1. Overview

Gift Card Extension for Magento 2 by CedCommerce facilitates customers to purchase Gift Cards and send them to their friends over their email address.

Gift cards are discount coupons that the user can use for making a purchase on our website. Admin can create multiple gift cards with different pricing models, enabling the customer to do the shopping via gift card coupons. The key features of the Gift Card module are as follows:

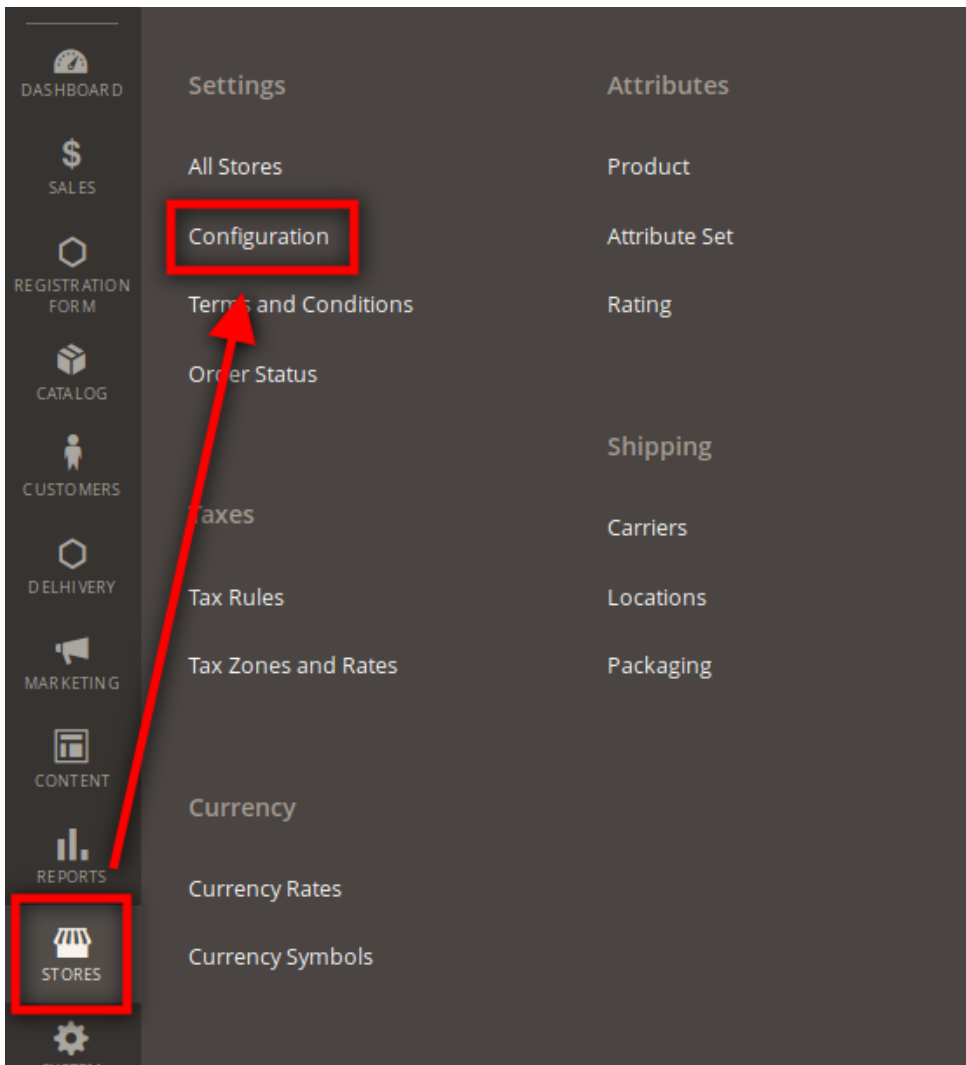

1. The Customer who wants to send a Gift Card to Other choose the image for the Gift Card from the available options. He can also upload an image of his own choice.
2. Then he is allowed to choose the amount of the Card from the Pre-Defined amounts set else he can also add any random amount as per his requirement.
3. Customer sending the Gift Card can also mention a Message that he/she wants the receiver to see in their Email.
4. Customer sending the Gift Card even has a privilege to Schedule the Delivery of Gift card as on any specific date even after he has already completed his purchase, so the Customer receiving the gift card will automatically receive a gift card mail on the specified date.

Note:

1. At a time of Purchasing a Gift Card; Coupon-Code of any earlier gifted card will not be applicable as well as any discount code.
2. The gift card once bought cannot be refunded.
3. To enable the **Gift Card Checkout feature** for any product admin need to **Enable** the attribute **“Gift Card Checkout Allowed”** from the admin panel at the time of creating the product.
Now at the store frontend, if the customer wants to use the Gift card coupon code to purchase a product, he needs to enter the coupon code at **“Apply Gift Coupon”**.
4. Admin cannot create the Gift card order on behalf of any customer from **Create Order** at Magento Admin Panel.
5. Multicurrency is not supported for gift card purchase.

2. Configuration Setting

In order to use the gift card for your store, you need to configure the gift card settings. Navigate to configuration section on the Admin Setting.

Magento Admin Panel > Stores > Configuration

Now, we will see the **gift card** option. There are following options which need to be selected by the admin:

- **Allowed Payment Methods:** This section enables admin to choose the payments methods which he wants to provide to the customer while purchasing gift card item.
- **Gift card slab:** This section enables the admin to enter the different price values, that he wants to show for the gift card products.

3. Manage gift card

The Manage Gift card is used to provide 2 options as follows:

1. **Manage Gift Card Templates:** This section is used to create the templates rule and coupon code format for gift cards.
2. **Manage Gift Coupons:** This section shows admin the list of gift card coupons that are created for the customers.

3.1. Manage Gift card templates

This page allows the admin to create the template rule and the coupons code format for gift card type product. In order to navigate to Gift card template the steps are as follows: **Admin panel > Catalog > Manage Gift Card Templates**

On clicking **Manage Gift Card Templates**, we would be redirected to the Manage Gift card template. The following things can be performed over here:

1. Creation of new gift card template
2. Edit the gift card template
3. Delete the gift card template

Once we click on the **“Add New Template”** we would be redirected to the **New Gift Template** page. This page consists of many fields and are as follows:

New Gift Template ← Back Reset Save and Continue Edit **Save**

Rule Name *

Add Gift Card Name. The coupon code on adding special characters will be concatenated

Code Template *

Note: Add In Format of prefix_{N}{S}{N}{S}. Here {N}-> for Number and {S}-> for string. Special characters are not allowed. The coupon code on adding special characters will be concatenated

Gallery Images (*) ⌵

Rule name: The admin can set the name of the template in this field.

Note: The special characters apart from “_” will be automatically truncated on being saved

Code template: The admin can set the format of the coupon code that he wants for the particular gift card product.

Note: The special characters apart from “_” will be automatically truncated on being saved.

Gallery Image: The admin can upload the image for the gift card template. This allows the customer to choose the particular image which he wants to send as a giftcard image.

The admin can also give the name of the gift card template design. In order to do so, click on the image and type the name of the gift card in the alt-tab text field, followed by a close button.

Note: We can upload multiple images for the gift card template.

Once the admin chooses the options from the required fields, he clicks on the save button in order to save the changes. On clicking, we will be redirected to the Manage Gift Card template page and there we would be getting a success message “Data Saved Successfully” along with the gift card template name.

On select the delete button, an alert box turns up on the screen, asking the admin " Are you sure you wan't to delete selected items?".

✓ Successfully Deleted Data.

Once admin chooses the option as "Delete", that particular template gets deleted along with that admin can see a success message "Successfully Deleted Data"

3.2. Manage Gift coupons

This will show us the list of gift card coupons that are already assigned to the customer. In order to go to the Manage Gift coupon page, from the admin panel click on **Catalog>Manage Gift Coupon.**

On clicking, we will be redirected to the **Manage Gift Coupons** page. The gift coupon by default show us the following details:

1. **Gift coupon id:** It consists of the order for which the coupon is generated
2. **Coupon code:** It consists of the coupon code that is generated for the particular order.
3. **Expiration date:** The date when the coupon code will get expired.
4. **Created at the date:** The date when the coupon code is created.
5. **Current amount:** This section shows us the amount that is still available in the coupon code.
6. **Coupon price:** This section shows us what was the price of the coupon while sending to the receiver customer.

Please Ensure manually, that it is more than the minimum amount of giftcard

Gift Price Slabs [global] *

Gift Template [global] *

Fill the details in the same way as we create for a simple product type, here we have an extra section that needs also to be filled in order to create gift card type product.

1. **Gift Expiry Date:** Enter after how many days the gift card coupon should expire.
2. **Gift Minimum Price:** Enter the minimum amount that should be entered for the gift card product.
3. **Gift Maximum Price:** Enter the maximum amount that should be entered for the gift card product.
4. **Gift Price Slab:** Select price slabs, that admin wants the customer to choose from.

Note: For the gift card price slab values if values are not between the minimum and maximum amount, then those prices would not be reflected in the gift card product page.

5. **Gift template:** Select the template which admin want's to apply for the gift card product
Once, admin does so and fill the other fields values, admin clicks on the **"Save"** button.

Once admin clicks the **save** button, he would be redirected to the product page along with that he would also get the success message **"You saved the product"**. In the grid, admin can see the gift card product that he had created in the list.

Deleting the gift card product

The admin needs to select the gift card product that he needs to remove as products. In order to do so, click on the checkbox for that particular product that admin does not require from his own end. Once admin selects the products, he needs to click on the delete option from the available drop-down list present above the product grid. Once, admin selects the delete button, we would be getting an alert check box. Click on the "Ok" button in order to delete that particular product.

The screenshot shows the 'Products' admin interface. A modal dialog titled 'Delete items' is open, asking 'Delete selected items? (1 record)' with 'Cancel' and 'OK' buttons. In the background, the 'Products' list is visible with the following data:

Name	Type	Attribute Set	SKU	Price	Quantity	Visibility	Status	Websites	Special Price From Date	Action
nice_thing	Gift Card	Default	nice_thing		118.0000	Catalog, Search	Enabled	Main Website		Edit

Once the admin, click on “ok” he would be getting a success message **“A total of 1 record have been deleted”**

The screenshot shows the 'Products' admin interface after a successful deletion. A yellow success message banner reads: 'A total of 1 record(s) have been deleted.' The background table shows 2540 records found. The table data is as follows:

ID	Thumbnail	Name	Type	Attribute Set	SKU	Price	Quantity	Visibility	Status	Websites	Special Price From Date	Action
2563		nice_thing	Gift Card	Default	nice_thing		120.0000	Catalog, Search	Enabled	Main Website		Edit
2562		asdasdas	Simple Product	Default	asdasdas	₹0.00	11111.0000	Catalog, Search	Enabled	Main Website		Edit

5. Gift Card Order Place

This section comes into the picture when the gift card payment is done through the offline mode. Therefore, for such cases, the admin has to generate the invoice.

In order to do so: **From the admin panel: Click on**

Sales > Orders

Once we click on the “Orders” button admin would be redirected to the orders page.

6. Gift card Purchase: Customer’s End by Sender

In this section, we will see how the customer will purchase the gift card product and send it to the other customer. In order to purchase the gift card coupon, go to the customer panel and search the gift card product either from the category or search the item in the search box for the gift card.

Note: We can search the product either through the product name or through the SKU.

[What's New](#) [Gift](#) [Women](#) ▾ [Men](#) ▾ [Gear](#) ▾ [Training](#) ▾ [Sale](#)

Select any gift card product and click on it.

Once, customer click on it he would be taken to that particular product, where the customer needs to fill the available fields which are as follows:

1 **Choose the card:** From the list of gift card template images available, choose the image which customer need while sending the gift card product. Here, the customer also gets the option to upload the gift card image from his end, which we want to apply to the gift card.

2 **Price:** Select the price from the price slab that the customer wants to send. The customer can also add his own price, but the condition is that the price amount should be within the price range of the product.

3. **From:** Enter the name of the sender, who will be sending the gift card.

4 **Recipient Name:** Enter the name of the receiver, who will be receiving the gift card.

5 **Recipient Email:** Enter the email of the receiver, who will be receiving the email.

6 **Delivery date:** Enter the date of sending the gift card. If the sender wants to send at that moment leave the space as blank and if he wants to send on a particular date, then from the calendar available select the day when he wants to send the gift card to the receiver.

7 **Having something to say:** Enter the text which sender wants to show to the receiver in the email template.

8 **Qty:** Enter here the number of coupon codes that sender wants to send to the receiver.

Note: The multicurrency is not supported in this module as of now.

Expires: dd/mm/yyyy

nice thing

Once, we do so, we click on the “**Add to cart**” option. After clicking the product would be on the cart.

The screenshot shows the LUMA website interface. At the top left is the LUMA logo. A search bar contains the text "Search entire store here...". To the right of the search bar is a shopping cart icon with a red badge showing the number "2". Below the search bar is a navigation menu with items: "What's New", "Gift", "Women", "Men", "Gear", "Training", and "Sale". The "Gift" category is highlighted. Below the navigation menu, the breadcrumb "Home > nice_thing" is visible. A green notification bar states "You added nice_thing to your shopping cart." The main content area features a large pink coupon with the text "VALID SUN 1/10/16", "20% OFF ENTIRE PURCHASE INCLUDING SALE ITEMS", and "PROMO CODE: SUPERSL1106". To the right of the coupon, the product name "nice_thing" is displayed, along with the text "Be the first to review this product". Below this, the price range is shown: "From ₹345.00 To ₹3,434.00". The SKU# is "nice_thing". A "Choose A Card:" section includes a "Browse" button and three coupon icons: a 20% off coupon, a 10% off coupon, and a "COUPON" icon.

Now, click on the cart button present at the top right corner and press the **“Proceed to checkout”** button. Once, we do so we will be directed to the review and payment page. So, if we are a guest user, we can just give our email address for that.

This screenshot shows the same LUMA website interface as the previous one, but with a cart overlay visible. The overlay is titled "1 Item in Cart" and shows the "Cart Subtotal: ₹2,468.00". The "Proceed to Checkout" button is highlighted with a red border. The overlay also displays the product name "nice_thing", a "See Details" link, the price "₹1,234.00", and a quantity of "2". Below the price and quantity, there is a "View and Edit Cart" link. The background of the website is dimmed, showing the same coupon and product information as in the previous screenshot.

The next section consists of the payment methods. Here, the customer can choose the payment method of purchasing the gift card.

XXXXXX	₹4,530.00	₹4,530.00	24-01-19

Email received by the receiver

The receiver would be getting an email, regarding the gift card. Here, the customer could see who had sent the gift card. Once we click on the gift card, the customer could see the coupons we received. Along with that customer can also see the total amount of gift card the customer received and time of expiration of the gift card.

Customer panel

Once, the customer logged in, if the customer had the gift card coupons then in order to see the gift card coupons, click on the "My accounts section"

Once, customer click on that, a customer will be directed to the My account section. Click on the "**Check Gift Card Values**".

Once, the customer does so, a customer will see all the coupons that are available for the gift card. The grid shows us the following details:

Card number: This shows us the coupon code.

Initial value: This shows us the original value in the coupon code.

Current value: This shows us the actual value in the coupon code.

Expiration date: This shows us when the coupon code is getting expired.

Purchasing the product

Select any product that the customer wants to purchase. Once customer does so, then select to "add to cart" button.

Note: The gift card could be applied to only those product for which "Gift card Checkout Allowed" is enabled.

Now, click on the card button present at the top right corner.

Click on the "Proceed to checkout" button. Once, we click we will be taken to the page, where we need to select the shipping address and the shipping method.

Select the shipping address and shipping method as per the customer choice and click on the “**Next**” button.

Once we do so, we will be directed to the Payment method page. From the list of payment method choose the payment as per the convenience of the customer

After that, click on “Apply gift coupon” field. Enter the coupon code if a customer has it and click on “Apply gift Coupon”. If the coupon code is valid and has the amount, a success message would generate as “Success: Your coupon was successfully applied”. If we have the discount code, we can apply that also.

Note: Either the discount code is applied or gift card coupon is applied.

If we look at the “Order Summary” present at the right corner, we could see:

1 Cart subtotal: The total amount in the card

2 Card discount: If card discount is applied we could see that

3 Gift discount: The gift discount that is applied to cart

4 Shipping: Shipping amount that is needed to be applied

5 Order total: (Card subtotal+Shipping)-(Giftcart code/Discount code)
