1. Overview

Fyndiq Integration for Magento 2 is a fabulous API integration that helps Magento® 2 store owners to synchronize inventory, price, and other product details for product creation and management between Magento 2 store and Fyndiq marketplace.

The **Fyndiq Integration for Magento 2** extension interacts with Fyndiq marketplace to integrate the synchronized product listing between Magento 2 and Fyndiq retailers. After the installation, the merchant can create Fyndiq categories and the dependent attributes on the Magento 2 store.

The process enables the merchant (admin) to configure the desired product category into Magento 2 for automatic submission of selected product on the same category on Fyndiq.

Key features are as follows:

- **Upload product based on profile:** An admin can create a profile, map the Fyndiq category and attributes to the Magento 2 category and attributes. Then, after assigning the product to the profile can easily upload the product to Fyndiq.
- **Attribute mapping:** The feature allows mapping the suitable existing attribute with Fyndiq attributes to one single category of Fyndiq.
- **Archive and Unarchive Products:** Merchants can close and reopen the products on Fyndiq.se using the Archive and Unarchive feature. Archive disables the products on Fyndiq.se and Unarchive enables the archived product.
- **Upload Products in Bulk:** The admin has the option to upload the products in any number of the bulk amount on Fyndiq website using this feature.
- **Profile Based Pricing:** Increase or decrease in price based on the profile.
- **Automated Synchronization:** The products listing, order, inventory return and refund, and pricing are automatically synchronized at regular interval of time.
- **Batch product request download:** You can create the batch product download request and fetch the status. Once it turns to finish status, the admin can process by one click.
- **Enable and disable of products:** A merchant can anytime open and close the products on Fyndiq using enable and disable the feature.
- **New Order Notifications:** Whenever a new order is fetched from Fyndiq.se, the admin receives a notification.
- **Rejected products notification:** If any product containing some invalid details is rejected, then its information is fetched from the auto synchronization request along with the error due to which it is rejected.
- **Low Stock Notifications:** Whenever Stock diminishes lower than a threshold, a notification is sent informing the status.
- **Simple and configurable product upload:** The admin can upload the simple and configurable type of Magento 2 product on the Fyndiq website.

2. Fyndiq Integration for Magento 2 Extension Installation

To install the extension

1. Log in the **ftp**, and then go to the Magento 2 root folder (generally present under the *public_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
 - a. Upload or Drag and Drop *app/code/Ced/Fyndiq* directory.
 - b. After successfully uploading the directory, the extension will be installed/upgraded.
 - c. Now run the following upgrade command in *cmd*

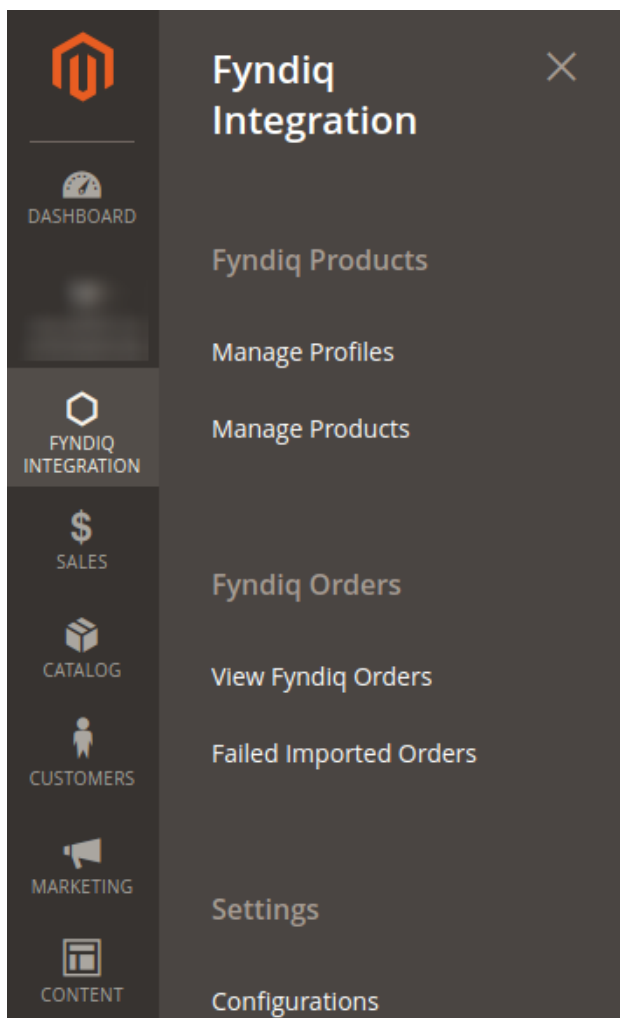

php bin/magento setup:upgrade.

3. Fyndiq Configuration Settings

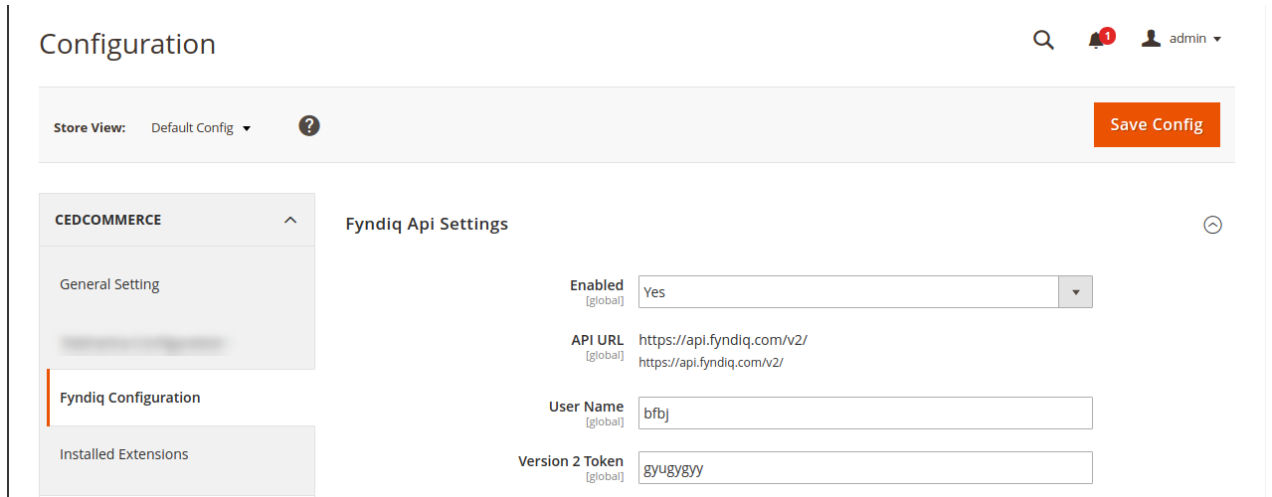

Once the extension is successfully installed in the Magento 2 store, the **FYNDIQ INTEGRATION** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the Fyndiq seller panel. Once the seller account is created and is approved by Fyndiq, then the Magento 2 store owner can use the **Fyndiq Username** and **Password** while setting up the Fyndiq Configuration settings in the **Magento 2 Admin** panel.

To set up the configuration settings in the Magento 2 Admin panel

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Configuration**.
The page appears as shown in the following figure:

4. In the right panel, under **Fyndiq Api Settings**, do the following steps:
 - a. In the **Enabled** list, select **Yes** to enable the extension features.
The other relevant fields appear as shown in the following figure:
 - b. In the **User Name** box, enter the Fyndiq seller account Username.
 - c. In the **Version 2 Token** box, enter the token key Fetched from the Merchant Panel.
5. Click the **Save Config** button to save the entered values.
6. Scroll down to the **Fyndiq Product Sync Settings** tab, and then click the tab.
The section appears as shown in the following figure:

7. Under **Fyndiq Product Sync Settings**, do the following step:
 - In the **Select Store** list, select the required store.
 - In the **Use Parent image as Child Product Image**.
 - Select **Yes** to send the parent image as a child image in the configurable product.
 - Select **No** to send child image too, along with parent image in the configurable product.
8. Scroll down to the **Fyndiq Global Settings** tab, and then click the tab.
The section appears as shown in the following figure:

Fyndiq Global Settings ⊙

Please set the global settings for Fyndiq.com

Are you a manufacturer [global] ▼

if you are a manufacturer and not having upc/ean then you can set yes

Fyndiq Product Price [global] ▼

Select to send a different product price to **fyndiq.com**

Fyndiq Order Id Prefix [global]

Prefix for Fyndiq Increment ID

Fyndiq Order Prefix [global]

Order Prefix for Fyndiq Order Id.Example: For Fg_10001 Use : Fg_ , for FG-10001 use : FG-

9. Under **Fyndiq Global Settings**, do the following steps:

a. In the **Are you a manufacturer** –

- i. Select the option **Yes**, if you manufacture the product.
- ii. Select the option **No**, if you did not manufacture the product.

b. In the **Fyndiq Product Price** list, select one of the following options:

- `. **Increase by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.
- `. **Increase by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the Fyndiq, product price by the entered value % of Magento 2 price.

`. *For Example,*

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

Enter Percentage = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Fyndiq Product Price = 105

- `. **Decrease by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.

- `. **Decrease by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the Fyndiq product price by the entered value % of Magento 2 price

`. *For Example,*

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

Enter Percentage = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Fyndiq Product Price = 95

c. In the **Inventory Fulfillment Lag Time** box, enter the required value.

Enter the numeric value for the fulfillment lag time provided with the number of days to fulfill the inventory when **out of stock**.

d. In the **Product Tax Code Value** box, enter the 7 digit product tax code.

OR

Click the **Select Taxcode** button to select the required tax code.

e. In the **Fyndiq Order ID Prefix** box, enter the required prefix value.

For instance, enter *FY-* for *FY-10001*.

10. Scroll down to the **Fyndiq Cron Settings** tab, and then click the tab.

The tab is expanded and the relevant field appears as shown in the following figure:

Fyndiq Cron Settings

Fyndiq Order Cron [global] Disable ▼
Order Fetch Cron

Fyndiq Price Cron [global] Disable ▼
Price Sync Cron

Fyndiq Inventory Cron [global] Disable ▼
Inventory Sync Cron

11. Under **Fyndiq Cron Settings**, do the following steps:
 - a. In the **Fyndiq Order Cron** list, select **Enable** to enable the fetch order cron.
 - b. In the **Fyndiq Price Cron** list, select **Enable** to enable the Price Sync cron.
 - c. In the **Fyndiq Inventory Cron** list, select **Enable** to enable the Inventory Sync cron.
12. Scroll down to the **Order Fetch Settings** tab, and then click the tab.
The section appears as shown in the following figure:

Order Fetch Setting

Auto acknowledge Fyndiq Order [global] No ▼
Auto acknowledge order

Auto Reject Fyndiq Order [global] No ▼
Auto Reject order

Include Disabled Product in Order [global] No ▼
Include disabled products as order items

Include OutOfStock Product in Order [global] No ▼
Include outofstock products as order items

- a. In **Auto Acknowledge Fyndiq Order**, select **yes** to auto-acknowledge.
 - b. In **Auto reject Fyndiq Order**, select **yes** to reject automatically.
 - c. In **Include Disabled Product in Order**, On selecting **yes**, it will create the order of those products also which are disabled in Magento.
 - d. In **Include OutOfStock Product in Order**, On selecting **yes**, it will create the order of those products also which are out of stock in Magento.
13. Click the **Save Config** button.

4. Manage Fyndiq Profile

Admin can create a new profile and assign the required products to the profile. While creating and editing the

profile, admin can map the Magento 2 attributes to the Fyndiq attributes. These attributes are applicable to all the products that are assigned to the profile.

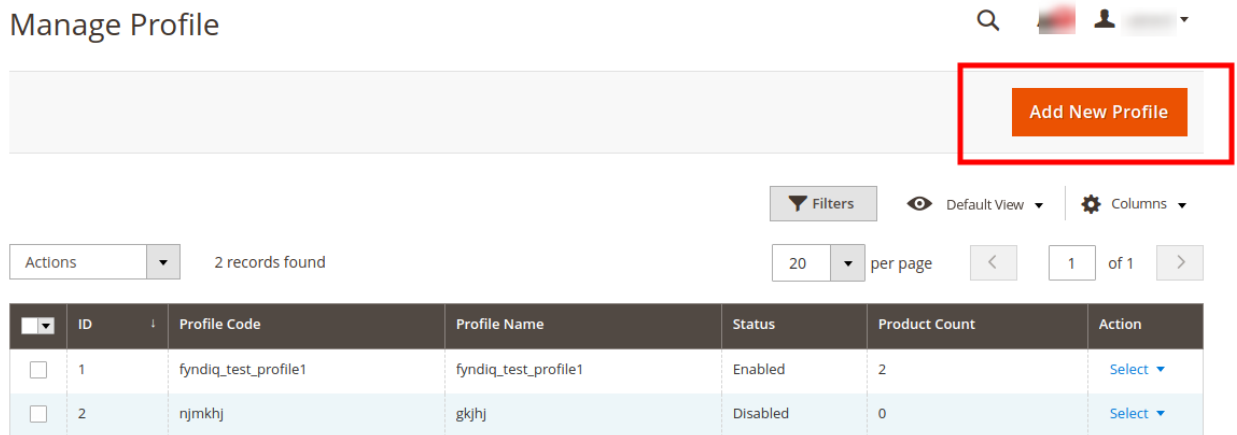

Admin can do the following tasks:

- Add new profile
- Edit the existing profile
- Delete the profiles
- Enable or Disable the Selected Profiles
- Manage the Product Assigned to the Profile

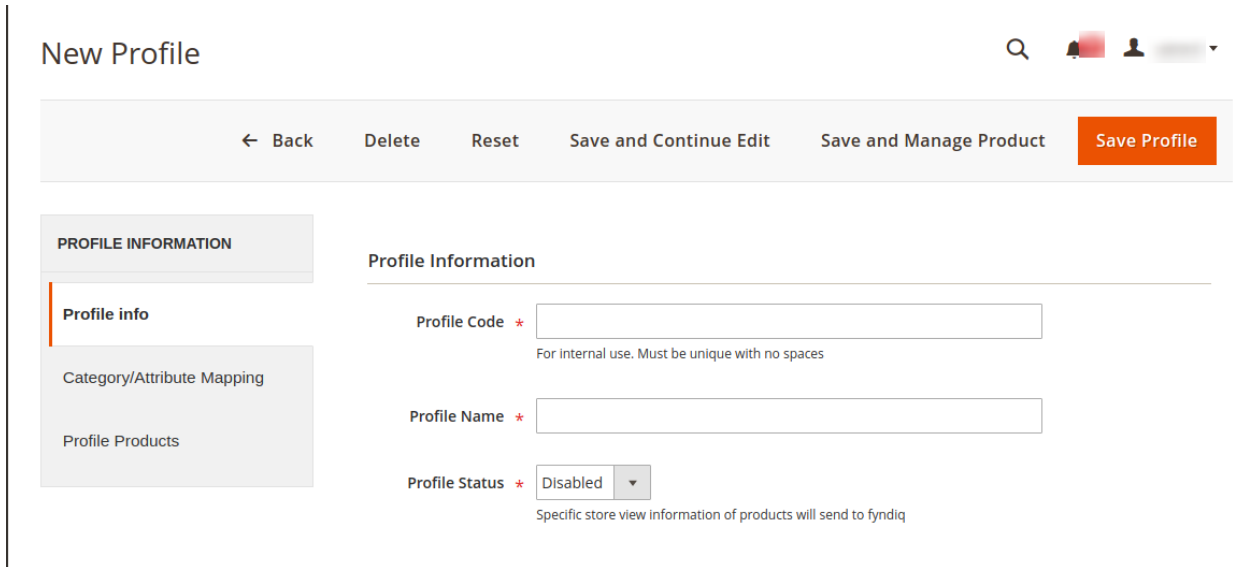

4.1. Add A New Profile

To add a new profile

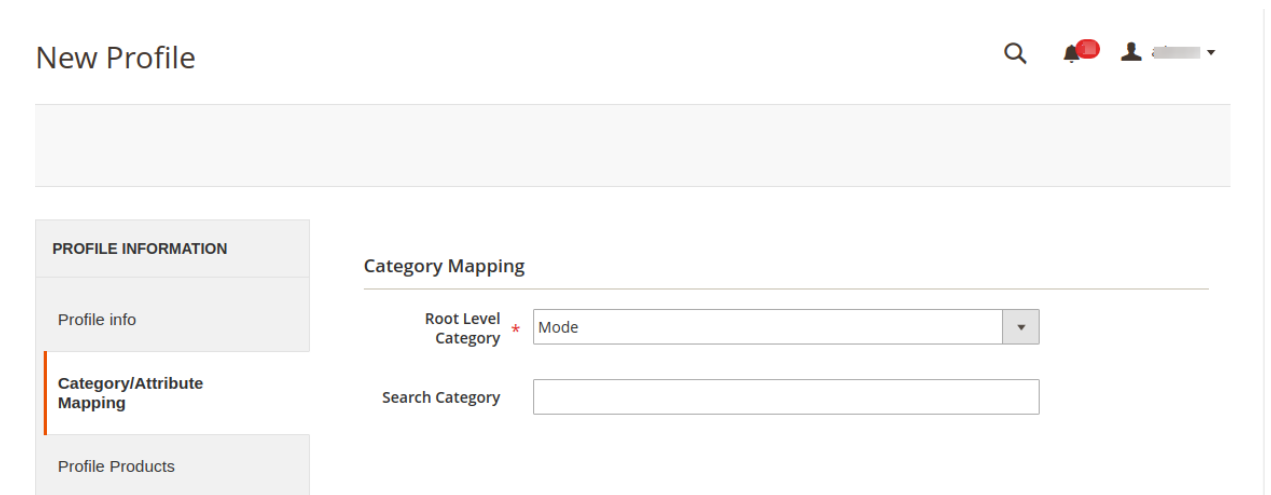

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu, and then click **Manage Profile**.
The **Manage Profile** page appears as shown in the following figure:

3. Click the **Add New Profile** button as highlighted with the red color.
The **New Profile** page appears as shown in the following figure:

4. In the right panel, under **Profile Information**, do the following steps:
 - a. In the **Profile Code** box, enter a profile code.
Note: It is only for the internal use. Use the unique profile code with no spaces. Start with small letters.
 - b. In the **Profile Name** box, enter the name of the profile.
Note: Use the unique name to identify the profile.
 - c. In the **Profile Status** list, select **Enabled** to enable the profile.
Note: The Inactive option disables the profile.
5. Click the **Save and Continue Edit** button.
6. In the left navigation panel, click the **Category/Attribute Mapping** menu.
 In the right panel, the page appears as shown in the following figure:

7. Under **Category Mapping**, do the following steps:
 - In the **Root Level Category** list, select the required category to map.
 OR
 In the **Search Category** box, enter the category initials to search for the required category. A list appears with the suggested categories. Select the required one. Once selected the category appears in the **Root Level Category** field.
8. Scroll down to the **Fyndiq / Magento Attribute Mapping (Required/Optional mapping)** section.

The section appears as shown in the following figure:

Fyndiq / Magento Attribute Mapping (Required/Optional mapping)

Fyndiq Attribute	Magento Catalog Attribute	Default Value	Action
product-id	sku		
product-title	name		
product-description	description		
product-price	price		
product-oldprice	price		
product-vat-percent	fyndiq-vat-percent		
product-image-1-url	image		
article-sku	sku		
article-quantity	quantity_and_stock_status		
article-name	name		
article-ean	ean		

9. Under **Fyndiq/ Magento Attribute Mapping (Required/Optional mapping)**, do the following steps:
 - a. In the **Magento Catalog Attribute** column, select the required Magento attribute from the corresponding list to map it with the corresponding Fyndiq attribute.
Note: In case the required attribute does not exist in the corresponding list, then select **-Set Default value-** from the corresponding list. A text box appears in the Default Value column next to corresponding **Magento Catalog Attribute** column.
 - b. Repeat the mapping of all the required or optional Magento attributes listed with the corresponding Fyndiq attributes.
 - c. Click the **Add Attribute** button to add more attributes if required.

10. Scroll down to the **Fyndiq / Magento Attribute Mapping (Variant Attribute mapping)** section. The section appears as shown in the following figure:

Fyndiq / Magento Attribute Mapping (Variant Attribute Mapping)

Fyndiq Attribute	Magento Catalog Attribute	Action
article-property	color	<input type="button" value="Delete"/>

11. Under **Fyndiq / Magento Attribute Mapping (Variant Attribute mapping)**, do the following steps:
 - a. Click the **Add Attribute** button to add attributes if required.
 - b. In the **Fyndiq Attribute** column, select the required Fyndiq attribute to map it with the corresponding Magento attribute.
 - c. In the **Magento Catalog Attribute** column, select the required Magento attribute.
12. Scroll down to the **Fyndiq / Magento Attribute Mapping (Optional mapping)** section.
The section appears as shown in the following figure:

Fyndiq / Magento Attribute Mapping (Variant Attribute Mapping)

Fyndiq Attribute	Magento Catalog Attribute	Action
article-property ▼	color ▼	Delete
article-property ▼	gift_message_available ▼	Delete
▼	▼	Delete
Add Attribute		

13. Similarly, under **Fyndiq / Magento Attribute Mapping (Optional mapping)**, do the following steps if required:
 - a. Click the **Add Attribute** button to add attributes if required.
 - b. In the **Fyndiq Attribute** column, select the required Fyndiq attribute to map it with the corresponding Magento attribute.
 - c. In the **Magento Catalog Attribute** column, select the required Magento attribute.
14. Click the **Save and Continue Edit** button.
15. In the left navigation panel, click the **Profile Products** menu.
In the right panel, the page appears as shown in the following figure:

New Profile

	Product Id	Profile	SKU	Product Name	Type	Category	Product Status	Attrib. Set Name	Price
Yes ▼	From To	▼			▼	▼	▼	▼	From To USD ▼

We couldn't find any records.

16. Since no products are assigned to the profile, there are no products listed in the table.
17. Click the **Reset Filter** link.

All the products are listed in the table as shown in the following figure:

<input type="checkbox"/>	Product Id	Profile	SKU	Product Name	Type	Category	Product Status	Assign
<input type="checkbox"/>	From To							
<input checked="" type="checkbox"/>	1	fyndiq_test_profile1	SCAF_F1_BIANCO_123	Ball123	Simple Product	Cloths	Enabled	D
<input checked="" type="checkbox"/>	2	fyndiq_test_profile1	M124	Batlucifer	Simple Product	Cloths	Enabled	D

18. In the right panel, do the following step:
 - Select the check boxes associated with the required products those the admin wants to assign to the new profile.

Note: Admin can assign one product to one profile only. It means, admin can assign multiple products to the same profile but can associate a product only with one profile at one time. To assign a product to another profile, the admin has to remove that product from the currently assigned profile.

19. Click the **Save Profile** button.

The created profile is saved and listed on the **Manage Profile** page.

Or

Click the **Save and Continue Edit** button to save the created profile and continue editing, if required.

Or

Click the **Save and Manage Product** button to save the profile and make ready to upload the product to Fyndiq.

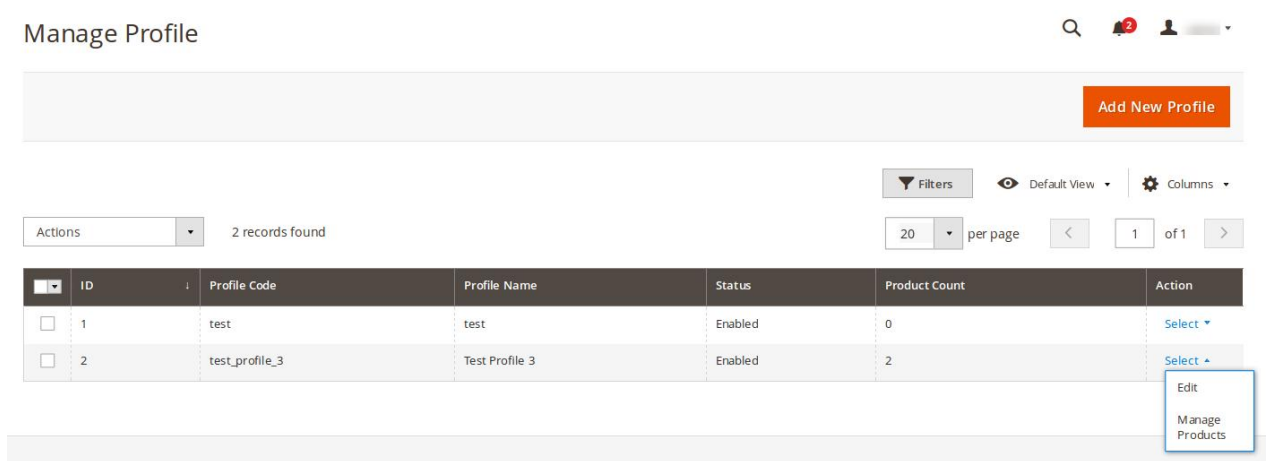

The assigned products are listed on the **Manage Products** page as shown in the following figure:

<input type="checkbox"/>	Fyndiq Profile	ID	Thumbnail	Name	Type	SKU	Price	Visibility	Status	Fyndiq Product Status	Validation	config_color
<input type="checkbox"/>	fyndiq_test_profile1	1		Ball123	Simple Product	SCAF_F1_BIANCO_123	\$20.00	Catalog, Search	Enabled	Uploaded	VALID	Red
<input type="checkbox"/>	fyndiq_test_profile1	2		Batlucifer	Simple Product	M124	\$20.00	Catalog, Search	Enabled	Uploaded	VALID	Red

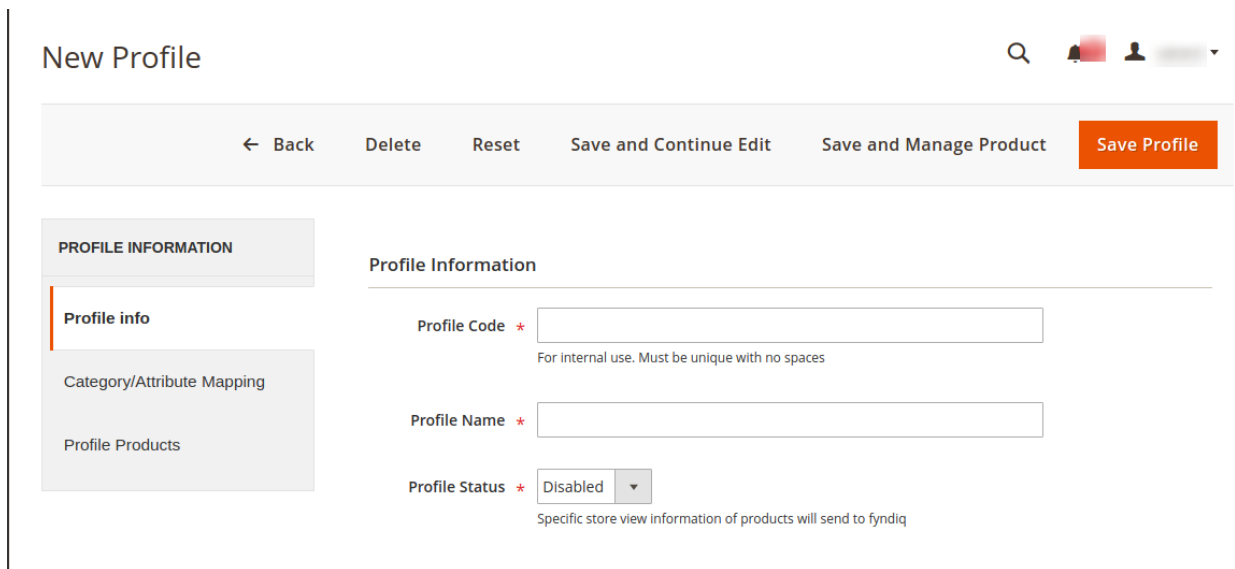

4.2. Edit the Existing Profile

To edit the existing profile

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu, and then click **Manage Profile**.
The **Manage Profile** page appears as shown in the following figure:

- On this page, all the available profiles are listed.
3. Click the required row of the profile that the admin wants to edit.
OR
In the **Action** column, click the arrow button, and then click **Edit**.
The page appears as shown in the following figure:

4. Make the changes as per requirement.
5. Click the **Save Profile** button.
The created profile is saved and listed on the **Manage Profile** page.
Or
Click the **Save and Continue Edit** button to save the created profile and continue editing, if required.
Or

Click the **Save and Manage Product** button to save the profile and make ready to upload the product to Fyndiq.

The assigned products are listed on the **Manage Products** page as shown in the following figure:

Manage Products

4.3. Delete the Profiles

To delete the selected profiles in bulk

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu, and then click **Manage Profile**. The **Manage Profile** page appears as shown in the following figure:

Manage Profile

Search, Notifications, User Profile

Add New Profile

Filters | Default View | Columns

Actions | 2 records found | 20 per page | 1 of 1

	ID	Profile Code	Profile Name	Status	Product Count	Action
<input type="checkbox"/>	1	fyndiq_test_profile1	fyndiq_test_profile1	Enabled	2	Select
<input type="checkbox"/>	2	njmkhj	gkjhj	Disabled	0	Select

On this page, all the available profiles are listed.

3. Select the check boxes associated with the profiles those are no more required.
4. In the **Actions** list, select the **Delete** option.

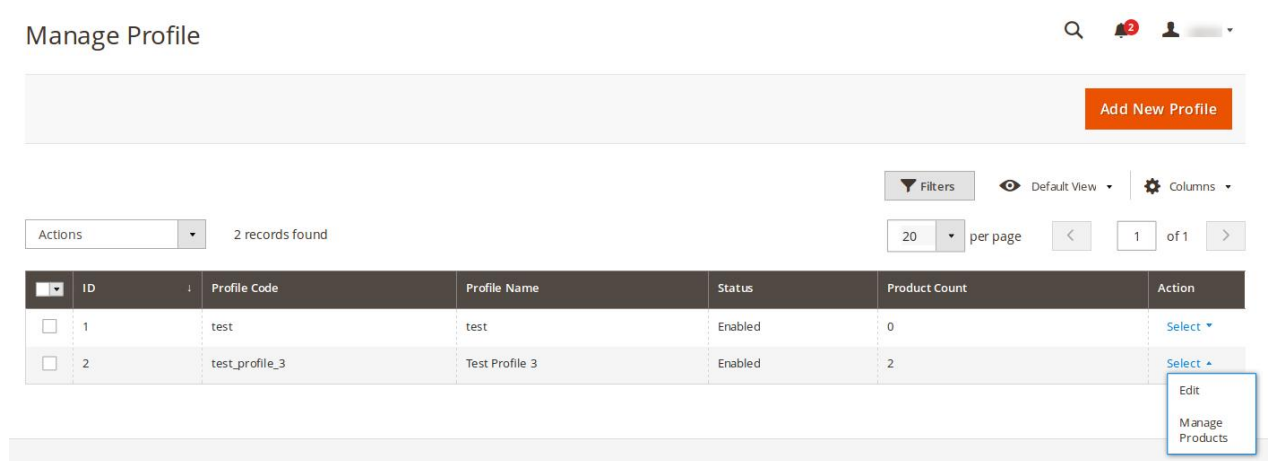

A confirmation dialog box appears.

5. Click the **OK** button.
The selected profiles are deleted.

Note: Admin can also delete the current profile while viewing the details of the profile on the profile editing page. This feature enables the admin to check the details of the profile before deleting it.

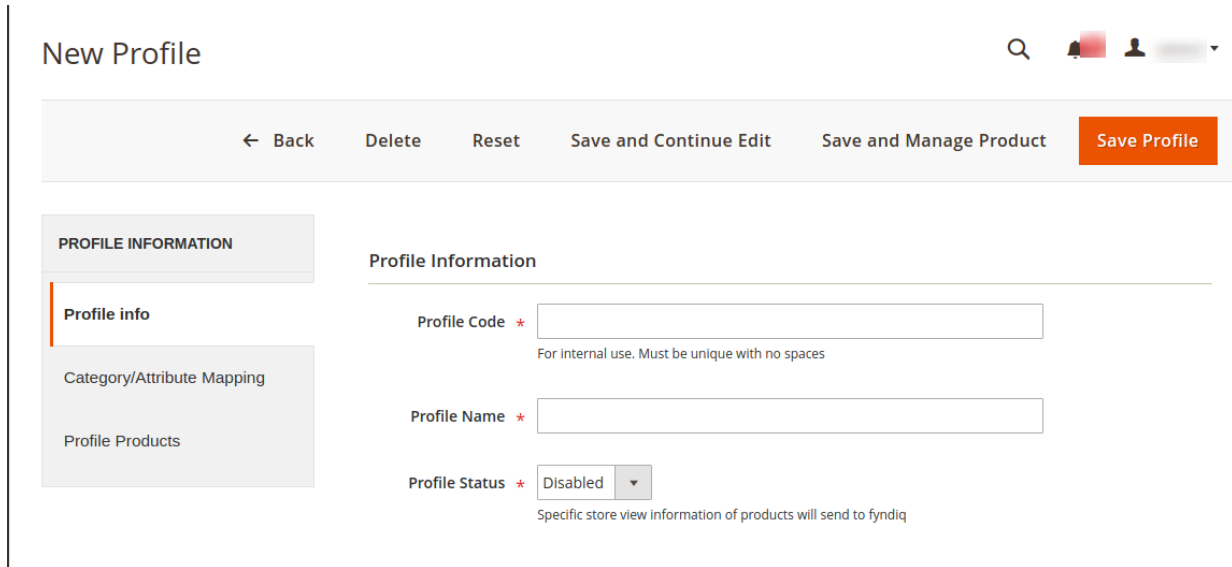

To delete the current profile

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu, and then click **Manage Profile**.
The **Manage Profile** page appears as shown in the following figure:

On this page, all the available profiles are listed.

3. Click the required row of the profile that is no more required.
OR
In the **Action** column, click the arrow button, and then click **Edit**.
The page appears as shown in the following figure:

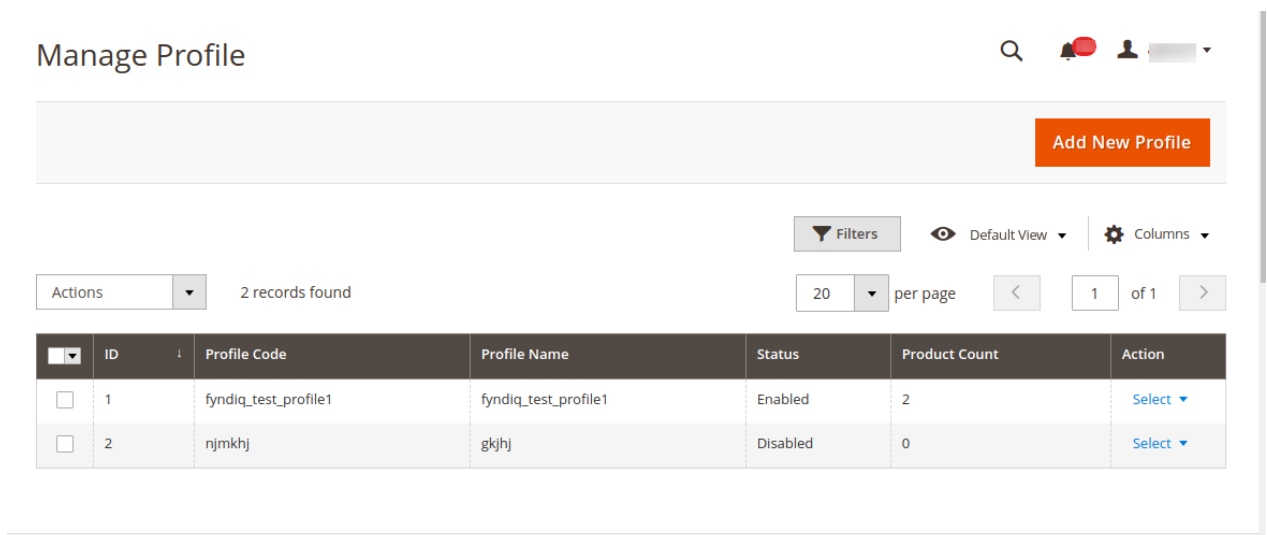

4. On the top navigation bar, click the **Delete** button.
A confirmation dialog box appears as shown in the following figure:
5. Click the **OK** button.
The current profile is deleted.

4.4. Enable or Disable the Selected Profiles

To enable or disable the selected profiles in bulk

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu, and then click **Manage Profile**.
The **Manage Profile** page appears as shown in the following figure:

- On this page, all the available profiles are listed.
3. Select the check boxes associated with the required profiles.
 4. In the **Actions** list, select the **Enable** option to enable the selected profiles or select the **Disable** option to

disable the selected profiles.

The selected profiles are enabled or disabled based on the selected option.

5. Manage Fyndiq Products

This feature of the integration extension enables the admin to manage all the products available in the Magento 2 store and uploaded on Fyndiq.com.

Hence, after getting redirected to the **Manage Products** page from the **Manage Products** menu, the store owners can perform the similar tasks as they can perform on the **Manage Products** page after getting redirected from the **Manage Profile** page.

The only difference here is the display of the products on the **Manage Products** page.

The differences are as follows:

- **Display of the Products on the Manage Products page after getting redirected from the Manage Profile page:** Only those products that are assigned to the selected profile are listed.
- **Display of the Products on the Manage Products page after getting redirected from the Manage Products menu:** All the products of all the profiles are listed.

Hence, there are two ways to open or go to the Manage Products page:

Option 1: Through the **Manage Profile** page:

1. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu, and then click **Manage Profile**. The **Manage Profile** page appears as shown in the following figure:

Manage Profile

file1	2		Batlucifer	Simple Product	M124	\$20.00	Catalog, Search	Enabled	Uploaded	VALID	Red	Select ▲

2. Scroll down to the required product.

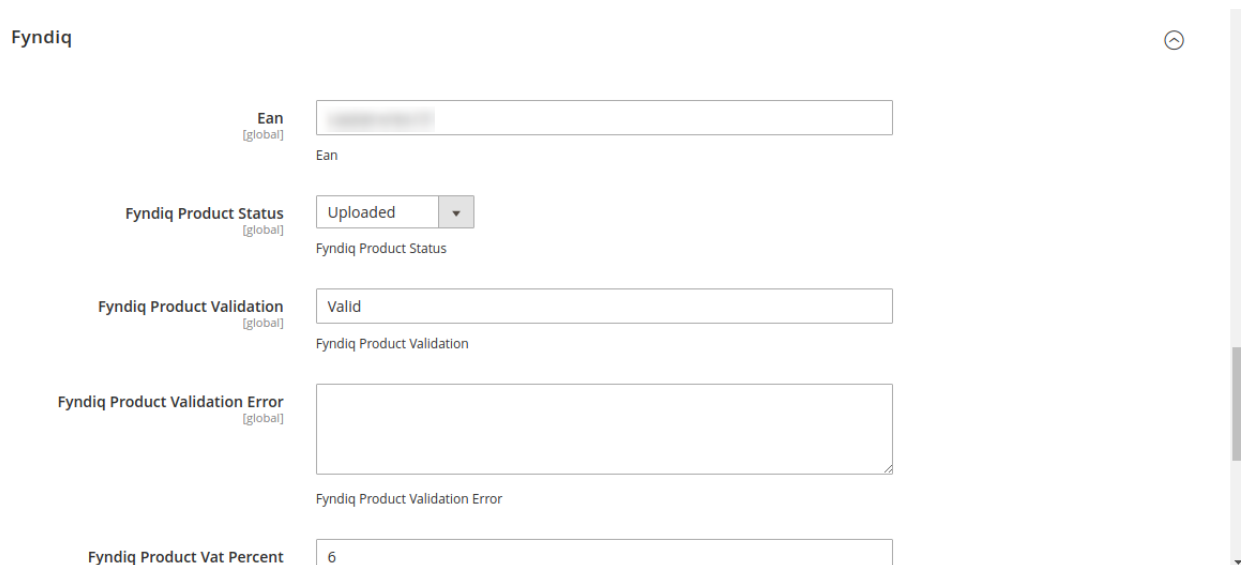

3. In the **Action** column, click the **Select** link associated with the required product. The menu appears as shown in the following figure:

4. Click **Edit**. The selected product information page appears as shown in the following figure:

5. Scroll down to the **Fyndiq** tab, and then click the tab. The tab is expanded and the relevant fields appear as shown in the following figure:

6. On this page, make the required changes, and then click the **Save** button.

The changes are saved and a success message appears on the **Manage Products** page.

5.2. Upload a Single Product

To upload a single product

1. Go to the **Manage Products** page.

The **Manage Products** page appears as shown in the following figure:

Manage Products

2 records found

20 per page

	Fyndiq Profile	ID	Thumbnail	Name	Type	SKU	Price	Visibility	Status	Fyndiq Product Status	Validation	config_color

1	24-MB01	<ul style="list-style-type: none"> → EAN : Required-Attribute-Empty → Brand : Required-Attribute-Empty → StockQuantity : Required-Attribute-Empty → NormalPriceWithVAT : Required-Attribute-Empty → VATRate : Required-Attribute-Empty

5.4. Submit Certain Actions on the Selected Products

Admin can submit the following actions for the selected products:

- **Validate Products:** To validate the product before uploading it to the fyndiq.com. It displays the corresponding validation error if any. If there is no error, it confirms that the product is ready to upload.
- **Validate And Upload Products:** To validate the product before uploading it on the fyndiq.com. It displays the corresponding validation error for all the products if any. If there is no error, then it validates the selected products and then uploads them to the fyndiq.com.
- **Update Inventory:** Updates the inventory of the product on fyndiq.com. This action completes all the job related to the product inventory and also it manages the quantity related issues.

To submit actions for the selected products

1. Go to the **Manage Products** page.
The **Manage Products** page appears as shown in the following figure:

	Fyndiq Profile	ID	Thumbnail	Name	Type	SKU	Price	Visibility	Status	Fyndiq Product Status	Validation	config

- f. Correct the issues and then again repeat the process of synchronizing the product inventories of the selected products.

6. Manage Fyndiq Orders

The admin can manage the fyndiq.com orders and can perform the following tasks:

- View Fyndiq Orders
- View Failed Imported Orders

6.1. Fetch and View the Orders Details

The user can fetch and view all the order details fetched from **Fyndiq**.

To fetch and view Fyndiq Orders

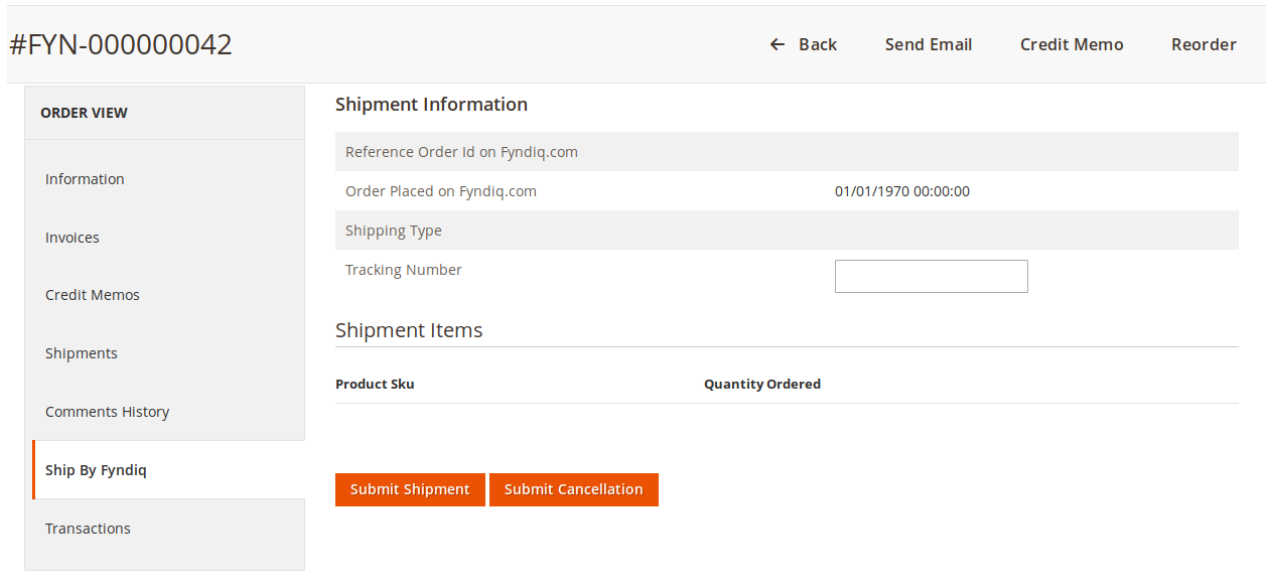

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu, and then click **View Fyndiq Orders**. The **Orders Grid** page appears as shown in the following figure:

Magento Order id	Merchant Order Id	Purchase Order Id	Order Place Date	Status	Deliver By	Entity Id
000000004	1494944050921386	1494944050921386	2015-03-06 16:55:45	Shipped	2015-03-06 16:55:45	1

3. Click the **Fetch New Orders** button. If the order is imported successfully, then a new record is found in the **Orders Grid** table and a success message appears as shown in the above figure.

Notes:

- Orders are automatically imported through CRON in every 10 minutes.
 - Whenever the latest orders are imported from **Fyndiq**, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported into the Magento 2 admin panel.
 - If no Order is imported, then check the Failed order log on the **Failed Orders Grid** page.
 - Order are auto-rejected on **Fyndiq** in the following conditions:
 - When **Fyndiq** Product SKU does not exist in Magento 2.
 - When Product is **Out of Stock** in Magento 2.
 - When a product is **disabled** in Magento 2.
4. In the left navigation panel, click the **Ship by Fyndiq** menu. The page appears in the right panel as shown in the following figure:

5. Under the **Fyndiq Order Information** section, do the following steps:
 - a. In the **Tracking Number** box, enter the required value.
6. Click on the **Ship Order** button.
The success message appears if the order is shipped successfully.

6.2. View Fyndiq Failed Orders

The users can view the list of failed Fyndiq orders on the **Failed Orders Grid** page.

In the following conditions, Orders are not imported from Fyndiq:

- If any product in the Fyndiq Order is Out of Stock in Magento 2.
- If any product in the Fyndiq Order is disabled in Magento 2.
- If any Product does not exist in Magento 2 or is deleted from Magneto after uploading to Fyndiq.
- If the selected Payment Method in Fyndiq System Configuration Setting is not available in Magento 2.

To view, Fyndiq failed orders

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **FYNDIQ INTEGRATION** menu, and then click **Failed Imported Orders**.

The **Failed Orders Grid** page appears as shown in the following figure:
