1. Overview

Founded in 2009, Houzz is headquartered in Palo Alto, California. **Houzz** is a website and online community about architecture, interior design and decorating, landscape design and home improvement. In other words, Houzz is a marketplace where the consumers can find the ultimate collection of furniture, Kitchen and Tabletop, Bed and Bath, and so on.

The WooCommerce Houzz Integration helps admin to synchronize the orders, products, pricing, and inventory through establishing the interaction between the **Houzz** API and the WooCommerce store.

The WooCommerce store owner can also manage the **Houzz** orders on the WooCommerce stores without making any significant changes in the operational functionalities.

The most important feature is that it enables the users to create the **Houzz** Categories and its dependent attributes in the WooCommerce store. Thus, it enables the admin to configure the desired product category to the WooCommerce store for automatic submission of the selected product to the same category on **Houzz.com**.

Key Features are as follows:

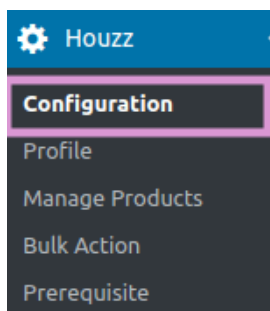

- **Easy Debug:** Easy debug process for hassle-free products upload on the Houzz website.
- **Low Stock Notifications:** Whenever Stock diminishes lower than a threshold, a notification is sent informing the status.
- **Crons:** Cron job automates the process for Inventory, Price and Order management.
- **Manage Houzz Orders:** It allows admin to import orders from the Houzz Marketplace to convert it into regular Woocommerce Orders and Shipments.
- **Profile Based Product Upload:** It allows the profile based product upload on the Houzz Marketplace.
- **Product Operation:** It allows admin to perform product related tasks such as product upload, product archive, and product view using bulk management system.

2. Houzz Configuration Settings

After obtaining the **Houzz Generated Application Id, Username Of Vendor Account, Houzz Generated Token credentials** from the Houzz Seller account, the WooCommerce store owner has to paste them in the respective fields displayed on the **Houzz Configuration** page of the admin panel.

To set up the configuration settings in the WooCommerce Admin panel

1. Go to the **WooCommerce Admin** panel.
2. On the left navigation bar, click the **Houzz** menu.
The menu appears as shown in the following figure:

3. Click **Configuration**.

The **Houzz** Configuration page appears as shown in the following figure:

- Here, you have to enter the **Houzz credentials** after that click on **SAVE CREDENTIALS** to save your details.

3. Manage Profile

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the WooCommerce store attributes to the Houzz attributes. These attributes are applicable to all the products that are assigned to the profile.

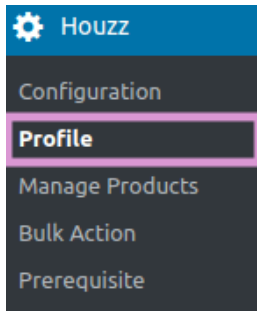

Admin can do the following tasks:

- Add new profile(<https://docs.cedcommerce.com/woocommerce/woocommerce-bestbuy-integration-guide/?section=add-new-profile-29>)
