## 1. Overview

This extension from CedCommerce provides Admin with the authority to create Fyndiq Categories and the dependent attributes on the Prestashop store. It also enables the store owners to establish a mapping of the desired product category on the Prestashop stores for automatic submission of the selected product to the same category on Fyndiq.com.

**Fyndiq Integration for the Prestashop Stores** enables the admin to manage the Fyndiq orders in their Prestashop stores without making any significant changes to the operational functionalities.

This extension interacts with the Fyndiq Marketplace to integrate the synchronized product listing between Prestashop store and the Fyndiq.com retailers.

It synchronizes the orders, products, pricing, and inventory through establishing the communication between Fyndiq APIs and the Prestashop store.

### Key Features of Fyndiq Integration Extension by CedCommerce:

- **Profile Based Product Upload**: Admin can create a profile and map the category and attributes to Prestashop store category and attributes. Then, after assigning the product to the profile can easily upload the product to Fyndiq.
- **Product Category Mapping:** Follows many-to-one category mapping philosophy. Enables the admin to map many categories of the Prestashop stores to the single category of Fyndiq.
- Synchronized Inventory and Profile Based Pricing: Auto synchronization of the inventory at regular intervals and product listings along with all the details is established between Prestashop store and Fyndiq.com. Profile-based price increase or decrease.
- Easy Order Import: Easy import of orders from Fyndiq marketplace to Prestashop panel.
- New Order Notifications: Whenever a new order is fetched from Fyndiq.com, the admin receives a notification.
- **Rejected products notification:** If any product containing some invalid details is rejected, then its information is fetched from the auto synchronization request along with the error due to which it is rejected.
- **Simple and Configurable Product Upload**: Admin can upload the Simple and Configurable types of Prestashop store product on Fyndiq.com. The configurable product in Prestashop stores is treated as a variation product on Fyndiq.com.
- Automated Shipment: The shipment process can be automated with Shipstation, Shipworks, Stamps.com, Linnworks, Xtento, ShipRush.
- Crons: Cron job automates the process for Inventory, Price, and Order management.
- Easy Deletion of Products: Admin can easily delete the products (if required) either one by one or in bulk.
- Easy Debug: Easy debug process for hassle-free products upload on the Fyndiq website.
- Creation of Prestashop Orders: Newly placed orders on Fyndiq.com are automatically created in the Prestashop store as well with all the required details as on Fyndiq.com.

## 2. Fyndiq Integration for Prestashop Extension Installation

#### To install the module

- Go to the Prestashop Admin panel.
- In the left navigation panel, place cursor on **Modules** menu. The menu appears as shown in the following figure:

Modules	Modules & Services
Design	Modules Catalog
	Active Shopping

### • Click Modules & Services.

The page appears as shown in the following figure:

Og PrestaShop	Quick Access 🗸 🔍		Fruugo Integation	۵	
Dashboard SELL	Modules Module selection Selection Installed modules Notifications	G UPLOAD A MODULE	O→ CONNECT TO ADDONS M	ARKETPLACE	<b>1</b> Help
Orders Catalog					
Customers Customer Service					

• In the right panel, click the **UPLOAD A MODULE** button. A dialog box appears as shown in the following figure:

Upload a module	>	<
6	-	
Drop your module archive here or select file		
Please upload one file at a time, .zip or tarball format (.tar, .tar.gz or .tgz). Your module will be installed right after that.		

• **Drag and Drop** the module or click the **select file** link to upload the Fyndiq PrestaShop Integration module.

The modules are installed and the **Configure** button appears to set the configuration settings. The admin has two options to configure the settings. Either click the **Configure** button that appears while module installation or go to the **Installed Modules** tab and then configure the Integration settings.

## 3. Fyndiq Configuration Setting

After installing the **Fyndiq PrestaShop Integration** module, the store owner (admin) has to set up the Fyndiq Integrations configurations. Prior to this, the admin has to first create a seller account on Fyndiq seller panel. Once the seller account is created and is approved by Fyndiq, the store owner can use the Fyndiq **Username** and **Password** while setting up the Fyndiq Configuration settings in the PrestaShop Admin panel.

### To set up the configuration settings in the PrestaShop Admin panel

Go to the Prestashop Admin panel.

### General Settings

• Under General Settings, do the following steps:

Ø₿ GENERAL SETTINGS	
Enable	YES NO Enable this module.
API Url	API URL OF FYNDIQ SELLER i.e. "https://fyndiq.se/api/v1/".
* Fyndiq User Name	Fyndiq User Name.
* Fyndiq Token.	Fyndiq API Token.
Store Language	English (English)       Store Language to be used in this module.
Debug.	YES NO Log data while request sends on fyndiq.

- Click the **YES** button in **Enable** to enable the module.
- The API URL box gets autofilled.
- Scroll down to the other fields.
- In the **Fyndiq User Name** box, Enter username which you will get from your seller panel from following link https://fyndiq.se/merchant/settings/api/(https://fyndiq.se/merchant/settings/api/)
- In the Fyndiq Token box, enter the token retrieved from this link https://fyndiq.se/merchant/settings/api/(https://fyndiq.se/merchant/settings/api/)
- In the Store Language, select the language of your store.
- In Debug, select YES if you want the data log to be created.

#### Product Settings

Now move to the next section ie. product setting. These settings are displayed:

✿B PRODUCT SETTINGS	
Products Feed Url	Products Feed url which is to be shared with fyndiq.
Price variant Type	Regular Price 🔻
Fyndiq Price Type	Product Price
Disabled Product Upload	Skip Disabled Product
	Disabled Product to be upload or not at the time of Product upload on Fyndiq.
Map All Category	V

- In Product Feed URL, gets auto-filled as you move to the products setting section.
- In Price Variant Type, select the price option that you want for your products on Fyndiq marketplace.
  - Regular Price: If you don't want any change in the price of your PrestaShop store products on Fyndig marketplace.
  - Increase Fixed Amount: You may select this option if you want your product price to be increased on Fyndiq as compared to your PrestaShop store. If you select this option, a box appears as shown below:

Price variant Type	Increase Fixed Amount			
Price Variant Value	8			
	Amount to be variate on the basis of Increment or Decrement value.			

- By choosing this option, you may enter in the Price Variant Value box the amount by which you want your product price to be Increased on Fyndiq as compared to your PrestaShop store. Suppose if you enter 50 in this field and your product is for 100 on your PrestaShop store, then the amount that your product will be available for on Fyndiq would be 150 (as the amount entered is 50 for Increase by fixed price, so the price entered would be added to the price for which product is available on PrestaShop).
- **Decrease Fixed Amount-** You may use this option if you want the price of your PrestaShop product to be decreased on Fyndiq.
  - By choosing this option, you may enter in the Price Variant Value box the amount by which you want your product price to be decreased on Fyndiq as compared to your PrestaShop store. Suppose if you enter 50 in this field and your product is for 100 on your PrestaShop store, then the amount that your product will be available for on Fyndiq would be 50 (as the amount entered is 50 for **Decrease** by fixed price, so the price entered would be subtracted from the price for which product is available on PrestaShop).
- **Increase Fix Percentage-** You may use this option if you want the price of your PrestaShop product to be increased on Fyndiq by a certain percent.
  - By choosing this option, you may enter in the Price Variant Value box the percentage amount by which you want your product price to be increased on Fyndiq as compared to your PrestaShop store. Suppose if you enter 20 in this field and your product is for 100 on

your PrestaShop store, then the amount that your product will be available for on Fyndiq would be 120 (as 20% of 100 is 20 which gets added to 100).

- **Decrease By Fix Percent-** You may use this option if you want the price of your PrestaShop product to be decreased on Fyndiq by a certain percent.
  - By choosing this option, you may enter in the Price Variant Amount box the percentage amount by which you want your product price to be decreased on Fyndiq as compared to your PrestaShop store. Suppose if you enter 20 in this field and your product is for 100 on your PrestaShop store, then the amount that your product will be available for on Fyndiq would be 80 (as 20% of 100 is 20 which gets subtracted from 100).
- In Fyndiq Price Type, choose from Normal Price with VAT and Normal Price without VAT, as per your requirement.
- In **Disabled Product Upload**, select the status for your products which are disabled, from **Skip Disabled Products** and **Upload with Out Of Stock status**.
- In Map All Category, select one from the categories to map PrestaShop category, for all your products.

### Order Settings

Now move to the order setting section. These settings are displayed:

©© ORDER SETTINGS	
Customer Id	Default Customer Id to create order on store which are imported form fyndiq.
Order Import Status	Awaiting check payment  Vorder Status when imported from Fyndiq.
Order Accept Status	Awaiting check payment     Image: Constraint of the second s
Order Shipped Status	Awaiting check payment     Image: Constraint of the second s
Order Cancelled Status	Awaiting check payment     Image: Control of the second seco
Order Carrier	0 ▼ Carrier used to import Order from fyndiq.
Order Payment	Payments by check       Payment method used to import Order from fyndiq.

- In the **Customer ID** box, enter the customer Id which will be used to create the order that is imported from Fyndiq to the store.
- In the **Order import status**, select the order status when it is imported from Fyndiq.
- In the Order accept status, select the order status when it is accepted at Fyndiq.
- In the Order shipped status, select the order status required to show after the order is shipped.
- In the Order canceled status, select the order status required to show after the order has been canceled.
- In the Order carrier, select the order carrier required while importing the order.
- In the Order Payment list, select the type of order payment required while importing the order.

#### Cron Info

Now move to the last section of the configuration setting which is cron info:

i CRON INFO			
Cron Secure Key			
	This cron	secure key need to set in the parameters of following cron urls	
FYNDIQ CRON URLS	Cron Name	Cron Url	Recommended Time
	Order Import		PER 20 MINUTES
			Save

- You can see Cron Info in this section. It is by default added as set by you on the server.
- Cron URL needs to be set at cPanel so that orders get imported periodically
- The cron url, name and recommended time are displayed in Findiq Cron URL.

Click the Save button and the configuration will be saved.

## 4. Retrieve API Credentials from the Fyndiq Seller Account

Once the extension is successfully installed in the Prestashop store, the **Fyndiq** menu appears on the top navigation bar of the Admin Panel. The store owner has to fill out the retrieved the **Fyndiq** *DEVELOPER ID* and *BONAPITIT CERTIFICATE ID* details in the respective fields displayed on the **Fyndiq Configuration** page of the admin panel.

### To retrieve the API credentials from the Fyndiq Seller Account

1. Go to the https://fyndiq.se/merchant/settings/api/(https://fyndiq.se/merchant/settings/api/) link.

The page appears as shown in the following figure:

FYNDIQ			Create Account	Sign in
		WELCOME		
Sign in				
	User name:	ххх		
	Password:	•••		
		Sign in		
	Fo	orgot your password?		

2. Enter the login credentials to log into the Bonanza seller account. The seller account page appears.

FYN	DIQ					Log	ged in as the Log out
Overview	Order	products	payouts	Settings	Contact Fyndiq	Wiki for Traders	Analytics 😡
Account	Email	Password	Payments	ΑΡΙ			
Docume Finding API d							
APIUse	mame						
API Tok	en		_				
Current AF	'I Token		(Version 2) <u>Dele</u>	ete			
CICALE AFT	токен						
You can use t Your API Tok	ne button bel en is used to a	ow to create an AP uthenticate you in	communication	your account. with the Fyndiq A	PI.		

- 3. Both the API UserName and API Token is mentioned here.
- 4. Save the corresponding values in some text editor or the in Word file to use it later on while setting up the configuration in the Prestashop store admin panel.

## 5. Manage Fyndiq Category Mapping

### To select the required store categories for mapping

- Go to the PrestaShop Admin panel.
- In the left navigation panel, place cursor on **Fyndiq Integration** menu. The menu appears as shown in the following figure:

• Click Fyndiq Category from the submenu

The Fyndiq Category page appears as shown in the following figure:

-

Fruugo I	Igo Category		
		2	Tep
1	Animals & Pet Supplies > Live Animals	1 Root	🖋 Edit Mapping
		5 Women	
2	Animals & Pet Supplies > Pet Supplies > Bird Supplies > Bird Cage Accessories	Not Mapped	🖋 Edit Mapping
3	Animals & Pet Supplies > Pet Supplies > Bird Supplies > Bird Cage Accessories > Bird Cage Bird Baths	Not Mapped	🖋 Edit Mapping
4	Animals & Pet Supplies > Pet Supplies > Bird Supplies > Bird Cage Accessories > Bird Cage Food & Water Dishes	Not Mapped	🖋 Edit Mapping

- Select the check boxes associated with the required Products to upload to Fyndiq.
- Click the Bulk actions button and then select the Upload selected option.

- Product feed URL gets updated on clients seller panel & periodically feed file gets validated & products get uploaded.
- If the selected products are valid and error-free, then all the selected products are uploaded and a success message appears.
- Once you upload the product from here the product feed URL gets updated. Your products will soon be updated once the feed is verified by Fyndiq.com

#### **API V2 Settings**

The product feed is the new way to export products to Fyndiq in API v2. Don't use this if you use API V1 or manually upload products via our merchant pages! If you enter a URL for a feed below, we will periodically read the feed, and **update all the products** that you have added to Fyndiq.

to use Product reed)	
2 ··· -· ·	the state of the s
n URL:	
to use Product Feed Notifications)	
to use Order Notifications)	
	to use Product feed)

- In case any error occurs, the sellers will get notified through product Feed notification URL.
- Your order confirmation will be notified by Order Notification URL.

## 8.2. Syncing the Products

To sync the number of selected products

• Go to the PrestaShop Admin panel.

• In the left navigation panel, place cursor on **Fyndiq Integration** menu. The menu appears as shown in the following figure:

### • Click Fyndiq Products.

The **Fyndiq Products** page appears as shown in the following figure:
