## 1. Overview

Walmart Canada Integration for Magento 2 store is an extension, developed by CedCommerce([https://marketplace.walmart.com/k/articles/Article/Integration-Methods-Channel-Partner?c=&q=channel%20partner&l=en\\_US&kb=](https://marketplace.walmart.com/k/articles/Article/Integration-Methods-Channel-Partner?c=&q=channel%20partner&l=en_US&kb=)) helps to integrate the Magento store with Walmart by establishing a synchronization of products, orders, and refunds with the help of Walmart Canada API.

The CRONs implemented in this extension help to automate the process thereby keeping it up to date.

This extension interacts with Walmart Canada Marketplace to integrate the synchronized product listing between the Magento 2 store and the Walmart Canada retailers. After installing the extension, the merchant can map with multiple Walmart Canada Categories and the dependent attributes on the Magento 2 store.

The process enables the merchant to configure the desired product category into the Magento 2 store for automatic submission of the selected product to the same Category on Walmart Canada.

***The features of the Walmart Canada Integration with Magento 2 store extension are as follows:***

- Profile Based Product Upload  
It allows you to Create a particular profile and Upload Products on the basis of the profile
- Easy Walmart Canada Category and Attribute mapping  
Choose among multiple categories and map attributes on the basis of categories Selected
- Manage Walmart Canada Product and Upload Product (directly from the grid and bulk upload all products)
- Product Synchronization
  - Automatic process on each product edit
  - Manual synchronization process
- Review Product/Inventory/Price Feeds  
Debug Mode Enables you to Check the feeds corresponding to every SKU Updated
- Automated Order Import & Acknowledgement  
This works on the basis of Crons(Automated Programs)
- Shipment and Cancellation of Orders  
Ship/Cancel Your orders In one Click
- Automated Shipment with Shipworks/Shipstation  
Our Extension is completely compatible with Shipworks/Shipstation
- Multiple Shipment of an Order  
Ship Multiple orders from Magento 2 store itself
- Create Refund  
Refunds Are also fetched and worked at Magento store level
- Upload Configurable Product(s)  
You can upload configurable products along with proper attributes
- Bulk Product Upload/Publish  
This Feature allows you to upload products in a bulk
- Retire/Unpublish Selected Product(s)  
With, this You can Select and Retire products as you need
- CRON Facility  
Crons are working for Order, Inventory, Price Auto-sync
- Knowledge Base

- Walmart Canada Tax Codes

### Caution

: Extension is heavily dependent on Crons for running various automated processes. So, make sure that Cron Job is properly configured and working on the server.

## 2. Walmart Canada Integration Installation

### To install the extension

1. Log in the **ftp**, and then go to Magento 2 root folder (generally present under the *public\_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
  - a. Drag and Drop *app/code/Ced/Walmart Canada* directory.
  - b. After successfully uploading the directory, the extension will be installed/upgraded.
  - c. Now run the following upgrade command in *cmd*  
*php bin/magento setup:upgrade*

## 3. Walmart Canada Configuration Settings

Once the extension is successfully installed on the Merchant's store, WALMART.CA INTEGRATION menu appears in the Magento 2 store Admin Panel. The merchant has to fill in the API credentials in the **Walmart Canada Configuration** page of the admin panel.

The user has to log in the Walmart Seller account to obtain the following API credentials:

- **Consumer Id**
- **Private Key**

After obtaining the Consumer Id and the Private Key, the merchant has to copy all of them one by one from the Walmart Canada Seller account and paste it one by one to the Configuration page of the admin panel of the merchant.

To follow the process of copying and pasting of the consumer ids and private keys, open the Walmart Seller account and the Magento 2 store Admin Panel in two different tabs or windows of the browser. Thus, copy the keys from the Walmart Canada Seller account and paste them one by one to the Magento store Admin Panel.

