## 1. Overview

**Lazada Product Importer For Opencart** is an extension developed by CedCommerce for Opencart Store, which allows the admin to import products from the Lazada store to the Opencart store based on the Lazada Seller Id and Lazada Site Id.

**Lazada Product Importer For Opencart** is a one-step process, which means it imports the products on a single click. This extension supports only Simple and Configurable Products.

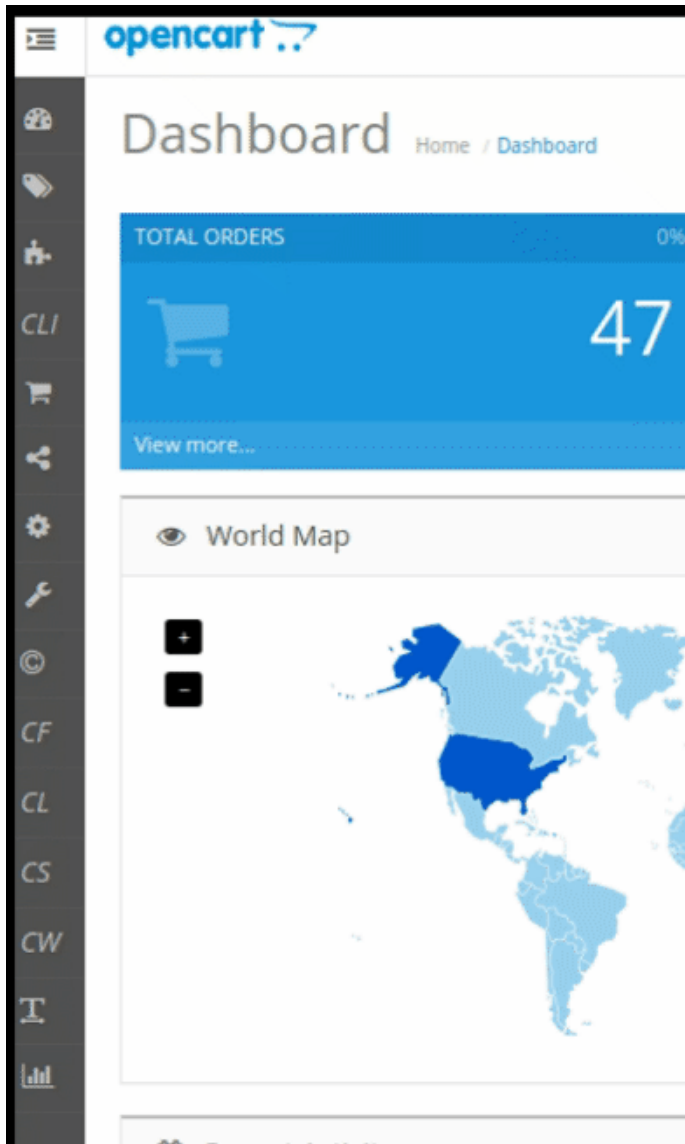

### *Key Features are as follows:*

- Hassle-free dynamic attribute creation.
- User-Friendly and easy to understand.
- Imports Simple and Configurable Products from the Lazada store to the **Opencart** store through Lazada API.
- It is a one-step process product import.
- Uploads all the products variation and stock information on the fly.

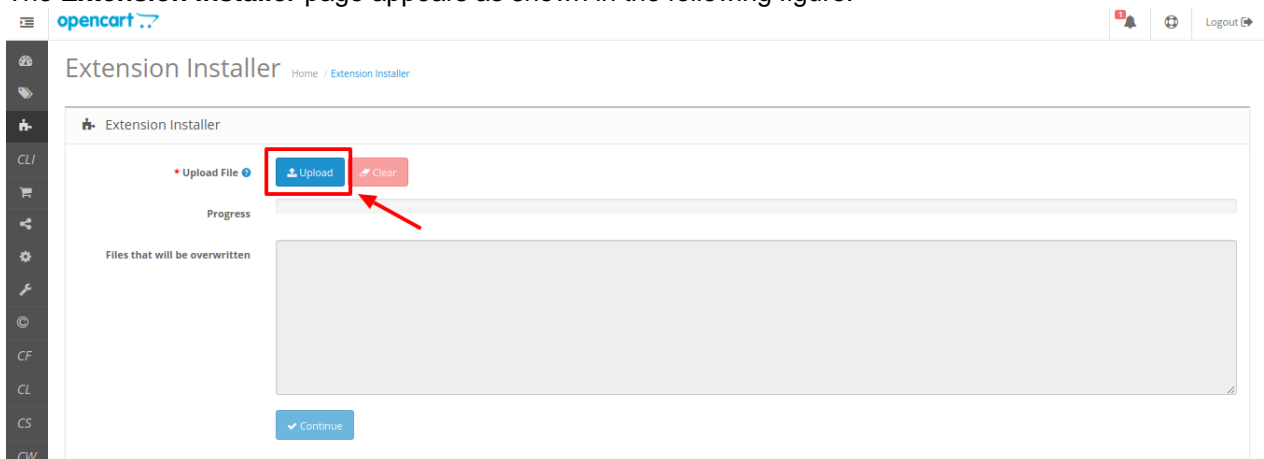

## 2. Lazada Opencart Importer Extension Installation

### *To install the extension:*

- Go to the **Opencart Admin panel**.
- On the left navigation bar, point cursor to the **Extension & Installation**.

The **Extension Installer** page appears as shown in the following figure:

- Now you need to click on **Upload** on the top right corner of the page.
- Choose the package file of Lazada marketplace from your system.
- Once selected, click on the **Upload this module button**.

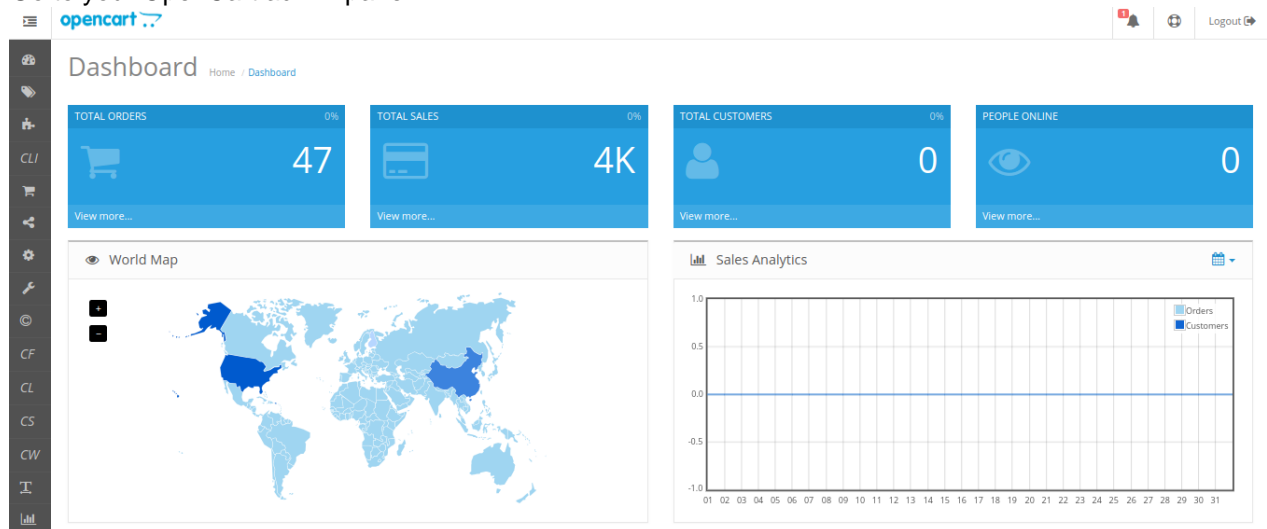

- The module will be installed and you will be navigated to the **Configuration** page for further steps to be taken.

### 3. Lazada Product Importer Configuration Settings

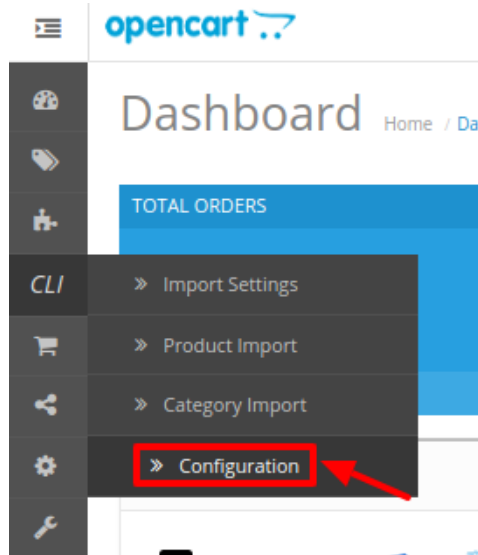

Once the module has been installed, the first necessary step needs to be taken by the admin is to complete the Configuration.

To do the **Configuration**,

- Go to your OpenCart admin panel.

- Place the cursor on **CLI** which is on the left navigation bar, as shown in the figure below.

- From the menu that appears as shown in the image below, click on **Configuration**.
- On clicking Configuration, you will be navigated to the Lazada Importer Configuration page as shown below:

The screenshot shows the 'Edit Importer Configuration' page in the OpenCart admin interface. The page has a breadcrumb trail: Home / Modules. The 'Setting' tab is selected, showing the following configuration fields:

- Status:** A dropdown menu set to 'Enabled'.
- APP Name:** A text input field containing 'Lazada OpenCart Importer'.
- APP Key:** A text input field with a masked value.
- APP Secret:** A text input field with a masked value.
- Redirect URI:** A text input field containing a URL: 'http://demo.cedcommerce.com/integration/opencart2.0/admin/index.php?route=module/lazada\_importer&token='.
- APP Code:** A text input field with a masked value.

A blue button labeled 'Save And Validate' is located at the bottom of the configuration form.

- In **Status**, select **Enabled** to enable the module.
- In the **App Name** bar, enter the app name provided on the Lazada App Console
- In the **App Key** bar, Enter the six-digit app key.
- In the **App Secret key** bar, enter the ID that you had retrieved from the Lazada App Console.
- Once you complete all these, click on click on **Save & Validate**. You will be redirected to Lazada's seller panel. Login once for confirmation and you will be redirected back to this panel again.
- In the **Redirect URL** and the **App Code** bar, is by default filled.
- 

Once you are done with entering and selecting all these needed information, click on the **Save button** on the top right corner, to save all the configuration settings you have made changes for.

Your configuration will be saved.

Now move to the 2nd section of the Configuration settings ie – **Default Values**. This page opens up as:

**Edit Importer Configuration**

Setting **Default Values** Field Mapping

**Available Date**

**Tax Class**

**Length Class**

**Weight Class**

**Default Category**

- Desktops

**Store(s) In Created Product**

- (Default)

- In the **Available date** enter the date associated with the product import.
- From the **Tax Class**, choose the tax imposed on the products as downloadable or taxable.
- From the **Length Class**, Choose the desired length you wish either centimeter, millimeter or inch.
- 
- From the **Weight Class**, Select the desired weight as kilogram, gram, pound or ounce.
- 

Choose the **Default Category** of the product from the next section.

Once you are done with entering and selecting all these needed information, click on **Save Button** to save all the configuration settings you have made changes for.

Now move to the last section of the Configuration, ie **Field Mapping**. The page opens up as:

Edit Importer Configuration

Setting Default Values **Field Mapping**

|                   |                    |
