## 1. Overview

Walmart DSV Integration for Magento 2 is an extension, developed by CedCommerce helps to integrate the Magento 2 store with Walmart DSV by establishing a synchronization of products, orders, and refunds with the help of Walmart DSV API.

The CRONs implemented in this extension help to automate the process thereby keeping it up to date.

This extension interacts with Walmart DSV Marketplace to integrate the synchronized product listing between the Magento 2 and the Walmart DSV retailers. After installing the extension, merchant can create the Walmart DSV Categories and the dependent attributes on the Magento 2 store.

The process enables the merchant to configure the desired product category into Magento 2 for automatic submission of the selected product to the same Category on Walmart DSV.

***The features of the Walmart DSV Integration for Magento 2 extension are as follows:***

- Profile Based Product Upload
- Easy Walmart DSV Category and Attribute mapping
- Manage Walmart DSV Product and Upload Product (directly from a grid and bulk upload all products)
- Product Synchronization
  - Automatic process on each product edit
  - Manual synchronization process
- Review Product/Inventory/Price Feeds
- Automated Order Import & Acknowledgement
- Shipment and Cancellation of Orders
- Automated Shipment with Shipworks/Shipstation
- Multiple Shipment of an Order
- Create a Refund
- Upload Configurable Product(s)
- Bulk Product Upload/Publish
- Retire/Unpublish Selected Product(s)
- CRON Facility
- Knowledge Base
- Walmart DSV Tax Codes

### Caution

: Extension is heavily dependent on Crons for running various automated processes. So, make sure that Cron Job is properly configured and working on the server.

## 2. Installation Of The Extensions

### ***To install the extension***

- Log in the **ftp**, and then go to the Magento 2 root folder (generally present under the *public\_html* folder).

- Overwrite the *app*, *skin*, *js* and *var* folders in the same sequence as illustrated in the following steps:
  - Drag and Drop the *app/code*, *app/design*, *js*, *skin* and *var* directories.
  - Finally, upload the *app/etc* directory.
  - After the folders are loaded successfully, the extension is installed or upgraded.

### 3. Walmart DSV Configuration Settings

Once the extension is successfully installed on the Merchant's store, Walmart DSV menu appears in the Magento 2 store Admin Panel. The merchant has to fill in the API credentials in the **Walmart DSV Configuration** page of the admin panel.

The user has to log in the Walmart DSV Seller account to obtain the following API credentials:

- **Consumer Id**
- **Private Key**

After obtaining the Consumer Id and the Private Key, the merchant has to copy all of them one by one from the Walmart DSV Seller account and paste it one by one to the Configuration page of the admin panel of the merchant.

To follow the process of copying and pasting of the consumer ids and private keys, open the Walmart DSV Seller account and the Magento 2 store Admin Panel in two different tabs or windows of the browser. Thus, copy the keys from the Walmart DSV Seller account and paste them one by one to the Magento 2 store Admin Panel.