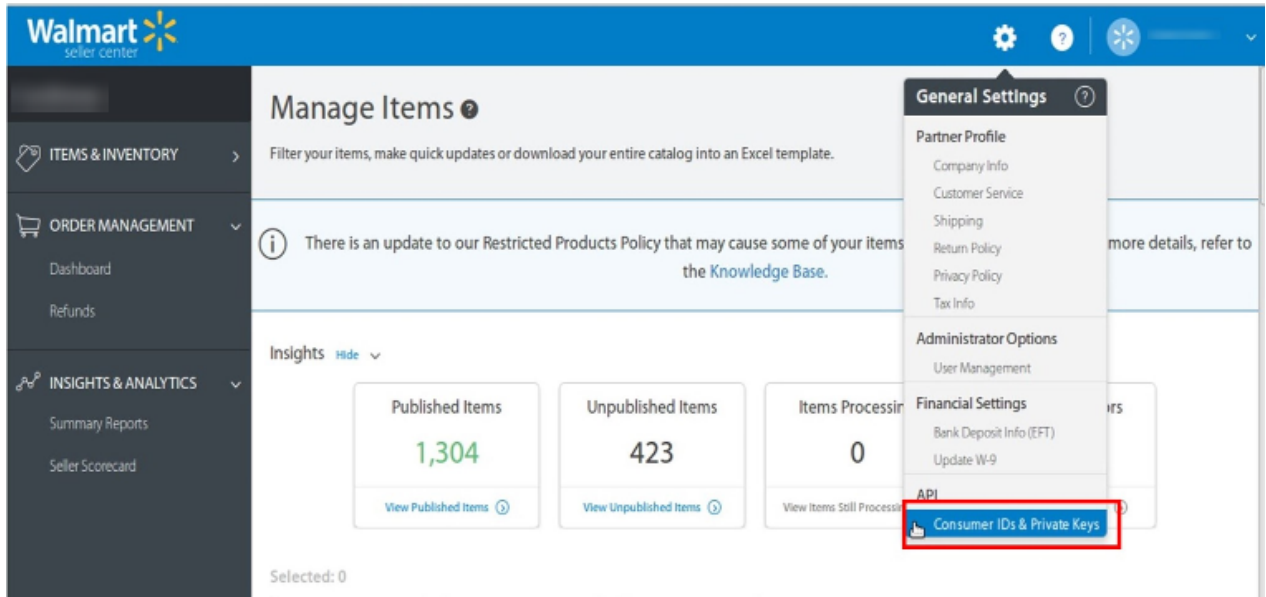

### To copy the API Credentials from the Walmart Canada Seller account

1. Open the **Walmart Canada Seller** account.
2. Click the **Settings**

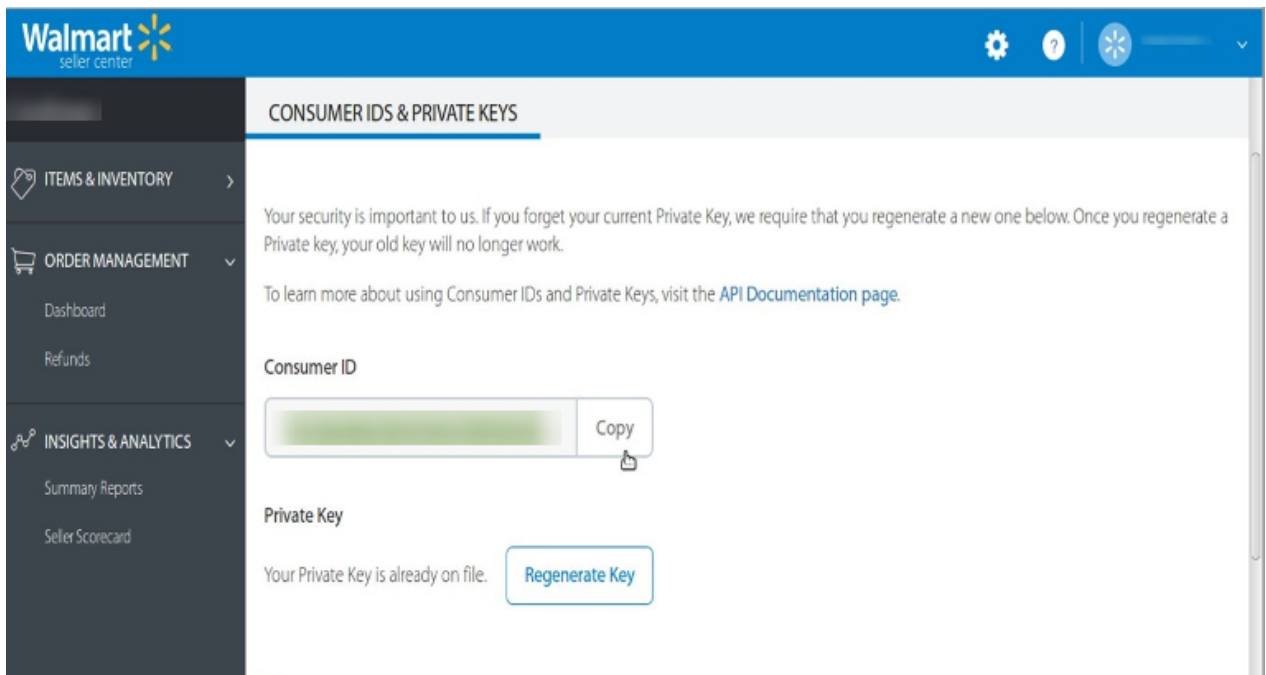

icon.

The **General Settings** menu appears as shown in the following figure:

3. Under **API**, click **Consumer IDs & Private Keys**.  
The page appears as shown in the following figure:

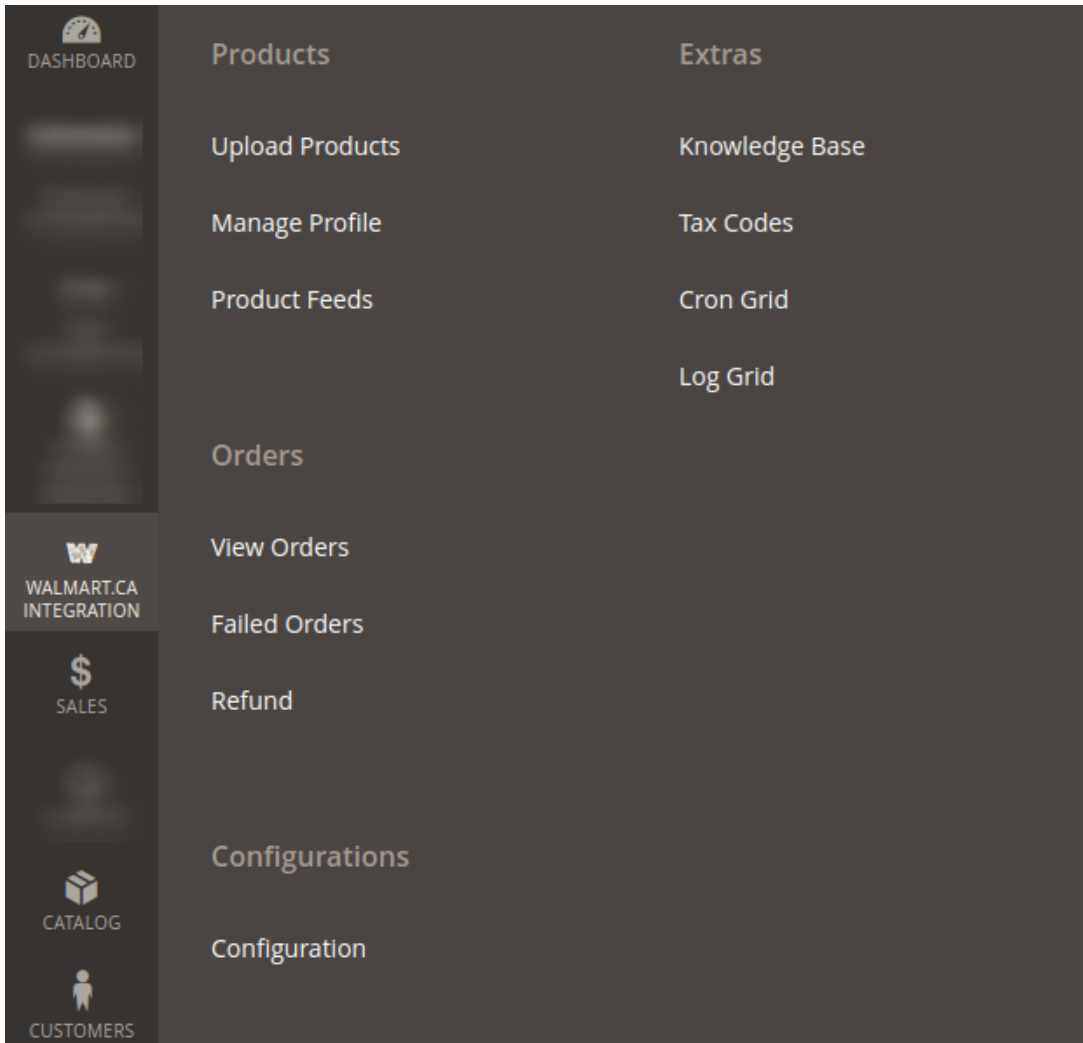

4. Under **Consumer ID**, click the **Copy** button.
5. Under **Private Key**, click the **Regenerate Key** button.  
The **Regenerate Secret Key** dialog box appears as shown in the following figure:

6. Click the **Yes, Regenerate Key** button.  
The key is generated. Copy the generated key.

***To Set up the Configuration settings in the Magento 2 store Admin panel***

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu.  
The menu appears as shown in the following figure:

1. Click **Configuration**.

The **Configuration** page appears as shown in the following figure;

## Walmartca Api Settings

**Enabled** [global] Yes

**API URL** [global] https://marketplace.walmartapis.com/  
https://marketplace.walmartapis.com/

**Consumer Id** [global]

**Private Key** [global]

**Orders Fetch Start Date** [global] 2018-09-27

**Validation**

- In the right panel, under **Walmart Ca API Settings**, do the following steps:
  - In the **Enabled** list, select **Yes**.  
**Note:** The **No** option hides all the relevant fields that appear under the **Walmart Ca API Settings** section. The **WALMART.CA INTEGRATION** menu does not appear on the left navigation bar.
  - In the **Consumer Id** box, paste the corresponding **Consumer ID** copied from the **Consumer IDs & Private Keys** page of the **Walmart Seller Account**.
  - In the **Private Key** box, paste the corresponding **Private Key** copied from the **Consumer IDs & Private Keys** page of the **Walmart Canada Seller Account**.
  - In the **Orders, Fetch Start Date** box, click the calendar icon, and enter the date.  
The date when the user starts to fetch the order.
  - Now click on the **Validate Details** button to verify the details.
- Click the **Product Global Settings** tab.  
The tab is expanded and the relevant fields appear as shown in the following figure:

## Product Global Settings

Please set the global settings for Walmartca.com

**Walmartca Product Price** [global] Default Magento Price

**Inventory Fullfillment Lag Time** [global] 1  
Days to fulfill the inventory on **out of stock**

**Product Identifier Type** [global] UPC  
Product Identifier Type to be applied on each product for **walmartca.com**

- a. Under Product Global Settings, do the following steps:
- b. In the **Walmart Product Price** list, select the required option.
- c. **Walmart Product Price**: This is to set a different price for all the products as shown in the following figure:  
The user can set the price on the following basis: –

- **Increase by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.
- **Increase by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.  
Enter the numeric value to increase the price of the Walmart Canada product price by the entered value % of Magento price  
*For Example – Magento price + 5% of Magento price.*  
Magento Price = 100  
Select **Increase By Fixed Percentage** option  
**Modify by Percentage Price = 5**  
 $100 + 5\% \text{ of } 100 = 100 + 5 = 105$   
Thus, Walmart Canada Product Price = 105
- **Decrease by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.
- **Decrease by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.  
Enter the numeric value to decrease the price of the Walmart product price by the entered value % of Magento price  
*For Example – Magento price – 5% of Magento price.*  
Magento Price = 100  
Select **Decrease By Fixed Percentage** option  
**Modify by Percentage Price = 5**  
 $100 - 5\% \text{ of } 100 = 100 - 5 = 95$   
Thus, Walmart Product Price = 95

1. In the **Inventory Fulfillment Lag Time (Default)** box, enter the number of days to fulfill the inventory when the product is out of stock.
- 2.

In the **Product Identifier Type** attribute, select the options according to your products unique identifiers.

In the **Product Tax Code Value** box, enter 7 digit product tax code.

**Product Tax Code Value**  
[global]

Category Wise Tax Code for Category **Animal** to be applied on each product for **walmartca.com**

Or Click the **Select Taxcode** button.  
The **Find a Tax Code** page appears as shown in the following figure:

Find a Tax Code ✕

Search Key

Tax Code	Category	Category Description	Action
2043138	SST Testing Codes Not for General Use	SST Matrix Testing SKU 61220 not for general use	<input type="button" value="Select"/>
2044217	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Single serving.	<input type="button" value="Select"/>
2044218	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Package of 2 containers.	<input type="button" value="Select"/>

## 4. Walmart Canada Products

Admin can manage products, create a new profile and assign the required products to the profile. While creating and editing the profile, the admin can map the Magento store attributes to the Walmart Canada attributes. These attributes are applicable to all the products that are assigned to the profile.

### **Admin can do the following tasks:**

- Upload Single Product, View Error Log, and Edit Product Information
- Submit Actions on the Manage Products page
- Add new profile
- Edit the existing profile
- Delete the profile
- Submit Actions on the Manage Profile page

## 4.1. Manage Products

On this page, admin can view, edit, and upload the individual product. Also, the admin can view the error message if any error exist in any product details. The admin can also submit certain actions on the selected products available on the **Manage Products** page.

*This section covers the following topics:*

- View and Edit Single Product(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=view-and-edit-single-product>)
- Upload Single Product(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=upload-single-product>)
- View Error Log(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=view-error-log>)
- Submit Actions on the Manage Products Page(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=submit-actions-on-the-manage-products-page>)

### 4.1.1. View and Edit Products

**To view the product information.**

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART CANADA INTEGRATION** menu.  
The menu appears as shown in the following figure:

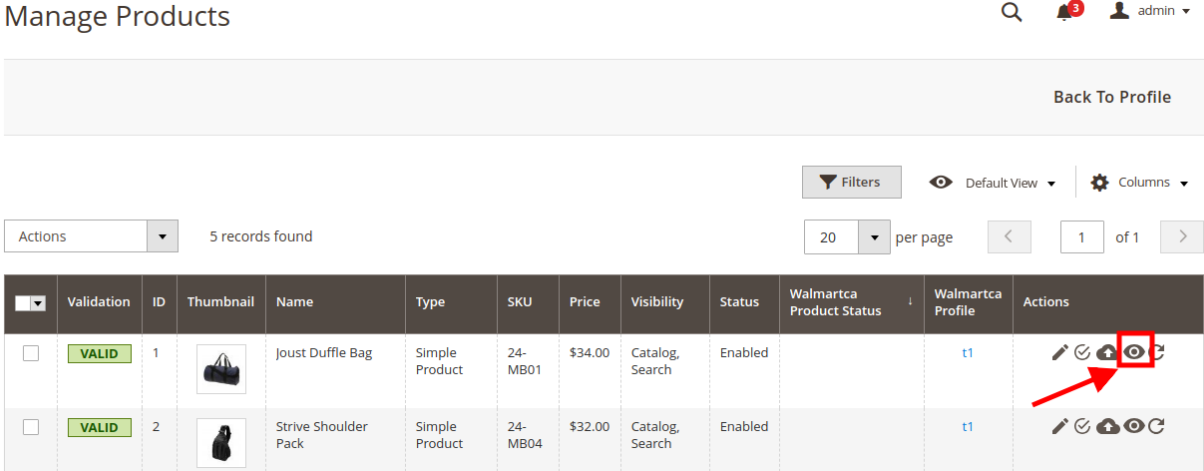

3. Click **Products**.

The **Manage Products** page appears as shown in the following figure:

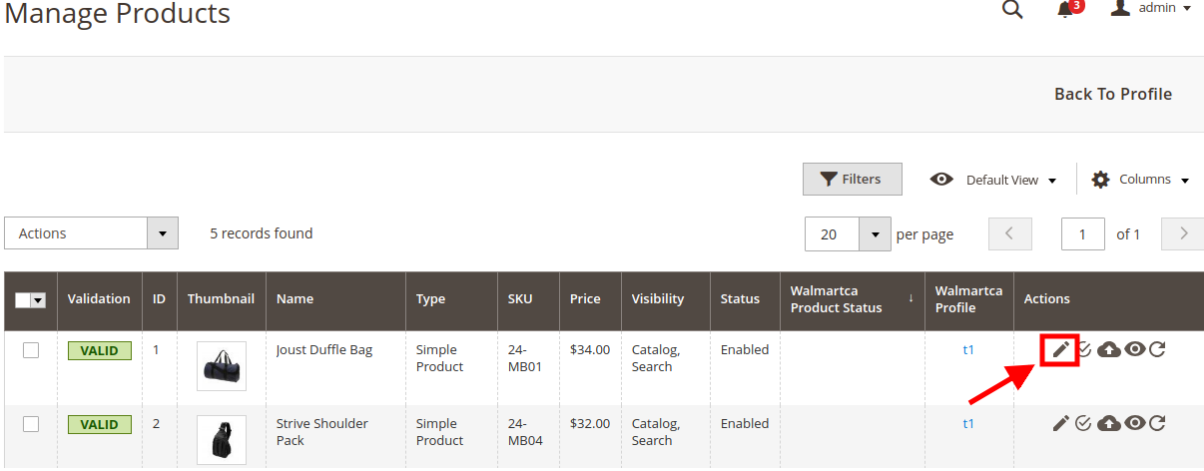

- All the available products are listed on this page.
- 4. Scroll down to the required product.
- 5. In the **Action** column, click the **View** button.

- 6. The product information will appear.

**To edit the product.**

- 1. Click the **Edit** button adjacent to the product under **Actions** column.

The required product page appears as shown in the following figure:

## Joust Duffle Bag

Store View: All Store Views   Back

#### 4.1.6. Submit Actions on the Manage Products Page

**Admin can perform the following tasks through the Bulk Action feature:**

- **Validate Products:** To validate the selected products before uploading to the Walmart Canada website. It displays the corresponding validation error if any. If there is no error, it confirms that the product is ready to upload.
- **Validate and Upload Products:** To validate and upload the selected products to the Walmart Canada website. It displays the corresponding validation error, if any. If there is no error, then the selected products are validated and uploaded, and a success message appears.
- **Sync Product Status:** To get the request from Walmart Canada to update the status of the selected products in the Magento 2 store. It helps the user to view the status of the product. For example, unpublished, transmit, data fix, system error, or so on.
- **Retire Products:** To withdraw the selected products so that it is neither used nor ordered. On submitting this action, the product is not listed on Walmart. Thus, nobody can order them from Walmart Canada.
- **Update Inventory:** To update the inventory of the selected products on Walmart Canada. This action completes all the job related to the product inventory and also it manages the quantity related issues.
- **Update Price:** To update the price of the selected products on Walmart Canada. *For example*, if the user has changed the product price on the Magento store and also wants to change the price on Walmart then this action is applicable. The price is updated when the user submits this action for the selected product.

**To Submit Action**

1. Go to the **Magento Store Admin** panel.
  - a. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu.  
The menu appears as shown in the following figure:

- b. Click **Upload Products**.  
The **Manage Products** page appears as shown in the following figure:

### **4.2.1. Add New Profile**

#### **To add a new profile**

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu.

The menu appears as shown in the following figure:

3. Click on the **Profile Manager**.

The **Manage Profile** page appears as shown in the following figure:

## Manage Profile

Filters Default View Columns

Actions 0 records found 20 per page 1 of 1

ID	Profile Code	Profile Name	Root Category	Child Category	Product Count	Status	Actions
We couldn't find any records.							

4. Click the **Add New Profile** button.

The **New Profile** page appears as shown in the following figure:

Profile Products

**Profile Information**

**Profile Code** \*   
For internal use. Must be unique with no spaces

**Profile Name** \*

**Profile Status** \* Enabled   
Specific store view information of products will send to walmartca

5. In the right panel, under the **Profile Information** section, do the following steps:

a. In the **Profile Code** box, enter a profile code.

**Note:** It is only for the internal use. Use the unique profile code with no spaces. Start with small letters.

b. In the **Profile Name** box, enter the name of the profile.

**Note:** Use the unique name to identify the profile.

c. In the **Status** list, select **Active** to enable the profile.

**Note:** The Inactive option disables the profile.

6. Click the **Save and Continue Edit** button.

7. In the left navigation panel, click the **Profile Configurations** menu.

The page appears as shown in the following figure:

**Product Global Settings**

Please set the global settings for Walmartca.com

Walmartca Product Price [global]   Use Default  
Select to send a different product price to walmartca.com

Inventory Fulfillment Lag Time [global]   Use Default  
Days to fulfill the inventory on out of stock

Product Identifier Type [global]   Use Default  
Product Identifier Type to be applied on each product for walmartca.com

8. Under the **Product Global Settings** section, do the following steps:

a. In the **Walmartca Product Price** list, select the required option. *You may do it once you have unchecked the **Use Default** option adjacent to the corresponding field.*

i. **Walmartca Product Price:** This is to set a different price for all the products as shown in the following figure:

The user can set the price on the following basis: –

**Increase by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.

**Increase by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the Walmart Canada product price by the entered value % of Magento price

*For Example – Magento price + 5% of Magento price.*

Magento Price = 100

Select **Increase By Fixed Percentage** option

**Modify by Percentage Price = 5**

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Walmart Product Price = 105

**Decrease by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.

**Decrease by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the Walmart Canada product price by the entered value % of Magento price

*For Example – Magento price – 5% of Magento price.*

Magento Price = 100

Select **Decrease By Fixed Percentage** option

**Modify by Percentage Price = 5**

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Walmart Product Price = 95

b. In the **Inventory Fulfillment Lag Time** box, enter the number of days to fulfill the inventory when the product is out of stock. *You may do it once you have unchecked the **Use Default** option adjacent to the corresponding field.*

c. In the **Product Tax Code Value** box, enter 7 digit product tax code.  
Or Click the **Select Taxcode** button.

The **Find a Tax Code** page appears as shown in the following figure:

Find a Tax Code

Search Key: 22 Search

Tax Code	Category	Category Description	Action
2043138	SST Testing Codes Not for General Use	SST Matrix Testing SKU 61220 not for general use	Select
2044217	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Single serving.	Select
2044218	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Package of 2 containers.	Select

Save

- d. Scroll down to the required Tax Code.
- e. In the **Action** column, click the corresponding **Select** button.  
The Tax Code is selected and appears on the top-right corner of the page as highlighted.

Find a Tax Code

Search Key: 22 Search

Selected Tax Code: 2043138

Tax Code	Category	Category Description	Action
2043138	SST Testing Codes Not for General Use	SST Matrix Testing SKU 61220 not for general use	Select
2044217	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Single serving.	Select
2044218	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Package of 2 containers.	Select

Save

- f. Click the **Save** button.  
The page is closed and the selected Tax Code appears in the **Product Tax Code** box.
- g. In the **Walmartca Product Id Override** list, select the required option.  
**Note:** **Enable** to Override Walmart Product Identifier. Disable it until it is specifically needed.
- h. In the **Walmartca Product SKU Override** list, select the required option.  
**Note:** **Enable** to Override Product SKU on Walmart.
2. To configure the **Shipping Settings**, click the **Add** button.  
The field is expanded and appears as shown in the following figure:

Shipping Settings [global]	Enabled	Region	Method	Magento Attribute Code	Action
	Yes ▼	▼	▼	--ple ▼	
<input type="button" value="Add"/>					

- i. In the **Enabled** list, select **Yes**.
- ii. In the **Region** list, select the required region.
- iii. In the **Method** list, select the required shipping method.
- iv. In the **Magento Attribute Code** list, select the corresponding attribute code.

**Note:** Click the **Add** button to add more shipping settings. To delete the rule, in the corresponding row of the **Action** column, click the **Delete** icon.

9. Under **Walmartca Inventory Rules**, do the following steps:

- a. In the **Set Inventory on Basis of Threshold** list, select **Enable** to send the inventory based on the threshold.

**Note:** Only when the admin selects **Enable**, the other fields appear.

The section appears as shown in the following figure:

#### Walmartca Inventory Rules ⌵

Set Inventory on Basis of Threshold  
[global]

Disable ▼

Use Default

Choose yes to send inventory on walmartca by condition

**Note:** Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock.

10. Click the **Save and Continue Edit** button.

11. In the left navigation panel, click the **Mapping** menu.

The page appears as shown in the following figure:

**Walmartca / Magento Attribute Mapping (Required/Optional mapping)**

Walmartca Attribute	Magento Catalog Attribute	Default Value	Action
<input type="button" value="Add Attribute"/>			

12. In the right panel, go to the **Category Mapping** section.
13. Under **Category Mapping**, do the following steps:
  - a. In the **Root Level Category** list, select the required **Walmart Canada** category that the admin wants to map.
  - b. In the **Child Level Category** list, select the required child category.  
Depending upon the selection of the category and the sub-categories, the Walmart Canada and Magento 2 attributes appear under the **Walmartca / Magento Attribute Mapping (Required/ Optional mapping)** section, if exist.
14. Go to the **Walmartca / Magento Attribute Mapping (Required/ Optional mapping)** section.
15. Under **Walmart / Magento Attribute Mapping (Required/ Optional mapping)**, do the following steps:
  - a. In the **Walmart Attribute** column, select the required Walmart attribute to map it with the corresponding Magento store attribute.
  - b. In the **Magento Catalog Attribute** column, select the required Magento 2 store attribute to map it with the corresponding Walmart attribute.
  - c. Click the **Add Attribute** button to add more attributes, if required.
  - d. Repeat the steps to map all the required Walmart attributes to the corresponding Magento store attributes.
16. Go to the **Walmart / Magento 2 Attribute Mapping (Variant Attribute Mapping)** section.
17. Under **Walmart / Magento 2 Attribute Mapping (Variant Attribute Mapping)**, do the following steps:
  - a. In the **Walmart Attribute** column, select the required Walmart attribute to map it with the corresponding Magento store attribute.
  - b. In the **Magento Catalog Attribute** column, select the required Magento store attribute to map it with the corresponding Walmart attribute.
  - c. Click the **Add Attribute** button to add more attributes, if required.
  - d. Repeat the steps to map all the required Walmart attributes to the corresponding Magento store attributes.
18. Click the **Save and Continue Edit** button.
19. In the left navigation panel, click the **Profile Products** menu.  
The page appears as shown in the following figure:

## 4.2.2. Edit the Existing Profile

### *To edit the existing profile*

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Manage Profile**.  
The **Manage Profile** page appears as shown in the following figure:

4. Scroll down to the required profile.
5. In the **Action** column, click **Edit**.

The required profile page appears as shown in the following figure:

6. Make the changes as per the requirement.
7. Click the **Save Profile** button.  
The profile is saved and listed on the **Manage Profile** page.  
OR  
To save and manage the products, click the **Save and Manage Product** button.  
OR  
To save and continue the editing, click the **Save and Continue Edit** button.

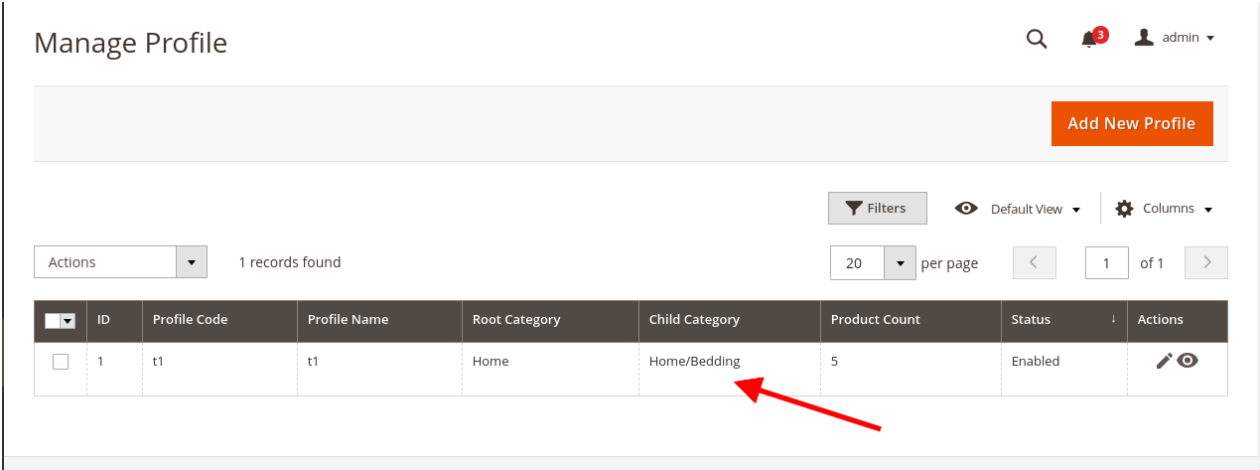

### 4.2.3. Delete the Profile

#### *To delete the existing profile*

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Manage Profile**.  
The **Manage Profile** page appears as shown in the following figure:

4. Scroll down to the required profile and check the box associated with it.
5. In the **Action** column, click the **Arrow** button.  
A menu appears.
6. Click the **Delete** the button.  
A confirmation dialog box appears as shown in the following figure:

7. Click the **OK** button.  
The profile will be deleted.

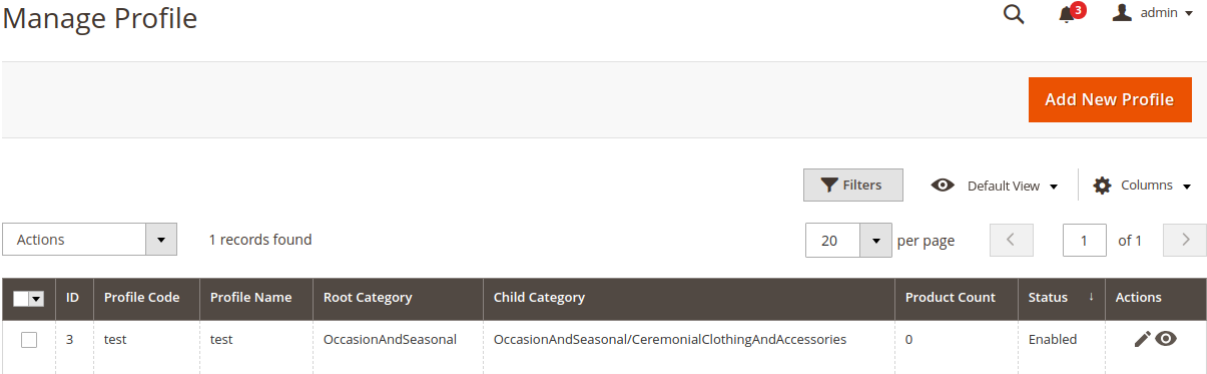

#### 4.2.4. To manage the profile products

##### *To manage the products of the existing profile*

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Manage Profile**.  
The **Manage Profile** page appears as shown in the following figure:

4. Click the **Manage products** sign under the Actions column adjacent to the profile.

### 4.3. Product Feeds

After uploading the product on Walmart Canada or after updating the product inventory or the product price, the user can check the status of the feed and sync the selected feeds or all the feeds from the Walmart Canada Feed Details page.

