by the unit-count.	[GLOBAL]
Type of unit for price per unit	type_of_unit_for_ppu **Attribute type - Text** The type_of_unit_for_price_per_unit attribute is a label for the number_units_for_price_per_unit. The price per unit can then be constructed by dividing the selling price by the number of units and appending the text "per unit value." For example, for a six-pack of soda, number_units_for_price_per_unit= 6, type_of_unit_for_price_per_unit= can, price per unit = price per can.	[GLOBAL]
Package Length Inches	package_length_inches **Attribute type - Numeric** Length of the merchant SKU when in its shippable configuration. Number >= 0.01	[GLOBAL]
Package Width Inches	package_width_inches **Attribute type - Numeric** Width of the merchant SKU when in its shippable configuration. Number >= 0.01	[GLOBAL]
Package height inches	package_height_inches **Attribute type - Numeric** Height of the merchant SKU when in its shippable configuration. Number >= 0.01	[GLOBAL]
Display Length Inches	display_length_inches **Attribute type - Numeric** Length of the merchant SKU when in its fully assembled/usable condition. Number >= 0.01	[GLOBAL]
Display width Inches	display_width_inches **Attribute type - Numeric** Width of the merchant SKU when in its fully assembled/usable condition. Number >= 0.01	[GLOBAL]
Display Height Inches	display_height_inches **Attribute type - Numeric** Height of the merchant SKU when in its fully assembled/usable condition- number >= 0.01	[GLOBAL]
Legal Disclaimer Description	legal_disclaimer_description **Attribute type - Text** Any legal language required to be displayed with the product.	[GLOBAL]
Safety Warning	safety_warning **Attribute type - Text** If applicable, use to supply any associated warnings for your product - 2000 characters	[GLOBAL]
Country Of Origin	country_of_manufacture **Attribute type - Text or Select** The country that the item was manufactured in - 50 characters	[GLOBAL]
Manufacturer's Suggested Retail Price	msrp **Attribute type - Numeric** The manufacturer's suggested retail price or list price for the product. Value must be >= 0.01	[GLOBAL]
Fulfillment Time	fulfillment_time **Attribute type - Numeric** Number of business days from receipt of an order for the given merchant SKU until it will be shipped (only populate if it is different than your account default). 0 = ships the day the OrderMessage is received 1 = ships one business day after the 'merchant_order' is received 2= ships two business days after the 'merchant_order' is received N = ships N business days after the 'merchant_order' is received	[GLOBAL]
No return fee adjustment	no_return_fee_adjustment **Attribute type - Numeric**	[GLOBAL]

14. Under **Jet Additional Attribute Mapping**, select the corresponding attributes for mapping:
    - **Amazon Item Type Keyword**: Select the Text-Type attribute.
      It allows customers to find the specific products.
    - **Number Units For Price Per Unit**: Select the Numeric-Type attribute.
      The attribute value should specify unit of measure to indicate what is being measured by the unit-count.
    - **Type of unit for price per unit**: Select the Text-Type attribute.
      The atribute value of the type_of_unit_for_price_per_unit attribute is defined as a label for the atribute value of the number_units_for_price_per_unit attribute .
      price per unit = selling price divided by the number of units and appending the text *per unit value*.
      For example: If the product is six-pack of soda, then number_units_for_price_per_unit= 6, type_of_unit_for_price_per_unit= can, thus, price per unit = price per can.
    - **Package Length Inches**: Select the Numeric-Type attribute. The allowed attribute value is >= 0.01.
    - **Package Width Inches**: Select the Numeric-Type attribute. The allowed attribute value is >= 0.01.
    - **Package height inches**: Select the Numeric-Type attribute. The allowed attribute value is >= 0.01.
    - **Display Length Inches**: Select the Numeric-Type attribute. The allowed attribute value is >= 0.01.
    - **Display width Inches**: Select the Numeric-Type attribute. The allowed attribute value is >= 0.01.
    - **Display Height Inches**: Select the Numeric-Type attribute. The allowed attribute value is >= 0.01.
    - **Legal Disclaimer Description**: Select the Text-Type attribute. Any legal content that the admin wants to display with the product.
    - **Safety Warning**: Select the Text-Type attribute. Limitation on the attribute value is 2000 characters.
    - **Country Of Origin**: Select the Text-Type or the Select-Type attribute. Specifies the country where the product is manufactured. Limitation on the attribute value is 50 characters.
    - **Manufacturer’s Suggested Retail Price**: Select the Numeric-Type attribute. Retail price or list price suggested by the manufacturer. The allowed attribute value is >= 0.01.
    - **Fulfillment Time**: Select the Numeric-Type attribute.
    - **No return fee adjustment**: Select the Numeric-Type attribute.
15. Click the **Save Config** button.

4. Manage Profile

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento attributes to the Jet attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add new profile(https://docs.cedcommerce.com/magento/jet-magento-integration-guide-0-3-4-2?section=manage-profile)

- Edit the existing profile(https://docs.cedcommerce.com/magento/jet-magento-integration-guide-0-3-4-2?section=edit-the-existing-profile)

- Delete the profile(https://docs.cedcommerce.com/magento/jet-magento-integration-guide-0-3-4-2?section=delete-the-profile)

- Submit Actions on the Jet Profile Listing Page(https://docs.cedcommerce.com/magento/jet-magento-integration-guide-0-3-4-2?section=submit-actions)

- Upload Single Product, View Error Log, and Edit Product Information(https://docs.cedcommerce.com/magento/jet-magento-integration-guide-0-3-4-2?section=product-manager)
- Submit Actions on the Product Manager page(https://docs.cedcommerce.com/magento/jet-magento-integration-guide-0-3-4-2?section=upload-products)

4.1. Add New Profile

To add a new profile

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, click the **Jet** menu.
   The menu appears as shown in the following figure:

Test Brown Shirt (Default)

jetcom

Standard Identifier

Standard Identifier	Value	Action
UPC	094922345158	

Brand: Brand1
1 to 50 characters

Manufacturer part number:
Part number provided by the original manufacturer of the merchant SKU

Jet Product Status: Under Jet Review

Amazon Item Type Keyword:
ItemType allows customers to find your products as they browse to the most specific item types. Please use the exact selling from Amazon's browse tree guides

Category Path:

Bullets:
Please enter product feature description.Add each feature inside '{}'.Example :- {This is first one.}{This is second one.} and so on.Each '{}' contains maximum of 500 characters.Maximum 5 '{}' is allowed.

Number Units For Price Per Unit:
For Price Per Unit calculations, the number of units included in the merchant SKU. The unit of measure must be specified in order to indicate what is being measured by the unit-count.

Type of unit for price per unit:
The type_of_unit_for_price_per_unit attribute is a label for the number_units_for_price_per_unit. The price per unit can then be constructed by dividing the selling price by the number of units and appending the text \"per unit value.\" For example, for a

Shipping Weight Pounds:
Weight of the merchant SKU when in its shippable configuration.

Package Length Inches:
Length of the merchant SKU when in its shippable configuration.

Package Width Inches:
Width of the merchant SKU when in its shippable configuration.

Package height inches:
Height of the merchant SKU when in its shippable configuration.

Display Length Inches:
Length of the merchant SKU when in its fully assembled/usable condition.

Display width Inches:
Width of the merchant SKU when in its fully assembled/usable condition.

Display Height Inches:
Height of the merchant SKU when in its fully assembled/usable condition.

Proposition 65: No
You must tell us if your product is subject to Proposition 65 rules and regulations. Proposition 65 requires merchants to provide California consumers with special warnings for products that contain chemicals known to cause cancer, birth defects, or other

Legal Disclaimer Description:
Add any legal language required to be displayed with the product.

CPSIA Cautionary Statements:
- no warning applicable
- choking hazard small parts
- choking hazard is a small ball
- choking hazard is a marble
- choking hazard contains a small ball
- choking hazard contains a marble
- choking hazard balloon

Use this field to indicate if a cautionary statement relating to the choking hazards of children's toys and games applies to your product. These cautionary statements are defined in Section 24 of the Federal Hazardous Substances Act and Section 105 of the

Safety Warning:
If applicable, use to supply any associated warnings for your product.Maximum of 500 characters.

Start Selling Date:
If updating merchant SKU that has quantity = 0 at all FCs, date that the inventory in this message should be available for sale on Jet.com.

Fulfillment Time:
Number of business days from receipt of an order for the given merchant SKU until it will be shipped (only populate if it is different than your account default).

Map Price:
[USD]
Retailer price for the product for which member savings will be applied.

Map Implementation:
The type of rule that indicates how Jet member savings are allowed to be applied to an item�s base price.

Product Tax Code:
Jet's standard code for the tax properties of a given product.

No return fee adjustment:
[USD]

Exclude from fee adjustments: No
This SKU will not be subject to any fee adjustment rules that are set up if this field is Yes.

Ships alone: No
If this field is Yes, it indicates that this merchant SKU will always ship on its own.A separate merchant_order will always be placed for this merchant_SKU, one consequence of this will be that this merchant_sku will never contriube to any basket size fee

Jet Repricing Minimum Price:
Minimum price of product you want to sell on jet.com

Exclude from fee adjustments: No
This SKU will not be subject to any fee adjustment rules that are set up if this field is Yes.

5. Enter the required information, and then click the **Save** button.

4.5.1. Upload Products

The admin can upload the products that are assigned to the selected profile and are listed on the **Product Manager** page to the Jet.com.

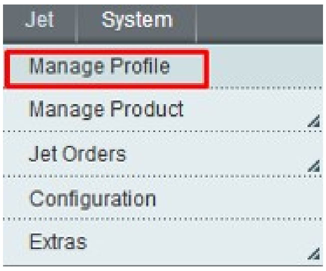
Other than the Validate & Upload Products to Jet action, the admin can also perform the following actions on the selected products available on the Product Manager page:

- **Validate Products**: To validate the product before uploading it to the Jet.com. It displays the corresponding validation error, if any. If there is no error, it confirms that the product is ready to upload.
- **Archive Products on Jet**: Disables products from Jet.com.
- **Unarchive Products on Jet**: Enables products on Jet.com.
- **Sync Inventory and Price**: To update the price and inventory of the product on Jet.com. For example, if the admin has changed the product price and inventory on the Magento store and also wants to change the price and inventory on Jet.com then this action is applicable. The price and inventory are updated when the user submits this action for the selected product. This action completes all the job related to the product inventory and also it manages the quantity related issues.
- **Sync Product Status**: To get the request from Jet.com to update the status of the product on the Magento store. It helps the admin to view the status of the product. For example, unpublished, transmit, data fix, system error, or so on.

Note: These actions are also submitted similarly as submitting the **Validate & Upload Products to Jet** action for uploading the products.

To upload products

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, click the **Jet** menu.
   The menu appears as shown in the following figure:



3. Click **Manage Profile**.

   Note: Only after uploading the products on Jet.com, admin can synchronize the feeds(logs).
3. To synchronize feeds, click the **Sync Feeds** button.

All the feeds or logs details are displayed in the table that appears on the **Rejected Jet Files Manager** page.

4. To clear all logs, click the **Clear All Logs** button.
5. To view errors and resubmit the log, move to the Action column, and then click the **View Errors & Resubmit** link of the associated log.

To delete the selected logs

1. Go to **Magento Admin** Panel.
2. On the **Jet** menu, point to **Manage Product**, and then click **Product Feeds**.
   The **Products Feeds** page appears.
3. Select the checkboxes of the logs that the admin wants to delete.
4. In the **Actions** list, click the arrow button, and then click **Delete**.
5. Click the **Submit** button.
   A confirmation dialog box appears.
6. Click the **OK** button.
   All the selected logs are deleted.

5.2. Live Products

Admin can manage the live products by performing the following tasks on the Jet Live Products Management page:

- **Get all products price** or **single** product price.
- **Get all products quantity** or **single** product quantity.
- **Analyze all products** or **single** product to get the best offer price available in the Marketplace. With the help of this the admin can compare the price of products with best offer price available in the Marketplace and can change the rpice accordingly to win the BuyBox, if required.
- **Archive all products** or **single** product.
- **Unarchive all products** or **single** product.
- **Enable vacation mode** feature enables admin to disable or inactivate the products display on Jet.com during the admin is enjoying the vacation.
- **Disable vacation mode** feature enables the admin to enable or activate the products display on Jet.com.

To get all products price or single product price

1. Go to **Magento Admin** Panel.
2. On the **Jet** menu, point to **Manage Product**, and then click **Live Products**.
   The **Jet Live Products Management** page appears as shown in the following figure:

4. Click the **Fetch Latest Jet Orders** button.
   If the order is imported successfully, then a new record is found in the Jet Order Details table.
   Notes:

   - Orders are automatically imported through CRON in every 10 minutes.
   - Whenever the latest orders are imported from Jet, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento admin panel.
   - As per Jet's Policy, orders should be acknowledged within 60 minutes.
   - If no order is imported, then check the Failed order log on the **Failed Jet Orders Import Log** page.
   - Order are auto rejected on Jet in the following conditions:
     - When Jet Product SKU does not exist in Magento.
     - When Product is Out of Stock in Magento.
     - When product is disabled in Magento.
5. In the **Magento Order#** column, click the link associated with the required order.
6. In the left navigation menu, click **Ship By Jet**.

   A dialog box appears to open or save the exported file. as shown in the following figure.
5. Click to select the **Open With** or **Save File** as per the requirement.
6. Click the **OK** button.

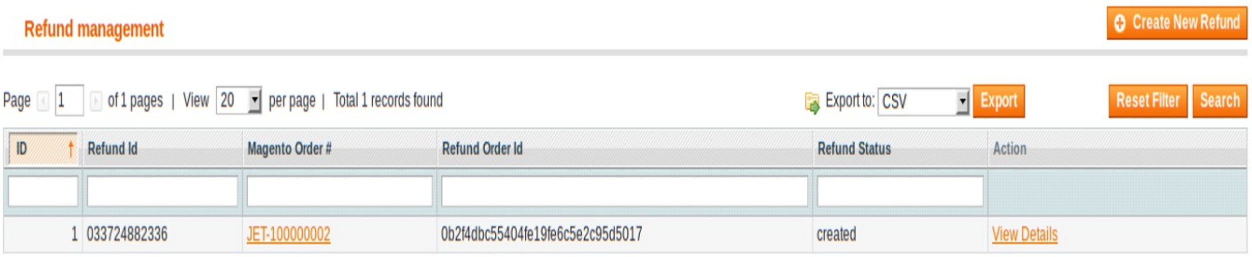
6.4. Refund

If a front-end user returns the product or order directly to the merchant without the involvement of Jet.com, then the merchant has to send a request on Jet.com for completing this type of return.
To complete this type of return the merchant has to create a new refund.

Admin can also view the refund details and export it on the local system.

To create a new refund

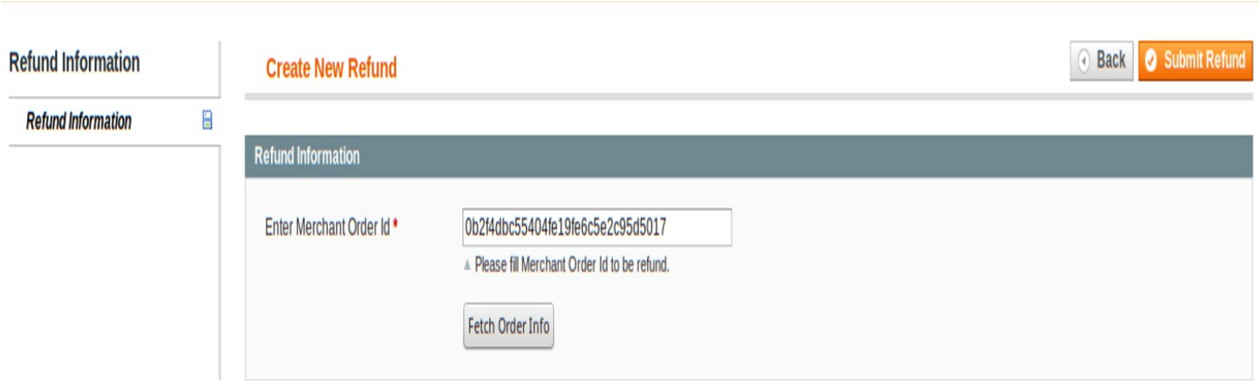
1. Go to the **Magento Admin** panel.
2. On the top navigation bar, click the **Jet** menu.
3. On the **Jet** menu, point to **Jet Orders** , and then click **Refund**.
   The **Refund Managemen**t page appears as shown in the following figure:



Page 1 of 1 pages | View 20 per page | Total 1 records found

ID	Refund Id	Magento Order #	Refund Order Id	Refund Status	Action
1	033724882336	JET-100000002	0b2f4dbc55404fe19fe6c5e2c95d5017	created	View Details

4. Click the **Create New Refund** button.
   The page appears as shown in the following figure:



Enter Merchant Order Id * 0b2f4dbc55404fe19fe6c5e2c95d5017

Please fill Merchant Order Id to be refund.

5. Under **Refund Information**, in the **Enter Merchant Order Id** box, enter a value.
6. Click the **Fetch Order Info** button.
   If the entered purchase order Id is correct, then the respective order details are displayed product-wise in the new sections as follows:
    - **Refund id**: Refund id that the merchant receives from walmart.com.
    - **Refund Merchant Id**: Identification number of the merchant.
    - **Order item id**: Identification number generated at the time of placing order.
    - **Qty Requested**: Total number of items or product ordered in the current order.
    - **Qty Already Refunded**: Items or product that have been already refunded to the front-end user.
    - **Qty Available for Refund**: Number of items or product that can be refunded.
    - **Qty Returned**: Number of items or product returned by the customer.
      Note: Returned quantity should be less than or equal to the shipped quantity.
    - **Qty Refunded**: Number of items or product that the merchant wants to refund
      Integration Guide
      Note: Refunded quantity should be less than or equal to the Returned quantity.
    - **Refund tax**: Tax applied on the items or products returned.
    - **Refund Amount**: Amount that Walmart has to return to the front-end user.
    - **Refund Shipping Cos**t: Shipping cost applicable to the returned product.
    - **Refund Shipping tax**: Shipping tax applicable to the returned product.
    - **Refund Feedback**: Feedback of merchant on the returned product.
    - **Refund Reason**: Reason why the front-end user has returned the product.
7. Click the **Submit Refund** button.

To view the Refund details

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, click the **Jet** menu.
3. On the **Jet** menu, point to **Jet Orders** , and then click **Refund**.
