1. Ebay Integration for Magento 2 store Overview

eBay Inc. is a multinational e-commerce corporation, headquartered in San Jose, California, facilitating online consumer-to-consumer and business-to-consumer sales. The company manages the eBay.com Web site, an online auction and shopping website in which people and businesses buy and sell a broad variety of goods and services worldwide.

CedCommerce **Ebay-Magento 2 store Integration** extension helps the Magento store owner to synchronize the product listing between the Magento store and the eBay.com retailers or sellers. It can also manage the eBay orders on the Magento stores without making any significant changes in the operational functionalities.

It helps admin to synchronize the orders, products, pricing, and inventory through establishing the interaction between the eBay APIs and the eBay-Magento 2 store Integration extension. It also enables the admin to create the eBay Categories and its dependent attributes on the Magento 2 store. Thus, it enables the store owner to configure the desired product category to the Magento store to automatically submit the selected product to the same category on the eBay.com Web site.

Key Features are as follows:

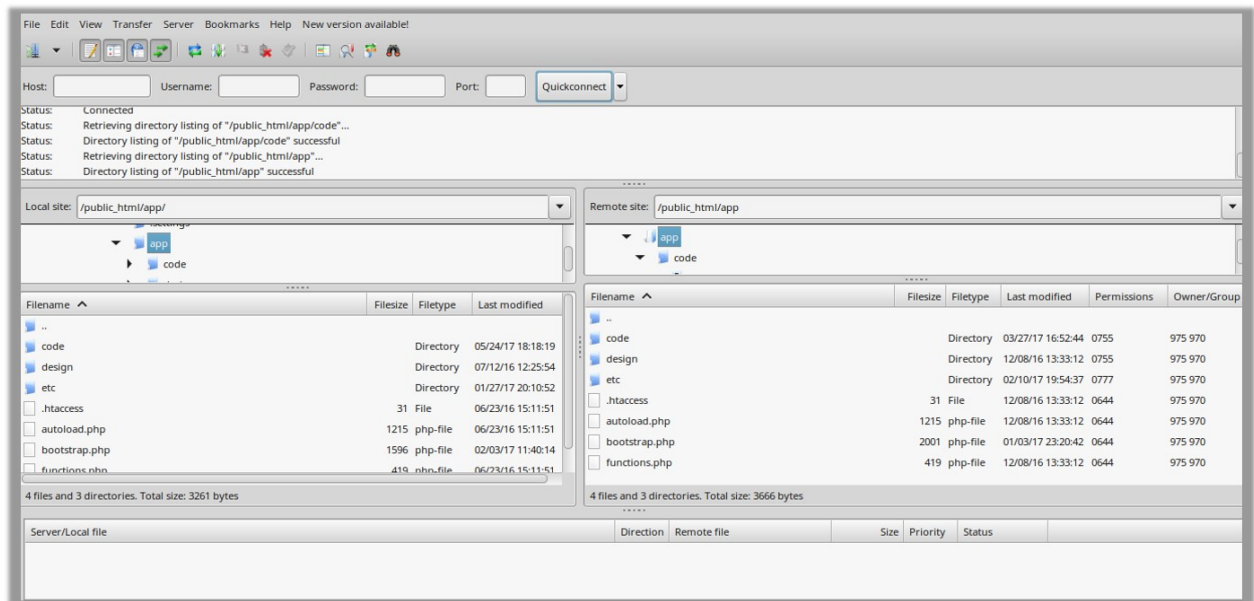

- **Profile based product upload:** Admin can create a profile and map the eBay category and attributes to the Magento store category and attributes. Then, after assigning the products to the profile, the admin can easily upload products to the eBay.
- **Bulk Upload System:** The merchant has the flexibility to upload any number of products on eBay.com using the bulk product upload feature.
- **Product Category Mapping:** Follows many-to-one category mapping philosophy. Admin can map many categories of the Magento store to the single category of eBay.
- **Synchronized Inventory and Profile Based Pricing:** Establishes Inventory Synchronization at regular intervals. Establishes Product Listing between Magento store and eBay. Increase or decrease in Profile based price.
- **Simple Products Upload:** Admin can upload the Simple types of Magento store product on eBay.com.
- **New Order Notifications:** Whenever a new order is fetched from eBay.com, the admin receives a notification.
- **Low Stock Notifications:** Whenever Stock diminishes lower than a threshold, the admin receives a notification.
- **Rejected Products Notification:** If eBay.com rejects any product containing some invalid details, then the extension helps in fetching the information from the automatically synchronized requests along with the cause of rejection.
- **Order Shipment:** Merchant can enter shipping carrier and the tracking number to send shipment or can automate the shipment process.
- **Manage eBay Orders:** Allows admin to import orders from the eBay Marketplace to convert it into regular Magento Store Orders and Shipments.
- **Product Operation:** Allows admin to perform product related tasks such as product upload, product archive, and product view using bulk management system.
- **Easy Debug:** Provides easy debug process for hassle-free products upload on the eBay Marketplace.
- **Crons:** Cron job automates the process to fetch eBay Orders from eBay to Magento 2 Store.

Caution: Extension is heavily dependent on Crons for running various automated processes. So, make sure that Cron Job is properly configured and working on the server.

2. Ebay Integration for Magento 2 store extension Installation

To install the extension

1. Log in the **ftp**, and then go to Magento 2 store root folder (generally present under the *public_html* folder).

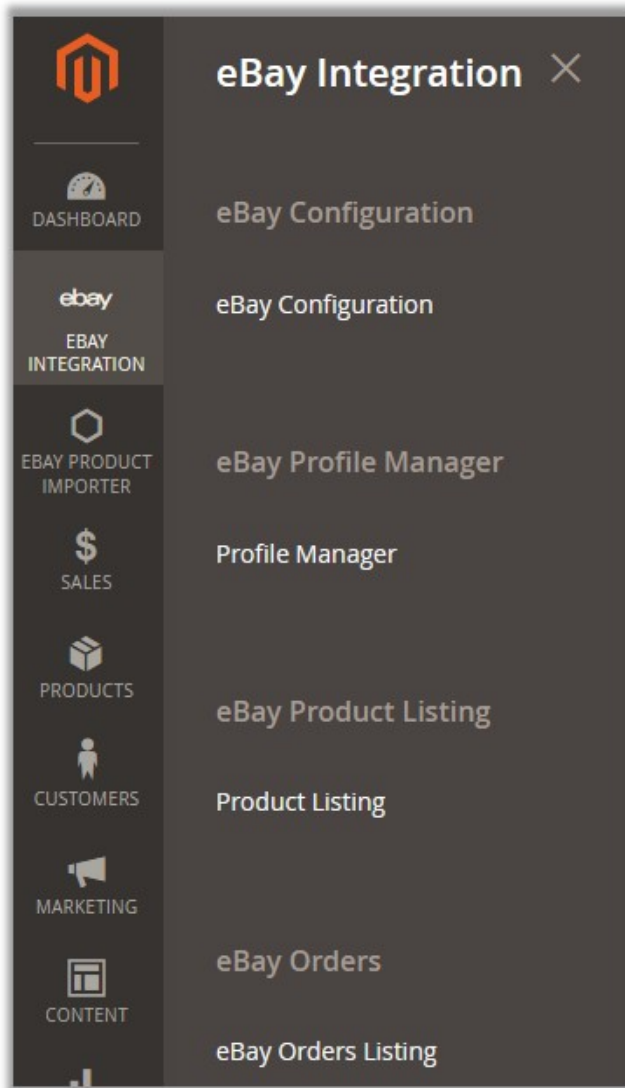

2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
 - a. Drag and Drop *app/code/Ced/Ebay* directory.
 - b. After successfully uploading the directory, the extension will be installed/upgraded.
 - c. Now run the following upgrade command in *cmd*
`php bin/magento setup:upgrade`

3. eBay Configuration Settings

Once the extension is successfully installed on the Merchant's store, the eBay INTEGRATION menu appears on the left navigation bar displayed in the Magento Admin Panel. Before starting with the configuration settings, the pre-requisite is to have an eBay seller account.

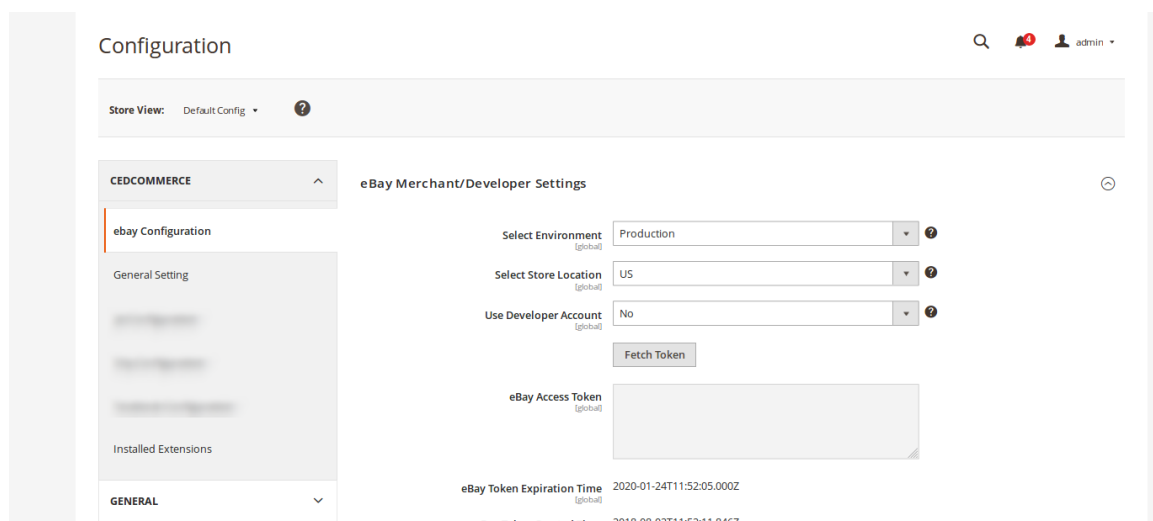

To set up the eBay Integration Configuration settings

1. Go to Admin panel.
2. On the left navigation bar, click the **EBAY INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **eBay Configuration**.

The **Configuration** page appears as shown in the following figure:

Now before you start the configuration, you need to take an important step. You need to disable the secret key to be added to the URL, while entering it during the configuration process.

- To do that,
 - Click on **Advanced** which is on the left left panel menu of Configuration page. The section gets expanded as shown below:

Admin Account Sharing [store view] No ▾ ☒ Use system value

If set to Yes, you can log in from multiple computers into same account. Default setting No improves security.

Password Reset Protection Type [store view] By IP and Email ▾ ☒ Use system value

Recovery Link Expiration Period (hours) [global] 2 ☒ Use system value

Please enter a number 1 or greater in this field.

Max Number of Password Reset Requests [store view] 5 ☒ Use system value

Limit the number of password reset request per hour. Use 0 to disable.

Min Time Between Password Reset Requests [store view] 10 ☒ Use system value

Delay in minutes between password reset requests. Use 0 to disable.

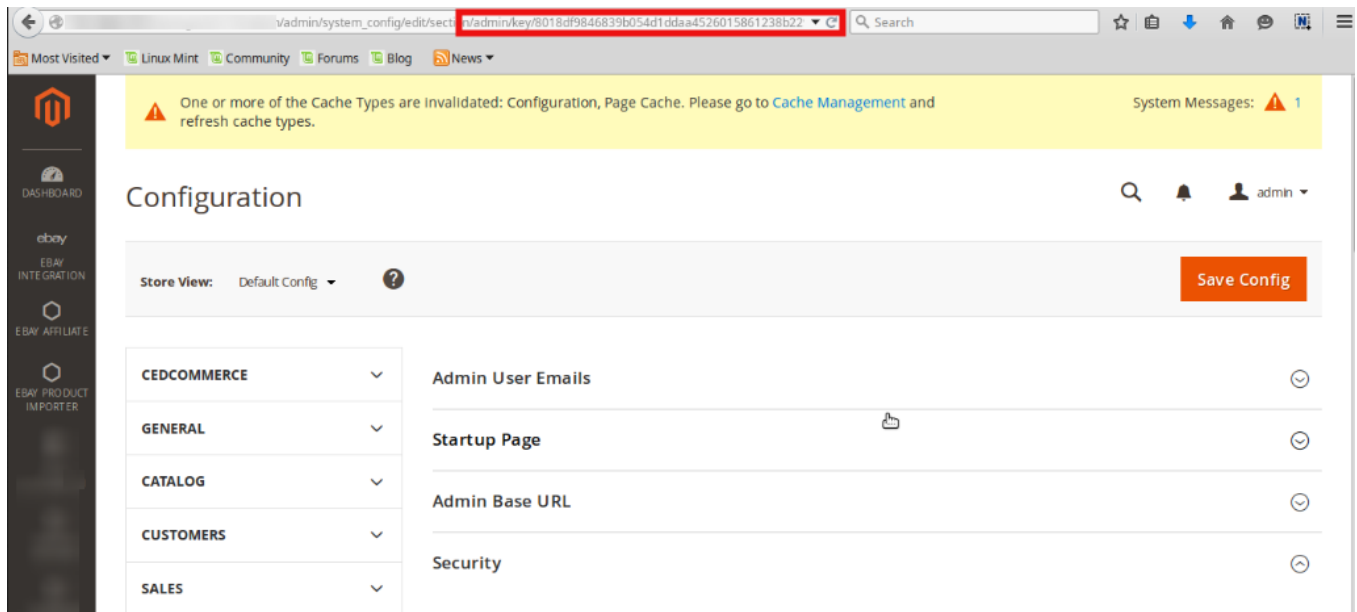

Add Secret Key to URLs [global] Yes ▾ ☒ Use system value

Login is Case Sensitive [global] No ▾

Admin Session Lifetime (seconds) [global] 31536000 ☐ Use system value

Please enter at least 60 and at most 31536000 (one year).

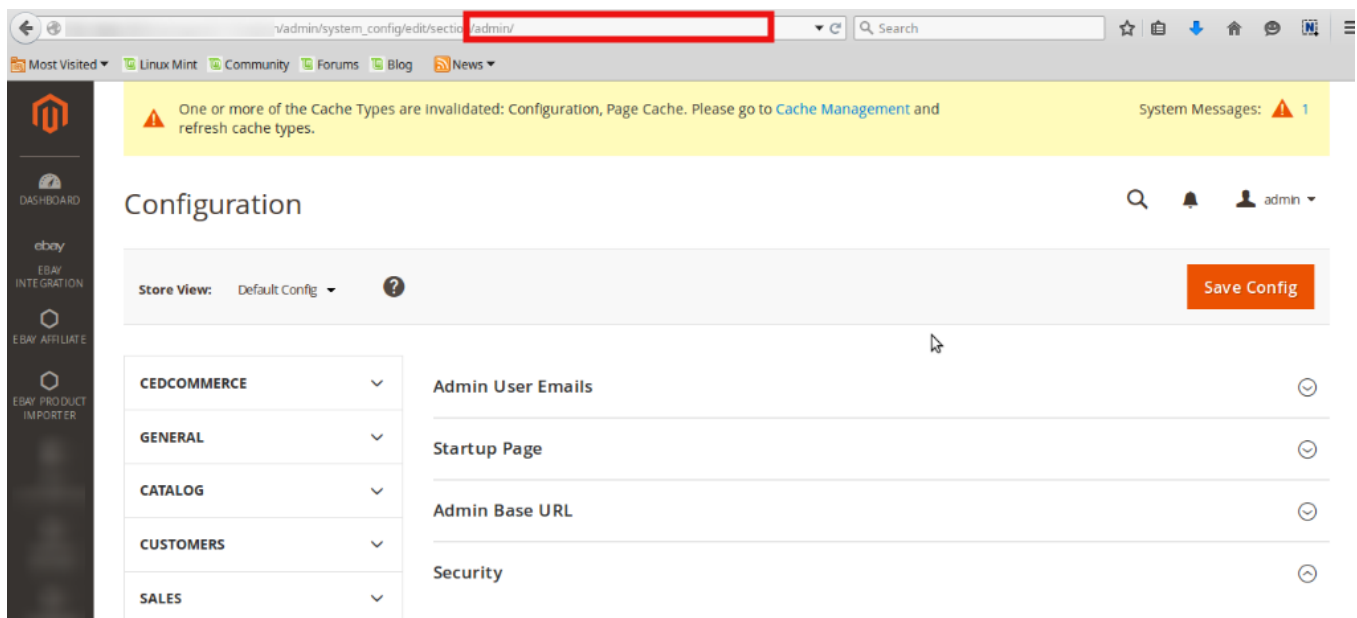

- Click on Admin and the section will appear as shown in the image above.
- In the box adjacent to **Add Secret Key to URLs**, the status is **Yes**. With yes as status, the key gets displayed in the URL as shown in the image below in the red box:

- Uncheck the **Use system value** and change the status from **Yes** (which is the default status) to **No**.

- By taking this step, the Secret Key gets removed from the URL, as shown in the image below:

- Once you have completed the configuration, you may change the status of **Add Secret Key to URLs** from **No** to **Yes**.

Now you may start the Configuration process:

eBay Redirect URL name (global)

Fetch Token

eBay Access Token (global)

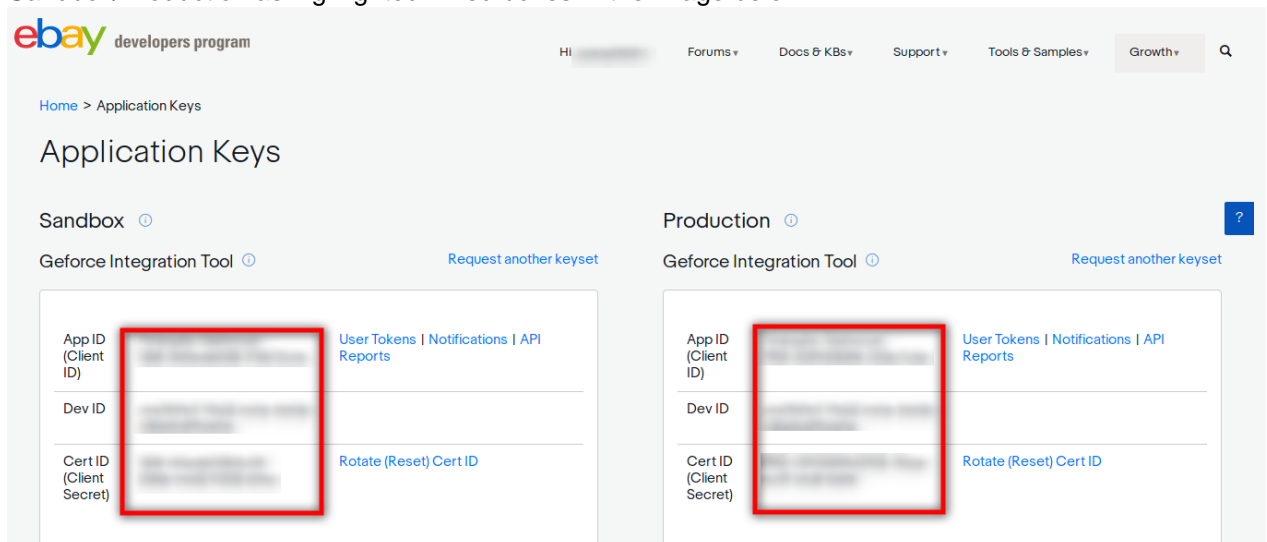

8. To fill eBay App ID, Cert ID, Dev ID, and eBay Redirect URL Name, you need to click on **Get Developer Details** button which is below these fields.
9. On clicking it, the **eBay developers program page** opens.
10. Click **Sign In** on the top, the sign in page opens and you need to login.
11. Enter the Log In credentials and then click the sign in button. The page appears as shown below:

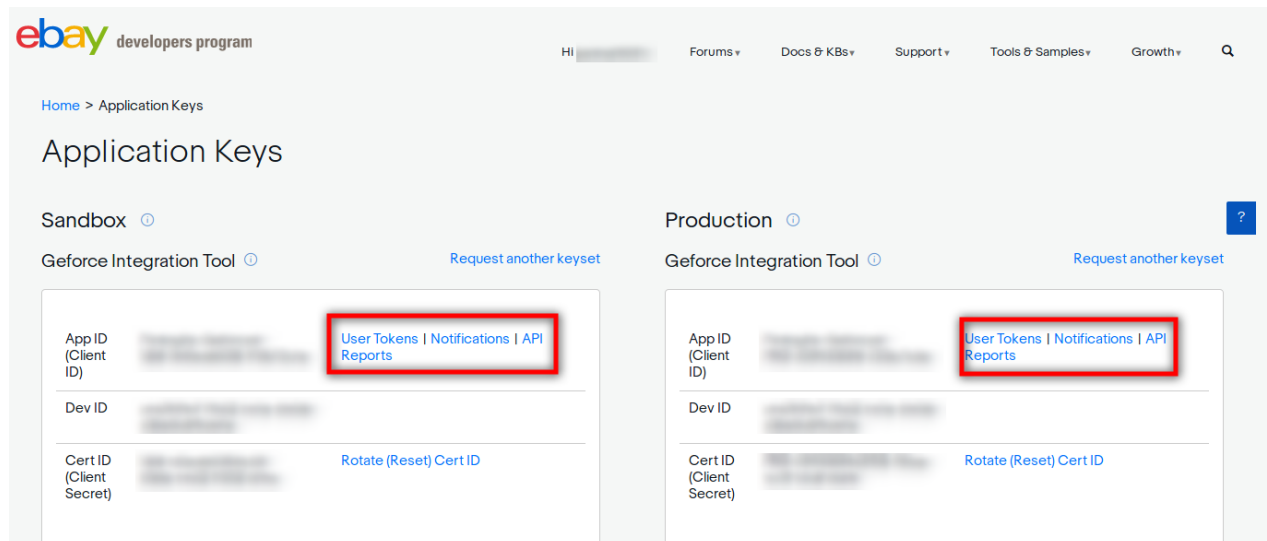

12. Now, click on your profile name on the top of the page, and when the menu appears, click **Application access keys**, as highlighted in the image below:

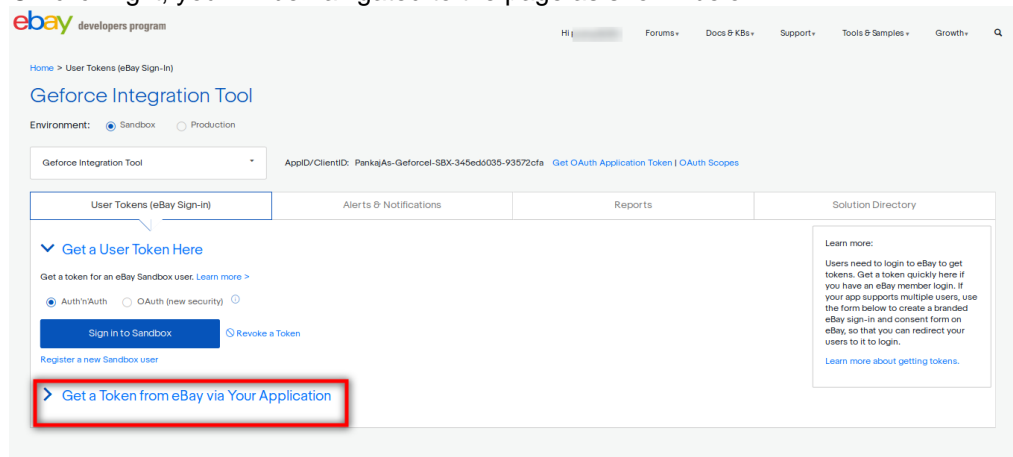

13. On clicking it, a tab will get opened and you may see your App Id, Dev Id and the Cert Id on the page for Sandbox/Production as highlighted in red boxes in the image below:

14. Copy the API Keys and enter them in the respective fields displayed in the section of the **eBay Configuration page**.
15. Now, for **Redirect URL Name** for either Sandbox or Production, click on the corresponding **User Token | Notifications | API Reports** on the seller page's section where you get the ID's. It is highlighted in the image below:

16. On clicking it, you will be navigated to the page as shown below:

17. Click the **Get a Token from eBay via Your Application** Button as highlighted in the above image. The section gets expanded and appears as shown below:

Get a Token from eBay via Your Application

How does this work? [Learn more >](#)

Your eBay Sign-in Settings [+ Add eBay Redirect URL](#)

Redirect URL Name (eBay Redirect URL name) Display Title OAuth Enabled Review your sign-in

Your branded eBay Sandbox Sign In (Authn/auth) <https://signin.sandbox.ebay.com/PankajAs-GeForc-Idnmtua9Sess>

Your branded eBay Sandbox Sign In (OAuth) <https://auth.sandbox.ebay.com/... See all>

Display Title

Your privacy policy URL

Your auth accepted URL

Your auth declined URL

If you leave these fields blank, the eBay default [accept](#) and [reject](#) pages will be used.

[Delete](#) [Clone](#) ☒ Authn/Auth ☐ OAuth [Test Sign-In](#)

Pankaj_Aswal-PankajAs-GeForc-dfevdvvn

Grant Application Access: <Display Title Here>

Ready to use <Display Title Here>? Great! We need your consent to share your eBay data. Don't worry, we won't share by editing your Account Preferences.

Please take the time to read <Display Title Here> terms of service and [Privacy Policy](#), because these policies will apply manage policies set by other companies.

By clicking on the "I agree" button, you're allowing us to link your eBay account with <Display Title Here>.

[I agree](#) [No thanks, take me to the Application's website or eBay home](#)

18. Now copy the **Redirect URL Name** as highlighted inside the red box in the above image and paste it in the **eBay Redirect URL Name** field on **eBay Configuration page**. *(In **Your auth accepted URL** and **Your auth declined URL** fields present on the same page as shown in the above image, you need to enter the URL's given to you by CedCommerce and save the settings.)*
19. Once you have filled the ID's and Redirect URL Name, you may click the Fetch Token button. The process to fetch it has already been mentioned.
20. Now, once the actions till now have been taken (whether you select Yes or No in Use Developer Account), click the **Fetch Other Details** button.
Other details such as Payment details, Shipping details, and Return policy are fetched from the eBay website to the Magento store.
21. Scroll down to the **Payment Details** tab, and then click the tab.
The **Payment Details** tab is expanded and the relevant field appears as shown in the following figure:

Payment Details

Please select payment methods for eBay products

Payment Methods [global]

- American Express
- Payment on delivery**
- Discover card
- Integrated Merchant CreditCard
- PayPal
- Visa/Mastercard

22. In the **Payment Methods** list, select the required payment methods for eBay products.
23. Scroll down to the **Shipping Details** tab, and then click the tab.

The **Shipping Details** tab is expanded and the relevant fields appear as shown in the following figure:

The screenshot shows a form titled "Shipping Details" with the instruction "Please fill shipping details for eBay products". The form contains five fields, each with a label and a value:

Field Label	Value
Service Type [global]	Flat
Shipping Service [global]	USPS Priority Mail
Shipping Cost [global]	12
Shipping Additional Cost [global]	12
Postal Code [global]	43212

24. In the **Service Type** list, select the required option.
25. In the **Shipping Service** list, select the required option.
26. In the **Shipping Cost** box, enter the required value.
27. In the **Shipping Additional Cost** box, enter the required value.
28. In the **Postal Code** box, enter the zip code of the area where the shipping is required.
29. Scroll down to the **Return Policy** tab, and then click the tab.

The **Return Policy** tab is expanded and the relevant fields appear as shown in the following figure:

Return Policy

Please fill return policy for eBay products

Refund Type [global]	Money Back	▼
Return With-In Days [global]	14 Days	▼
Return Accepted [global]	Returns Accepted	▼
Return Description [global]	testing	
Shipping Cost Paid By [global]	Buyer	▼
Re-Stocking Fee Value [global]	No	▼

30. In the **Refund Type** list, select the required refund type.
 31. In the **Return With-In Days** list, select the required number of days.
 32. In the **Return Accepted** list, select the option to mention whether the return is accepted or not.
 33. In the **Return Description** box, enter the description.
 34. In the **Shipping Cost Paid By** list, select the payer of the shipping cost.
 35. In the **Re-Stocking Fee Value** list, select the required value or option.
 36. Scroll down to the **Product Edit Settings** tab, and then click the tab.
- The **Product Edit Settings** tab is expanded and the relevant fields appear as shown in the following figure:

Product Edit Settings

Auto Sync [global]	Yes	▼
Auto Update product information on eBay While Product Edit		
Price Sync [global]	Yes	▼
Sync price with eBay		
Inventory Sync [global]	Yes	▼
Sync inventory on eBay		
Image Sync [global]	Yes	▼
Sync images on eBay		
All Details Sync [global]	Yes	▼
Sync all details of product		
Archive Child Product [global]	No	▼
Choose whether child product need to be archived on eBay once it's parent config product is disabled or deleted		

37. Enable or disable the following fields:

- **Auto Sync:** If **Yes**, then it enables Auto update product information on the eBay website while Product Edit.
- **Price Sync:** If **Yes**, then it synchronizes the product price with the eBay website.
- **Inventory Sync:** If **Yes**, then it synchronizes the product inventory with the eBay website.
- **Image Sync:** If **Yes**, then it synchronizes the product image with the eBay website.
- **All Details Sync:** If **Yes**, then it synchronizes all the details of the product with the eBay website.
- **Archive Child Product:** If **Yes**, then the child product is archived on the eBay website once its parent config product is disabled or deleted.

38. Scroll down to the **eBay Order Setting** tab, and then click the tab.

The **eBay Order Setting** tab is expanded and the relevant fields appear as shown in the following figure:

eBay Order Setting

Order Notification Email
[global]

39. In the **Order Notification Email** box, enter an email notification message.
40. Scroll down to the **eBay Product Upload Setting** tab, and then click the tab.
The **eBay Product Upload Setting** tab is expanded and the relevant fields appear as shown in the following figure:

41. In the **Product Chunk Size** box, enter the size of the chunk.
42. Click the **Save Config** button.
The configuration is saved.

4. Manage Profile

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento store attributes to the eBay attributes. These attributes are applicable to all the products that are assigned to the profile.

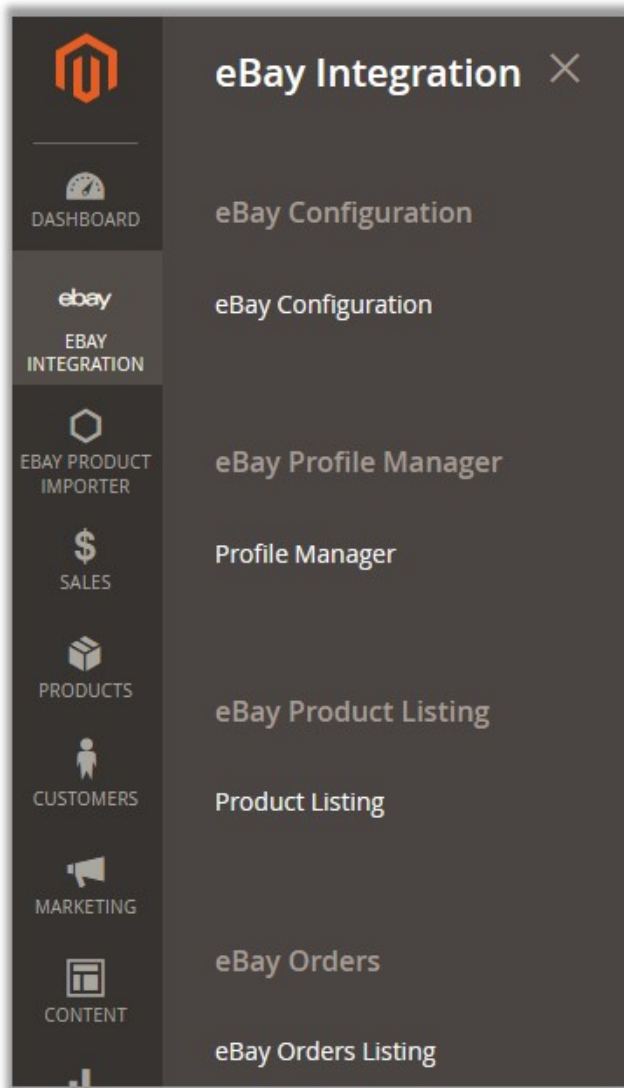

Admin can perform the following tasks:

- Add New Profile(<http://docs.cedcommerce.com/magento-2/ebay-magento-2-integration-guide-0-0-1?section=add-new-profile-2>)
- Edit the existing profile(<http://docs.cedcommerce.com/magento-2/ebay-magento-2-integration-guide-0-0-1?section=edit-the-existing-profile-3>)
- Delete Profile(<http://docs.cedcommerce.com/magento-2/ebay-magento-2-integration-guide-0-0-1?section=delete-profile>)
- Submit Actions on the Manage Profile Page(<http://docs.cedcommerce.com/magento-2/ebay-magento-2-integration-guide-0-0-1?section=submit-actions-on-the-manage-profile-page>)

4.1. Add New Profile

To add new profile

1. Go to the Admin panel.
2. On the left navigation bar, click the **EBAY INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Profile Manager**.

The **Manage Profile** page appears as shown in the figure:

Manage Profile					
<div> <div> <div></div> <div></div> <div>admin</div> </div> <div>Add New Profile</div> </div>					
<div> <div>Filters</div> <div>Default View</div> <div>Columns</div> </div>					
<div> <div>Actions</div> <div>3 records found</div> <div>20 per page</div> <div>1 of 1</div> </div>					
ID	Profile Code	Profile Name	Status	Action	
1	profile1	Profile 1	Enabled	Edit	
2	profile2	Profile 2	Enabled	Edit	
3	testingprofile	Testing Profile	Enabled	Edit	

On this page all the available profiles are listed.

- Click the **Add New Profile** button.

The page appears as shown in the following figure:

The screenshot shows a web interface titled "New Profile". At the top right, there are icons for search, notifications, and a user profile labeled "admin". Below the title bar, there is a navigation bar with buttons: "Back", "Delete", "Reset", "Save and Continue Edit", and a prominent orange "Save" button. On the left side, there is a sidebar menu under the heading "PROFILE INFORMATION" with three items: "Profile info" (highlighted with an orange bar), "Category & Attribute", and "Profile Products". The main content area is titled "Profile Information" and contains three fields: "Profile Code" with a red asterisk and a text box below it stating "For internal use. Must be unique with no spaces"; "Profile Name" with a red asterisk and a text box; and "Profile Status" with a dropdown menu currently showing "Disabled".

- In the right panel, under **Profile Information**, do the following steps:
 - In the **Profile Code** box, enter a profile code.
Note: It is only for the internal use. Use the unique profile code with no spaces. Start with small letters.
 - In the **Profile Name** box, enter the name of the profile.
Note: Use the unique name to identify the profile.
 - In the **Status** list, select **Active** to enable the profile.
Note: The Inactive option disables the profile.
- In the left navigation panel, click the **Category & Attribute** menu.
The page appears as shown in the following figure:

7. In the right panel, under **Category Mapping**, do the following:

a. In the **Root Level Category** list, select the required category that the admin wants to map.

Note: As soon as the admin selects the root category, the **Level 1 Category** list is enabled with the list of the required sub-categories based on the **Root Level Category** selection.

b. In the **Level 1 Category** list, select the required sub-category that the admin wants to map.

Notes:

- ` Once again, based on the **Level 1 Category** selection the **Level 2 Category** list is enabled with the list of the required sub-categories relevant to **Level 1 Category**.
- ` Every time the admin selects the category or sub-category, the next level category list is enabled with the respective sub-categories list.
- ` The **Category has no leaf category** option means there are no further sub-categories for the selected category or sub-category.

The screenshot shows a form titled "Category Mapping" with four rows of category selection. Each row consists of a label, a star icon, a text input field, and a dropdown arrow. The selections are as follows:

Category Level	Selected Category
Root Level Category *	Business & Industrial
Level 1 Category *	Construction
Level 2 Category *	Levels & Surveying Equipment
Level 3 Category *	Total Stations & Accessories

3. Click the **Save and Continue** button.

8. Scroll down to the **Ebay-Magento Category Dependent Attributes Mapping** section.

Note: Depending upon the selection of the category and the sub-categories, the eBay and Magento store attributes appear under the **Ebay-Magento store Category Dependent Attributes Mapping** section. It means the attributes available are dependent upon the selected the last level category. Admin can map the Magento Catalog Attribute to the required eBay Attribute.

procode123

For internal use. Must be unique with no spaces

Profile Name *

praname

Profile Status

Enabled

4. On the top navigation bar, click the **Delete** button.
A confirmation dialog box appears as shown in the following figure:

Are you sure you want to do this?

Cancel

OK

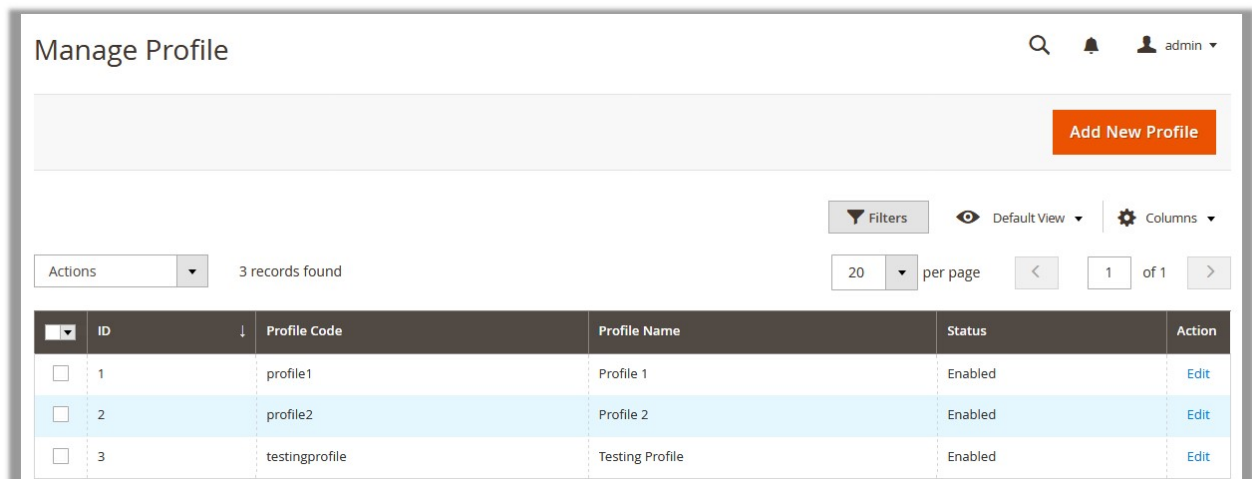

5. Click the **OK** button.
The profile is deleted.

4.4. Submit Actions on the Manage Profile Page

Admin can delete the selected profiles and also can enable or disable the selected profiles through bulk action.

To delete the selected profiles through Bulk action

1. Go to the **Magento Admin** panel.
2. On the left navigation bar, click the **EBAY INTEGRATION** menu, and then click **Profile Manager**.
The page appears as shown in the following figure:

On this page all the available profiles are listed.

3. Select the check boxes associated with the required profiles that the admin wants to delete at once.
4. Click the **Arrow** button next to the **Actions** field.

The menu appears as shown in the following figure:

5. Click **Delete**.

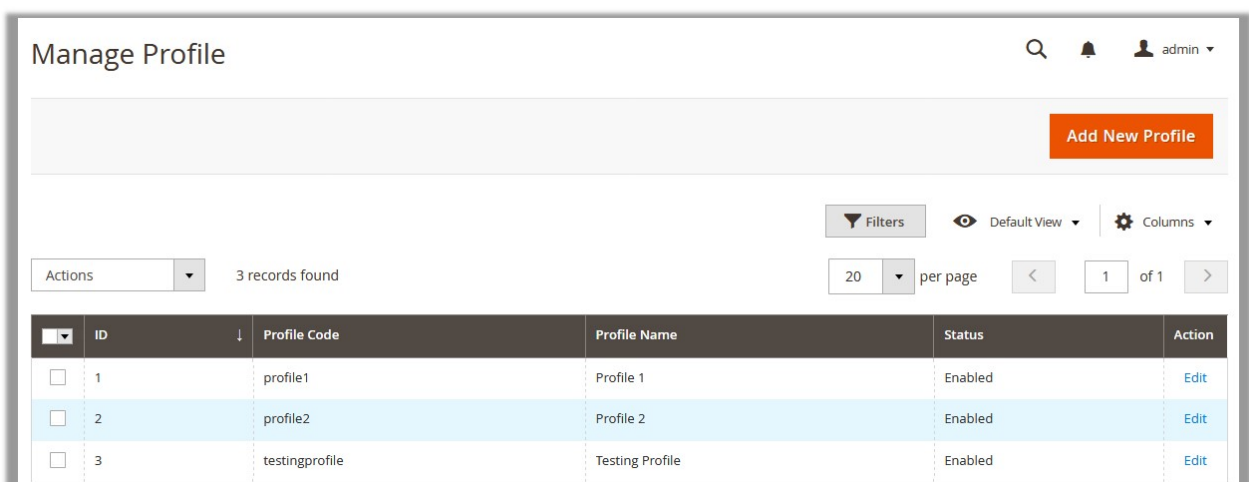

A confirmation dialog box appears as shown in the following figure:

- Click the **OK** button.
All the selected profiles are deleted at once.

To enable or disable the selected profiles through Bulk action

- Go to the **Magento Admin** panel.
- On the left navigation bar, click the **EBAY INTEGRATION** menu, and then click **Profile Manager**.
The page appears as shown in the following figure:

On this page, all the available profiles are listed.

- Select the check boxes associated with the required profiles.
- Click the **Arrow** button next to the **Actions** field.
The menu appears as shown in the following figure:

- Click the **Disable** or **Enable** option based on the current status and requirement.

The status is changed and a success message appears.

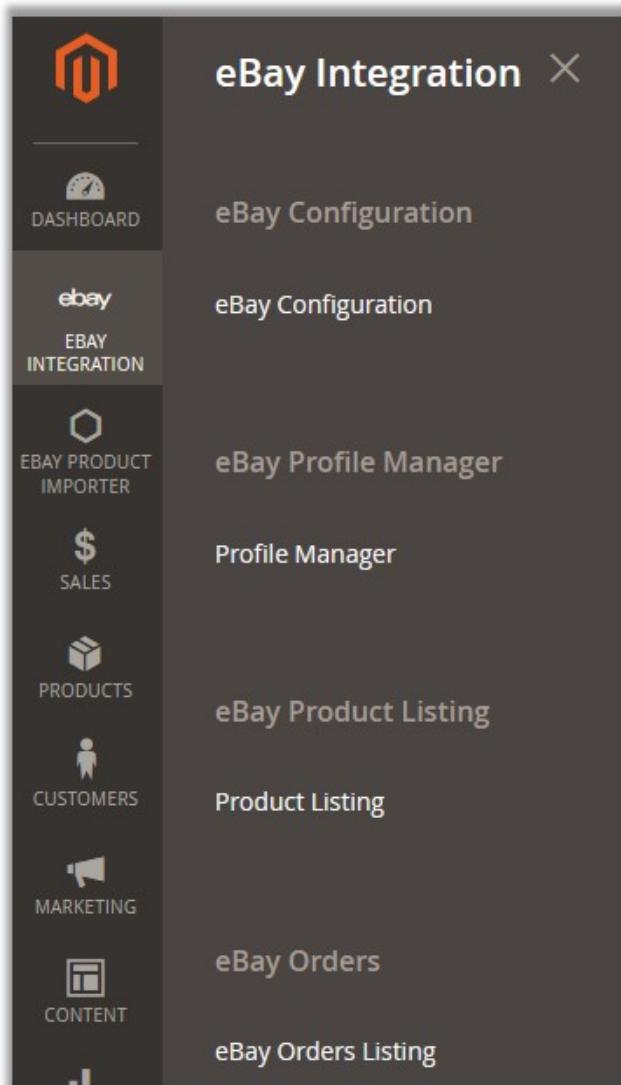

5. eBay Product Listing

Admin can perform the following tasks:

- Selected Product Upload
- Bulk Product Upload
- Synchronize Inventory and Price

To upload selected products on eBay

1. Go to the Admin panel.
2. On the left navigation bar, click the **EBAY INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Product Listing**.

The **eBay Product Listing** page appears as shown in the following figure:

ID	Image	Name	Type	SKU	Price	Quantity	eBay Product Status	Action	Visibility	Status
6		Fusion Backpack	Simple Product	24-MB02	\$59.00	1240.0000		Edit	Catalog, Search	Enabled
7		Impulse Duffie	Simple Product	24-UB02	\$74.00	100.0000		Edit	Catalog, Search	Enabled
10		Savvy Shoulder Tote	Simple Product	24-WB005	\$32.00	100.0000		Edit	Catalog, Search	Enabled
11		Endeavor Daytrip Backpack	Simple Product	24-WB06	\$33.00	100.0000		Edit	Catalog, Search	Enabled

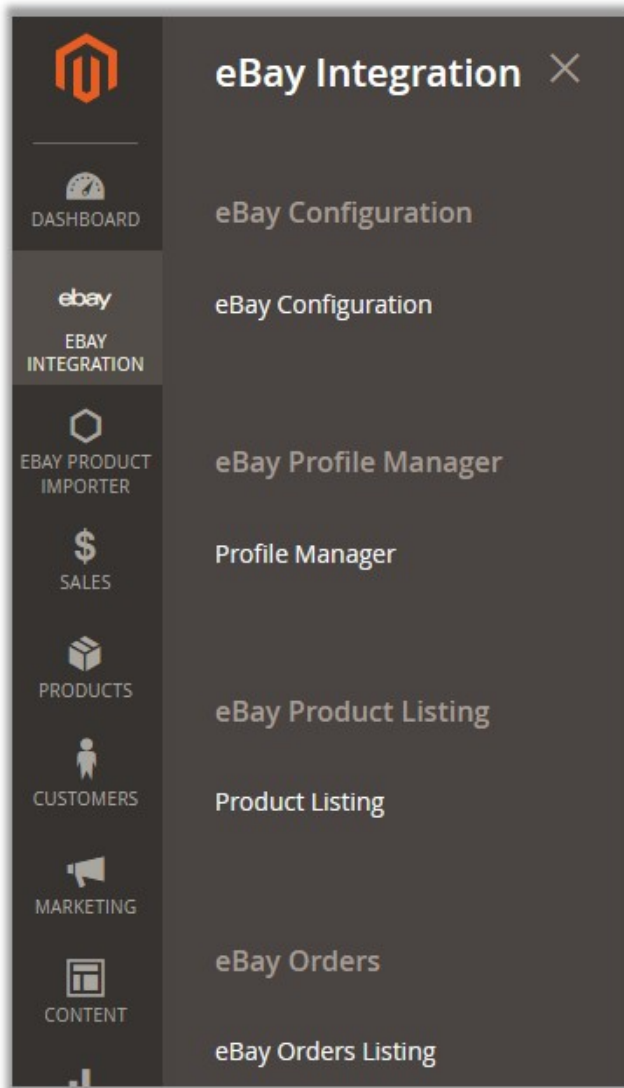

4. Select the check boxes associated with the required products that the admin wants to upload.
5. Click the **Arrow** button next to the **Actions** list, and then click **Selected Product Upload**.
A Confirmation dialog box appears as shown in the following figure:

6. Click the OK button.
If the products are valid, then only the selected products are uploaded on eBay. Otherwise, an error message appears for the specific products that are not valid.

To upload all the products on eBay

1. Go to the Admin panel.
2. On the left navigation bar, click the **EBAY INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Product Listing**.

The **eBay Product Listing** page appears as shown in the following figure:

6. eBay Orders Listing

The admin can fetch and view all the order details fetched from eBay. Also, the admin is allowed to ship or cancel the eBay product orders.

To Fetch new orders from eBay

1. Go to the Admin panel.
2. On the left navigation bar, click the **EBAY INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **eBay Orders Listing**.
The **eBay Order List** page appears as shown in the following figure:

eBay Order List				
				Fetch New Orders
<div> <div>Filters</div> <div>Default View</div> <div>Columns</div> </div>				
1 records found				
<div>20 per page</div> <div>1 of 1</div>				
<input type="checkbox"/>	Magento Order id	eBay Order Id	Order Place Date	eBay Order Status
<input type="checkbox"/>	000000073	110203823579-28669042001	2017-06-24	shipped

- On the top navigation bar, click the **Fetch New Orders** button.
All the available orders are listed on the page.

To Ship or Cancel orders

- On the **eBay Order List** page, scroll down to the product that the admin wants to ship or cancel.
- In the **Magento Order#** column, click the link associated with the required order.
The page appears as shown in the following figure:

#000000073		<div> <div>Back</div> <div>Send Email</div> <div>Credit Memo</div> <div>Reorder</div> </div>									
<div> <div>ORDER VIEW</div> <div> <div>Information</div> <div>Invoices</div> <div>Credit Memos</div> <div>Shipments</div> <div>Comments History</div> <div>Transactions</div> <div>Ship eBay Order</div> </div> </div>		<div>eBay Order Information</div> <div> <div>Order Placed on eBay</div> <div>Saturday, June 24th 2017</div> </div> <div> <div>Shipping Carrier</div> <div>USPS Priority</div> </div> <div> <div>Tracking Number</div> <div></div> </div> <div> <div>eBay Delivery Date</div> <div></div> </div> <div>Shipment Order Items</div> <table> <tr> <th>Product sku</th><th>Quantity ordered</th><th>Quantity to Ship</th><th>Quantity to Cancel</th></tr> <tr> <td>24-UG06</td><td>1</td><td>1</td><td>0</td></tr> </table> <div>Submit Shipment</div>		Product sku	Quantity ordered	Quantity to Ship	Quantity to Cancel	24-UG06	1	1	0
Product sku	Quantity ordered	Quantity to Ship	Quantity to Cancel								
24-UG06	1	1	0								

- In the right panel, under **eBay Order Information**, do the following steps:
 - In the **Tracking Number** box, enter a value.
 - In the **eBay Delivery Date** box, click the **Calendar** icon, and then enter the required date.
- In the right panel, under Shipment Order Items, do the following steps:
 - In the **Quantity to Ship** box, enter a value.
The number of quantity that the user can ship. The value cannot be greater than the **Qty Available for Ship** value.

- b. In the **Quantity to Cancel** box, enter a value.
The number of quantity that the user wants to reject. The value cannot be greater than the **Qty Available for Ship** value.
- c. Click the **Submit Shipment** button.
The success message appears, if the order is shipped successfully.