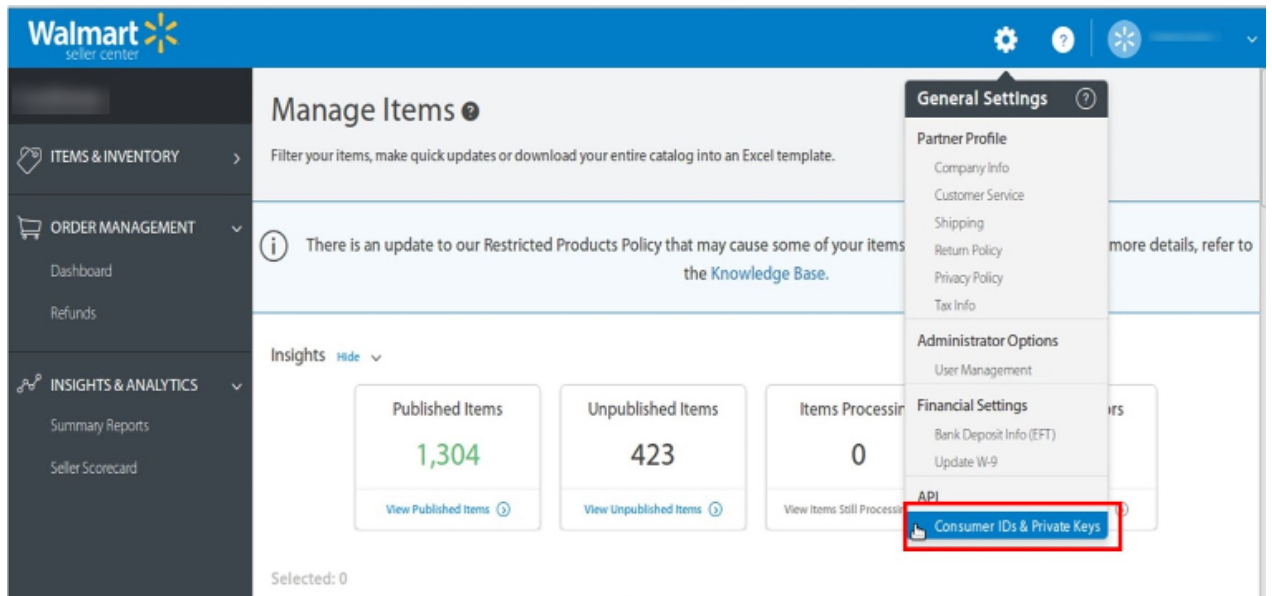

#### **To copy the API Credentials from the Walmart DSV Seller account**

1. Open the **Walmart DSV Seller** account.
2. Click the **Settings**

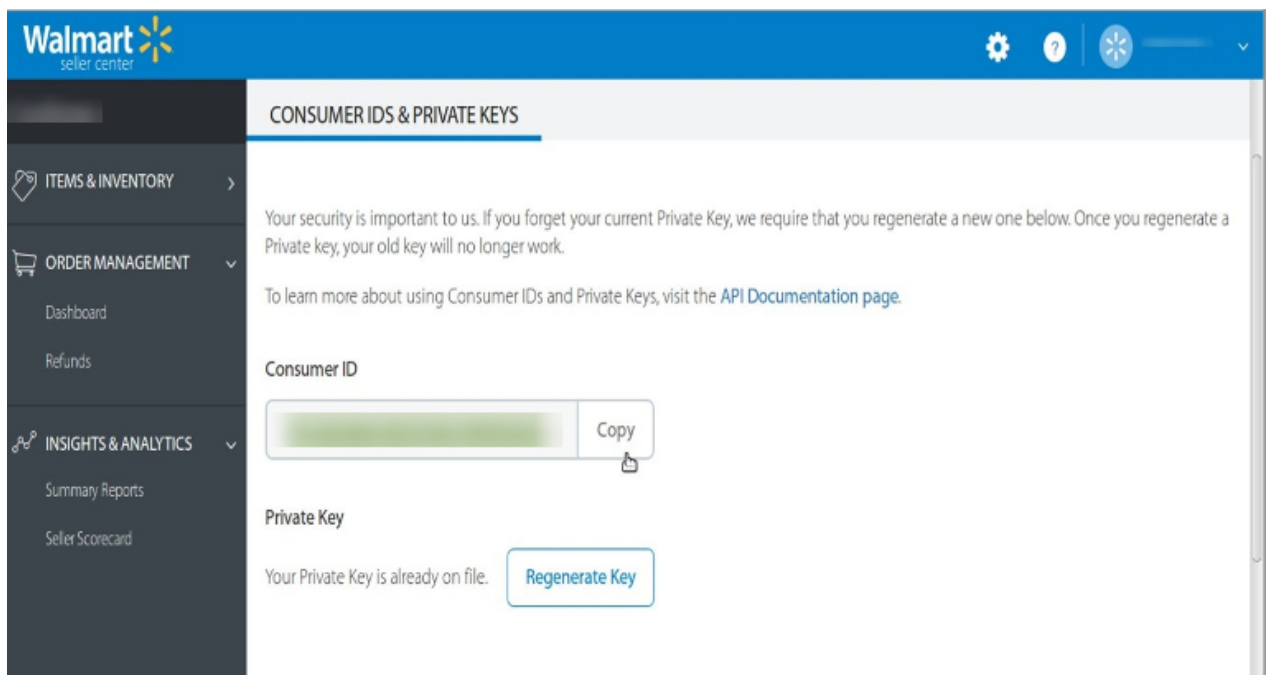

icon.

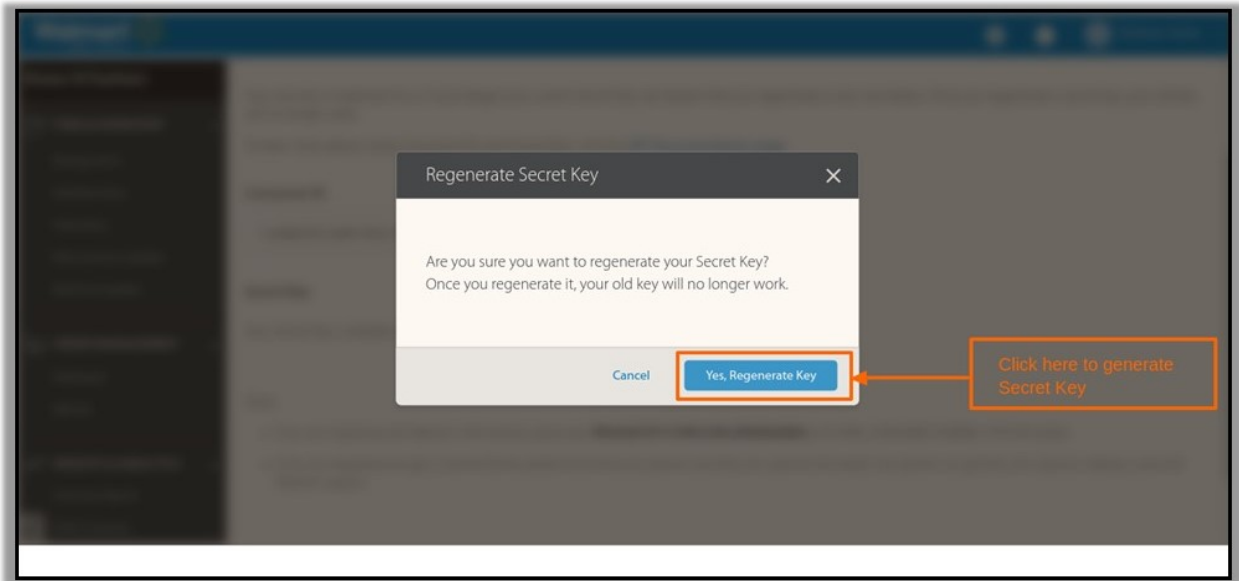

The **General Settings** menu appears as shown in the following figure:

- Under **API**, click **Consumer IDs & Private Keys**.  
The page appears as shown in the following figure:

- Under **Consumer ID**, click the **Copy** button.
- Under **Private Key**, click the **Regenerate Key** button.  
The **Regenerate Secret Key** dialog box appears as shown in the following figure:

6. Click the **Yes, Regenerate Key** button.  
The key is generated. Copy the generated key.

**To Set up the Configuration settings in the Magento 2 store Admin panel**

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **WALMART DSV INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Configuration**.

The **Configuration** page appears as shown in the following figure;

### Walmartdsv Api Settings

Enabled [global]	Yes	▼
Consumer Id [global]	test	
Shipping Node [global]	test	
Private Key [global]	asqadasfasfs	
Orders Fetch Start Date [global]	2018-11-22	
Debug Log [global]	No	▼
Select Store [global]	Default Store View	▼

4. In the right panel, under **Walmart DSV API Settings**, do the following steps:
  - a. In the **Enabled** list, select **Yes**.
 

**Note:** The **No** option hides all the relevant fields that appear under the **Walmart DSV API Settings** section. The **WALMART DSV INTEGRATION** menu does not appear on the left navigation bar.
  - b. In the **Consumer Id** box, paste the corresponding **Consumer ID** copied from the **Consumer IDs & Private Keys** page of the **Walmart DSV Seller Account**.
  - c. In the **Private Key** box, paste the corresponding **Private Key** copied from the **Consumer IDs & Private Keys** page of the **Walmart DSV Seller Account**.
  - d. In the **Orders, Fetch Start Date** box, click the calendar icon, and enter the date.  
The date from when the user starts to fetch the order.
  - e. In the **Debug Log** list, select **Yes** to capture the log.  
It captures the log for the debug process.
  - f. In **Select Store**, select your store.
5. Click the **Product Global Settings** tab.  
The tab is expanded and the relevant fields appear as shown in the following figure:

## Configuration

Please set the global settings for Walmartdsv.com

**Walmartdsv Product Price** [global]  ▼  
 Select to send a different product price to **walmartdsv.com**

**Inventory Fullfillment Lag Time (Default)** [global]   
 Days to fulfill the inventory on **out of stock** Please Enter Default Value.

**Inventory Fullfillment Lag Time** [global]  ▼  
 Days to fulfill the inventory on **out of stock** Please Select Attribute. Accept Only Number. If attribute not having number then we get value from default field if default field not having value (invalide value) then we send minfulfillment lag time 1 (one)

**Product Tax Code Value** [global]   
 Category Wise Tax Code for Category **Animal** to be applied on each product for **walmartdsv.com**

Select Taxcode

**Shipping Settings** [global]

Enabled	Region	Method	Magento Attribute Code	Action
Add Rule				

**Walmartdsv Product Id Override** [global]  ▼  
 Enable to Override Walmartdsv Product Identifier . Keep It disabled until it is specifically Needed.

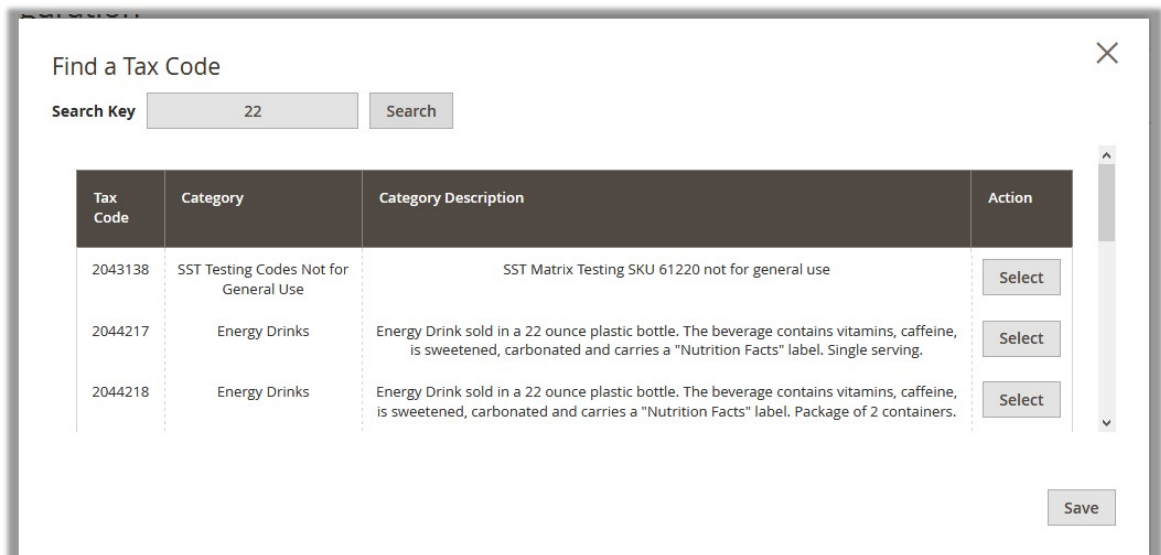

**Walmartdsv Product SKU Override** [global]  ▼  
 Enable to override product SKU on walmartdsv

**Enable Swatches for Configurable Product** [global]  ▼

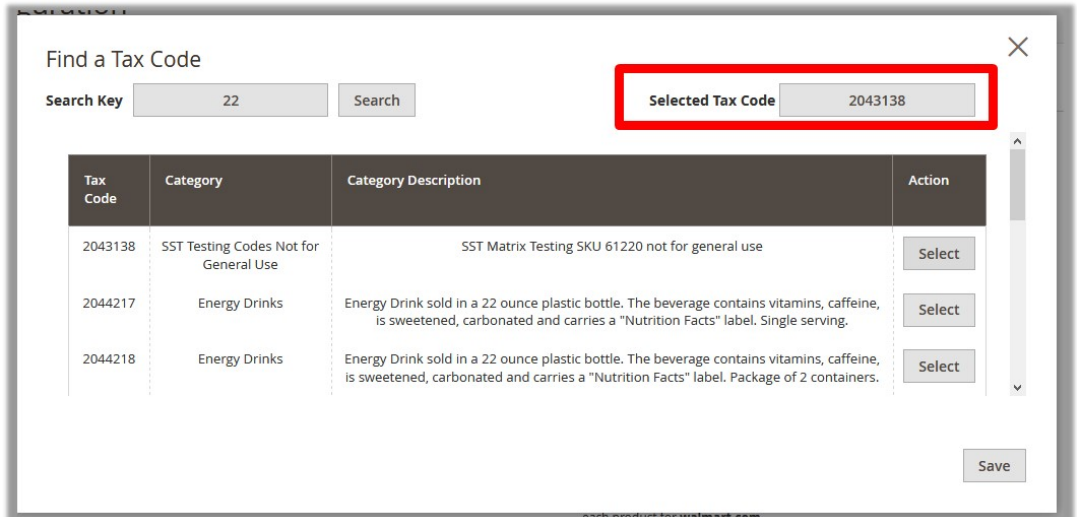

**HTTPS Images** [global]  ▼  
 Please do Enable if you want to https image on walmart.com .

- a. Under Product Global Settings, do the following steps:
- b. In the **Walmart DSV Product Price** list, select the required option.
  - \. **Walmart DSV Product Price**: This is to set a different price for all the products as shown in the following figure:  
 The user can set the price on the following basis: –

- `. **Increase by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.
  - `. **Increase by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.  
 Enter the numeric value to increase the price of the Walmart DSV product price by the entered value % of Magento 2 price  
*For Example: Magento 2 price + 5% of Magento 2 price.*  
 Magento 2 Price = 100  
 Select **Increase By Fixed Percentage** option  
**Modify by Percentage Price = 5**  
 $100 + 5\% \text{ of } 100 = 100 + 5 = 105$   
 Thus, Walmart DSV Product Price = 105
  - `. **Decrease by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.
  - `. **Decrease by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.  
 Enter the numeric value to decrease the price of the Walmart DSV product price by the entered value % of Magento 2 price  
*For Example: Magento 2 price – 5% of Magento 2 price.*  
 Magento 2 Price = 100  
 Select **Decrease By Fixed Percentage** option  
**Modify by Percentage Price = 5**  
 $100 - 5\% \text{ of } 100 = 100 - 5 = 95$   
 Thus, Walmart DSV Product Price = 95
3. In the **Inventory Fulfillment Lag Time (Default)** box, enter the number of days to fulfill the inventory when the product is out of stock.
  4. In the **Inventory Fulfillment Lag Time** box, select the attribute for the number of days to fulfill the inventory when the product is out of stock.
  5. In the **Product Tax Code Value** box, enter 7 digit product tax code.  
 Or Click the **Select Tax code** button.  
 The **Find a Tax Code** page appears as shown in the following figure:

- i. Scroll down to the required Tax Code.
- ii. In the **Action** column, click the corresponding **Select** button.  
 The Tax Code is selected and appears on the top-right corner of the page as highlighted.

iii. Click the **Save** button.

The page is closed and the selected Tax Code appears in the **Product TaxCode** box.

6. In the **Shipping Settings** field, click the **Add** button.

**Shipping Settings**  
[global]

Enabled	Region	Method	Magento Attribute Code	Action
Yes ▼	▼	▼	--pl€ ▼	
<b>Add Rule</b>				

i. In **Enabled**, select **Yes**.

ii. Select the shipping region in **Region** field.

iii. Select the shipping method in the next field.

iv. Select the **Magento 2 Attribute Code** in the next field.

7. In the **Walmart DSV Product Id Override** list, select the required option.

**Note:** **Enable** to Override Walmart DSV Product Identifier. Disable it until it is specifically needed.

8. In the **Walmart DSV Product SKU Override** list, select the required option.

**Note:** **Enable** to Override Product SKU on Walmart DSV.

9. In the **Enable Swatches for Configurable Product** list, select the required option.

10. On selecting **Enable**, a field appears as:

**Enable Swatches for Configurable Product**  
[global]

**Swatches Attributes**  
[global]

Enable

- color
- size
- assembledProductWidth
- material
- shoeSize
- clothingSize
- sportsTeam
- sportsLeague
- capacity
- shape

11. Select the swatch attributes from the list given.
6. Click **Order Settings** tab and the section will expand as:

**Order Settings**

**Create Product**  
[global]

No

Create Product if product Not exist in magento.

**Walmartdsv Order Id Prefix**  
[global]

Prefix for Walmartdsv Increment ID

**Customer Id**  
[global]

Enter the Customer Id for which customer will be created for Walmartdsv Orders.

**Customer Email**  
[global]

Enter the Email for which customer will be created for Walmartdsv Orders.

**Shipping**  
[global]

-- Please Select --

**Payment**  
[global]

-- Please Select --

- a. In **Create Product** field, select **Yes** if you want to create a product if it does not exist in Magento 2 and yet has been ordered on Walmart DSV.
- b. In the **Walmart DSV Order Id Prefix** box, enter a text as a prefix for Walmart DSV Increment ID.

  - d. In the **Price Update** field, enter the chunk size for the number of products. The price will be updated in one batch for the number of products that you enter in this field.
  - e. In the **Retire Update** field, enter the chunk size of the products. The number of products that you will be able to retire on Walmart DSV would be same as the number that you enter in this field.
  - f. In the **Sync Status** field, enter the chunk size of the products. The number of products that you will be able to sync the status for would be the same as the number that you enter in this field.
10. Click the **API Calling Switch** tab and it will expand as:

### API Calling Switch

**Price and Inventory By Post**   
[global]  
 Update Price and Inventory By Post Request

- a. In the **Price and Inventory By Post** field, select **Yes** if you want the price and inventory to be updated by a post request.
11. Once you have taken all the steps mentioned above, click on the **Save Config** button on the top right side of the page. The configuration will be saved.

## 4. Walmart DSV Products

Admin can manage products, create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 store attributes to the Walmart DSV attributes. These attributes are applicable to all the products that are assigned to the profile.

### Admin can do the following tasks:

- Upload Single Product, View Error Log, and Edit Product Information
- Submit Actions on the Manage Products page
- Add a new profile
- Edit the existing profile
- Delete the profile
- Submit Actions on the Manage Profile page

### 4.1. Manage Products

On this page, admin can view, edit, and upload the individual product. Also, the admin can view the error message if any error exists in any product details. The admin can also submit certain actions on the selected products available on the **Manage Products** page.

#### *This section covers the following topics:*

- View and Edit Single Product
- Upload Single Product
- View Error Log
- Submit Actions on the Manage Products Page

#### 4.1.1. View and Edit Single Product

##### To view the product information,

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **WALMART DSV INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Products**.

The **Manage Products** page appears as shown in the following figure:

Manage Products												Back To Profile

## 4.2. Manage Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 Store attributes to the Walmart DSV attributes. These attributes are applicable to all the products that are assigned to the profile.

**Admin can complete the following tasks:**

- Add a new profile
- Edit the existing profile
- Delete the profile
- Submit Actions on the Manage Profile page

### 4.2.1. Add New Profile

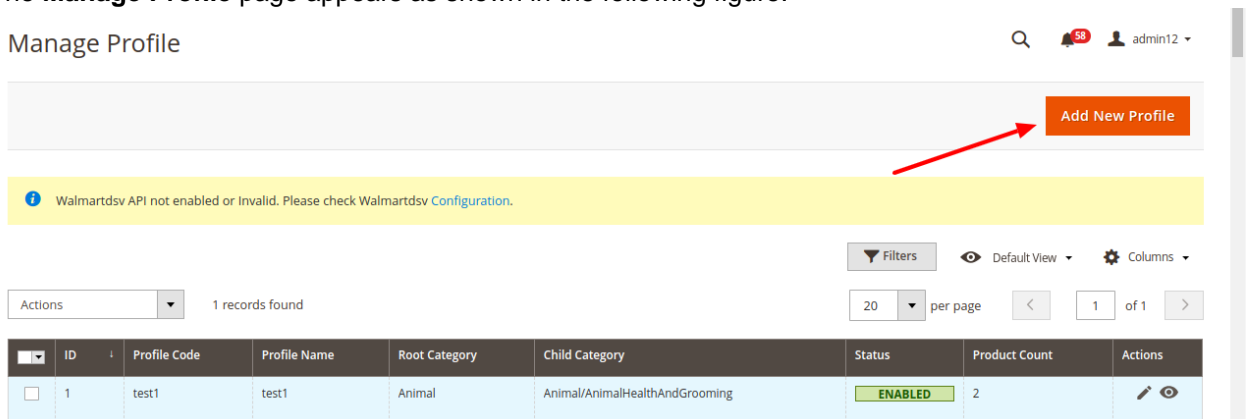

**To add a new profile,**

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **WALMART DSV INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Profile Manager**.

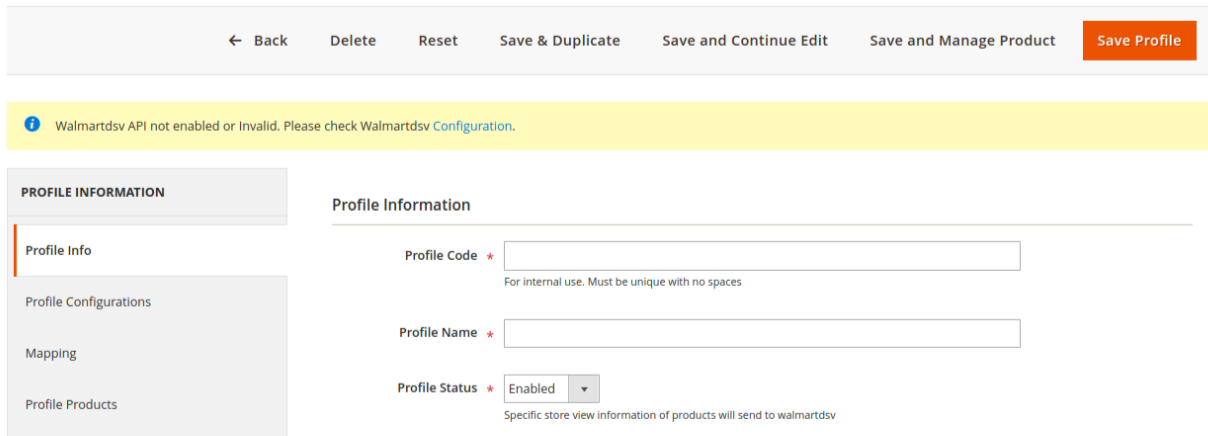

The **Manage Profile** page appears as shown in the following figure:

4. Click the **Add New Profile** button.

The **New Profile** page appears as shown in the following figure:

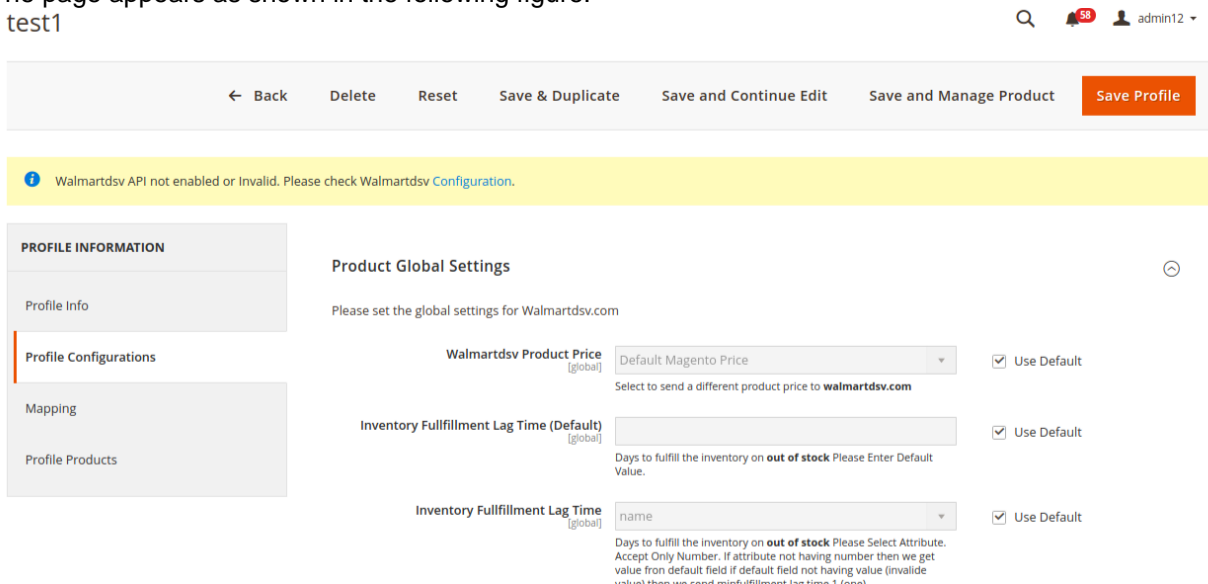

New Profile

5. In the right panel, under the **Profile Information** section, do the following steps:
  - a. In the **Profile Code** box, enter a profile code.  
**Note:** It is only for the internal use. Use the unique profile code with no spaces. Start with small letters.
  - b. In the **Profile Name** box, enter the name of the profile.  
**Note:** Use the unique name to identify the profile.
  - c. In the **Status** list, select **Active** to enable the profile.  
**Note:** The Inactive option disables the profile.
6. Click the **Save and Continue Edit** button.

7. In the left navigation panel, click the **Profile Configurations** menu.

The page appears as shown in the following figure:  
test1

8. Under the **Walmart DSV Global Settings** section, do the following steps:
  - a. In the **Walmart DSV Product Price** list, select the required option. *You may do it once you have unchecked the **Use Default** option adjacent to the corresponding field.*
    - i. **Walmart DSV Product Price:** This is to set a different price for all the products as shown in the following figure:

Users can set the price on the following basis: –

**Increase by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.

**Increase by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the Walmart DSV product price by the entered value % of Magento 2 price

*For Example: Magento 2 price + 5% of Magento 2 price.*

Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

**Modify by Percentage Price = 5**

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Walmart DSV Product Price = 105

**Decrease by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.

**Decrease by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the Walmart DSV product price by the entered value % of Magento 2 price

*For Example: Magento 2 price – 5% of Magento 2 price.*

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

**Modify by Percentage Price = 5**

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Walmart DSV Product Price = 95

- b. In the **Inventory Fulfillment Lag Time** box, enter the number of days to fulfill the inventory when the product is out of stock. *You may do it once you have unchecked the **Use Default** option adjacent to the corresponding field.*
- c. In the **Product Tax Code Value** box, enter 7 digit product tax code.  
Or Click the **Select Tax code** button.

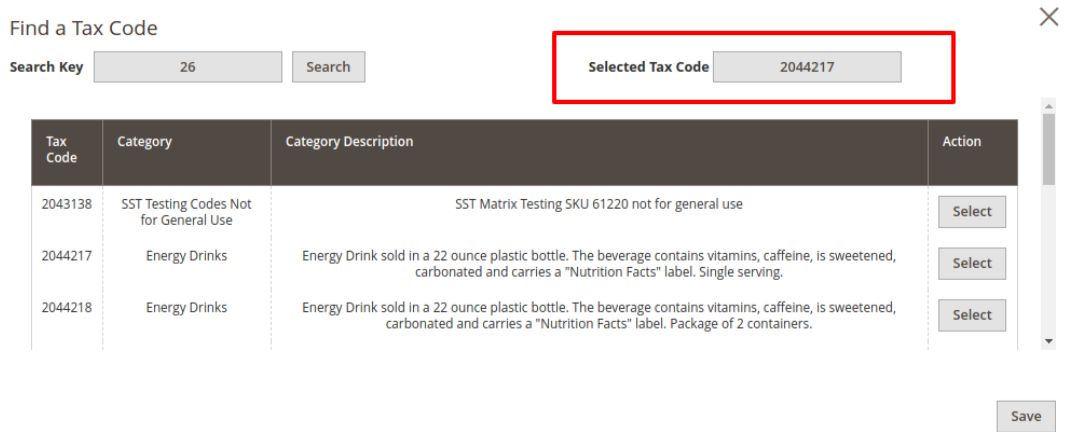

The **Find a Tax Code** page appears as shown in the following figure:

Find a Tax Code ✕

Search Key

Tax Code	Category	Category Description	Action
2043138	SST Testing Codes Not for General Use	SST Matrix Testing SKU 61220 not for general use	<input type="button" value="Select"/>
2044217	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Single serving.	<input type="button" value="Select"/>
2044218	Energy Drinks	Energy Drink sold in a 22 ounce plastic bottle. The beverage contains vitamins, caffeine, is sweetened, carbonated and carries a "Nutrition Facts" label. Package of 2 containers.	<input type="button" value="Select"/>

- d. Scroll down to the required Tax Code.
- e. In the **Action** column, click the corresponding **Select** button.  
The Tax Code is selected and appears on the top-right corner of the page as highlighted.

f. Click the **Save** button.

The page is closed and the selected Tax Code appears in the **Product Tax Code** box.

g. In the **Walmart DSV Product Id Override** list, select the required option.

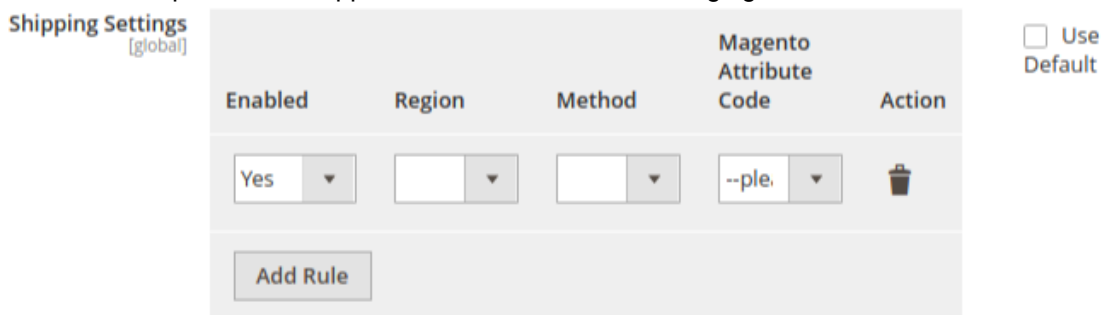

**Note:** **Enable** to Override Walmart DSV Product Identifier. Disable it until it is specifically needed.

h. In the **Walmart DSV Product SKU Override** list, select the required option.

**Note:** **Enable** to Override Product SKU on Walmart DSV.

2. To configure the **Shipping Settings**, click the **Add** button.

The field is expanded and appears as shown in the following figure:

i. In the **Enabled** list, select **Yes**.

ii. In the **Region** list, select the required region.

iii. In the **Method** list, select the required shipping method.

iv. In the **Magento 2 Attribute Code** list, select the corresponding attribute code.

**Note:** Click the **Add** button to add more shipping settings. To delete the rule, in the corresponding row of the **Action** column, click the **Delete** icon.

9. Under **Walmart DSV Inventory Rules**, do the following steps:

a. In the **Send Inventory on Basis of Threshold** list, select **Enable** to send the inventory based on threshold.

**Note:** Only when the admin selects **Enable**, the other fields appear.

The section appears as shown in the following figure:

Walmartdsv Inventory Rules

**Set Inventory on Basis of Threshold**   Use Default  
[global]  
 Choose yes to send inventory on walmartdsv by condition

**Inventory Threshold Value**   Use Default  
[global]  
 Set inventory quantity on which lesser and greater condition can control.

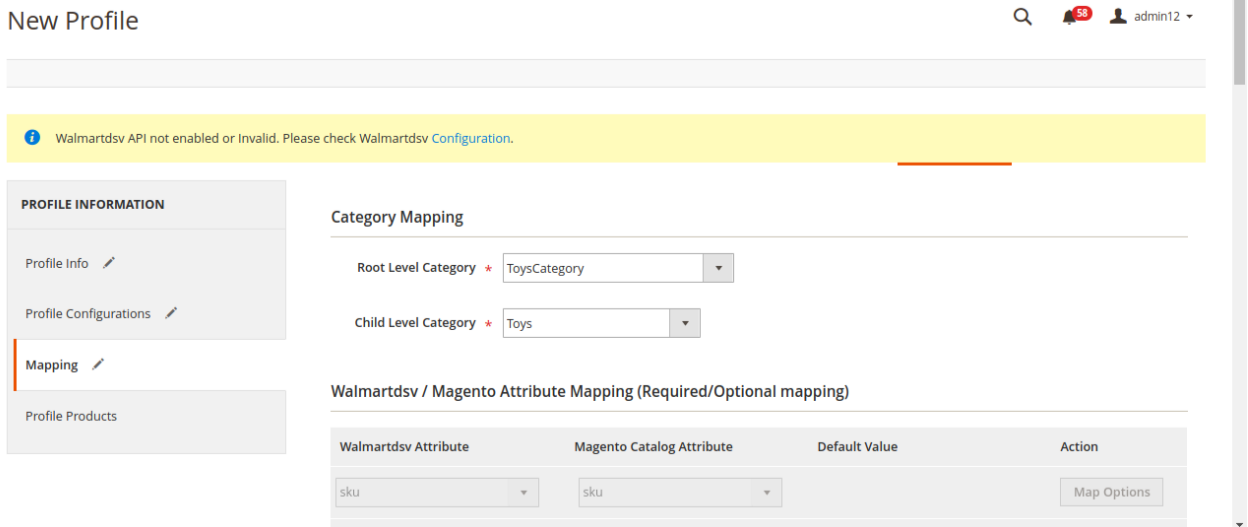

**Send Inventory for Lesser Than Threshold Case**   Use Default  
[global]  
 Send Quantity to Walmartdsv for those products, whose inventory is LESSER than the inventory threshold.

**Send Inventory for Greater Than Threshold Case**   Use Default  
[global]  
 Send Quantity to Walmartdsv for those products, whose inventory is GREATER than the inventory threshold.

**Note:** Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock.

- b. In the **Inventory Threshold Value** box, enter the required value.
  - c. In the **Send Inventory for Lesser Than Threshold Case** box, enter the required value.
  - d. In the **Send Inventory for Greater Than Threshold Case** box, enter the required value.
10. Click the **Save and Continue Edit** button.
11. In the left navigation panel, click the **Mapping** menu.

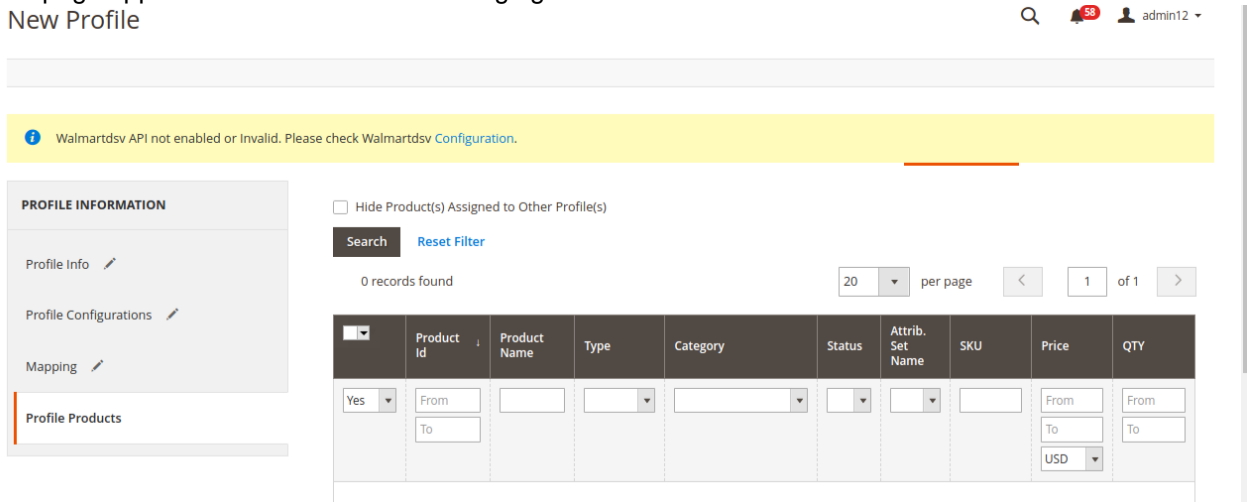

The page appears as shown in the following figure:

- 12. In the right panel, go to the **Category Mapping** section.
- 13. Under **Category Mapping**, do the following steps:
  - a. In the **Root Level Category** list, select the required **Walmart DSV** category that the admin wants to map.
  - b. In the **Child Level Category** list, select the required child category.  
Depending upon the selection of the category and the sub-categories, the Walmart DSV and Magento 2 attributes appear under the **Walmart DSV / Magento 2 Attribute Mapping (Required/Optional mapping)** section, if exist.

14. Go to the **Walmart DSV / Magento 2 Attribute Mapping (Required/ Optional mapping)** section.
15. Under **Walmart DSV / Magento 2 Attribute Mapping (Required/ Optional mapping)**, do the following steps:
  - a. In the **Walmart DSV Attribute** column, select the required Walmart DSV attribute to map it with the corresponding Magento 2 store attribute.
  - b. In the **Magento 2 Catalog Attribute** column, select the required Magento 2 store attribute to map it with the corresponding Walmart DSV attribute.
  - c. Click the **Add Attribute** button to add more attributes, if required.
  - d. Repeat the steps to map all the required Walmart DSV attributes to the corresponding Magento 2 store attributes.
16. Go to the **Walmart DSV / Magento 2 Attribute Mapping (Variant Attribute Mapping)** section.
17. Under **Walmart DSV / Magento 2 Attribute Mapping (Variant Attribute Mapping)**, do the following steps:
  - a. In the **Walmart DSV Attribute** column, select the required Walmart DSV attribute to map it with the corresponding Magento 2 store attribute.
  - b. In the **Magento 2 Catalog Attribute** column, select the required Magento 2 store attribute to map it with the corresponding Walmart DSV attribute.
  - c. Click the **Add Attribute** button to add more attributes, if required.
  - d. Repeat the steps to map all the required Walmart DSV attributes to the corresponding Magento 2 store attributes.
18. Click the **Save and Continue Edit** button.
19. In the left navigation panel, click the **Profile Products** menu.

The page appears as shown in the following figure:

Since no products are assigned to the profile, there are no products listed in the table.

20. Click the **Reset Filter** link.
- All the products are listed in the table as shown in the following figure:

5. On this page, you may manage the products assigned to the profile.

To know how to operate the management of products, refer to the **Manage Products** section of this user guide.

### 4.3. Feed

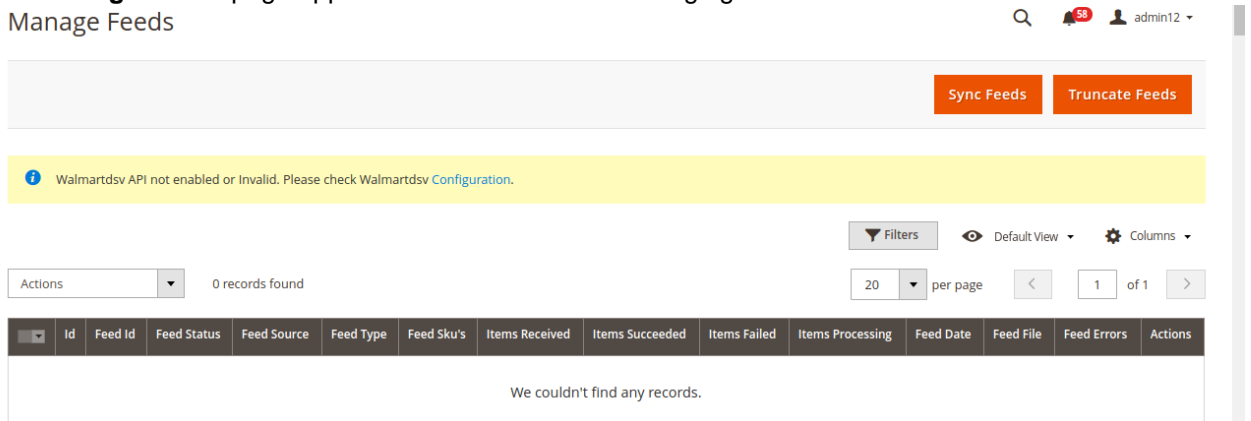

After uploading the product on Walmart DSV or after updating the product inventory or the product price, the user can check the status of the feed and sync the selected feeds or all the feeds from the Walmart DSV Feed Details page.

#### To view product feeds status.

1. Go to **Magento 2 Store Admin Panel**.
2. On the left navigation bar, click the **WALMART DSV INTEGRATION** menu, and then click **Feeds**.

The **Manage Feeds** page appears as shown in the following figure:

3. Do the following tasks if required:

- View the status of the feed in the **Feed Status** column.
- To synchronize the feeds between Walmart DSV and Magento 2 Store, click the **Sync Feeds** button.

**To view product feed status on Walmart DSV seller panel,**

1. Go to the **Walmart** DSV seller panel.
2. In the left navigation menu, click **Feed Status**.

The page appears as shown in the following figure:

The screenshot shows the Walmart DSV seller panel interface. The left sidebar contains a navigation menu with 'Feed Status' highlighted. The main content area is titled 'Feed Status' and includes tabs for 'ITEM FEED', 'INVENTORY FEED', 'PRICE FEED', and 'PROMO FEED'. Below the tabs, there is a message: 'You can view your Item Feed statuses below. If any of your feeds have errors listed in the Error column, fix the error and reupload your feed.' A table displays the following data:

Feed ID	Date	Status	Submitted	Processed	Pending	Errors	Error File
1F10E462CE2D4B378C2094A46FCF80...	3/17/17	Processed	20	20	0	0	Download Errors

3. In the **Error File** column, click the **Download Errors** link associated with the required product feed.
4. Fix the errors, if any.
5. Re-upload the product feed.

**To truncate feeds,**

1. Click on the **Truncate Feeds** button on **Manage Feeds** page and the feeds will be cleared.

The screenshot shows the 'Manage Feeds' page in the Walmart DSV seller panel. The page includes a search bar, a user profile 'admin12', and two buttons: 'Sync Feeds' and 'Truncate Feeds'. The 'Truncate Feeds' button is highlighted with a red box and a red arrow. Below the buttons, there is a yellow warning message: 'Walmartdsv API not enabled or Invalid. Please check Walmartdsv Configuration.' Below the warning, there are filters, a table with 0 records found, and a table header with columns: Id, Feed Id, Feed Status, Feed Source, Feed Type, Feed Sku's, Items Received, Items Succeeded, Items Failed, Items Processing, Feed Date, Feed File, Feed Errors, Actions.

## 5. Developer

**The Developer section covers the following information:**

## 6. Walmart DSV Orders

**Admin can do the following tasks while managing the Walmart DSV orders:**

- View Walmart DSV Orders
- View Failed Imported Orders

### 6.1. View Walmart DSV Orders

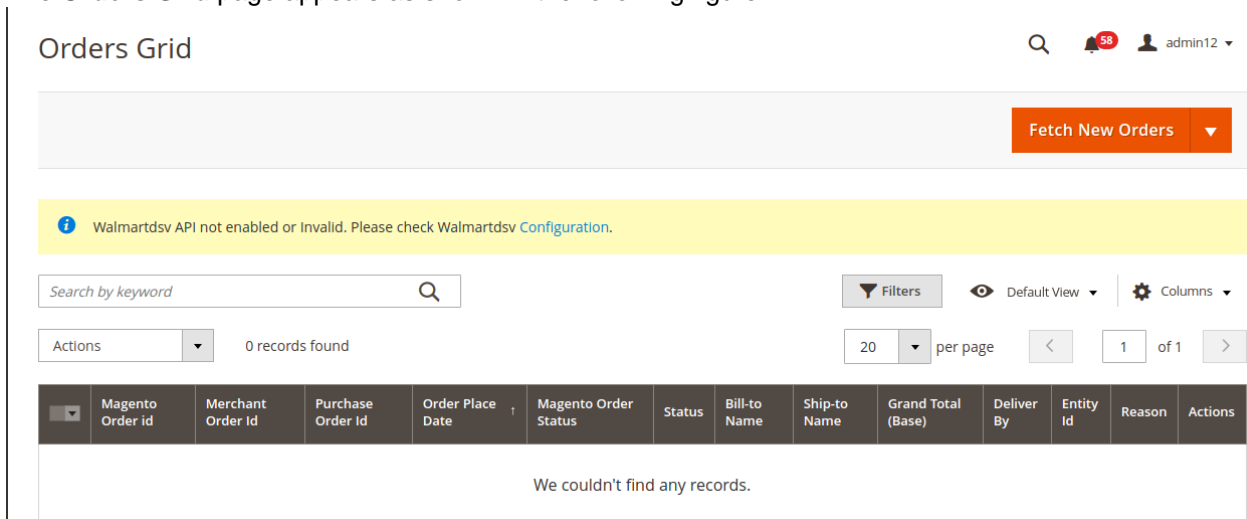

The user can fetch and view all the order details fetched from Walmart DSV.

**To view Walmart DSV Orders.**

1. Go to **Magento 2 Store Admin Panel**.
2. On the left navigation bar, click the **WALMART DSV INTEGRATION** menu, and then click **Orders**.

The **Orders Grid** page appears as shown in the following figure:

3. Click the **Fetch New Orders** button.

If the order is imported successfully then, a new record is found in the Orders Grid table.

**Notes:**

- Orders are automatically imported through CRON in every 10 minutes.
  - Whenever the latest orders are imported from Walmart DSV, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento 2 Store admin panel.
  - As per Walmart DSV’s Policy, orders should be acknowledged within 60 minutes.
  - If no Order is imported, then check the Failed order log on the **Failed Walmart DSV Orders Import Log** page.
  - Order are auto-rejected on Walmart DSV in the following conditions:
    - When Walmart DSV Product SKU does not exist in Magento 2 Store.
    - When Product is Out of Stock in Magento 2 Store.
    - When a product is disabled in Magento 2 Store.
4. In the **Magento 2 Order id** column, click the link associated with the required order. The page appears as shown in the following figure:
