1. Overview

Founded in 1995, **eBay Inc.** is a multinational e-commerce corporation, facilitating online consumer-to-consumer and business-to-consumer sales. Headquartered in San Jose, the company manages the eBay.com Web site, an online auction and shopping website in which people and businesses buy and sell a broad variety of goods and services worldwide.

The WooCommerce Ebay Integration extension not only helps the each vendor to feed product data from their WooCommerce store to eBay but also, imports products from eBay to their WooCommerce store. Hence, it connects the store with one of the biggest e-commerce industry players. This extension supports only the Simple and Variable Products.

It helps to integrate the synchronized product listing between the WooCommerce and the eBay retailers. After installing the extension, the merchant can create the eBay Categories and the dependent attributes on the WooCommerce store.

Therefore, the merchant can configure the desired product category into WooCommerce for automatic submission of the selected product to the same Category on eBay. The process enables the merchant to configure the desired product category into WooCommerce for automatic submission of the selected product to the same Category on eBay.

This extension also helps the admin to import the Simple and Variable Products from the eBay store to the WooCommerce store on a single click.

Key Features are as follows:

- **Profile based Product Upload:** Enables the admin to create the Profiles and assign it to the products to automate the product upload.
- **Product Data Validation:** Enables the admin to validate the product information based on eBay standard and values.
- **Easy product upload:** Enables the admin to upload the Products on a single click when they are ready to

upload.

- **Bulk Upload:** Facilitates the admin to upload a large number of products in bulk with a single click and hence reduces the work of manual upload.
- **Creation of WooCommerce Orders:** The newly placed orders on the eBay Web site are automatically created in the WooCommerce store with all the required details as it is on the eBay Web site.

2. eBay Configuration Setting

Once the extension is successfully installed on the WooCommerce store, the **Ebay** menu appears on the left navigation bar displayed in the WooCommerce Admin Panel. Before starting with the configuration settings, the pre-requisite is to have an eBay seller account.

To set up the eBay Integration Configuration settings

1. Go to the WooCommerce Vendor panel.
2. On the left navigation bar, click the **Ebay** menu.
3. Click the **CONFIGURATION** tab

The **EBAY CONFIGURATION** page appears as shown in the following figure:

Ebay Application Keys

This section is for saving the Ebay developer application keys for using the eBay trading API.

| | |
|--------------------------------------|---|
| Choose Ebay Application Keys to use. | <input checked="" type="radio"/> Use your own application keys(Recommended) <input type="radio"/> Use Cedcommerce application keys |
| Select Mode of operation | Sandbox Testing Mode |

Follow these steps to get your Application Keys -

Step-1 First you need to create a developer account on eBay.

Step-2 Create an application and generate a production keyset.

Step-2 To get the run name , create a user token.

| | |
|------------------|------------------------|
| Application ID | Enter Application Id |
| Developer ID | Enter Developer Id |
| Developer ID | Enter Developer Id |
| Certification ID | Enter Certification Id |
| Run Name | Enter Run Name |

SAVE APPLICATION DETAILS

It is a step wise procedure.

Step-1 First you need to Authorize your details through clicking Authorization where you have to login with correct credentials in the new window and close window when you are successfully logged in and there is **close window** indication on page.

Step-2 Then click on Fetch Token to get token.

| | |
|-------------------------------|-------------|
| Select your location | US |
| Step-1 Authorize your account | AUTHORIZE |
| Step-2 Fetch Token | FETCH TOKEN |

- Choose **Application Keys** you wish to use, either Cedcommerce or create your own developer account on ebay and use those keys. We recommend to create your own application keys. Once you get your application keys, fill in the provided fields.
- Select **Mode of Operation** , either Sandbox or Production whichever you wish to use and then click on **SAVE APPLICATION DETAILS** button.

SAVE APPLICATION DETAILS

It is a step wise procedure.

Step-1 First you need to Authorize your details through clicking Authorization where you have to login with correct credentials in the new window and close window when you are successfully logged in and there is **close window** indication on page.

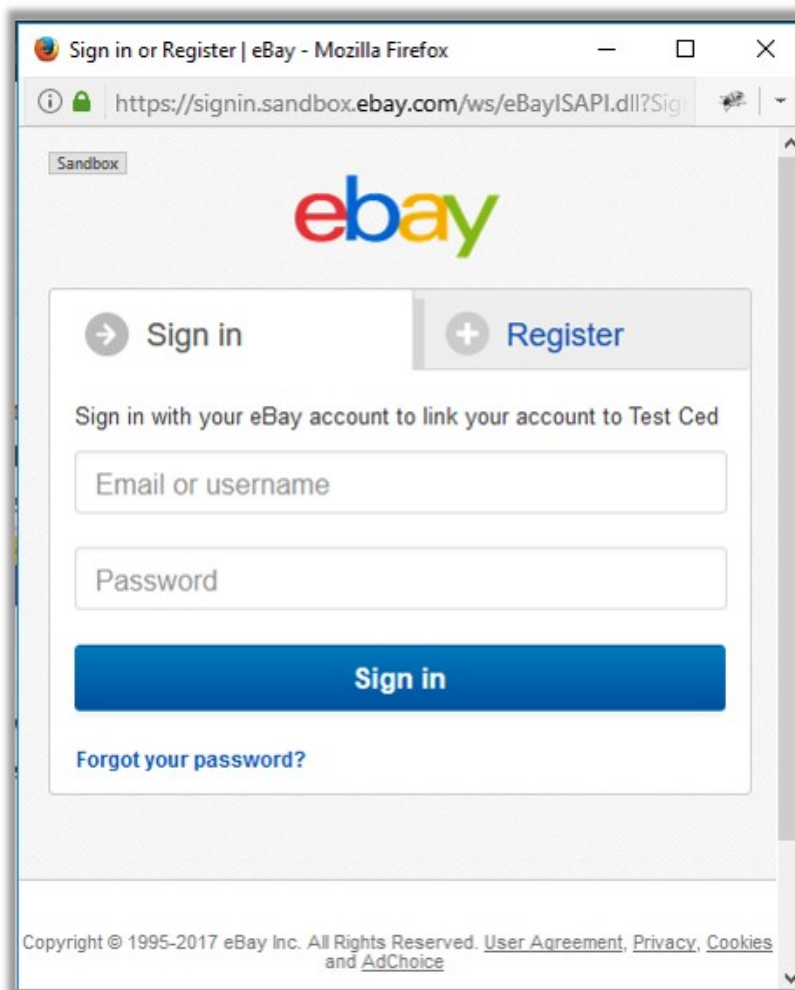

Step-2 Then click on Fetch Token to get token.

| | |
|-------------------------------|-------------------------------------|
| Select your location | US <input type="button" value="v"/> |
| Step-1 Authorize your account | AUTHORIZE |
| Step-2 Fetch Token | FETCH TOKEN |

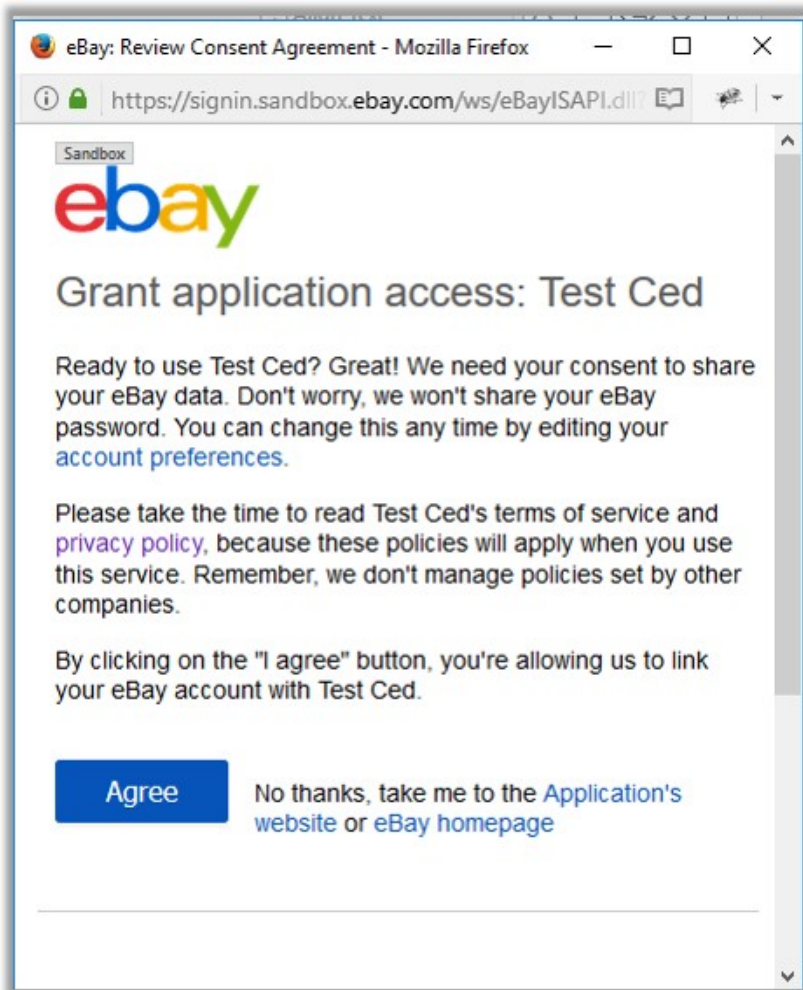

6. In the **Select your location** list, select the required location.

7. Click the Authorize button.

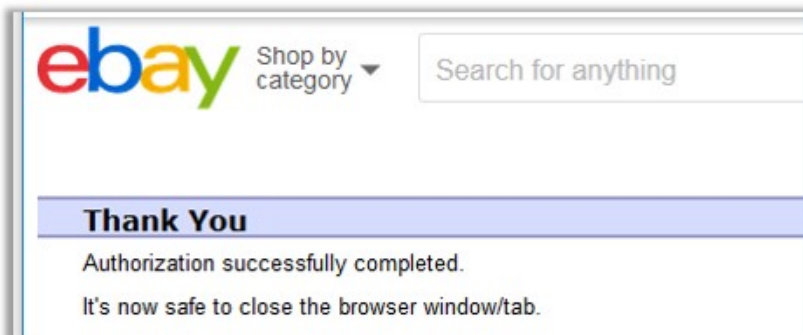

The **eBay Sign In** dialog box appears as shown in the following figure:

4. Manage Profile

Profile based product uploading provides the admin a facility to create a group of the required products those have common meta-keys, and then upload those products at one go through uploading that profile (created group). In other words, vendor can create a new profile and assign it to the group of those products, and then upload the profile on eBay; it saves the time of making the same changes in each meta-keys of each and every product.

It means, rather than making the changes in the common meta-keys of each and every product, admin can create a profile and assign it to all the products having common meta-keys, and thus make the changes in the meta-keys available on the profile page.

While creating and editing the profile, vendor can select the product and the corresponding meta-keys. These meta-keys are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add new profile
- Edit the existing profile
- Delete the profiles

4.1. Add new profile

To add a new profile

1. Go to the WooCommerce Vendor panel.
2. On the left navigation bar, click the **Ebay** menu.
3. Click the **PROFILE** tab.

The **PROFILES** page appears as shown in the following figure:

6. In the **Type Product Name Here** box, enter the required product name to get the attributes of the entered product name.
Note: Enter the initial of the product and a list appears. Select the required one from the list.
7. In the **Meta Field Key** column, select the check boxes associated with the required meta-keys.
8. Click the **SAVE META KEYS** button.
9. Scroll down to the **PROFILE INFORMATION** tab, and then click the tab.
The section appears as shown in the following figure:

Profile Information

Profile Name

Following two tabs appear:

- BASIC
- ADVANCE

10. Click the **BASIC** tab.
 11. Under **BASIC**, do the following steps:
 - In the **Profile Name** box, enter the name of the profile.
 12. Click the **ADVANCE** tab.
- The page appears as shown in the following figure:

The screenshot shows a 'Profile Information' form with two tabs: 'Basic' and 'Advance'. The 'Advance' tab is selected. The form contains two rows of fields. The first row has 'Ebay Product Title' followed by a text input box and a dropdown menu with '-- select --'. The second row has 'Ebay Category' followed by a dropdown menu with '-- Select --'.

The meta-keys selected under the **Select Product And Corresponding MetaKeys** section are listed in the select list field that appears next to the text boxes as shown in the following figure:

- a. In the **Identifier Type** list, select the required value.
- b. In the select list associated with the **Identifier Value** box, select the required meta key.

OR

In the **Identifier Value** box, enter the required value.

Note: The value entered in the box is applicable to all the products assigned to the profile.

Whereas, selecting the meta key from the list selects the individual value of the individual product.

- c. Similarly, enter the required values in the other fields.
- d. In the **Select shipping Services** list, select the required shipping method.
- e. In the **Ebay Category** list, select the required category for mapping.

It enables the admin to map only one category to one profile.

Notes:

- These meta-keys are applicable to all the products, the profile is assigned to. Leave the field empty if the specific value is required based on a specific product.

- Only after selecting the Ebay category, the fields appear under **Category Specific**.

13. Scroll down to the **Ebay** tab.
 14. Under **Ebay**, click the **CATEGORY SPECIFIC** tab.
- The section appears as shown in the following figure:

EBAY

SAVE PROFILE

18. Enter the required values in the required fields.

19. Click the **SAVE PROFILE** button.

4.2. Edit the Existing Profile

To edit the existing profile

- Go to the WooCommerce vendor panel.

- On the left navigation bar, click the **Ebay** menu.
- Click the **PROFILE** tab.

The page appears as shown in the following figure:

- Move the cursor over the required profile to edit.
The Edit and the Delete links appear as shown in the figure.
- Click the **Edit** link.
The page appears as shown in the following figure:

- Click the **SELECT PRODUCT AND CORRESPONDING METAKEYS** tab, the **PROFILE INFORMATION** tab, and/or the **Ebay** tab as per the requirement.
- Make the changes in the required section, and then click the **SAVE PROFILE** button.

4.3. Delete the Profiles

To delete the existing profile

1. Go to the WooCommerce Vendor panel.
 2. On the left navigation bar, click the **Ebay** menu.
 3. Click the **PROFILE** tab.
- The page appears as shown in the following figure:

| | Name | Meta Data | Product Status |
|--------------------------|-----------------------------------|---|---|
| <input type="checkbox"/> | Cameras & Photo>> Digital Cameras | Category -> Cameras & Photo>> Digital Cameras Listing Type -> FixedPriceItem | Total Products : 1 Ready Products : 1 Uploaded Products : 1 |
| <input type="checkbox"/> | Name | Meta Data | Product Status |

4. Move the cursor over the profile that is no more required and needs to be deleted.
The Edit and the Delete links appear as shown in the figure.
5. Click the **Delete** link.
6. The profile is deleted.
Admin can also delete more than one profiles in bulk through the **Bulk Action**.

To delete the profiles through the bulk action

1. Click the **PROFILE** tab.
2. The page appears as shown in the following figure:
