1. Overview

Amazon is the largest eCommerce marketplace and cloud computing platform in the world as measured by revenue and market capitalization. Started it eCommerce and online by selling books, today Amazon has risen to be World's biggest online store. Providing sellers with a wide variety of products categories to sell including electronics, books, home furnishings, clothing, pet supplies, office products, and many more.

Amazon Integration for Prestashop is an API integration that helps Prestashop store owners to sell their products on Amazon and also to synchronize inventory, price, and other product details for product creation and management between Prestashop store and Amazon marketplace. After the installation, the merchant can create Amazon categories and the dependent attributes on the Prestashop store.

Key Features are as follows:

Bulk Upload System: The vendor may upload a huge number of products on Amazon marketplace using the bulk product upload feature.

Product Category Mapping: The admin using this extension can map numerous PrestaShop store categories to a single Amazon marketplace category.

Profile-Based Pricing: This feature enables the admin to plan a variety of pricing strategies when selling a product or service on Amazon marketplace. The profile-based pricing increases or decreases the product price on Amazon marketplace.

Amazon Product Notification: If a product gets rejected by Amazon due to the violation of Amazon guidelines or invalid data, the merchants can see the details of the error according to the individual products in the module.

Enabling, Disabling, and Deletion of Products: This extension facilitates the merchants to easily disable, enable or permanently delete their products on Amazon.com.

Cron Management: Cron setting updates the product inventory, order, and price automatically, after a fixed interval of time.

New Order Notification: The admin receives a notification on the registered email address whenever a new order is fetched from Amazon marketplace.

2. Installation of Amazon Prestashop Integration Module

To install the module:

- Go to the Prestashop Admin panel.
- On the left navigation bar, point cursor to the **Modules**. The menu appears as shown in the following figure:

• Now click the Modules Manager menu, and you will come across a page like shown below.

- Now you need to click on **Upload a Module** on the top of the page.
- In doing so, the page opens a section like shown in the image below:

- **Drag and Drop** the module or click the **select file** link to upload the Amazon PrestaShop Integration module from your system.
- The module will be installed and you will be navigated to the **Configuration** page for further steps to be taken.

3. Amazon Prestashop Integration Configuration Settings

After installing the **Amazon PrestaShop Integration** module, the store owner (admin) has to set up the Amazon Integrations configurations. Prior to this, the admin has to first create a seller account on Amazon seller panel. Once the seller account is created and is approved by Amazon, the store owner can use the Amazon **Username** and **Password** while setting up the Amazon Configuration settings in the PrestaShop Admin panel.

To set up the configuration settings in the PrestaShop Admin panel

- Go to the Prestashop Admin panel.
- In the left navigation panel, place cursor on Amazon Integration and the section expands as:

Now click on Amazon Configuration.

• The Configuration Page opens up as shown:

- In the **Enable** Section, Select **Yes.** By choosing Yes the Amazon extension gets enabled and all the changes made on the Prestashop Dashboard will get reflected back to the marketplace.
- The next option is the **Cron Secure Key.** Here you need to enter the cron key that validates the URL. By doing so a perfect synchronization is established between the Amazon and Prestashop as regular updates

from the Cron updates the current scenario.

- In the **Customer Order Mail**, you need to provide the Email to create order on the store which is imported from Amazon.
- Enter the **Customer Id** in the next section. Customer Id is a unique id which is used to create order on the Prestashop store which is imported from Amazon.
- In the Order status when shipped, select the order status to appear when the order has been shipped.
- In the Order Carrier, select the order carrier set for particular orders while importing the Amazon order.
- In the **Order Payment Method**, select the order payment method set for each order while importing the Amazon order.
- In the **Price Variant Type**, you have the options to select the pricing to be reflected on Amazon for your products, as shown below:

Price variant Type

Select Price Variation 🔹 🔻
Select Price Variation
Regular Price
Increase Fixed Amount
Decrease Fix Amount
Increase Fix Percent
Decrease Fix Percent

- Increase by Fixed Amount: If you select this option, a bar gets opened as shown in the image below: Now suppose if your product price on Prestashop is 100 and you enter 50 in this tab, the price of the product that will be reflected on Amazon will be 150 now. It is because you have selected Increase By Fixed Amount and entered 50 in the corresponding fieldSuppose, your product is available on Prestashop for 100 and you enter 50 in the corresponding box, then the 50% of your product's Prestashop price will be added to it and it will be reflected on Amazon. So now your product will be available on Amazon for 150. (As 50% of 100 = 50.)
- **Increase by Fixed Percentage:** If you select this option, you may increase the product price by a fixed percentage.
- Decrease by Fixed Amount: It works in the same manner as Increase by Fixed Amount works, but it decreases the price of the Prestashop product on Amazon marketplace by a fixed amount.
- Decrease by Fixed Percentage: It works in the same manner as Increase by Fixed Percentage works, but it decreases the price of the Prestashop product on Amazon marketplace by a fixed percentage.
- In **Price Type Amount** you need to enter the Amount to be variated on the basis of Increment or Decrement value.
- Auto Sync Inventory and Price By Cron, select Yes or No in accordance with your needs. By selecting yes, the Inventory and Price will be synchronized between Prestashop and Amazon.
- In Store Language, select the default language of the store in which the data is processed.
- In Store Currency, choose the default currency in which you wish to see the transactions for your store.
- In **Remove Free Shipping**, select **Yes** or **No** in accordance with your needs. If you select yes, then free shipping gets removed from the product feed.
- In **Update on Product Edit**, select **Yes** or **No** in accordance with your needs. If you select yes, the Inventory and Price will be updated in product feed when you edit the products in the store.
- In the **Debug** section select Yes if you wish to Log data while the request is being sent on Amazon.
- At completing the process, you need to click on the **Save Config** button on the bottom right of the page as shown in the figure below:

• A confirmation message appears as shown:

4. Manage Amazon Accounts

This tab contains the information about entering the Amazon Account details so as to synchronize your items at Prestashop store with a specific Amazon account.

To set up the Amazon account settings in the PrestaShop Admin panel

- Go to the Prestashop Admin panel.
- In the left navigation panel, place cursor on **Amazon Prestashop Module** menu. The menu appears as shown in the following figure:

• Click on Amazon Account from the menu that opens up:

• The Amazon Accounts Page opens up as shown below:

- Enter the desired Account Name.
- Select Yes in **Enable**, if you want to use this account for integration and synchronization.
- In **Account Status**, select the mode as Mock or Live. By selecting live all the changes you perform in the account will get reflected on Amazon. The account status you selected will be displayed in the next column.
- In the Seller ID, Enter the seller id for that account of Amazon.
- Enter the Aws Access Key Id and Aws Auth Id in the next columns.

- Enter the Secret Key provided by Amazon.
- Click on the save button and the new account will be listed on the accounts section.

5. Amazon Profile Settings

The admin can take the following actions concerned with a profile while doing the Amazon Prestashop Integration.

- Addition of a new profile.
- Editing of an existing profile.
- Deletion of a profile.

5.1. Adding A New Profile

Note: A profile is where you may assign multiple products to be sold on Amazon from the Prestashop store.

To add a new profile

- Go to your Prestashop admin panel.
- On the left navigation bar, place the cursor on Amazon Integration as shown:

• When the menu appears, click on Amazon Profile.

• On clicking the **Amazon Profile**, you will be navigated to the page as shown below:

A		azon Profile			Add New Profile	? Help
AI	MAZON F	PROFILE 1			0	ß
	ID	Profile Code	Profile Name	Status		
	1	test	est	×	🖋 Edit 🔍	

- Here all the profiles are mentioned.
- Now to add a new profile click on Add a new profile (+) Button mentioned and you will be redirected to **Amazon New Profile Page:**

6. Manage Amazon Products

On the Amazon Products page, the store admin can perform the following tasks:

- Upload all the listed Products on the Amazon Website
- View the Product Details
- Edit the Product Information
- Upload the Selected Products
- Synchronize the Selected Products
- Delete the Selected Products

6.1. Upload Products

To upload all the listed products on Amazon

- 1. Go to the **Prestashop Admin** panel.
- 2. On the left navigation bar, move the cursor over the **Amazon Integration** menu, and then click **Amazon Products**.

The Amazon Products page appears as shown in the following figure:

- 3. Choose the account for which you want to Delete Products from the dropdown menu in **Account Selector** section.
- 4. All the products associated with the profile opens up and are listed below.
- 5. In the top-right corner, click the **Delete All** button.

Amazon Integration / Amazon Products						
Amazon Products		C	2	C		8
	Upload All	Sync All Inventory	Sync All Price	Upload Image	Delete All	Help

6. All the products associated with the account are Deleted.

To Delete a single product:

1. Scroll down to the required product and click on the arrow next to the Upload Button.

- 2. Click on the **Delete At Amazon** from the drop-down menu.
- 3. The selected product gets deleted from your Amazon seller panel.

6.5. Edit Product Information

To edit the product information

- 1. Go to the Prestashop Admin panel.
- 2. On the left navigation bar, move the cursor over the **Amazon Integration** menu, and then click **Amazon Products**.

3. The Amazon Products page appears as shown in the following figure:

 TRACKING NUMBER Fulfillment Date 	Fulfillment Date.				

• You can also cancel or ship the order from here only.

7.3. View Failed Orders

To view the failed orders:

- Go to the PrestaShop Admin panel.
- In the left navigation panel, place cursor on Amazon Integration menu.
- The menu appears as shown in the following figure:

• Click Amazon Failed Orders.

The Amazon Failed Orders page appears as shown in the following figure:

Amazon Integration / Amaz	on Failed Orders		Delete All Help
AMAZON FAILED ORDERS	D		
ID SKU	Amazon Order ID	Reason	

- All the Failed orders are listed here.
- In case you wish to cancel any failed orders from the list, Click on the cancel button associated with the failed order.
- To Delete all the failed orders, Click Delete All button on the top and all the orders will be deleted.

8. Option Mapping

To Perform Offer Mapping

- Go to the **PrestaShop Admin** panel.
- In the left navigation panel, place cursor on Amazon Integration menu.
- The menu appears as shown in the following figure:

- Click Amazon Option Mapping.
- The Amazon Option Mapping page appears as shown in the following figure:

Amazon Integration / Amazon Option Mapping

Amazon Integration / Amazon Option Mapping

Add new

Back To List Help

	Amazon Option	
Please Select Am	nazon Attribute	•
Amazon Values	Action	
	ADD	
	Please Select An Amazon Values	Amazon Option

- Here all the Prestashop categories are mentioned on the left-hand side and the Amazon categories are mentioned on the right.
- Map the Prestashop category with the most appropriate category on Amazon.
- Then click on Add to map the Prestashop value for that desired category with the Amazon values. **For example**, if you wish to map the values of various Colors between the Prestashop and Amazon categories. Then select the color in option and in the values map the desired color (say Blue) for your Prestashop with the purple of the Amazon value. The image below will make it all clear:

IAZON OPTIONS MAPPING							
Prestashop Opt	Prestashop Option			Amazon Option			
Color	٣	ColorMap		*			
Prestshop Values	Ar	mazon Values	Action				
Blue	• purple	•	Remove				
Red	▼ pink	•	Remove				
				ADD			

• Once you select the desired category then click on **Save Button** and the option mapping is saved.

9. Amazon Developer Settings

Amazon Developer Settings, user can do the following:

- Amazon Feeds
- Amazon Logs

9.1. Amazon Feeds

To view the Amazon Product Feed:

- Go to the PrestaShop Admin panel.
- In the left navigation panel, place cursor on Amazon Integration menu.
- The menu appears as shown in the following figure:

• Click Amazon Feed.

The Amazon Feed page appears as shown in the following figure:

Amazon II	zon Fe	ed								? Help
AMAZON	I FEED 0								3 >_	
ID	Feed ID	Feed Create	Execute Date	Туре	Status	Account ID	Feed File	Response File		

- All the product feeds are listed here.
- You can **Download** or **Update** the feed by clicking the link associated with.

9.2. Amazon Logs

The function of this feature is to enable you to view all the saved logs of your Amazon Prestashop Integration module.

To view logs in the PrestaShop Admin panel

- Go to the Prestashop Admin panel.
- In the left navigation panel, place cursor on **Amazon Integration** menu. The menu appears as shown in the following figure:

• On clicking on Amazon Logs, a new page opens up as shown:

nazon Integr	ation / Amazon Logs						0
