

# **Magento 2 Vendor Split Cart Addon - User Guide**

by CedCommerce Docs - Products User Guides

<b>1. Overview .....</b>	<b>3</b>
<b>2. Vendor Split Cart Configuration .....</b>	<b>3</b>
<b>3. Front-End View .....</b>	<b>4</b>

## 1. Overview

**Vendor Split Cart Addon** is an add-on of CedCommerce Multi-Vendor Marketplace for Magento® 2. Using this add-on, customers can choose different payment and shipping methods to apply on various vendors from whom they want to buy the products.

### *Pre-requisite*

- Compatible only with the **CedCommerce Multi-Vendor Marketplace**(<http://cedcommerce.com/magento-2-extensions/marketplace-basic>) extension.

### *Key Features are as follows:*

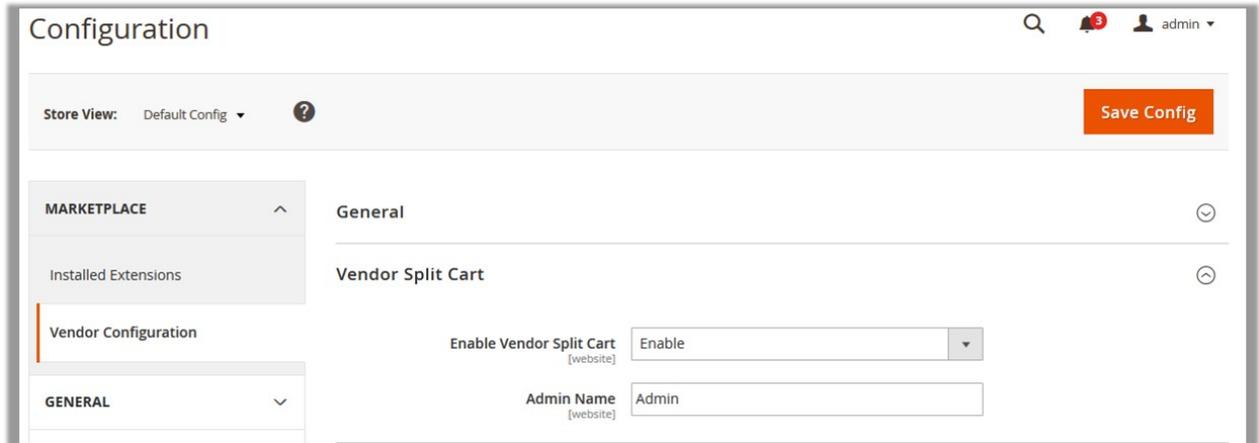

- Front-end users can prefer different payment methods and shipping methods for various vendors.
- Users can add different shipping addresses for different products belonged to the various vendors.
- Users can add products belonged to multiple vendors at the same time.
- Users can apply discount codes for various vendors products if applicable.
- Seller based checkout system is available for the various products from various vendors or from admin.
- Users can view the products based on various vendors on the Cart Page in the categorized form.

## 2. Vendor Split Cart Configuration

After the successful installation of the **Vendor Split Cart** add-on in the Magento 2 store, the admin has to set up the configuration settings required to enable the features of the add-on.

### *To configure the settings*

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **MARKETPLACE** menu, and then click **Vendor Configuration**.  
The **Configuration** page appears as shown in the following figure:

3. In the right panel, under the **Vendor Split Cart** section, do the following steps:
  - a. In the **Enable Vendor Split Cart** list, select Enable to enable the add-on features.
  - b. In the **Admin Name** box, enter the name of the admin.  
This name appears on the front-end view.
4. Click the **Save Config** button.  
The configuration settings are saved.

### 3. Front-End View

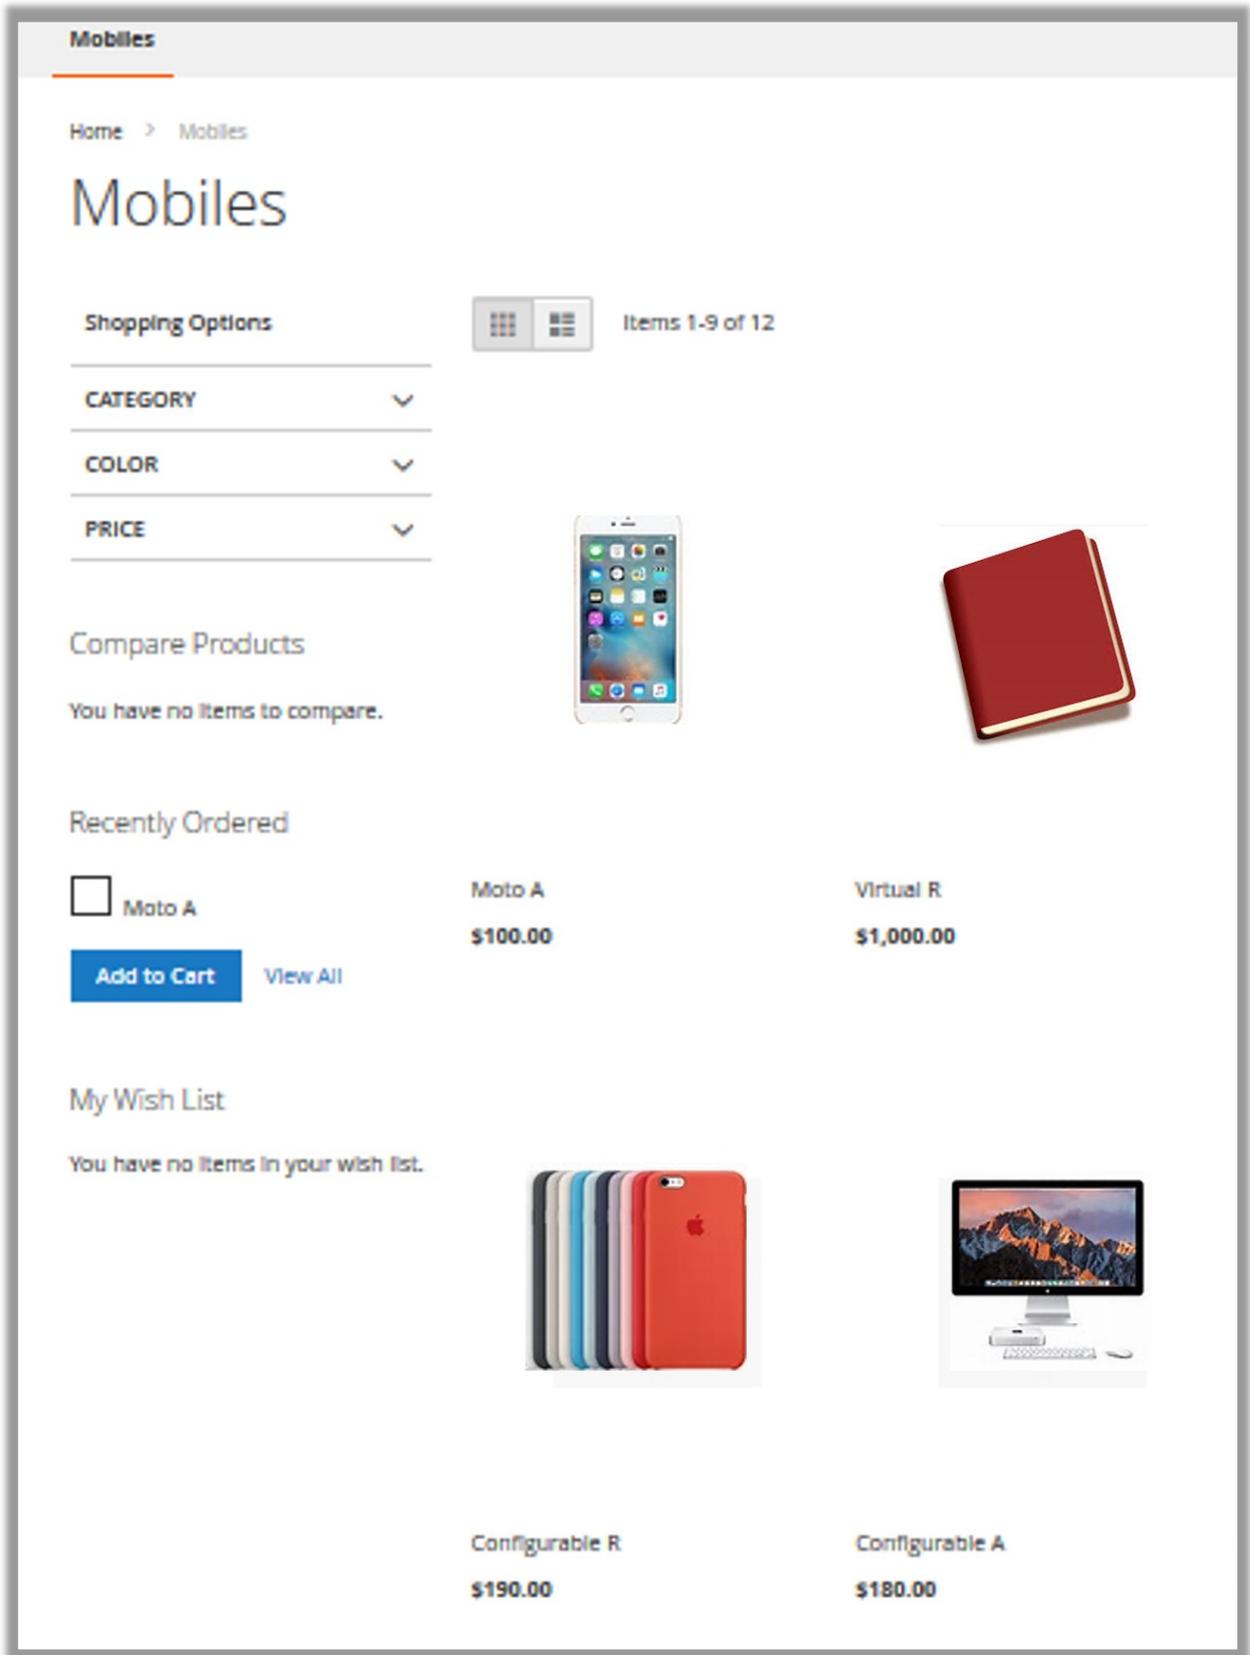

On the Products Display page of the front-end view, users can view all the products available in the store from various vendors and admin.

Users can select and add their required product from various sellers to their single cart without a need to worry about how to make a payment to different sellers. Here comes the need to use the excellent add-on, that is Vendor Split Cart, where the users have the facility of making the payments separately for the products purchased from various vendors or from admin as the single cart gets split into the number of carts based on the number of sellers; and separate payment summary and checkout buttons appear.

Users can use the different payment methods and shipping methods for various sellers.

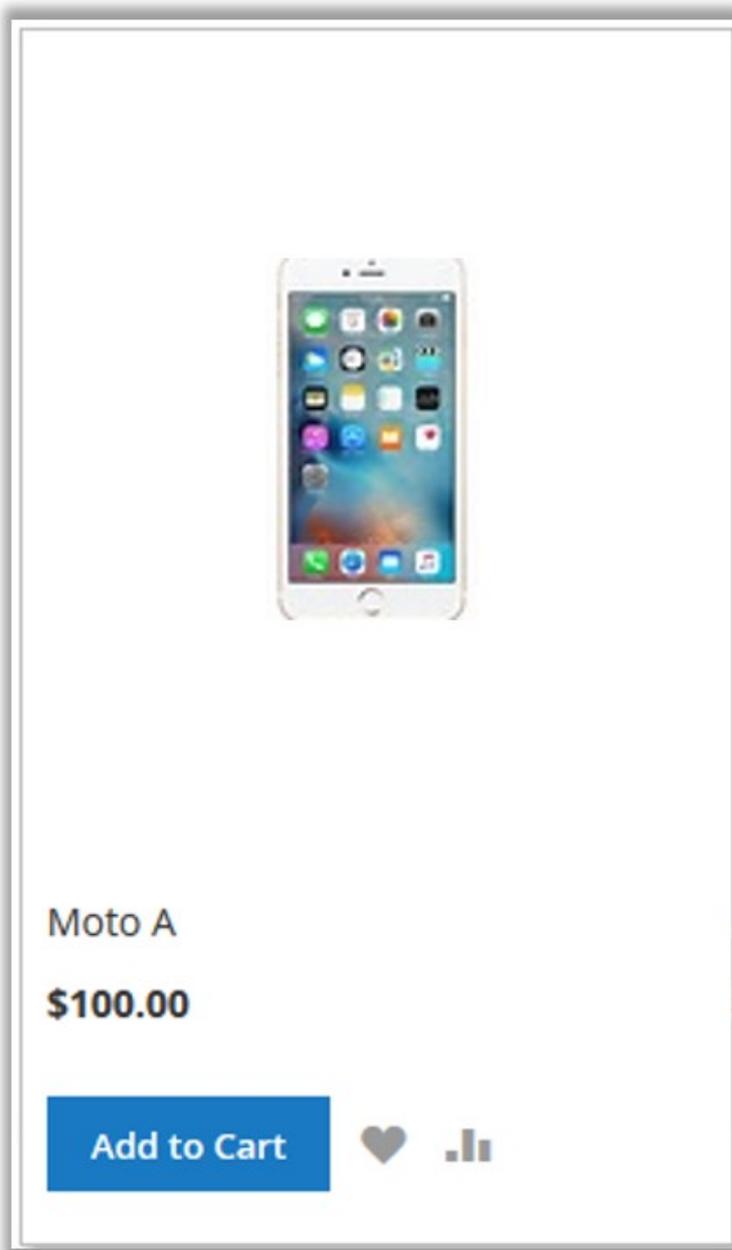

#### **To purchase the products from various sellers and make the separate payment**

1. Go to the Front-end view.
2. On the top navigation bar of the store, click the **Sign In** link.
3. Enter the login credentials.
4. Click the name of the required category.  
All the relevant products appear on the shop page.

Here all the products from various sellers are available.

5. Move the cursor over the various required products to add the selected products to the cart. Moving the cursor over the product activates the Add to Cart button such as shown in the following figure:

**[Note: Product names and images used in this online help are just as a sample and used as an example.]**

6. Click the **Add to Cart** button of each required product.  
All the required products are added in the cart.
7. Click the cart

icon.

All the added products appear such as shown in the following figure:

[Proceed to Checkout](#)

Based on the number of sellers and separate payment summary and checkout buttons appear.

9. Scroll down to the payment summary of the required seller.

10. Click the **Proceed to Checkout** button.

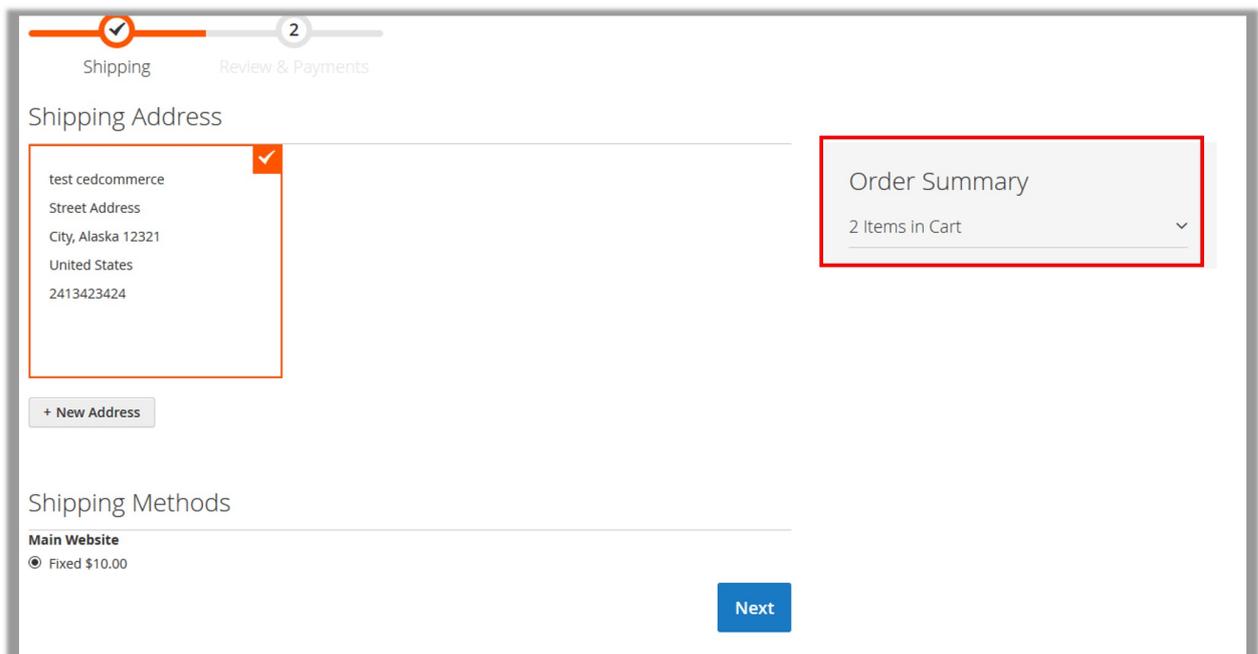

The Shipping page appears such as shown in the following figure:

In the Order Summary, the total number of products appear.

11. Click the **Next** button to proceed further.

After placing the order, only the remaining products are left for the next payment and the Order summary appears such as the following figure:

12. Click the **Next** button.

The **Payment Method** page appears as shown in the following figure:

Under **Order Summary**, the Order Total appears that the user has to pay to the corresponding seller for their products.

13. In the **Apply Discount Code** box, enter the code if applicable, and then click the **Apply Discount** button.

**Note:** Based on the applicable Discount code the Order Total can vary.

14. Click the **Place Order** button.

The order is placed successfully and the message appears such as shown in the following figure:

Your order number is: **00000036**.

We'll email you an order confirmation with details and tracking info.