#### *To view product feeds status*

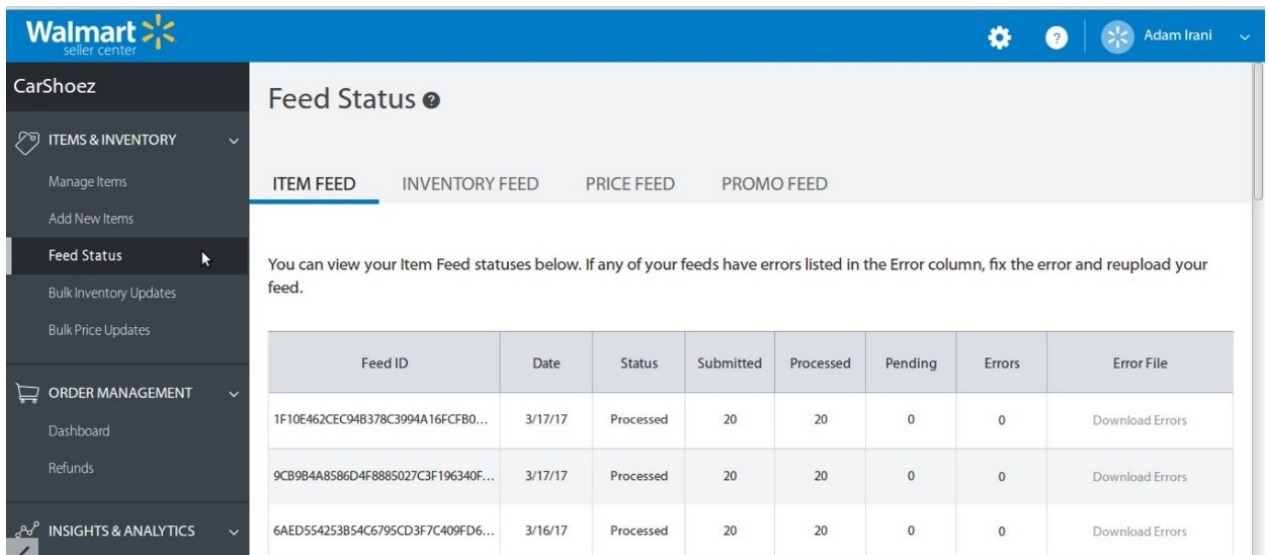

1. Go to **Magento Store Admin Panel**.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu, and then click **Product Feeds**. The **Manage Feeds** page appears as shown in the following figure:

3. Do the following tasks if required:
  - View the status of the feed in the **Feed Status** column.
  - To synchronize the feeds between Walmart and Magento Store, click the **Sync Feeds** button.

**To view product feed status on Walmart seller panel**

1. Go to the **Walmart** seller panel.
2. In the left navigation menu, click **Feed Status**.  
The page appears as shown in the following figure:

3. In the **Error File** column, click the **Download Errors** link associated with the required product feed.
4. Fix the errors, if any.
5. Re-upload the product feed.

## 5. Walmart Canada Orders

*Admin can do the following tasks while managing the Walmart Canada orders:*

- View Walmart Canada Orders
- View Failed Imported Orders
- Add New Refund

### 5.1. View Walmart Canada Orders

The user can fetch and view all the order details fetched from Walmart.

*To view Walmart Canada Orders*

1. Go to **Magento Store Admin Panel**.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu, and then click **View Walmart Canada Orders**.

The **Orders Grid** page appears as shown in the following figure:

Actions	Magento Order id	Entity Id	Merchant Order Id	Purchase Order Id	Order Place Date	Status	Deliver By
<input type="checkbox"/>	WM-000000003	1	2891779609246	3377712938561	2017-01-18 17:55:37	Created	2017-01-26 07:00:00
<input type="checkbox"/>	000000004	2	2891779609246	33777129385611	2017-01-18 17:55:37	Created	2017-01-26 07:00:00

3. Click the **Fetch New Orders** button.

If the order is imported successfully then, a new record is found in the **Orders Grid** table as shown in the figure.

**Notes:**

- Orders are automatically imported through CRON in every 10 minutes.
  - Whenever the latest orders are imported from Walmart Canada, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento 2 Store admin panel.
  - As per Walmart's Policy, orders should be acknowledged within 60 minutes.
  - If no Order is imported, then check the Failed order log on the **Failed Walmart Canada Orders Import Log** page.
  - Order are auto rejected on Walmart in the following conditions:
    - When Walmart Product SKU does not exist in Magento 2 Store.
    - When Product is Out of Stock in Magento 2 Store.
    - When the product is disabled in Magento 2 Store.
4. In the **Magento Order id** column, click the link associated with the required order.  
The page appears as shown in the following figure:

Submit Shipment

Orders imported from Walmart Canada uses **Payment Method** depending on the **System Configuration Settings** of Walmart extension.

5. Under **Shipment Information**, enter the corresponding values in the following fields:
  - a. In the **Shipping carrier used** list, select the required option.
  - b. In the **Shipping Type** list, select the required option.
  - c. In the **Tracking Number** box, enter a value.
  - d. In the **Ship To Date** box, click the calendar icon to enter a date.
  - e. In the **Carrier Pick Up Date** box, click the calendar icon to enter a date.
  - f. In the **Expected delivery Date(respectively)** box, click the calendar icon to enter a date.
6. Under **Shipment Items**, enter the corresponding values in the following fields:
  - a. In the **Quantity to Ship** box, enter a value.  
The number of the quantity that the user can ship. The value cannot be greater than the **Qty Available for Ship** value.
  - b. In the **Quantity Cancelled** box, enter a value.  
The number of the quantity that the user wants to reject. The value cannot be greater than the **Qty Available for Ship** value. The success message appears if the order is shipped successfully.
7. Click the **Submit Shipment** button.

**Notes:**

- a. Order **Shipment** is sent to Walmart.
- b. Order **Invoice** and **Shipment** is created automatically in the Magento Store.
- c. Order **Status** changes to **Complete** on Walmart Canada.
- d. The **status** of order changes to **Completed** on Magento store.

## 5.2. View Failed Imported Orders

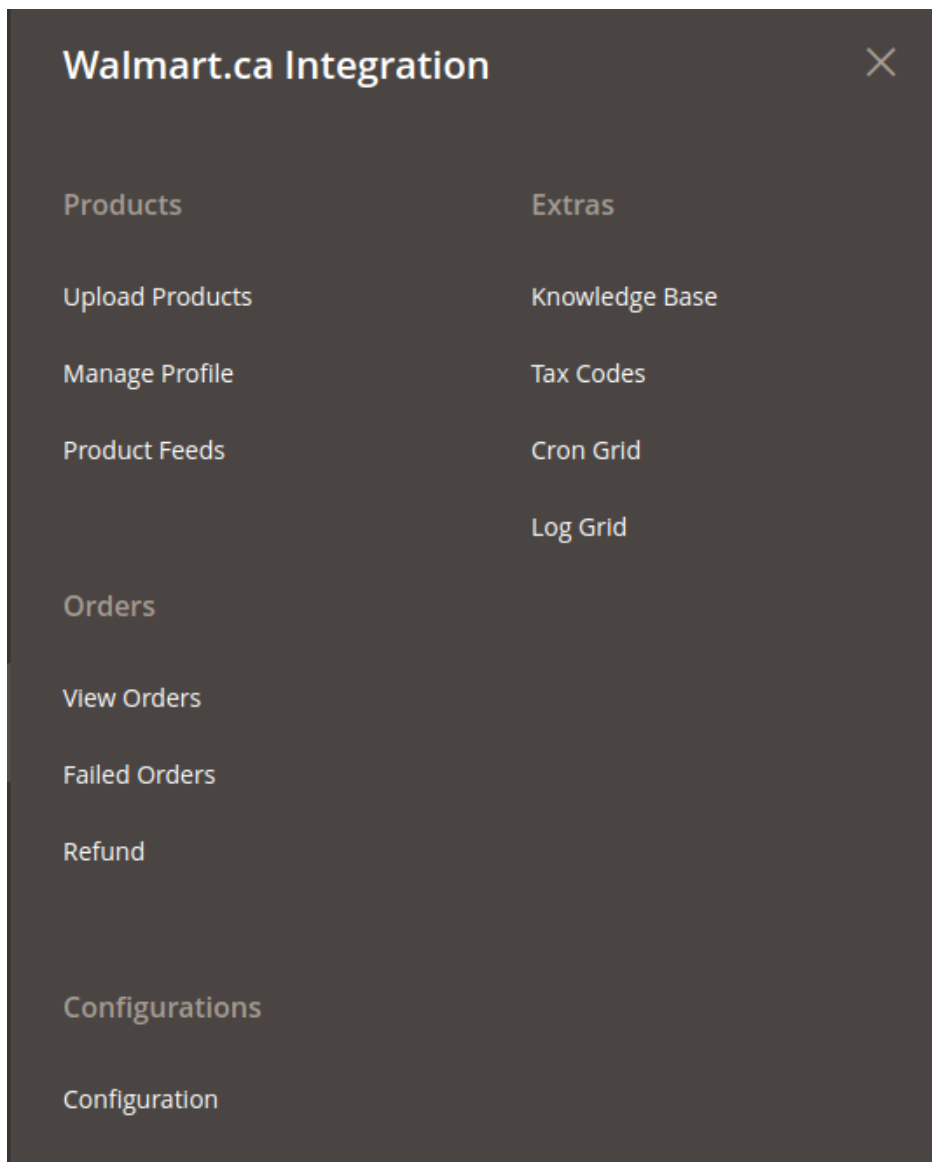

The users can view the list of failed Walmart orders on the **Failed Orders Grid** page.

*In the following conditions, Orders are not imported from Walmart:*

- If any product in the Walmart Order is Out of Stock in the Magento store.
- If any product in the Walmart Order is disabled in the Magento store.
- If any Product does not exist in Magento or is deleted from the Magneto 2 store after uploading on Walmart.
- If the selected Payment Method in Walmart System Configuration Setting is not available in the Magento store.

*To view, Walmart Canada failed orders*

1. Go to **Magento Store Admin** panel.
2. On the left navigation bar click the **WALMART.CA INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Failed Imported Orders**.

The **Failed Orders Grid** page appears as shown in the following figure:

Id	Purchase Order ID	Reference Number	Reason	Order Data

This page displays the failed orders with the order id and the reason for the failure.

4. To delete all the failed Orders list, click the **Delete Orders** button.

### 5.3. Add New Refund

If a front-end user returns the product or order directly to the merchant without the involvement of walmart.com, then the merchant has to send a request on walmart.com for completing this type of return.

To complete this type of return the merchant has to create a new refund.

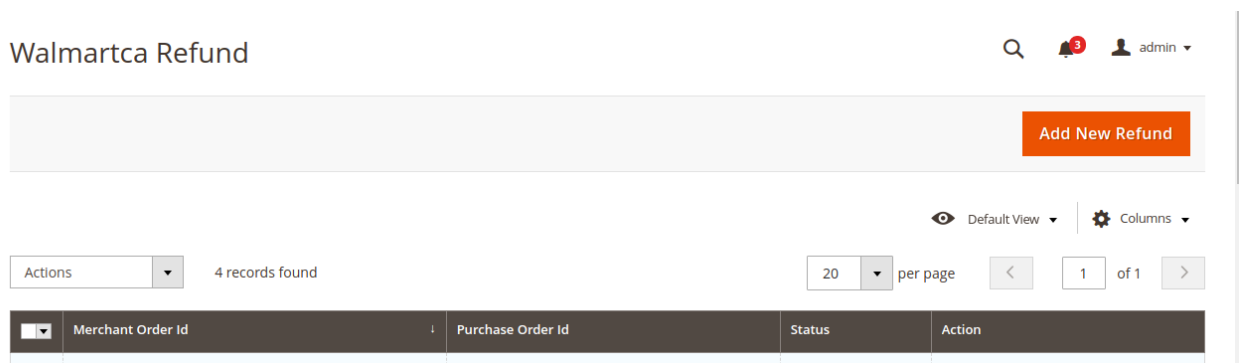

**To create a new refund**

1. Go to **Magento 2 Store Admin** panel.
2. On the left navigation bar click the **WALMART.CA INTEGRATION** menu. The menu appears as shown in the following figure:

3. Click **Refund**.

The **Walmart Refund** page appears as shown in the following figure:

4. In the right upper corner, click the **Add New Refund** button.

The page appears as shown in the following figure:

5. In the right panel, under **View Refund**, in the **Enter Merchant Order ID or Reference Order ID** box, enter a value.

6. Click the **Fetch Order Info** button.

If the entered purchase order Id is correct, then the respective order details are displayed product-wise in the new sections as follows:

- **Refund id:** Refund id that the merchant receives from walmart.com.
- **Refund Merchant Id:** Identification number of the merchant.
- **Order item id:** Identification number generated at the time of placing the order.
- **Qty Requested:** Total number of items or product ordered in the current order.
- **Qty Already Refunded:** Items or product that have been already refunded to the front-end user.
- **Qty Available for Refund:** Number of items or product that can be refunded.
- **Qty Returned:** Number of items or product returned by the customer.
- **Note:** Returned quantity should be less than or equal to the shipped quantity.
- **Qty Refunded:** Number of items or product that the merchant wants to refund.
- **Note:** Refunded quantity should be less than or equal to the Returned quantity.
- **Refund tax:** Tax applied on the items or products returned.
- **Refund Amount:** Amount that Walmart has to return to the front-end user.
- **Refund Shipping Cost:** Shipping cost applicable to the returned product.
- **Refund Shipping tax:** Shipping tax applicable to the returned product.
- **Refund Feedback:** Feedback of merchant on the returned product.
- **Refund Reason:** Reason why the front-end user has returned the product.

7. Click the **Save** button.

## 6. Extras

**The Extras section covers the following information:**

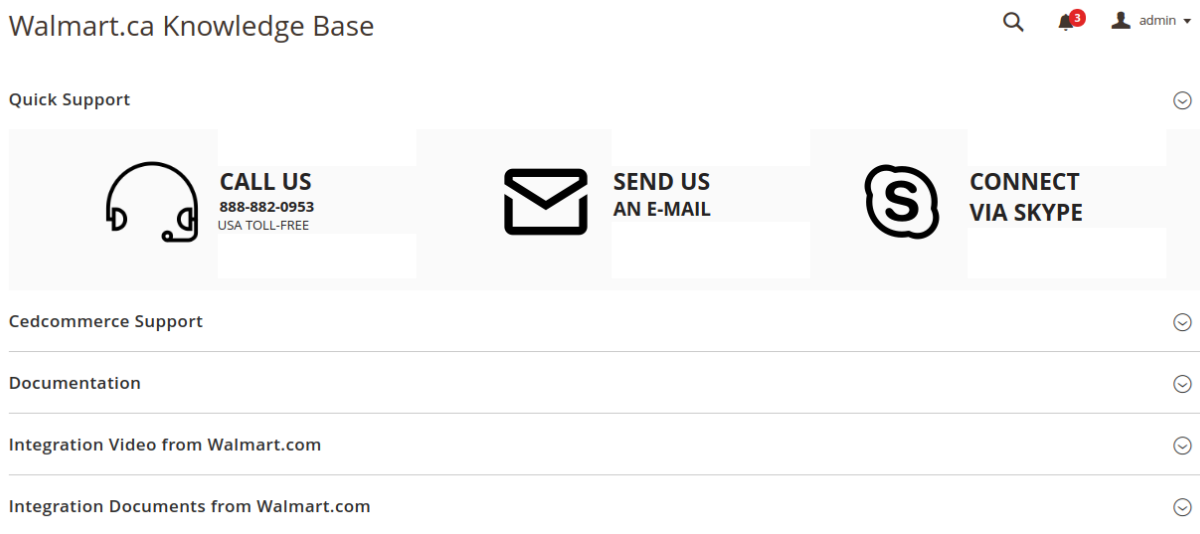

- Walmart.ca Knowledge Base
- Walmart.ca Tax Codes
- Walmart.ca Cron Grid
- Walmart.ca Log Grid

**To view Walmart.ca Knowledge Base**

1. Go to the **Admin** panel.

- On the left navigation bar, click the **WALMART.CA INTEGRATION** menu, and then click **Walmart.ca Knowledge Base**.

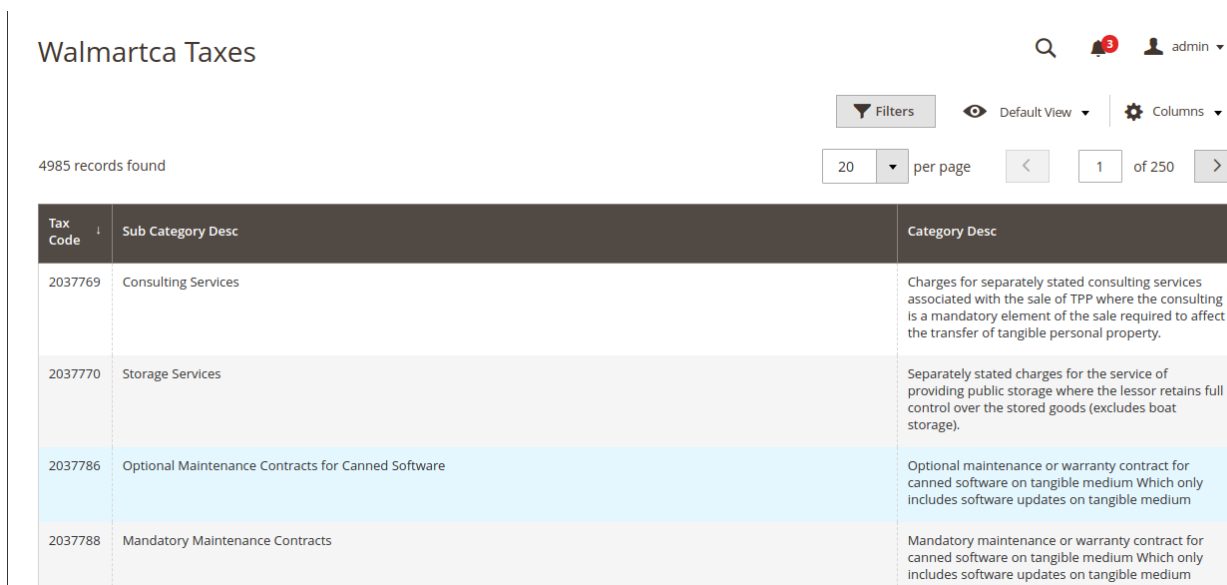

The **Walmart.ca Knowledge Base** page appears as shown in the following figure:

### To view Walmart.ca Tax Codes

- Go to the **Admin** panel.
- On the left navigation bar, click the **WALMART.CA INTEGRATION** menu, and then click **Walmartca Tax Codes**.

The **Walmartca Tax Codes** page appears as shown in the following figure:

### To view Walmart Cron Grid

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu, and then click **Walmartca Cron Grid**.

The **Walmart Cron Grid** page appears as shown in the following figure:

	Id	Job Code	Status	Messages	Created At	Scheduled At	Executed At	Finished At
<input type="checkbox"/>	1	0	pending		2017-08-01 11:49:00	2017-08-08 18:30:00		

### To view Walmart Log Grid

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu, and then click **Walmart Log Grid**.

The **Walmart Log Grid** page appears as shown in the following figure:

	Id	Job Code	Status	Messages	Created At	Scheduled At
<input type="checkbox"/>	1	Inventory	Walmart Sync	26th July 2017	n/a	n/a

### To view Walmart Categories

1. Go to the **Admin** panel.
2. On the left navigation bar, click the **WALMART.CA INTEGRATION** menu, and then click **Walmart Categories**.

The **Walmart Categories** page appears as shown in the following figure:

### Walmart Categories

Walmart API not enabled or Invalid. Please check Walmart Configuration.
