# 1. Overview

Wayfair is one of the unique marketplaces that sell with a belief that everyone should live in a home they love. Wayfair allows worldwide shoppers to quickly and easily find exactly what they want from a selection of more than **14 million** items across **home furnishings, décor, home improvement, housewares and more**. Wayfair is reinventing the way people shop for their homes – from product discovery to final delivery.

**Wayfair Integration for Magento**, developed by CedCommerce is an advanced API integration that helps the Magento store owners who are the sellers and keepers of the products to sell their products on Wayfair and ship them as well. Not only that, it enables the merchant to synchronize inventory, price, and other product details for the product creation and its management between the Magento store and the Wayfair website.

## Key features:

- Synchronization of Inventory: Real-time synchronization of product inventory.
- Manage Wayfair Orders: It allows admin to import orders from the Wayfair Marketplace to convert it into regular Magento Orders for Shipments.
- Notification Errors: If any error occurs, there is a feed error feature helping you to know what the error is.
- Cons: Crons automate the process of Inventory and Order management.
- **Return And Refunds:** Refunds are processed back to the original payment method used to purchase the order. Refund is also possible through extension.

# 2. Installing the Wayfair Magento Extension

### To Install the Extension:

- Go to the Magento Admin panel.
- On the top navigation bar, point to the **System** menu. The menu appears as shown in the following figure:

• Point to the **Magento Connect** menu, and then click **Magento Connect Manager**. The page appears as shown in the following figure:

- Scroll down to the Wayfair\_Integration Package.
- In the Actions column, select the Install option from the list.
- Click the **Commit Changes** button. Auto-scroll console contents screen appears and the extension is installed after the process.

# 3. Wayfair Configuration Settings

Once the installation has been done, you may proceed with the configuration.

### To perform configuration settings:

- Go to your Magento admin panel.
- Place cursor on **Wayfair** on the top navigation bar and the section expands as:

• When the menu appears, click on **Configuration**.

• On clicking it, you will be navigated to the configuration page that appears as:
