1. Overview

Amazon is the largest online retailer in the worldwide. The company was originally a bookseller but has expanded to sell a wide variety of consumer goods and digital media and also its own electronic devices such as the e-book reader, tablet, and so on.

Amazon Marketplace is an e-commerce platform owned and operated by Amazon.com that enables the third-party sellers to sell new or used products on a fixed-price online marketplace alongside the regular offerings of Amazon. Using Amazon Marketplace, the third-party sellers can gain the access to the customer base of Amazon, and it expands the offerings on its website without having to invest in additional inventory.

Amazon Integration for Magento 2 store is an amazing API integration that helps Magento® 2 store owners to synchronize inventory, price, and other product details for product creation and management between Magento® 2 store and the Amazon marketplace.

The **Amazon Integration for Magento 2 Integration** extension interacts with the Amazon marketplace to integrate the synchronized product listing between Magento® 2 store and Amazon retailers. After the installation, the merchant can create Amazon categories and the dependent attributes on the Magento® 2 store.

It enables admin to perform product related task such as product upload and product view using bulk management system.

With the help of this extension, the store owners can create a profile in which they can assign the products and then can upload to Amazon.com. It enables the Magento store owner to manage the Amazon orders on the Magento stores without making any significant changes in the operational functionalities.

You can boost up your business at Amazon by integrating your store as it interacts with the Amazon APIs to connect your Magento store to the Amazon marketplace and thus, you have the opportunity to cover a wide range of customers.

The Magento® 2 store owners can boost their business at Amazon by integrating their store as it interacts with the Amazon APIs to connect their Magento store to the Amazon marketplace and thus, they have the opportunity to cover a wide range of customers.

Key features are as follows:

- **Cron:** Cron jobs automate the process to fetch the Amazon orders from the Amazon marketplace to the Magento® of customers.
- **Debug Mode:** Provides easy debug process for hassle-free product upload to the Amazon marketplace.
- **Product Category Mapping:** Follow many to one category mapping methodology. Admin can map many categories of Magento® 2 store to a single category of Amazon.
- **Profile Based Products Upload:** Admin can create a profile and after assigning the products to the profile can easily upload on Amazon.
- **Simple Product Upload:** It enables admin to upload simple type of product on Amazon.com.
- **Auto Acknowledgement of Order:** Admin receives an acknowledgement of Orders automatically as soon as orders are created.
- **Automated Synchronization:** Auto synchronization of the product listing, order, inventory, return, and refund, and pricing at regular intervals is established between Magento® 2 store and Amazon.com.
- **Product Data Validation:** The extension enables the admin to validate the product information in accordance with Amazon standard and values.
- **Low Stock Notifications:** Whenever the stock diminishes lower than the threshold, a notification is sent informing the status of the same.
- **New Order Notifications:** Whenever a new order is fetched from Amazon.com, the admin receives a notification.
- **Rejected products notification:** If any product containing some invalid details is rejected, then its information is fetched from the auto synchronization request along with the error due to which it is rejected.

2. Amazon Magento 2 Store Integration Extension Installation

To install the extension

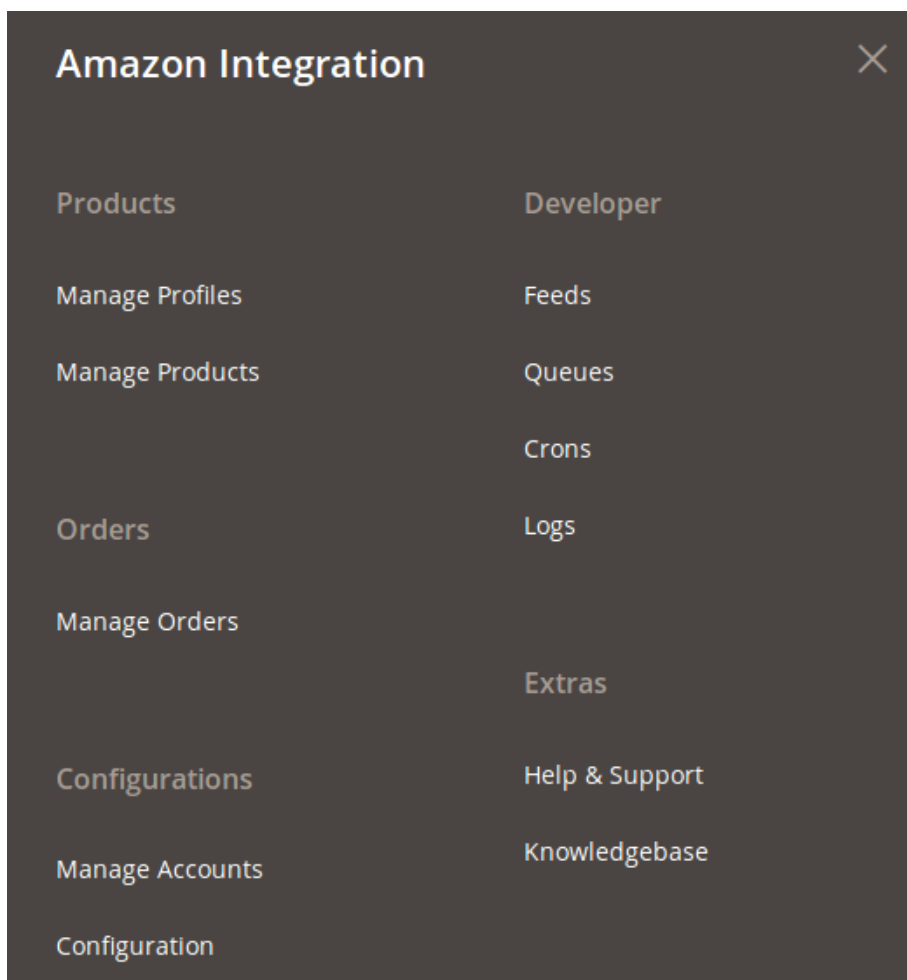

1. Log in the **ftp**, and then go to Magento 2 root folder (generally present under the *public_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
 - Upload or Drag and Drop *app/code/Ced/Amazon* directory.
 - After successfully uploading the directory, the extension will be installed/upgraded.
 - Now run the following upgrade command in *cmd*
php bin/magento setup:upgrade.

3. Amazon Integration Configuration Settings

Once the extension is successfully installed in the Magento 2 store, the **AMAZON INTEGRATION** menu appears on the left navigation bar of the Magento 2 store Admin panel. The merchant has to first create a seller account in the Amazon seller panel. Once the seller account is created and is approved by Amazon, the Magento 2 store owners have to obtain the AWS API Key values from the Amazon Seller account, and then the Magento® 2 store owners has to paste it in the respective fields displayed on the **Amazon Configuration** page of the admin panel.

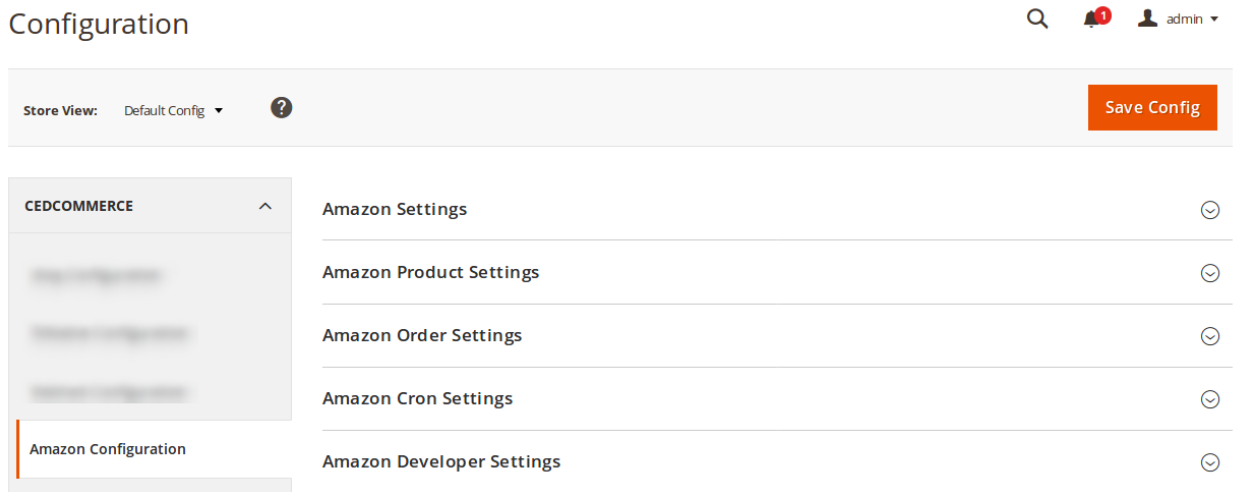

To set up the configuration settings in the Magento 2 Admin panel

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Configuration**.

The **Configuration** page appears as shown in the following figure:

4. In the right panel, click the **Amazon Settings** tab.

The **Amazon Settings** tab is expanded and the relevant fields appear as shown in the following figure:

5. Under **Amazon Settings**, do the following:

- a. In the **Enabled** list, select the **Yes** option.

6. Scroll down to the **Amazon Product Settings** tab, and then click the tab.

The **Amazon Product Settings** tab is expanded and the expanded section appears as shown in the following figure:

7. Click **Amazon Chunk Settings**, the section will expand as:

⏪ Amazon Chunk Settings

Product Queue Chunk Size
[global]

Enter the size of a chunk for a product upload queued task

Product Feed Chunk Size
[global]

Enter the size of a chunk for a product upload feed

Price Queue Chunk Size
[global]

Enter the size of a chunk for a price queued task

Price Upload Feed Chunk Size
[global]

Enter the size of a chunk for a price feed

Inventory Queue Chunk Size
[global]

Enter the size of a chunk for a inventory queued task

Inventory Feed Chunk Size
[global]

Enter the size of a chunk for a inventory feed

- i. In the **Product Queue Chunk Size** box, enter the size number of a chunk for a product upload queued task.
- ii. In the **Product Feed Chunk Size** box, enter the size number of a chunk for a product upload feed.
- iii. In the **Price Queue Chunk Size** box, enter the size number of a chunk for a price queued task.
- iv. In the **Price Upload Feed Chunk Size** box, enter the size number of a chunk for a price feed.
- v. In the **Inventory Queue Chunk Size** box, enter the size number of a chunk for an inventory queued task.
- vi. In the **Inventory Feed Chunk Size** box, enter the size number of a chunk for an inventory feed.

8. Click **Amazon Price Settings**, the tab gets expanded as:

⏪ Amazon Price Settings

Product Price
[global] ▼

Select to send a different product price to **Amazon**

i. In the **Product Price** list, select one of the following options:

Increase by Fixed Price: If selected, then the **Modify by Fix Price** field appears.

Increase by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the **Amazon**, product price by the entered value % of the Magento 2 store price.

For Example,

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

Modify by Percentage Price = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Amazon Product Price = 105

Decrease by Fixed Price: If selected, then the **Modify by Fix Price** field appears.

Decrease by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the Amazon product price by the entered value % of Magento 2 price

For Example,

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

Modify by Fix Price = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Amazon Product Price = 95

9. Click on **Amazon Inventory Settings**, the tab gets expanded as:

Amazon Inventory Settings

Inventory Fulfillment Latency <small>[global]</small>	0
	Days to fulfill the inventory on amazon in case of out of stock
Set Inventory on Basis of Threshold <small>[global]</small>	Disable ▼
	Choose yes to send inventory on amazon by condition

10. In the **Inventory Fulfillment Latency** box, enter the number of days to fulfill the inventory on Amazon in case of the product is out of stock.

11. In the **Set Inventory on Basis of Threshold** list, select the **Enable** option if required to set the inventory based on threshold.

i. **Note:** Only when the admin selects **Enable**, the other fields appear. Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock.

12. The section will expand as:

⏪ Amazon Inventory Settings

Inventory Fulfillment Latency [global]

Days to fulfill the inventory on amazon in case of **out of stock**

Set Inventory on Basis of Threshold [global]

Choose yes to send inventory on amazon by condition

Inventory Threshold Value [global]

Set inventory quantity on which lesser and greater condition can control.

Send Inventory for Lesser Than Threshold Case [global]

Send Quantity to Amazon for those products, whose inventory is LESSER than the inventory threshold.

Send Inventory for Greater Than Threshold Case [global]

Send Quantity to Amazon for those products, whose inventory is GREATER than the inventory threshold.

- 13.
14. In the **Inventory Threshold Value** box, enter the required value.
15. In the **Send Inventory for Lesser Than Threshold Case** box, enter the required value.
16. In the **Send Inventory for Greater Than Threshold Case** box, enter the required value.
17. Scroll down to the **Amazon Order Settings** tab, and then click the tab.
The tab is expanded and the section appears as shown in the following figure:

Amazon Order Settings

Auto invoice imported order <small>[global]</small>	Disable	▼
	<small>Auto Invoice Order Imported from Amazon in any case of successful import.</small>	
Auto acknowledge imported orders <small>[global]</small>	Disable	▼
	<small>Auto acknowledge order on Amazon in any case of successful import.</small>	
Auto cancel failed order <small>[global]</small>	Disable	▼
	<small>Auto Cancel Order on Amazon in any case of failure such as 'No Inventory'.</small>	
Amazon order id prefix <small>[global]</small>	AMZN	
	<small>Prefix for Amazon Increment ID</small>	
Enable Notification <small>[global]</small>	Disable	▼
	<small>Order import notification via email to store admin</small>	
Enable Default Customer <small>[global]</small>	No	▼

18. Under **Amazon Order Settings**, do the following steps:

- a. In **Auto Invoice Imported Order**, select **Enable** if you want auto invoice order imported from Amazon in any case of successful import.
- b. In **Auto acknowledge imported orders**, select **Enable** if you want the orders to be acknowledged automatically in case of successful import.
- c. In the **Auto Cancel Failed Order** box, select the **Enable** option to auto cancel the orders on Amazon in any case of failure such as **No Inventory**.
- d. In the **Amazon Order Id Prefix** box, enter the required order Id prefix.
- e. In the **Enable Notification** list, select the **Enable** option to get order import notification via email. The field appears as shown in the following figure:

Notification Email <small>[global]</small>	
--	--

- f. In the **Notification Email** field, enter the email id on which you may get the notifications.
- g. In the **Enable Default Customer** field, select the **Yes** option to enable the default customer.
 - i. The field appears as shown in the following figure:

Default Customer <small>[global]</small>		▼
--	--	---

- h.
 - i. In the **Default Customer** list, select the required customer name.
19. Click **Amazon Cron Settings** and the section will expand as:

Amazon Cron Settings

Order Cron [global]	Enable	▼
	Order Fetch Cron	
Price Cron [global]	Enable	▼
	Price Sync Cron	
Inventory Cron [global]	Enable	▼
	Inventory Sync Cron	
Shipment Cron [global]	Enable	▼
	This will automatically generate shipments	

- 20.
21. In the **Order Cron** list, select the **Enable** option to enable the fetch order cron.
22. In the **Price Cron** list, select the **Enable** option to enable the price sync cron.
23. In the **Inventory Cron** list, select the **Enable** option to enable the inventory sync cron.
24. In the **Shipment Cron** list, select the **Enable** option to enable the shipment cron and to generate shipments automatically.
25. Scroll down to the **Amazon Developer Settings** tab, and then click the tab.
The tab is expanded and the section appears as shown in the following figure:

Amazon Developer Settings

Throttle Mode [global]	Enable	▼
	Enable throttled api use.	
Debug [global]	Enable	▼

- 26.
27. In the **Throttle Mode** list, select the **Enable** option to restrict the API use if required.
28. In **Debug**, select **Enable** for the logs to be created.
29. Click the **Save Config** button to save the entered values and information. Configuration will be saved.

4. Manage Accounts

In the Manage Accounts section, the Amazon accounts can be managed- Added, Edited, Viewed, and Deleted.

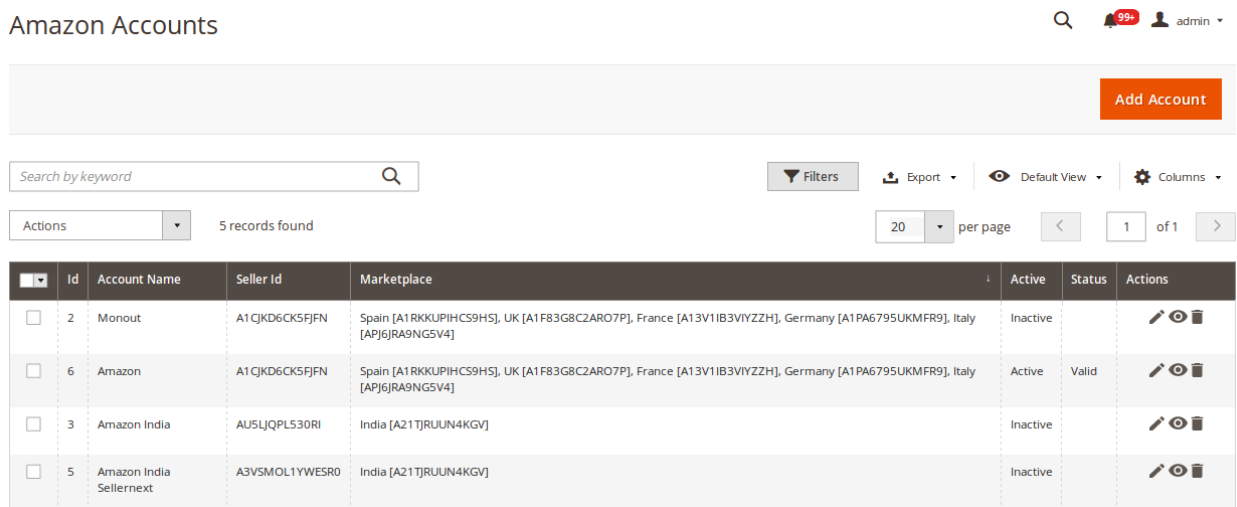

To add the account.

1. Go to the **Magento 2 Store Admin**
2. On the left navigation bar, click the **AMAZON INTEGRATION**
A menu appears as shown in the following figure:

3. Click **Manage Accounts**.

The **Manage Accounts** page appears as shown in the following figure:

4. Click the **Add Account**

The page appears as shown in the following figure:

Account Information

Account Name *

Active * ▾

Status ▾

Api Information ⌵

Store ⌵

Developer ⌵

5. Enter the **Account Name** in the corresponding field.
6. In **Active**, select **Yes**.
7. Now scroll down and click **Api Information**. The section will expand as:

To edit the existing profile

1. Go on **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu, and then click **Profile Manager**.
The **Manage Profile** page appears as shown in the following figure:

Manage Profile

The screenshot shows the 'Manage Profile' interface. At the top right, there is a search icon, a notification badge with '99+', and a user profile icon labeled 'admin'. Below this is a white bar with an orange 'Add New Profile' button. Underneath are controls for 'Filters', 'Default View', and 'Columns'. A table shows two records. The first record has an 'Edit' button highlighted with a red box and a red arrow pointing to it. The second record also has an 'Edit' button. Below the table are 'Actions' and '2 records found' indicators, and a pagination control showing '20 per page' and '1 of 1'.

	Id	Account	Store	Profile Name	Parent Category	Sub Category	Marketplace	Status	Actions
<input type="checkbox"/>	1	Amazon India Id:3	Default Store View	Amazon	DefaultCategory	DefaultCategory	A21TJRUN4KGV	Enabled	  
<input type="checkbox"/>	5	Amazon India Sellernext Id:5	Malaysia View	Home	Beauty	BeautyMisc	A1AM78C64UM0Y8	Enabled	  

3. Scroll down to the required profile row.

4. In the **Action** column of the respective row, click the **Edit** button as highlighted in the above image. The profile editing page appears as shown in the following figure:

6. Amazon Product Listing

On this page, admin can view, edit, and validate the individual product. Also, the admin can view the error message if any error exists in any product details. After uploading the product on Amazon or after updating the product inventory or the product price, the user can check the status of the feed. Also, the admin can view the feed error if any. The admin can submit certain actions on the selected products available on the **Amazon Product Listing** page.

This section covers the following topics:

- View the Product Details(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=view-the-product-details-7>)
- Edit the Amazon Products(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=edit-the-amazon-products>)
- Synchronize the Single Product(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=synchronize-the-amazon-products-between-amazon-and-the-magento-2-store>)
- Submit Bulk Action on the Selected Products(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=submit-bulk-action-on-the-selected-products-7>)

6.1. View the Product Details

To view the product details

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Manage Products**.
The **Amazon Products Listing** page appears as shown in the following figure:

The selected products are deleted and a success message appears on the page.

7. Manage Amazon Orders

Admin can do the following tasks while managing the Amazon orders:

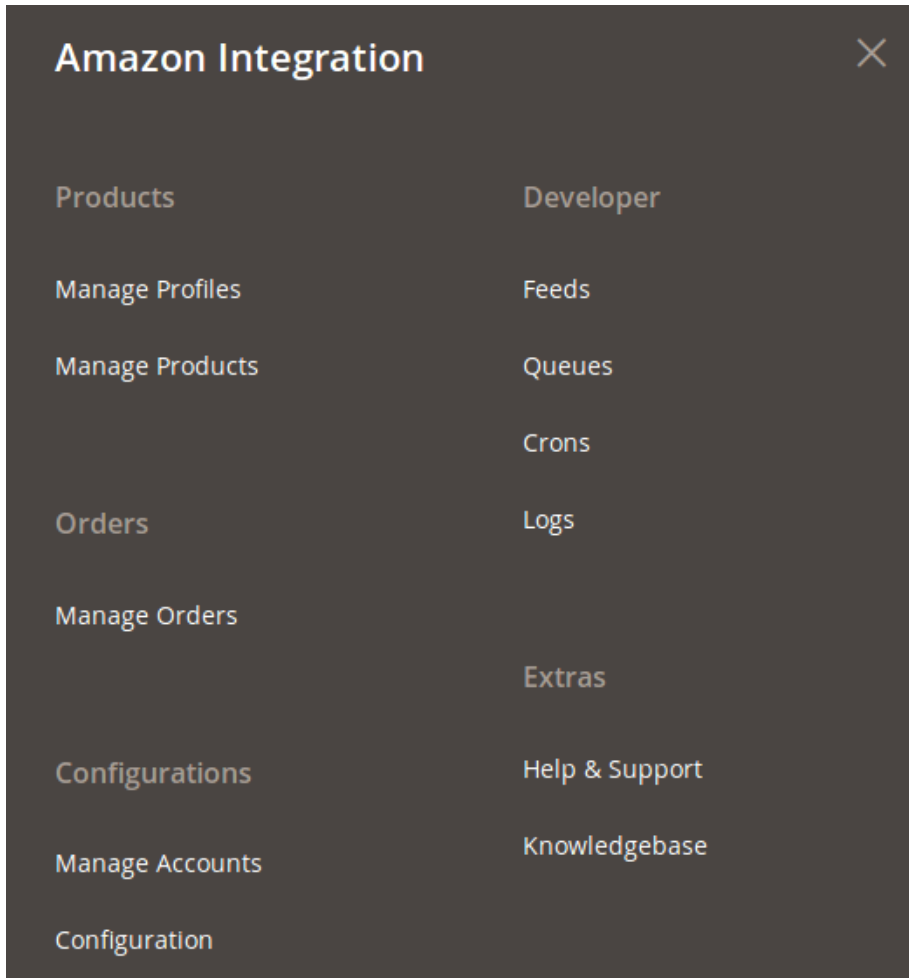

- Fetch, View, Ship, and delete the Amazon Orders(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=ship-and-delete-the-amazon-orders>)
- View and delete the Failed Orders(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=view-and-delete-the-failed-orders-5>)

7.1. Ship and Delete the Amazon Orders

The Magento 2 store owners can fetch the new orders and view all the order details fetched from Amazon. They can also ship the required orders and can delete the orders those are no more required.

To fetch and view new orders

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Manage Orders**.

The **Manage Amazon Orders** page appears as shown in the following figure:

Manage Amazon Orders 🔍 99🔔 admin ▾

4. Click the **Import Orders** button.

If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.

Notes:

- Orders are automatically imported through CRON in every 10 minutes.
- Whenever the latest orders are imported from Amazon, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento 2 store admin panel.
- If no order is imported, then check the Failed orders listed on the **Amazon Failed Order** page.
- Order are auto-rejected on Amazon in the following conditions:
 - When Amazon Product SKU does not exist in Magento 2 store.
 - When Product is Out of Stock in Magento 2 store.
 - When a product is disabled in Magento 2 store.

5. To View the Amazon order, do the following steps:

- a. Scroll down to the required order row.
- b. In Actions column of the respective row, click the **View** icon.

Create Shipment

6. In the right panel, under **Amazon Order Information**, do the following steps:
 - a. Click on **Create Shipment** button.

b. A box will appear as:

Create Marketplace Shipment
✕

Amazon Order Information

Amazon Order Id	123-1234567-4567890
Amazon Order Status	Shipped
Order Place Date	Thursday, October 11th 2012
Shipping Carrier	<input type="text" value="Select a carrier"/>
	or
	<input type="text" value="Provide a carrier name"/>
Shipping Method	<input type="text"/>
Tracking Number	<input type="text"/>
Fulfillment Date	<input type="text"/> <input style="float: right; width: 20px; height: 15px; border: 1px solid #ccc;" type="button" value="Calendar"/>

c. In the **Shipping Carrier** list, select the required shipping carrier.

OR

In the **Shipping Carrier Name** box, enter the required shipping carrier name.

d. In the **Shipping Method** box, enter the required shipping method.

e. In the **Tracking Number** box, enter the required value.

f. In the **Fulfillment Date** box, click the **Calendar** icon to enter the fulfillment date.

7. Scroll down to the **Shipment Order Items** section.

8. Under **Shipment Order Items**, enter the corresponding values in the following fields:

a. In the **Quantity to Ship** box, enter a value.

The number of quantity that the user can ship. The value cannot be greater than the **Qty Available for Ship** value.

b. In the **Quantity to Cancel** box, enter a value.

The number of quantity that the user wants to reject. The value cannot be greater than the **Qty Available for Ship** value.

c. In the **Select a reason** list, select a reason.

9. Click the **Submit Shipment** button.

A success message appears if the order is shipped successfully.

Notes:

- Order **Shipment** is sent to Amazon.
- Order **Invoice** and **Shipment** is created automatically in Magento Store.
- Order **Status** changes to **Complete** on Amazon.
- The **status** of order changes to **Completed** on Magento store.

To delete the Amazon Orders in bulk

1. To delete the selected Amazon orders in bulk, do the following steps:

a. Select the check boxes associated with the orders those are no more required.

b. Click the **Arrow** button next to the **Actions** list.

A menu appears as shown in the following figure:

- c. Click **Delete Order(s)**.
A confirmation dialog box appears.
- d. Click the **OK** button.
The selected orders are deleted from the Amazon Marketplace.

8. Amazon Feeds

After uploading the product on Amazon or after updating the product inventory or the product price, the user can check the status of the feed and sync the selected feeds from the **Amazon Feeds** page.

To view and manage the product feeds

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Feeds**.

The **Amazon Feeds** page appears as shown in the following figure:
