1. Overview

Google Express Integration for Magento is an extension, developed by CedCommerce helps to integrate the Magento store with Google Express by establishing a synchronization of products, and orders with the help of Google Express API.

The CRONs implemented in this extension help to automate the process thereby keeping it up to date.

This extension interacts with Google Express Marketplace to integrate the synchronized product listing between the Magento and the Google Express retailers. After installing the extension, merchant can create the Google Express Categories and the dependent attributes on the Magento store.

The process enables merchant to configure the desired product category into Magento for automatic submission of the selected product to the same Category on Google Express.

The features of the Google Express Integration for Magento extension are as follows:

- Profile Based Product Upload
- Easy Google Express Category and Attribute mapping
- Manage Google Express Product and Upload Product (directly from the grid and bulk upload all products)
- Product Synchronization
 - Automatic process on each product edit
 - Manual synchronization process
- Review Product/Inventory/Price Feeds
- Automated Order Import & Acknowledgement
- Multiple Shipment of an Order
- Upload Configurable Product(s)
- Bulk Product Upload/Publish
- Retire/Unpublish Selected Product(s)
- CRON Facility
- Knowledge Base

Caution

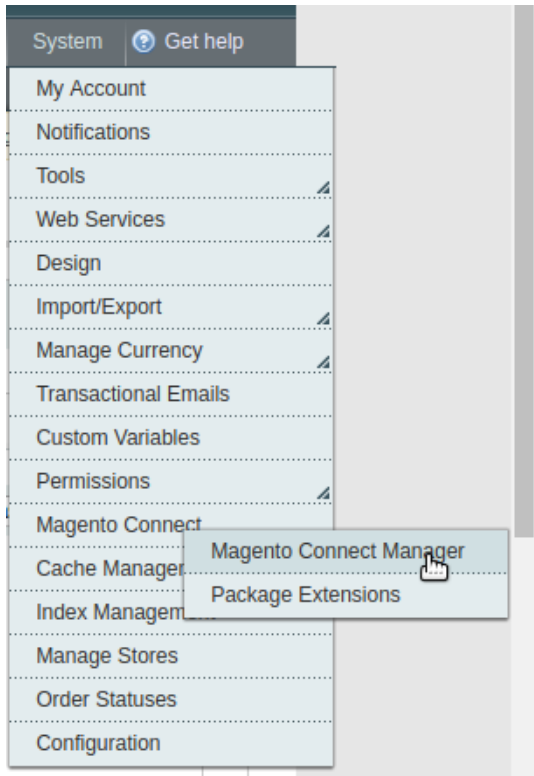

: Extension is heavily dependent on Crons for running various automated processes. So, make sure that Cron Job is properly configured and working on the server.

2. Google Express Integration Installation for Magento

To install the extension

- To install the extension, Go to the system and select the drop down as shown in the below figure.

- Select the Magento Connect
 - Go to the Magento Connect Manager.

You will get the screen as shown in the following image.

- Click on the button **Choose File** to select the file from your local drive.
- After selecting the file, Click on the upload.
- After the installation, a successful message will be displayed on the upper side of the screen.

To **disable** or **enable** the product, scroll down the screen and you will get the screen as given in the below figure.

[Commit Changes](#)

- Select that particular extension
 - Go to the actions, and select the options **uninstall**, to uninstall the extension.
 - Click on the button **Commit Changes**. To save the changes.

3. Getting the Google Express API Credentials

Once the extension is successfully installed on the Merchant's store, Google Express menu appears in the Magento Admin Panel. The merchant has to fill in the API credentials in the **Google Express Configuration** page of the admin panel.

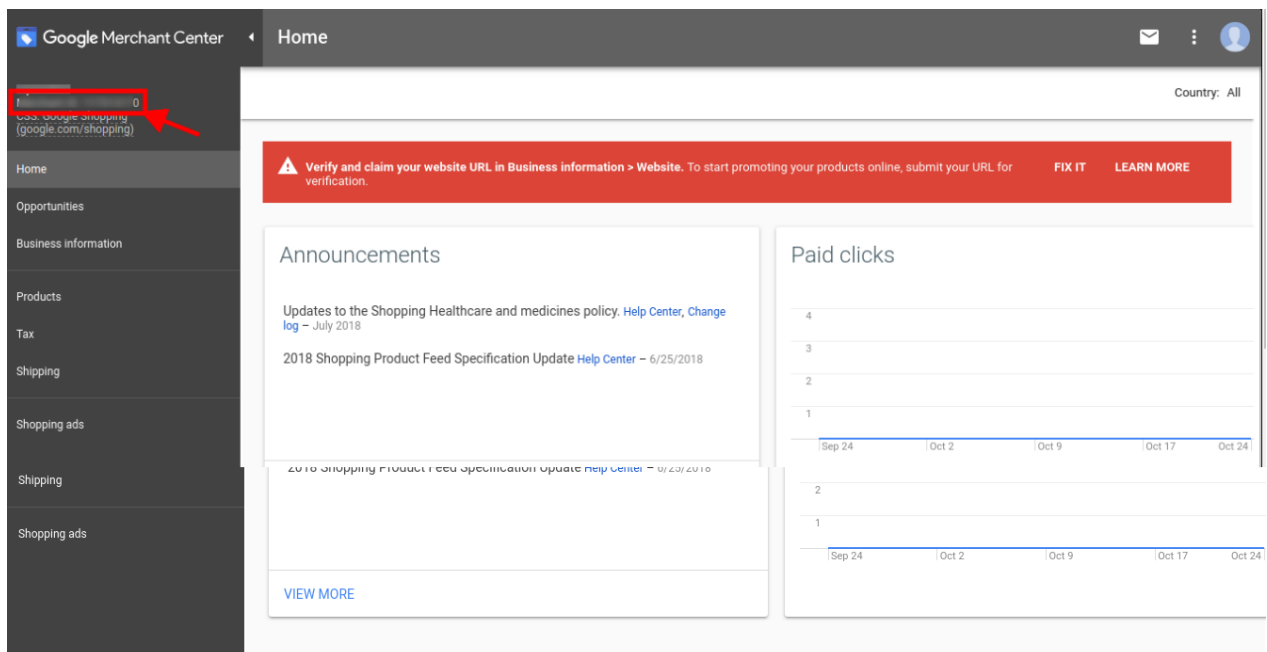

The user has to log in the Google Express Seller account to obtain the following API credentials:

- **Merchant Id**

After obtaining the id the merchant has to copy it from the Google Express Seller account and paste it to the Configuration page of the admin panel of the merchant.

To copy the API Credentials from the Google Express Seller account.

- Open the Google Express **Seller** account.
The page appears as shown in the following figure:

- Copy the **Merchant Id** from the Seller Panel as highlighted in the above image.
Now you have all the information to be used in the next step i.e. **Configuration**.

4. Google Express Magento Configuration Settings

To complete the Configuration Settings, do the following:

- Go to the **Magento Admin** panel.
- On the top navigation bar, point to the **Google Express** menu, and then click **Configuration**.

The **Google Express Configuration** page appears as shown in the following figure:

Google Express Configuration Save Config

Google Express Api Settings

Enabled	<input type="text" value="Yes"/>	[WEBSITE]
Redirect Url	<input type="text" value="http://demo.cedcommerce.com/magento/integration/index.php/googleexpress/googleexpressfrontindex/"/> Create Googleexpress a/c	[GLOBAL]
Default payment method	<input type="text" value="--Please Select--"/>	[GLOBAL]
Default shipping method	<input type="text" value="--Please Select--"/>	[GLOBAL]
Email Id to Recive Critical Notifications	<input type="text"/>	[GLOBAL]
Google Express Debug Mode	<input type="text" value="Yes"/>	[GLOBAL]
Google Express Customer Email	<input type="text"/>	[GLOBAL]
Google Express Order ID Prefix	<input type="text"/>	[GLOBAL]
Google Express Product Identifier Override	<input type="text" value="No"/>	[GLOBAL]

- Under **Google Express API Settings**, do the following steps:
 - In the **Enabled** list, select **Yes**.

Note: Selecting the **No** option hides all other fields of **Google Express API Settings**. The **Google Express** menu does not appear on the top navigation bar.
 - In the **Redirect URI** box, paste the corresponding *****
 - In the **Choose Default Payment Method for Google Express Orders** list, select the required option.
 - In the **Default Shipping Method**, select the default Shipping Method.
 - In **Email Id to receive critical notification**, Enter the email to receive the notifications.
 - In the **Google Express Debug mode** list, select **Yes**.

Note: Enable it to start Google Express Integration in the debug mode. It captures the log for the debug process.
 - In the **Google Express Customer Email** box, enter the customer email-id.
 - In the **Google Express Order ID Prefix** box, enter the prefix that the admin wants to add before the Google Express order Id.
 - In the **Google Express Product Identifier Override** list, select **Yes**.

Note: Enable it to change a UPC/GTIN of any product previously uploaded on Google Express.

- Under the **Google Express Product Global Settings**, do the following steps:
 - In the **Select Store** list, select the single store.
 - In Shipping Settings, Click on **Add Rule** & the section expands

Under **Enabled**, select **Yes**.

Choose the **Region** from the drop-down menu.

Select the **Method** of Selling from the drop-down menu.

You can also choose the **Magento Attribute Code** for selecting from the list.

- In the **Auto Image Resizing**,
 - Select **Yes**, to resize the image
 - Select **No**, to use original image size.
- In **Feed Size**, Enter the number of size of Feeds in the textbox.
- In **Upload Chunk Size**, Enter the size of the chunk which will be used during the auto synchronization of Products.
- In **Price Chunk Size**, Enter the size of chunks of Prices synchronization.

- In the **Google Express Product Advanced Price Settings**, do the following steps.
 - In **Google Express Product Price**, enter the values in the corresponding fields.
- The user can set the price on the following basis: –
 - **Increase by Fixed Price**: If selected, then the **Enter Amount** field appears.
 - **Increase by Fixed Percentage**: If selected, then the **Enter Percentage** field appears. Enter the numeric value to increase the price of the Google Express product price by the entered value % of Magento price
For Example- Magento price + 5% of Magento price.
 Magento Price = 100
 Select **Increase By Fixed Percentage** option
Enter Percentage = 5
 $100 + 5\% \text{ of } 100 = 100 + 5 = 105$
 Thus, Google Express Product Price = 105
 - **Decrease by Fixed Price**: If selected, then the **Enter Amount** field appears.
 - **Decrease by Fixed Percentage**: If selected, then the **Enter Percentage** field appears. Enter the numeric value to decrease the price of the Google Express product price by the entered value % of Magento price
For Example: Magento price – 5% of Magento price.
 Magento Price = 100
 Select **Decrease By Fixed Percentage** option
Enter Percentage = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$
 Thus, Google Express Product Price = 95

Enable Price Cron	<input type="text" value="No"/> ▲ Price Cron Enable/Disable	[WEBSITE]

- In **Google Express Inventory rules**,
 - In the **Send Inventory on the Basis of Threshold** list, select **Yes** to send the inventory based on a threshold.

Note: Only when the admin selects **Yes**, the other fields appear. Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock.
- In **Cron Settings**, do the following steps:
 - In the **Cron Settings Override** list, select **Yes** to enable the cron settings.

Note: Only when the admin selects **Yes**, the other fields appear.

 - In the **Enable Order Cron** list, select **Yes** to enable the order cron. The **Order Cron** field appears.
 - In the **Order Cron** box, enter the required value.
 - In the **Enable Inventory Cron** list, select **Yes** to enable the order cron. The **Product Inventory Update Cron** field appears.
 - In the **Product Inventory Update Cron** box, enter the required value.
 - In the **Enable Price Cron** list, select **Yes** to enable the order cron. The **Product Price Update Cron** field appears.
 - In the **Product Price Update Cron** box, enter the required value. The section appears as shown in the following figure:
- Click the **Save Config** button.

5. Manage Google Express Account

TO MANAGE ACCOUNT ON GOOGLE EXPRESS

- Go to the Magento admin panel.

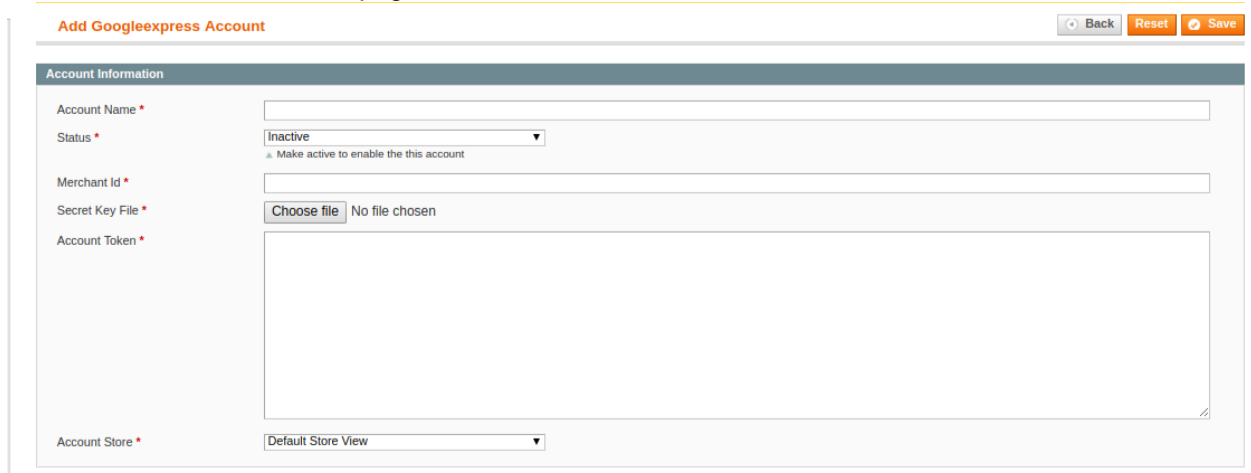

- On the Top navigation bar, click **Google Express**.

- When the menu appears, click **Manage Accounts**.
- On clicking it, you will be navigated to the **Google Express Accounts** page as shown below

- To add a new account, click on **Add NewAccount** button on the top right corner.
- You'll be redirected on a new page:

- Enter the **Account Name** by which you wish to sell on Google Express, in the first section.
- Select the **Status** of the account from the drop-down menu, either Active or Inactive.
- Move to the next section and enter the **Merchant Id**.
- Choose the **Secret Key File** of the account provided by Google Express.
- In the **Account Store** section choose the view of the store.
- Once all the actions have been taken so far, click on **Save** button on the top right of the page.
- Now To fetch the token, Go back to the Accounts page.
- The product created will be displayed

ID	Account Code	Merchant Id	Store	Status	Actions
1	ced_test	382099...	Main Website Main Website Store Default Store View	Active	Fetch Token

- Once you do so you will again be moved to the previous page and the **Account Token** section will automatically gets filled.

- In the user access section, Choose **Admin access**.
- After selecting the desired email notification and user status, click on the save button.
- Now copy all the emails associated with and add it in Magento admin panel.

6. Manage Google Express Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento attributes to the Google Express attributes. These attributes are applicable to all the products that are assigned to the profile.

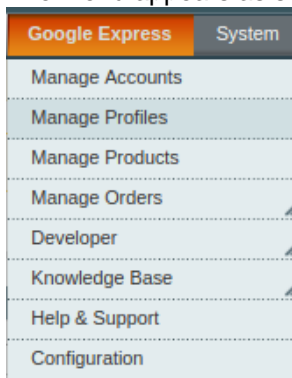

Admin can do the following tasks:

- Add a new profile
- Edit the existing profile
- Delete the profile
- Submit Actions on the Google Express Profile Listing Page

6.1. Add New Profile

To add a new profile

- Go to the **Magento Admin** panel.
- On the top navigation bar, point to the **Google Express** menu.
The menu appears as shown in the following figure:

- Click the **Manage Profiles** menu.
- The **Google Express Profile Listing** page appears as shown in the following figure:

- You are redirected to the next page and **choose the account** for which the profile is to be created.

- Select the account from the drop-down list and click on **Continue**. You will be redirected to the next page.
- Click the **Add New Profile** button.
The page appears as shown in the following figure:

- In the right panel, under **Profile Information**, do the following steps:
 - a. In the **Profile Code** box, enter a profile code.
Note: It is only for the internal use. Use the unique profile code with no spaces. Start with small letters.
 - b. In the **Profile Name** box, enter the name of the profile.
Note: Use the unique name to identify the profile.
 - c. In the **Status** list, select **Active** to enable the profile.
Note: The Inactive option disables the profile.
- Click the **Save and Continue Edit** button.
- In the left navigation panel, click the **Google Express Category Mapping** menu.
 The page appears as shown in the following figure:

- In the **Category** list, select the required **Google Express** category that the admin wants to map. The **Child Category** list appears next to the **Category** list.
- In the **Child Category** list, select the required child category.
 Depending upon the selection of the category and the sub-categories, the Google Express, and Magento attributes appear under the **Google Express / Magento Attribute Mapping (Required/ Optional mapping)** section if exist.

- You may map the attributes here.
- In **Google Express Category Mapping**
 - Select the root category
 - Then Select its sub Categories.
- Go to the **Google Express / Magento Attribute Mapping (Required/ Optional mapping)** section.

- In the **Magento Catalog Attribute** column, select the required Magento attribute from the corresponding list to map it with the corresponding Google Express attribute.
- Repeat the mapping of all the required or optional Magento attributes listed with the corresponding Google Express attributes.
- Click the **Add Attribute** button to add more attributes.
- Now go to the **Google Express / Magento Attribute Mapping (Variant Attribute Mapping)** section.
- In the **Magento Catalog Attribute** column, select the required Magento attribute.
- In the **Google Express Attribute** column, select the required Google Express attribute to map it with the corresponding Magento attribute.

Google Express / Magento Attribute Mapping (Variant Attribute Mapping)

Map configurable attributes to magento attribute

Config Attribute

Magento Catalog Attribute	Google Express Attribute	Action

On this page, all the available profiles are listed.

- Select the check boxes associated with the required profiles.
- Click the Arrow button next to the **Actions** field.

The **Actions** list appear as shown in the following figure:

- In the **Status** list, click **Change status**.

The **Status** field appears next to the Actions list.

- In the **Status** list, select the required option, and then click the **Submit** button. The status is changed and a success message appears.

7. Manage Product

Admin can perform the following tasks:

- Upload Products
- View Error Log
- View and Edit the Product Information

7.1. Upload Products

The admin can upload the products that are assigned to the selected profile and are listed on the **Product Manager** page to Google Express.

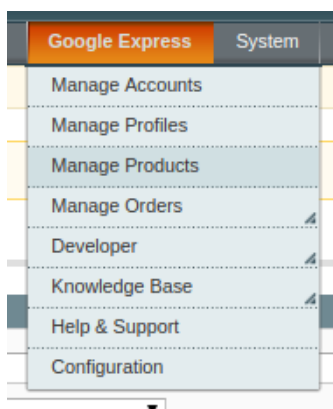

*Other than the **Validate & Upload Product(s) to Google Express** action, the admin can also perform the following actions on the selected products available on the **Product Manager** page:*

- **Validate Selected Product(s)**: To validate the product before uploading it to the Google Express website. It displays the corresponding validation error if any. If there is no error, it confirms that the product is ready to upload.
- **Product Price Update**: To update the price of the selected products on Google Express. For example, if the user has changed the product price on the Magento store and also wants to change the price on Google Express then this action is applicable. The price is updated when the user submits this action for the selected product.
- **Product Inventory Update**: To update the inventory of the selected products on Google Express. This action completes all the job related to the product inventory and also it manages the quantity related issues.
- **Delete Selected Product(s)**: To delete the selected products so that it is neither used nor ordered. On submitting this action, the product is not listed on Google Express. Thus, nobody can order them from Google Express.

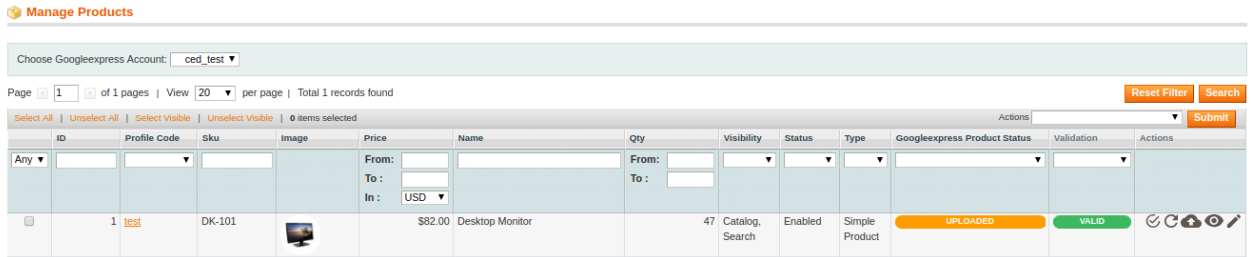

Note: These actions are also submitted similarly as submitting the **Validate & Upload Product(s)** action for uploading the products.

To upload the selected products

- Go to the **Magento Admin** panel.
- On the top navigation bar, point to the **Google Express** menu. The menu appears as shown in the following figure:

- Click the **Manage Product** menu.
- The **Product Manager** page appears as shown in the following figure:

All the available products are listed.

- First & Foremost **Choose the Google Express Account** for which you want to add products.

- From the drop-down menu select the account.
- Select the checkboxes associated with the product that the admin wants to upload it to Google Express.
- In the **Actions** list, click the arrow button, and then click **Validate & Upload Products**.

- Click the **Submit** button.
- The **Uploading Products to Google Express** page appears as shown in the following figure:

To upload single product

- Go to the **Product Manager** page.
The **Product Manager** page appears as shown in the following figure:

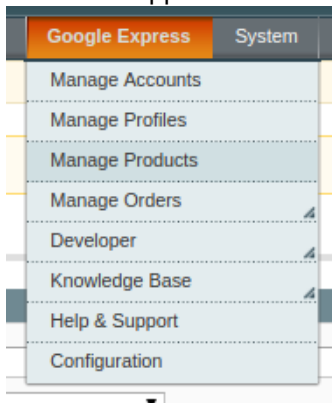

ID	Profile Code	Sku	Image	Price	Name	Qty	Visibility	Status	Type	Googleexpress Product Status	Validation	Actions
31	ced_clothing	df4sg53ds8		\$100.00	Conf product-Black	10	Catalog, Search	Enabled	Simple Product	UPLOADED	VALID	
32	ced_clothing	d3k3245		\$70.00	Conf product-Blue	1628	Catalog, Search	Enabled	Simple Product	UPLOADED	NOT VALIDATED	
33	Electronics	df4sg53ds9		\$399.85	KeyBoard	1507	Catalog, Search	Enabled	Simple Product	NOT_UPLOADED	NOT VALIDATED	
34	Electronics	TEST1203		\$110.00	test Product	120	Catalog, Search	Enabled	Simple Product	UNPUBLISHED	VALID	

- Scroll down to the required product.
- In the **Actions** column, click the **Upload** button.
If the product is uploaded successfully, then the success message appears on the top of the page.
If there is an error, then the upload failed message appears on the top of the page. Resolve the issue and then again upload the product.

7.2. View Error Log

To View the error log

- Go to the **Magento Admin** panel.
- On the top navigation bar, point to the **Google Express** menu, and then click the **Manage Product** menu.
The menu appears as shown in the following figure:

- Click **Manage Product**.
The **Product Manager** page appears as shown in the following figure:

Manage Products

Page 1 of 1 pages | View 20 per page | Total 4 records found Reset Filter Search

Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected Actions Submit

ID	Profile Code	Sku	Image	Price	Name	Qty	Visibility	Status	Type	Googleexpress Product Status	Validation	Actions

34	Electronics	TEST1203		\$110.00	test Product	120	Catalog, Search	Enabled	Simple Product	UNPUBLISHED	VALID	    

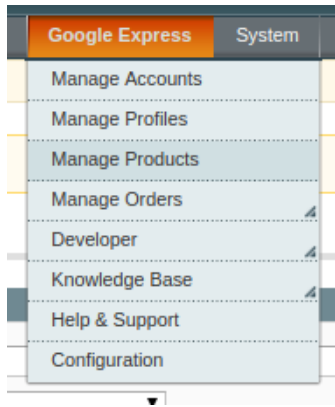

- All the available products are listed.
- Scroll down to the required product.
 - In the **Validation** column, click the **INVALID** button.
The relevant error message appears as shown in the figure.

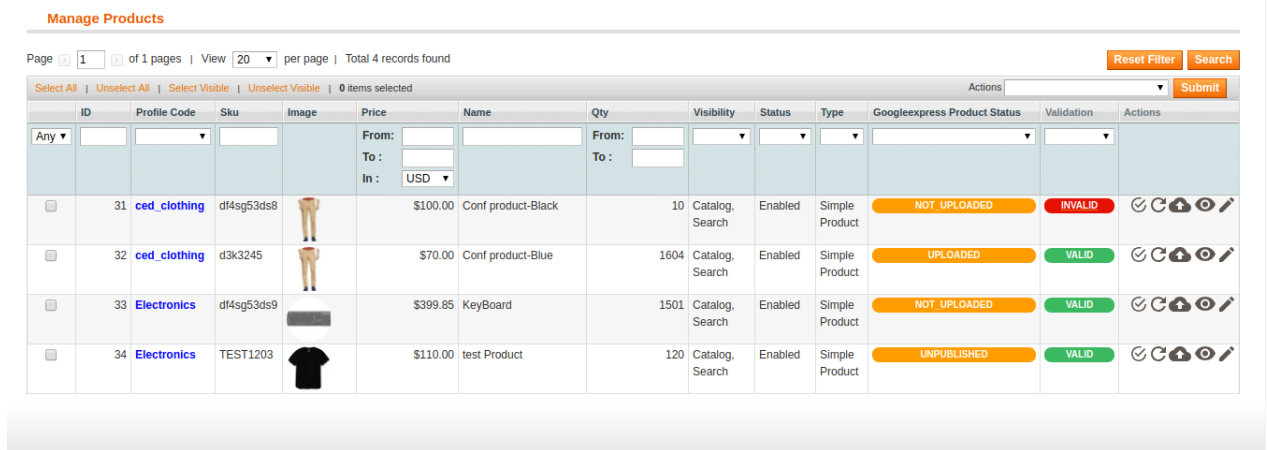

7.3. View and Edit Product Information

To view and edit product information

- Go to the **Magento Admin** panel.
- On the top navigation bar, point to the **Google Express** menu, and then click the **Manage Product** menu.
The menu appears as shown in the following figure:

The **Product Manager** page appears as shown in the following figure:

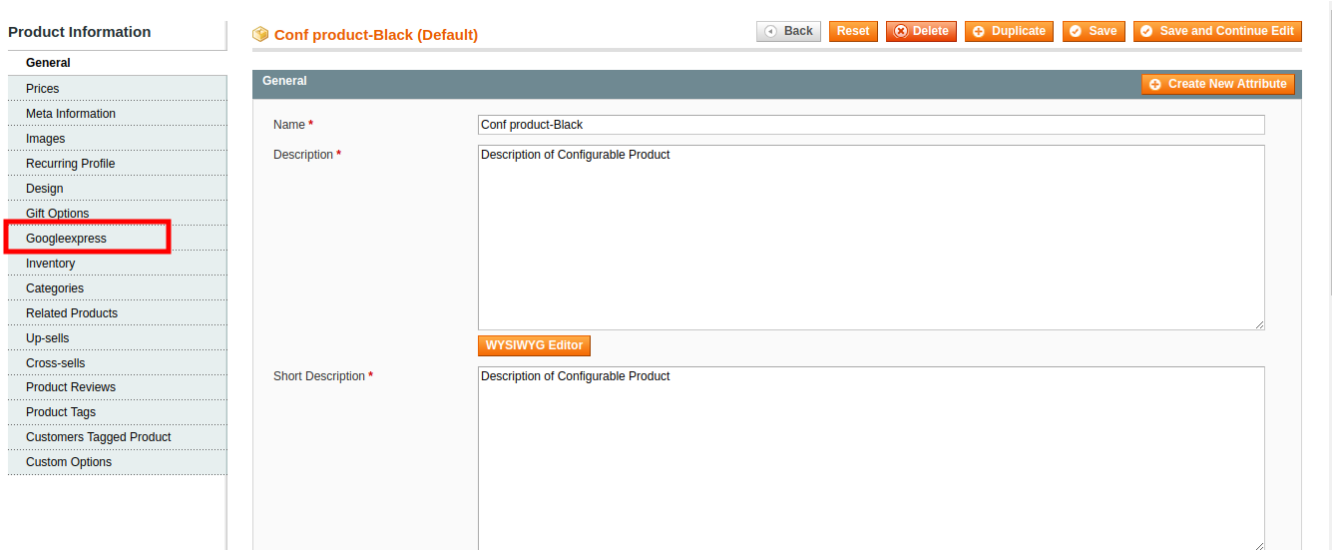

All the available products are listed.

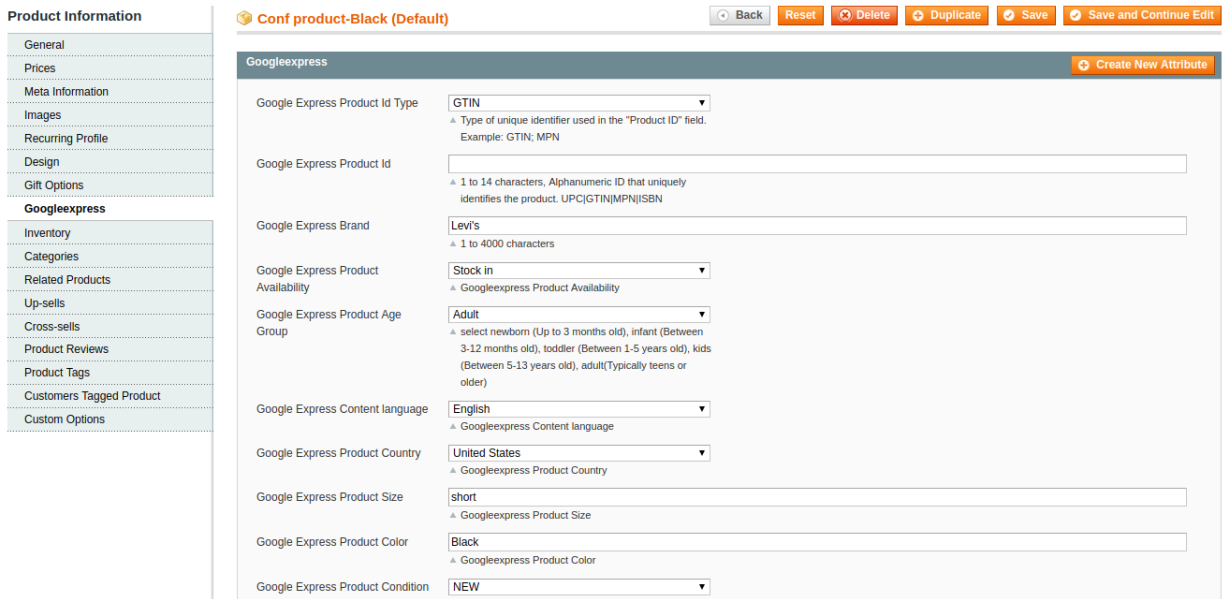

- Scroll down to the required product.
- In the **Actions** column, click the **Edit** sign as shown in the image below:

The **Product Information** page appears as shown in the following figure:

- You can edit changes here and in the left navigation panel, click the **Google Express** menu. The page appears as shown in the following figure:

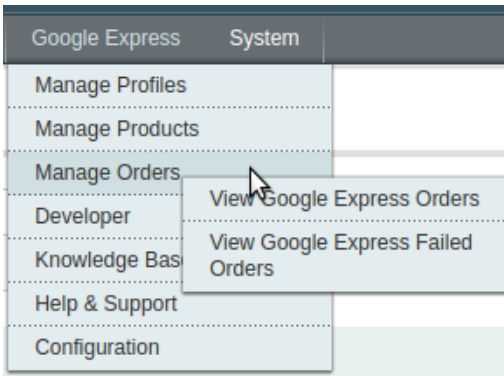

- Enter the required information, and then click the **Save** button.

8. Google Express Orders

On the **Google Express** menu, **Google Express Orders** has the following three sub-menus as shown in the following figure:

- View **Google Express Orders**
- View **Google Express Failed Orders**

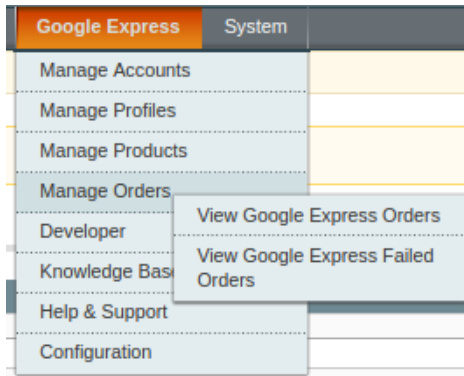

8.1. View Google Express Orders

The user can fetch and view all the order details fetched from Google Express.

To view Google Express Orders

1. Go to **Magento Admin Panel**.
2. On the **Google Express** menu, point to **Google Express Orders**, and then click **View Google Express Orders**.

The **Google Express Orders Details** page appears as shown in the following figure:

Google Express Orders Details Fetch Latest Googleexpress Orders

Page 1 of 1 pages | View 20 per page | Total 4 records found | Export to: CSV | Export | Reset Filter | Search

Select All | Unselect All | Select Visible | Unselect Visible | 0 Items selected | Actions | Submit

Magento Order #	Googleexpress Purchase Order Id #	Googleexpress Order #	Bill to Name	Ship to Name	Date Ordered	Ship By	Googleexpress Status	Status	G.T. (Purchased)	
Any					From: To:	From: To:			From: To:	
<input type="checkbox"/>	Google100000187	TEST-5754-77-6893	1254125	Jim Halpert	Jim Halpert	Dec 31, 1969 4:00:00 PM	Dec 31, 1969 4:00:00 PM	Acknowledged	Processing	176.0000

3. Click the **Fetch Latest Google Express Orders** button.

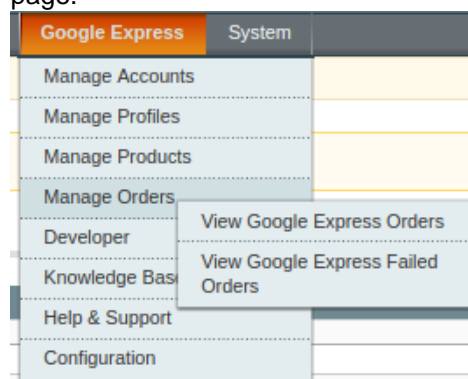

If the order is imported successfully then, a new record is found in the **Google Express Order Details** table as shown in the above figure.

Notes:

- Orders are automatically imported through CRON in every 10 minutes.
- Whenever the latest orders are imported from Google Express, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento admin panel.
- If no Order is imported, then check the Failed order log on the **Failed Google Express Orders Import Log** page.
- Order are auto-rejected on Google Express in the following conditions:
 - When Google Express Product SKU does not exist in Magento.
 - When Product is Out of Stock in Magento.
 - When a product is disabled in Magento.

8.2. View Google Express Failed Orders

The users can view the list of failed Google Express orders on the **Failed Google Express Orders Import Log** page.

In the following conditions, Orders are not imported from Google Express:

- If any product in the Google Express Order is Out of Stock in Magento.
- If any product in the Google Express Order is disabled in Magento.
- If any Product does not exist in Magento or is deleted from Magneto after uploading on Google Express.
- If the selected Payment Method in Google Express System Configuration Setting is not available in Magento.

To view, Google Express failed orders

1. Go to **Magento Admin Panel**.
2. On the **Google Express** menu, point to **Google Express Orders**, and then click **View Google Express Failed Orders**.

The **Failed Google Express Orders Import Log** page appears as shown in the following figure:

Note: To clear all the failed import order logs at once, click the **Truncate** button.

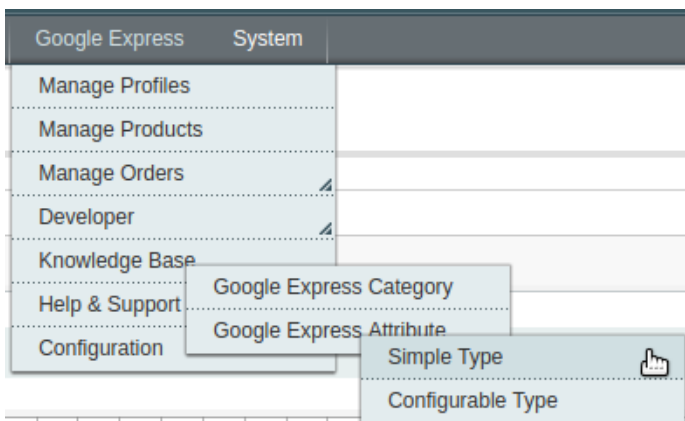

To delete Google Express log details

1. Go to the **Google Express Log Details** page.
2. Select the check-boxes associated with the logs that the admin wants to delete.
3. In the **Actions** list, select **Delete Records**, and then click the **Submit** button.
The log records are deleted and a success message appears.

10. Google Express Knowledge Base

In the Knowledge Base section, you may see the sections as shown in the figure below:

- Google Express Category
- Google Express Attribute

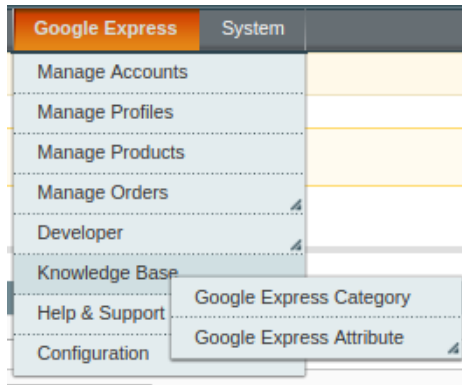

10.1. View Google Express Category

The user has to Map Google Express Category to Magento Category to upload products on Google Express admin panel.

To view the Google Express categories to the Magento categories

- Go to **Magento Admin Panel**.
- On the top navigation bar, point to the **Google Express** menu, and then point to the **Knowledge Base** menu.

The menu appears as shown in the following figure:

- Click **Google Express Category**.
The **Google Express Category Listing** Page appears as shown in the following figure:

Google Express Category Listing

Page 1 of 272 pages | View 20 per page | Total 5427 records found Reset Filter Search

ID ↑	Googleexpress Category Id	Googleexpress Category Id	Googleexpress Category Id	Googleexpress Category Id	Googleexpress Category Id	Googleexpress Category Id	Googleexpress Category Id	Magento Categ
1	Animals & Pet Supplies							0
2	Animals & Pet Supplies	Pet Supplies						0
3	Animals & Pet Supplies	Pet Supplies	Bird Supplies					0
4	Animals & Pet Supplies	Pet Supplies	Cat Supplies					0
5	Animals & Pet Supplies	Pet Supplies	Dog Supplies					0
6	Animals & Pet Supplies	Pet Supplies	Fish Supplies					0
7	Animals & Pet Supplies	Pet Supplies	Reptile & Amphibian Supplies					0
8	Arts & Entertainment							0

On this page, all the Google Express Categories details are listed.

10.2. View Google Express Attributes

The View Google Express Attribute menu has the following two sub-menus:

- Simple type Attribute
- Configurable type Attribute

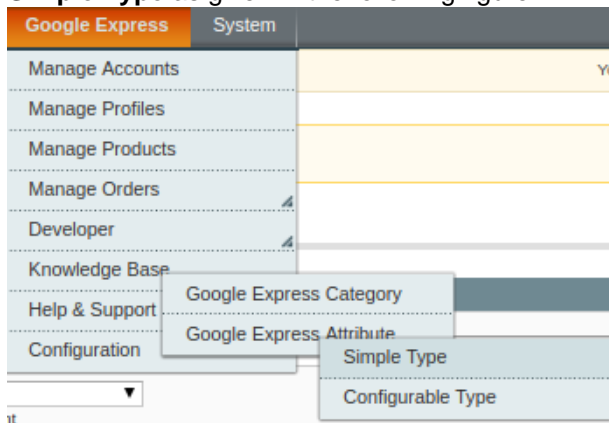

10.2.1. Simple Type Attribute

A simple type attribute consists of all the list of attributes associated with the simple product.

To view Google Express simple type attributes

- Go to **Magento Admin Panel**.
- On the **Google Express** menu, point to **Knowledge Base**, and then point to **Google Express Attribute**, and then click
- **Simple Type** as given in the following figure.

The **Attribute Management** page appears as shown in the following figure:

Attribute Management

Page 1 of 4 pages | View 20 per page | Total 65 records found Reset Filter Search

Id	Googleexpress Attribute Name	Googleexpress Attribute Enum/Values
