1. Overview

The **Google Express Integration For Magento 2** by CedCommerce is a handy tool that helps the Magento® 2 store owners to boost their business and generate the revenue as it interacts with Google Express API's to connect the Magento® 2 store. It provides an opportunity to cover a wide range of customers.

Admin gets the authority to create Google Express Categories and the dependent attributes on the Magento 2 store. It also enables you to establish a mapping of the desired product category on the Magento 2 store for automatic submission of the selected product to the same category on Google Express.com.

It enables the admin to manage the Google Express orders on the seller's Magento® 2 stores without making any significant changes to operational functionalities.

Synchronizing orders, products, pricing, and inventory is possible through establishing the communication between Google Express APIs and the Magento® 2 stores.

This extension interacts with the Google Express Marketplace to integrate the synchronized product listing between Magento® 2 Store and the Google Express retailers.

Key Features are as follows:

- **Product Upload Based on Profile:** Enables the admin to create a profile based on a single category, and then assign the products to the profile to automate the product upload.
- **Magento Order creation:** The newly placed orders on Google Express.com are automatically created in the Magento® 2 stores with all the required details as it is on Google Express.com.
- **Bulk upload Methodology:** Admin gets the authority to upload bulk products on Google Express but just selecting the products and upload in one go.
- **Product Data Validation:** The extension enables validating the product information in accordance with Google Express standard and values.
- **Product category mapping:** Follows category mapping philosophy. Admin can map any category of the Magento® 2 stores to the single category of Google Express.
- **Auto synchronization:** Auto synchronization of the product listing, order, inventory, and pricing at regular intervals is established between Magento® 2 Store and Google Express.com.
- **Auto-shipment procedure:*** Provides admin an ability to automate the process of shipment with Shipstation, Shipwork, Stamps.com, Linnworks, Xtento, ShipRush.
- **Email Notification:** Admin receives the notification through the mail on new order creation, low stock and if the product is rejected from Google Express.

2. Google Express Integration Extension - Installation

To install the extension

1. Log in the **ftp**, and then go to the **Magento 2** store root folder (generally present under the *public_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
 - a. Upload or Drag and Drop *app/code/Ced/GExpress* directory.
 - b. After successfully uploading the directory, the extension will be installed/upgraded.
 - c. Now run the following upgrade command in *cmd*
php bin/magento setup:upgrade.

3. Retrieve API Credentials from Google Express

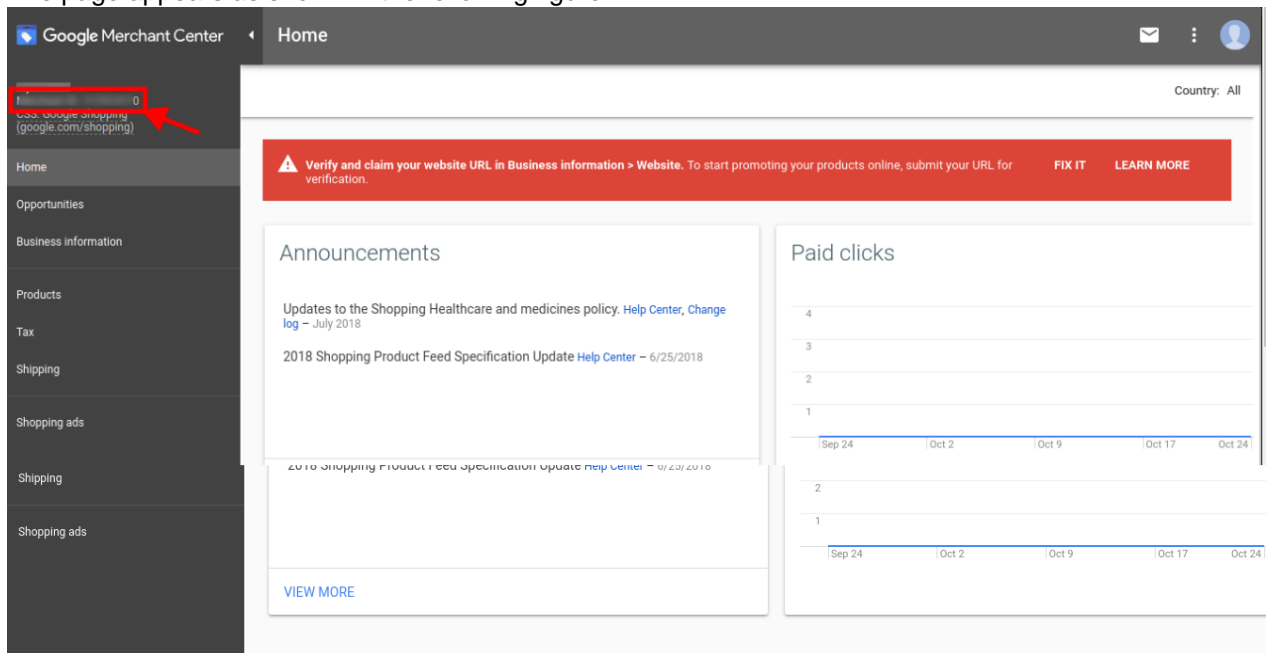

Once the extension is successfully installed on the Merchant's store, Google Express menu appears in the Magento Admin Panel. The merchant has to fill in the API credentials in the **Google Express Configuration** page of the admin panel.

The user has to log in the Google Express Seller account to obtain the **Merchant Id**.

After obtaining the id, from the Google Express Seller account and paste it to the Configuration page of the admin panel of the merchant.

To copy the API Credentials from the Google Express Seller account.

- Open the Google Express **Seller** account.
The page appears as shown in the following figure:

- Copy the **Merchant Id** from the Seller Panel as highlighted in the above image.
Now you have all the information to be used in the next step i.e. **Configuration**.

4. Configuration Setting

Once the extension is successfully installed on the Merchant's store, the Google Express tab appears in the Magento Admin Panel.

The admin has to set up the configuration settings for establishing the connection between the Magento store and the Google Express marketplace.

To set up the configuration settings in the Magento Admin panel:

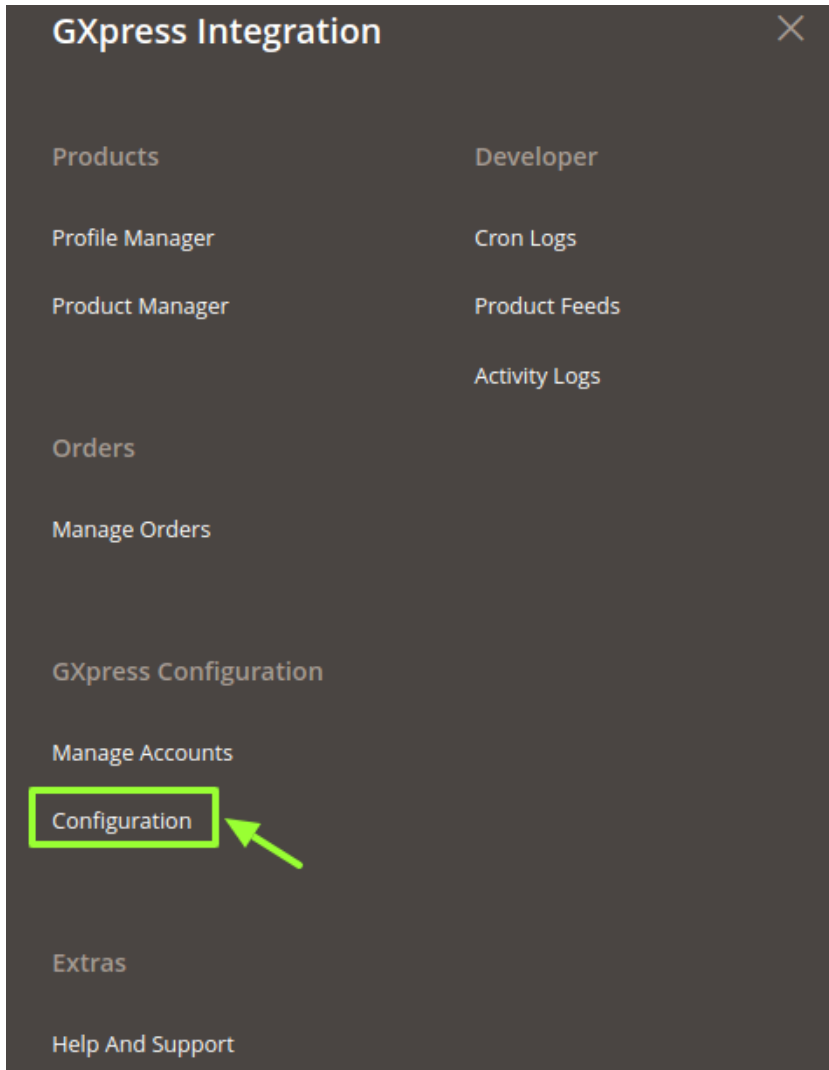

1. Go to the **Admin** panel.
2. On the left navigation bar, you will find the **GXpress Integration** option.

The screenshot displays the Magento 2 Dashboard with the Google Express integration. The sidebar on the left contains navigation icons for Dashboard, GXPRESS INTEGRATION, SALES, EDCOMMERCE INTEGRATOR, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, and STORES. The main content area shows the following sections:

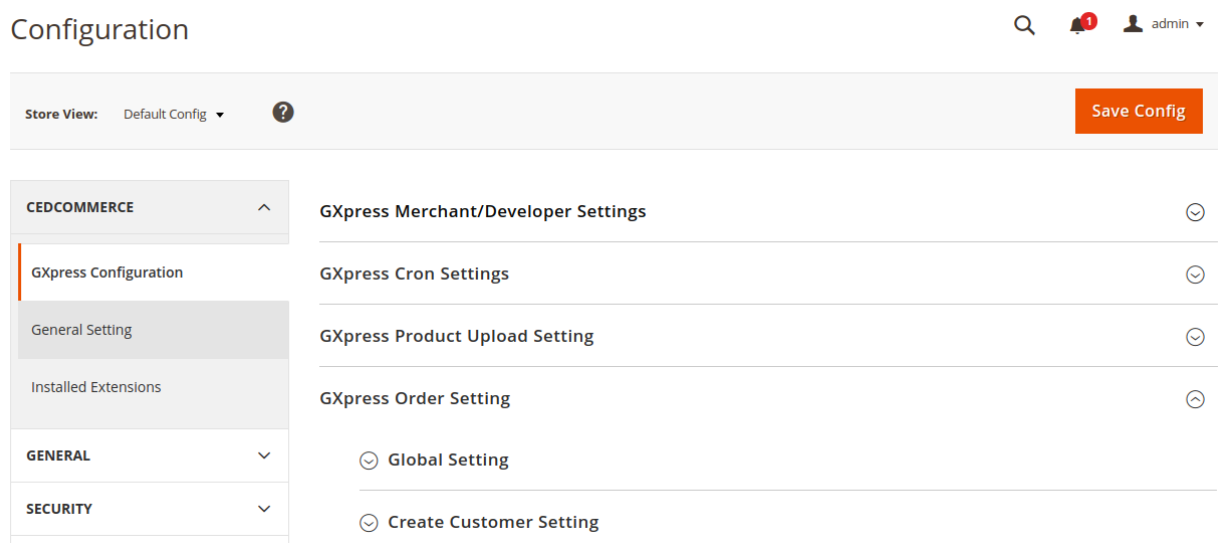

- Dashboard**: Title at the top.
- Store View**: A dropdown menu currently set to "All Store Views" with a help icon.
- Advanced Reporting**: A section header with a subtext: "Gain new insights and take command of your business' performance, using o".
- Lifetime Sales**: A large orange number showing "\$26,253.25".
- Average Order**: A large black number showing "\$444.97".
- Last Orders**: A table listing recent orders.

Customer	Items	Total
Pam Beesly	2	\$539.85
Pam Beesly	2	\$539.85

1. Click on **Configuration**.

The **Google Express Configuration** page appears as shown in the following figure:

2. Now click on the first heading ie **GXpress Merchant/Developer Settings:**

- A sub-menus opens up as:

GXpress Merchant/Developer Settings

Use Developer Account [global] 

Primary Account [global] 

- If you wish to **Use developer Account** then select **Yes** from the drop-down menu.
- An additional menu opens up as:

Use Developer Account [global] 

GXpress Redirect URL name [global]

- In the **GXpress Redirect URL name**, enter the.....
- Choose the Primary account associated with the Google Express Account.

3. Click on **GXpress Cron Settings**. The menu expands as:

GXpress Cron Settings

Order Cron [global]

File Creation Cron [global]

File Upload Cron [global]

Job Syncing [global]

Report File Processing Cron [global]

1. In this section, there are five Crons named:

- Order Cron,
- File Creation Cron,
- File Upload Cron,
- Job Syncing Cron
- Report File Processing Cron.

You can **Enable/Disable** the **Cron** as per the requirements.

4. Now, click on **GXpress Product Upload Settings**. The menu expands as:

GXpress Product Upload Setting

Debug Mode [global]	Yes
Product Price [global]	Decrease By Fixed Price
	Select to send different product price to gpress.com
Product Chunk Size [global]	5
	Enter the size of a chunk
Modify by Fix Price [global]	10

- Choose Yes in the **Debug Mode**.
- In the **Product Price** list, select one of the following options:
 - **Increase by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.
 - **Increase by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears. Enter the numeric value to increase the price of Google Express, product price by the entered value % of Magento 2 store price.
For Example,
Magento 2 price + 5% of Magento 2 price.
Magento 2 Price = 100
Select **Increase By Fixed Percentage** option
Modify by Percentage Price = 5
 $100 + 5\% \text{ of } 100 = 100 + 5 = 105$
Thus, Google Express Product Price = 105
 - **Decrease by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.
 - **Decrease by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears. Enter the numeric value to decrease the price of the Google Express product price by the entered value % of Magento 2 store price

- In the **Product Chunk Size**, set the default size of product chunk.
- In the **Product Price** list, select the price of the product.

For Example,

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

Modify by Fix Price = 5

100 – 5% of 100 = 100 – 5 = 95

Thus, Google Express Product Price = 95

5. Now, click on **GXpress Order Settings**.

GXpress Order Setting

⌵ Global Setting

⌵ Create Customer Setting

The menu is divided into two parts:

- **Global Setting**
- **Create Customer Setting**

6. Click on **Global Settings** and the section expands as:

⌵ Global Setting

Allow Order Notification <small>[global]</small>	<input type="text" value="Disable"/>
Order Fetch For Out Of Stock Product <small>[global]</small>	<input type="text" value="Yes"/>
Shipping Method of GXpress Orders <small>[global]</small>	<input type="text" value="gxpess Shipping Method"/>
GXpress Order Id Prefix <small>[global]</small>	<input type="text"/>
	<small>Prefix for GXpress Order Increment ID</small>
Create New Product (if Not Exist) <small>[global]</small>	<input type="text" value="Yes"/>
	<small>Create New Product if SKU not found in Magento Store</small>

Carrier Mapping <small>[website]</small>	<table border="1"> <thead> <tr> <th>Magento Carrier</th> <th>gxpess Carrier</th> <th>Action</th> </tr> </thead> <tbody> <tr> <td><input type="text" value="ups"/></td> <td><input type="text" value="UPS"/></td> <td></td> </tr> <tr> <td colspan="3" style="text-align: center;"><input type="button" value="Add Carrier"/></td> </tr> </tbody> </table>	Magento Carrier	gxpess Carrier	Action	<input type="text" value="ups"/>	<input type="text" value="UPS"/>		<input type="button" value="Add Carrier"/>		
Magento Carrier	gxpess Carrier	Action								
<input type="text" value="ups"/>	<input type="text" value="UPS"/>									
<input type="button" value="Add Carrier"/>										
	<small>Map Shipping Carrier for Auto Shipment</small>									

- In **Allow Order Notification**, choose either enable or disable.
- Next is the **Order Fetch from Out of Stock**, choose yes if you wish to fetch the order even though its currently out of stock.
- Users can choose the shipping methods of GXpress orders from the drop-down menu in the next section.
- Add the order prefix of your choice in the **Google Express Order Id Prefix**.
- You can Create New Product if SKU not found in your Magento Store by selecting **Yes** from the **Create New Product (if Not Exist)**.
- Now in the **Carrier Mapping** column, you can map the Magento Carrier with the corresponding Google Express Carrier.
- You can add a new carrier by clicking on **Add Carrier Button** Present.

7. Now, click on **Create Customer Setting**, and the section expands as:

⊟ **Create Customer Setting**

Create Real Customer [global]

- Select Yes Under **Create Real Customer**.
- When you select no the following section expands as:

Create Real Customer [global]

Customer First Name [global]

Customer Last Name [global]

Customer Group [global]

Customer Email [global]

Customer Password [global]

- Enter the **Customer First Name** in the next row.
- Enter the **Customer Last Name** in the next row.
- In the **Customer Group**, select the type of customer from the drop-down menu:

Customer Group [global]	NOT LOGGED IN
Customer Email [global]	General Wholesale Retailer
Customer Password	XXXXXXXXXX

- **Customer Email** needs to be entered in the next section.
- Enter the **Password** of your choice.
- Once all the actions have been taken so far, click on **Save Config** button on the top right of the page.
- The configuration will be saved.

5. Manage Google Express Accounts

[To Manage Account On Google Express](#)

- Go to the Magento 2 admin panel.
- On the left navigation bar, click **Google Express**.

The screenshot displays the Magento 2 Dashboard with the Google Express integration. The sidebar on the left contains navigation icons for Dashboard, GXPRESS INTEGRATION, SALES, EDCOMMERCE INTEGRATOR, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, and STORES. The main content area is titled 'Dashboard' and includes a 'Store View' dropdown set to 'All Store Views'. Below this, there is a section for 'Advanced Reporting' with a sub-header 'Lifetime Sales' showing a value of \$26,253.25, and 'Average Order' showing \$444.97. A 'Last Orders' table lists two orders for 'Pam Beesly', each with 2 items and a total of \$539.85.

Account Status * Disabled

Account Store * Default Store View

Client Secret File * Choose file No file chosen

Token

- Enter the **Account Code** provided by Google Express, in the first section.
- Move to the next section and enter the **Account Environment**, to be either production or sandbox.
- Enter the **Merchant ID** in the next section.
- You can choose the status of the account under the section **Account Status**.
- In the **Account Store** section choose the view of the store.
- In the **Client Secret File** choose the file from the system.
- The Token section reflects the token once it gets verified.
- Once all the actions have been taken so far, click on **Save** button on the top right of the page.

6. Manage Google Express Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento Store attributes to the Google Express attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add a new profile
- Edit the existing profile
- Delete the profile
- Submit Actions on the Google Express Profile Listing Page
- Product Manager

6.1. Add a New Profile

To add a new profile

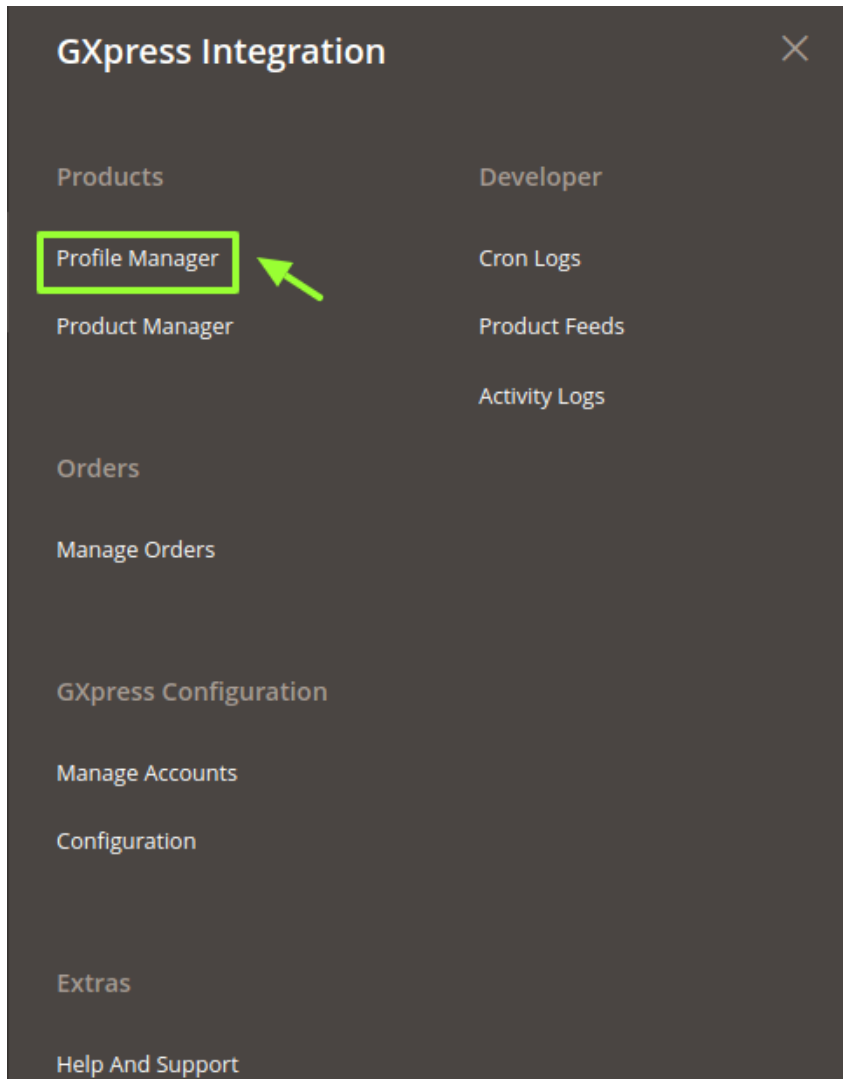

1. Go to the **Magento Admin** panel.
2. On the left navigation bar, click the **Google Express Integration** menu.

The screenshot shows the Magento Admin Dashboard. On the left sidebar, the 'GXPRESS INTEGRATION' menu item is highlighted. The main content area is titled 'Dashboard' and includes a 'Store View' dropdown menu currently set to 'All Store Views'. Below the dashboard header, there are several key performance indicators and reports:

- Advanced Reporting:** Gain new insights and take command of your business' performance, using o...
- Lifetime Sales:** \$26,253.25
- Average Order:** \$444.97
- Last Orders:** A table showing the most recent orders.

Customer	Items	Total

- 🟡 Finished product uploading execution.

7.2. To Sync the Inventory & Price

To sync inventory and price

1. Go to the Admin panel.
2. On the left navigation bar, click the **Google Express** menu.

The screenshot displays the Magento 2 Dashboard with the Google Express integration. The sidebar on the left contains navigation icons for Dashboard, GXPRESS INTEGRATION, SALES, EDCOMMERCE INTEGRATOR, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, and STORES. The main content area is titled 'Dashboard' and includes a 'Store View' dropdown set to 'All Store Views'. Below this, there is a section for 'Advanced Reporting' with a sub-header 'Lifetime Sales' showing a value of \$26,253.25, and 'Average Order' showing \$444.97. A 'Last Orders' table lists two orders for 'Pam Beesly', each with 2 items and a total of \$539.85.

4. Select the products for which you want to sync the price and inventory, by checking the corresponding boxes.
5. Click the **Arrow** button next to the **Actions** list, and then click **Sync Inventory-Price**.

6. A Confirmation dialog box appears as shown in the following figure. Click **OK**.

7. The inventory and price of selected products get synced between Magento and Google Express.

8. Google Express Orders

Admin can view the following details from the **Google Express Orders** menu:

- View **Google Express Orders**
- View **Google Express Failed Orders**

8.1. Fetch Google Express Orders

The user can fetch all the order details from Google Express. Also, later on, can proceed further for shipment.

To fetch Google Express Orders

1. Go to **Magento Admin** panel.

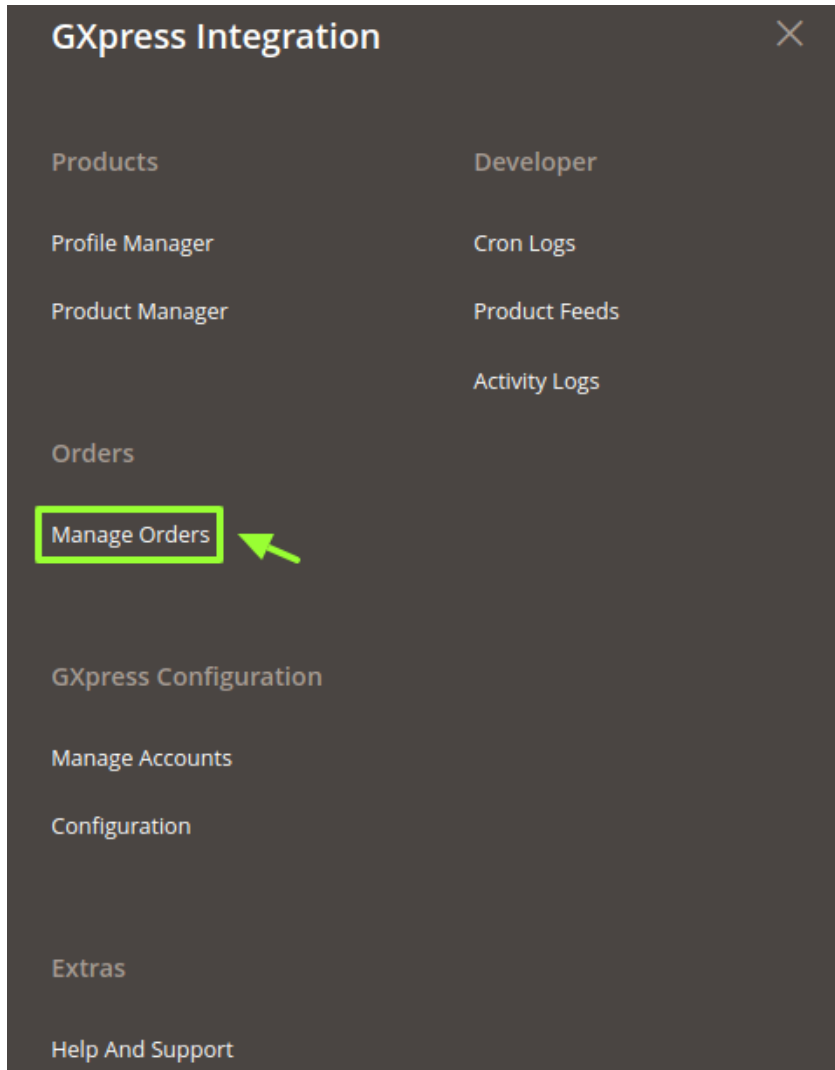

The screenshot shows the Magento 2 Dashboard with the Google Express integration menu highlighted in the sidebar. The dashboard displays the following information:

- Dashboard**: Main heading of the page.
- Store View**: All Store Views (with a dropdown arrow and a help icon).
- Advanced Reporting**: Section header with a subtext: "Gain new insights and take command of your business' performance, using o".
- Lifetime Sales**: \$26,253.25
- Average Order**: \$444.97
- Last Orders**: A table showing the most recent orders.

Customer	Items	Total
Pam Beesly	2	\$539.85
Pam Beesly	2	\$539.85

The sidebar menu includes the following items: DASHBOARD, GXPRESS INTEGRATION (highlighted), SALES, EDCOMMERCE INTEGRATOR, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, and STORES.

2. Click the **Google Express Integration** menu, and then click **View Google Express Orders**.

3. The **Google Express Orders** page appears as shown in the following figure:
