5. Help & Support	12

1. Overview

The **CedCommerce** Gtanslator extension for Magento® 2 is an easy to use and efficient translator Extension. This extension provides the ability to the admin to translate the contents of their products to a different language. This extension can be used to convert the products in any language desired.

Key Feature(s) of Gtranslator Magento 2 extension

• Admin can translate the products in any desired language.

2. Installation of Gtranslator Extension

To install the extension

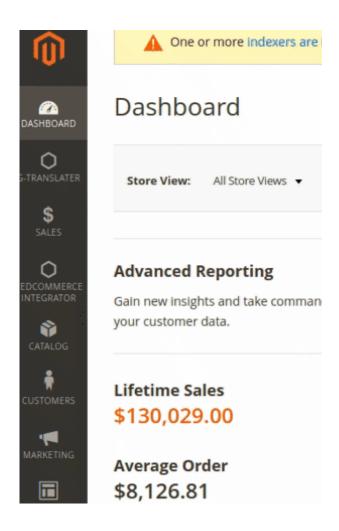

- Log in the ftp, and then go to Magento 2 root folder (generally present under the public_html folder).
- Create a new folder named code under the app folder; under code folder, create a folder named Ced.
 - a. Upload or Drag and Drop app/code/Ced directory.
 - b. After successfully uploading the directory, the extension will be installed/upgraded.
 - c. Now run the following upgrade command in *cmd php bin/magento setup:upgrade.*

3. Gtanslator Configuration Setting

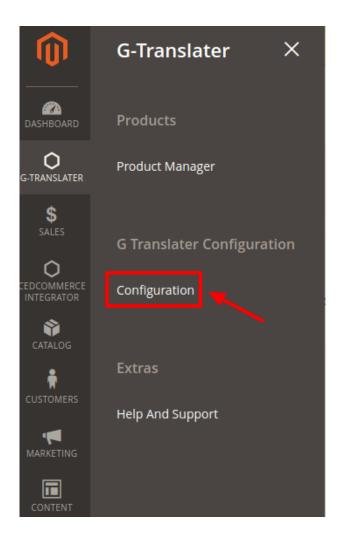

After the successful installation of the Gtanslator extension on the Magento 2 store, the admin has to set up the configuration settings required to enable the features of the extension.

To configure the settings

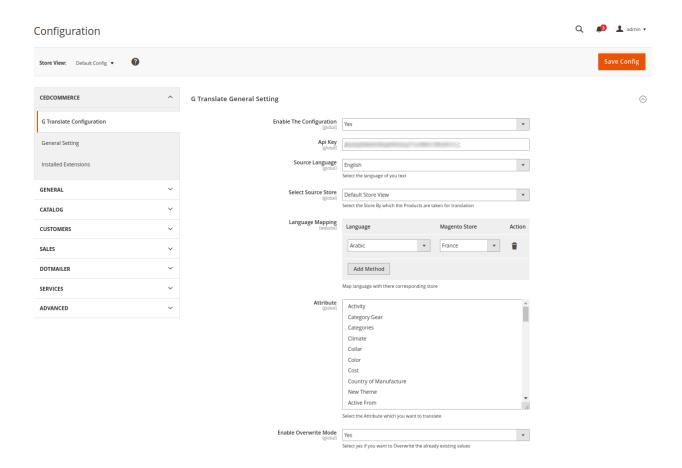

1. Go to the Admin panel.

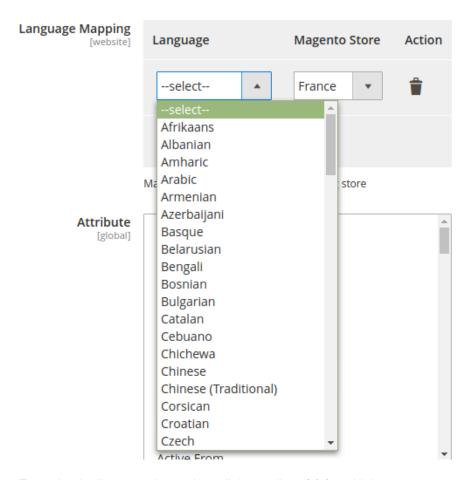

2. On the left navigation bar, click the **Gtranslator** menu, and then click **Configuration**.

The **Configuration** page appears.

- 3. In the **Enable the Configuration**, select the **Yes** option from the drop-down menu.
- 4. Enter the API key in the next section.
- 5. In the **Store Language** section, choose the original language of your store (the default language).
- 6. Choose the store whose Products you wish to translate from the **Select Source Store**.
- 7. Next comes the Language Mapping section. Here you can map the language with their corresponding store.

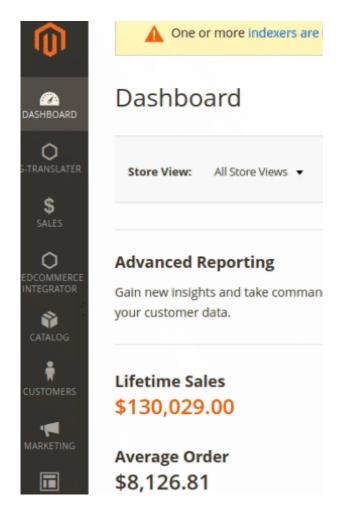

- 8. From the Attribute section, select all the attribute(s) for which you want to translate.
- 9. In the **Enable Overwrite Mode**, the data gets overwritten if already present in the store by selecting Yes. By selecting No the changes are discarded.

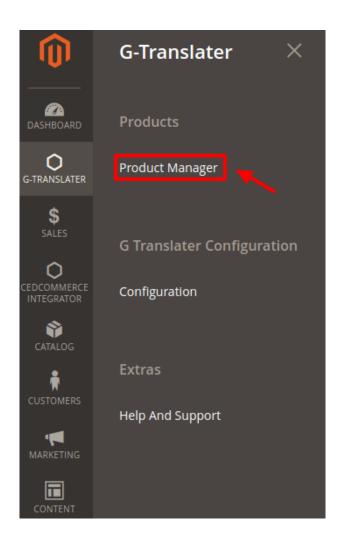

4. Manage Products

To add a new profile

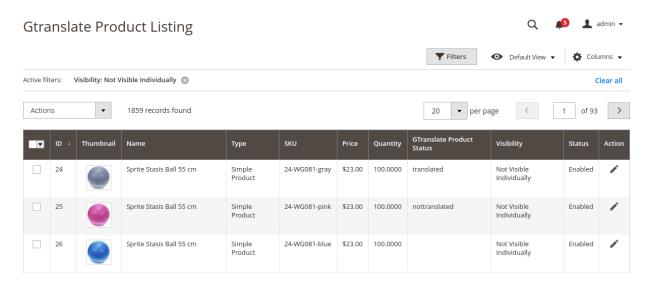

- 1. Go to the Magento 2 Store Admin panel.
- 2. On the left navigation bar, click the **Gtranslator** menu. A menu appears as shown in the following figure:

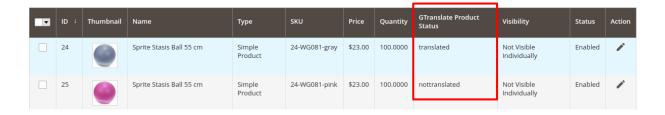

3. Click **Product Manager**.

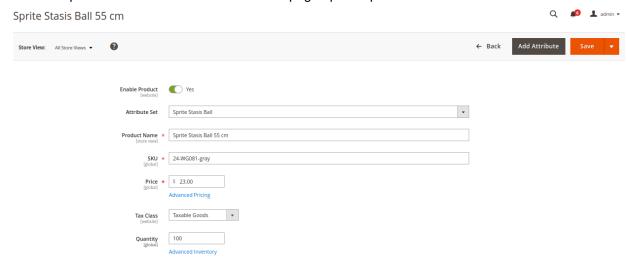

4. The **Gtranslate Product Listing** page appears as shown in the following figure:

5. You can view the current status of the Product from here:

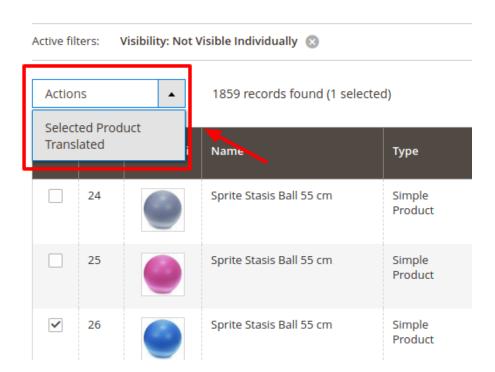

6. To edit the product click on the edit button & the page opens up:

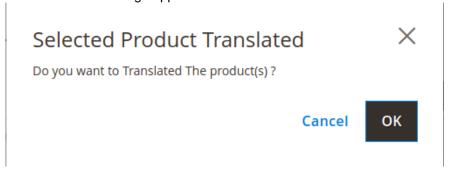

- 7. To translate the product go back to the previous menu and select the products you wish to translate.
- 8. Now click on Actions and choose Selected Product Translate.

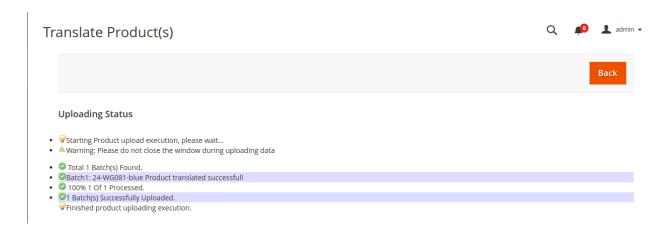

Gtranslate Product Listing

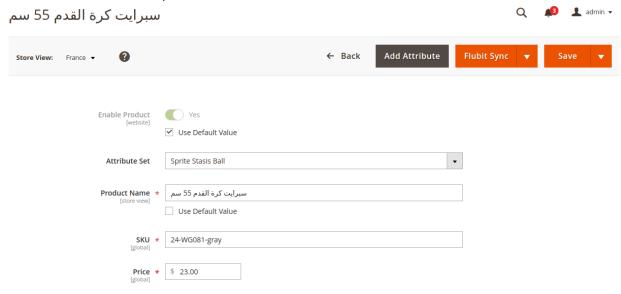

9. A confirmation message appears. Click OK.

10. Successful Translation is achieved and you can see this message:

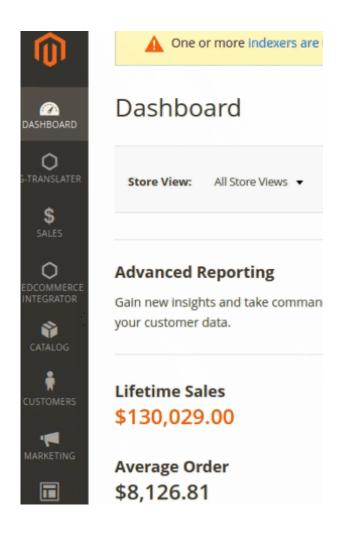

11. You can see the translated products now:

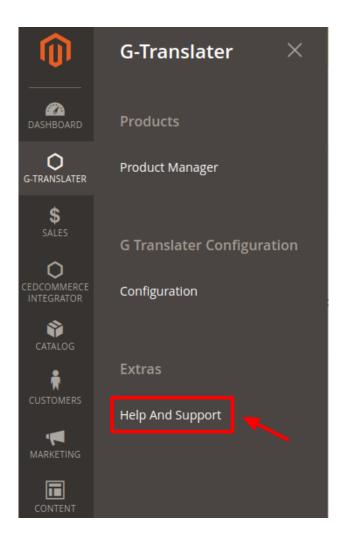

5. Help & Support
