## 1. Overview

As an eCommerce seller, would you not want to sell on leading Marketplaces to sell your online store products? If the answer to the above question, is, yes, then let's acquaint you to one of the world's top-selling Marketplaces- eBay.

eBay, a global Marketplace, started in 1995 with a view to help online sellers from all over the world to ensure a seamless selling experience.

To make the process of selling Shopify products on eBay easier, we have come up with eBay Marketplace Integration.

This solution has been designed with a perspective, that sellers who wish to sell their Shopify products on eBay can effortlessly list the products and manage them on eBay through a single platform.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/main-banner-image-modify.jpg>)

### Explore the prominent features of our solution:

**1) Quick Onboarding:** Executing the initial steps of getting your hands on the app is just a matter of a few minutes. The Onboarding Steps consist of all the important procedures (Registration, Category Mapping, etc). This reduces further efforts while using the app.

**2) Profiling:** The app provides the option to group products and assigns various business policies (Shipping, Payment & Return), templates (Inventory, Pricing, Title & Category). You can put products in a profile on the basis of different product properties such as product type, vendor, etc.

**3) Manageable Templates:** There is a segregated section in the app that allows the users to create Title, Inventory, Category (apart from the one set during Onboarding) & Price Templates to make the process of selling on eBay automated.

**4) Easy Listing:** The app helps to easy list Shopify products on eBay. The product details are properly fetched from Shopify to the app and are flawlessly conveyed to eBay.

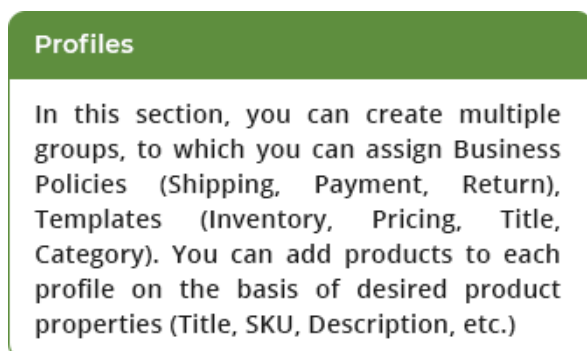

**5) Product Management:** The app helps you to edit/update the details of your Shopify products and reflect the same on eBay.

**6) Order Management:** Fetch the orders received on eBay to the app & fulfill them from your Shopify store through the app.

## Sections in our app:

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/Onboarding.png>)

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/eBay-profiles.png>)

**Products**

View your product details such as image, title, eBay Item Id, associated profile, Inventory, eBay Status (Uploaded/Not uploaded), etc.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/products.png>)

**Orders**

View your order details such as eBay Order ID, Customer Name, Shopify Order Name, Date of Product Import, etc.

You can also check order status (Unfulfilled /Fulfilled/Failed/Cancelled).

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/order.png>)

**Templates**

This section helps in viewing Category Templates as set up at the time of Onboarding. One can also manage Inventory, Pricing & Title of their products by creating respective templates.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/Templates.png>)

### Business Policy

View or create your Shipping, Payment & Return Policy. It is mandatory to set up these fields properly to sell better on eBay.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/Business-Policy.png>)

### Configurations

This section helps to view all your business policies as well as templates. In this section, you can even set-up your Global Configurations such as sales tax details, VAT details, product dimensions, etc.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/Configurations-1.png>)

### Activities

You can view your recently exported data & other ongoing processes to have a clear picture of your products & orders.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/Activities.png>)

## 2. Onboarding

To use an app efficiently, it is very important to onboard yourself appropriately. We have segmented the onboarding process into 6 steps. Each step is an effort to bring you closer to becoming an outstanding eBay seller.

The Onboarding process of the doc is quite effortless as the actions to perform are well divided into six simple steps:

**1) Registration**(<https://docs.cedcommerce.com/shopify/ebay-channel-integration->

[guide/?preview=true&section=regstn](#))

2) eBay account linking(<https://docs.cedcommerce.com/shopify/ebay-channel-integration-guide/?preview=true&section=link-your-ebay-account>)

3) Plan selection(<https://docs.cedcommerce.com/shopify/ebay-channel-integration-guide/?preview=true&section=choose-a-plan>)

4) eBay & Shopify attribute mapping(<https://docs.cedcommerce.com/shopify/ebay-channel-integration-guide/?preview=true&section=map-ebay-shopify-fields>)

5) Business policy set-up(<https://docs.cedcommerce.com/shopify/ebay-channel-integration-guide/?preview=true&section=set-your-business-policies>)

6) Default category template

set-up(<https://docs.cedcommerce.com/shopify/ebay-channel-integration-guide/?preview=true&section=execute-category-mapping>)

## 2.1. Registration

The first step of the onboarding process is all about filling in the below for:

## Tell us about yourself

●●●●●

Full Name:

**\*Required**

Email:  Skype ID:

**\*Required**

Your Primary Time Zone:  Preferable Time For Calling:

Country:  Code:  Phone Number:

\*required field,OTP will sent to this number for verification

How do you came to know about us

<https://www.facebook.com/cedcommerce>  
<https://plus.google.com/+Cedcommerce-Marketplace>  
<https://twitter.com/cedcommerce>  
<https://www.linkedin.com/company/cedcommerce>

We do our every bit do protect customer information and from time to time make changes to the privacy policy which through a notification is being displayed on the website. Regular visitors are aware of these things and for everyone going through the website make sure to go through the privacy policy page before sharing any information. The website is accessible through multiple devices and this privacy policy

Accept Terms & Conditions [↓](#)

[Next](#)

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/eBay-registration.png>)

**Make sure that you do not forget to accept the terms & conditions after reading them properly.**

**Mobile Number Verification:** Enter the OTP received on your mobile phone & verify the same to proceed.

## 2.2. Link your eBay account

Choose a location & connect your eBay account with the app.

[Need help?](#)

Live account ▾

UK ▾

[Connect](#)

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/connect.png>)

After clicking on the “Connect” button, you will see a pop-up, which will re-direct you to the eBay store. Having reached eBay.com, you need to sign in if, you already sell on eBay, or else register.

Succeeding this, you will see eBay terms & conditions, to which you need to agree by tapping on the “I agree” button.

Watch the video below to know more:

## 2.3. Choose a plan

Select a payment plan of your choice to enjoy the perks of the app. To explore the app, you can try the free plan and know the app inside out.

## Choose a plan

**\$ 39**  
/month

Choose this plan

### Silver

Manage upto 3000 products and sync upto 1000 orders

#### Silver plan services

- Upload and manage upto 3000 products
- Sync upto 1000 orders
- Real time product and inventory syncing

**\$ 69**  
/month

Choose this plan

### Gold

Manage upto 10000 products and sync upto 5000 orders

#### Gold plan services

- Upload and manage upto 10000 products
- Sync upto 5000 orders
- Real time product and inventory syncing

**\$ 99**  
/month

Choose this plan

### Platinum

Manage unlimited products and unlimited order syncing

#### Platinum plan services

- Upload and manage unlimited products
- Unlimited order sync
- Real time product and inventory syncing

**\$ 0**  
/month

Choose this Plan

### Free plan

Manage upto 250 products and sync upto 50 orders

#### Free plan services

- Upload upto 250 products
- Sync upto 50 orders
- Real time inventory syncing

Next

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/paym.png>)

## 2.4. Map eBay & Shopify fields

This functionality of the app ensures that you effortlessly map eBay and Shopify attributes of already existing eBay products. This process is to help you avoid duplicate product upload of Shopify products on eBay. You can map Shopify attributes with eBay Title or SKU.

### Map eBay and Shopify fields

● ● ● ● ●

i If you are already selling on eBay, then you need to map your **Title** and **SKU** fields of eBay and Shopify, this will help us in recognizing your already existing products on eBay and hence avoiding any sort of duplicacy issues.

Are you already selling on eBay?

Yes

**Mapping options**

eBay Attributes	Shopify Attributes
<b>Title</b>	<div style="border: 1px solid #ccc; padding: 2px;">Title</div>
<b>SKU</b>	<div style="border: 1px solid #ccc; padding: 2px;">SKU</div>

Next

(<https://docs.cedcommerce.com/wp-content/uploads/2019/05/map.png>)

## 2.5. Set your business policies

It is very important to have appropriate business policies ( Payment, Shipping, Return) before you start to sell on eBay. In this step, you need to either choose an existing business policy or create a new one(<https://docs.cedcommerce.com/shopify/ebay-channel-integration-guide/?section=bsns-policies>), which will be used as a default business policy for your products.

This section has been created with a point of view to help existing eBay sellers choose business policies that can be used as the default ones.

This section even helps to set selling details such as Sales Tax Details, item location, and excluded shipping locations.

**1) Sales tax details:** Select a country and the tax percentage you want to implement for that particular country. You can even apply shipping & handling costs.

**2) Item location:** Postal code of the place where the item is located. This value is used for proximity searches. This field is mandatory to proceed to the next step.

**3) Excluded shipping location:** You can create an exclusion list of the locations where you don't want to ship your products.

## Set your business policies

### Business Policy

 Policies you create or choose below will be set as **default profile** for products but you can change your default settings from **Configuration** section of the app.

#### Payment policy

## 2.6. Set a default category template

We have listed all the available eBay categories for you to assign to your products. Also, you can search for the desired category using the “Category Search” Bar.

You can assign categories up to 6 levels to be very specific about your product category.

If a category, assigned by you to any product has attributes, you can map them to Shopify attributes through our app.

You can choose the categories suitable for your products from the recommendations(as available on eBay) as well.

This is how the Attribute Mapping section looks like:

**Product Condition:** The seller can choose any one of the following options from the dropdown to tell about his product condition.

**Additional Information:** eBay recommends sellers to the seller all the relevant details about his product such as ISBN, UPC, EAN, etc.

**Secondary Category Mapping:** You can also execute Secondary Category Mapping by clicking on “Enable secondary category” as shown in the figure below.  
eBay allows you to sell a product in two different categories. Thus, we have provided the option to choose an additional category, apart from the primary category.

< Back

## Edit Template

Save

### Category template

**Category template** can be used for assigning a category along with the **required and optional attributes** which you commonly use for listing on eBay.

### **3. Dashboard**

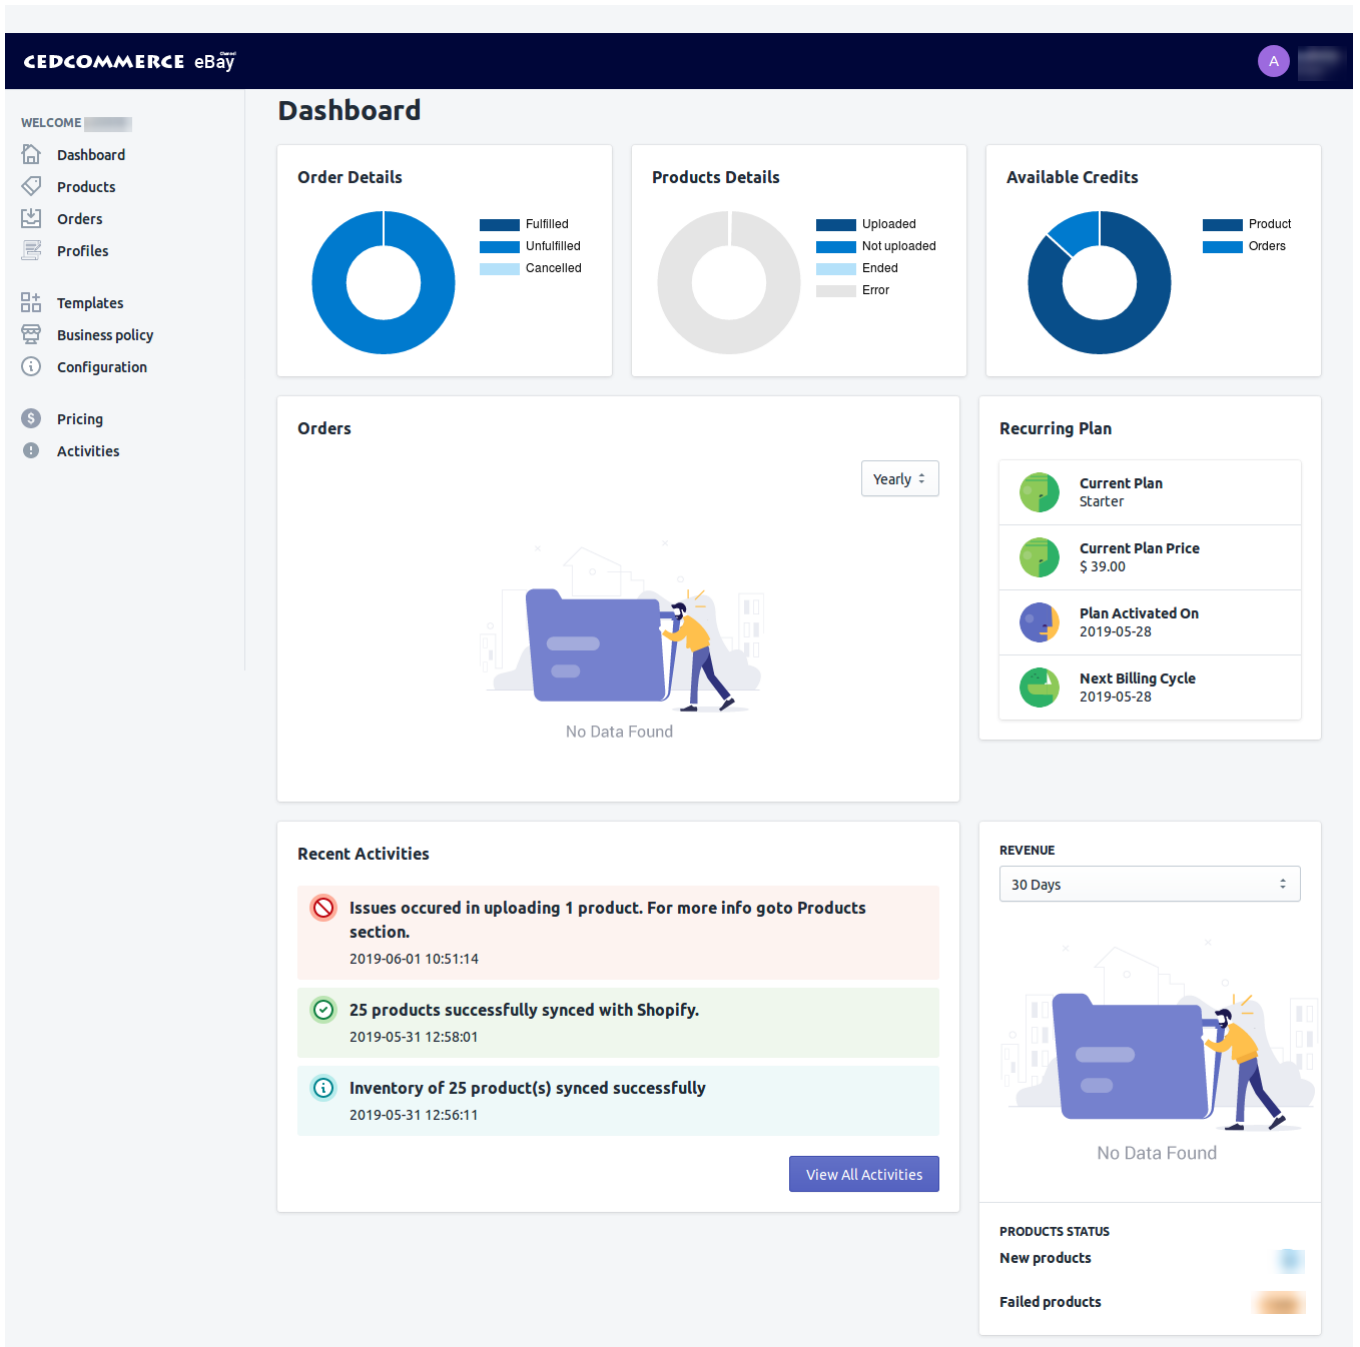

The app's dashboard is solely intended to help sellers have complete insight into orders, product status, credits, plans, sales, and activities.

Just by a glimpse of the dashboard, one can get a clear picture of the entire ongoing on the app.

Isn't it amazing?

This is how our dashboard looks like:

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/dashboard-final.png>)

### 3.1. Order Details

This subsection of the dashboard statistically states the proportion of fulfilled, unfulfilled and canceled orders.

### Order Details

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/order-details.png>)

## 3.2. Product Details

View the appropriate statistics of uploaded, not uploaded and ended products. You can check the error for the products which could not be uploaded.

### Products Details

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/op.png>)

## 3.3. Available Credits

This section helps you to stay updated about the credits left for your products and orders.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/available-credits.png>)

### 3.4. Orders

View a graphical representation of the orders received on eBay and managed through the app.

This is the order graph would look like:

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/order4.png>)

The above graph depicts that the maximum orders have been received in between the months of April & July.

You can set the time span for which you want to view the order stats.

### 3.5. Recurring plan

View your plan, current plan price, date of plan activation and date of start of next billing cycle.

#### Recurring Plan

	<b>Current Plan</b> Silver
	<b>Current Plan Price</b> \$ 39.00
	<b>Plan Activated On</b> 2019-06-01
	<b>Next Billing Cycle</b> 2019-06-01

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/rp.png>)

### 3.6. Recent Activities

Have a track of recent on goings of the app such as the number of products successfully uploaded, etc.

#### Recent Activities

-  1 product uploaded succesfully uploaded  
2019-06-06 11:36:07
-  1 product uploaded succesfully uploaded  
2019-06-06 10:03:20
-  1 product updated succesfully uploaded  
2019-06-06 09:38:21

[View All Activities](#)

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/recent-activities.png>)

On clicking on View All Activities, you have a look at not only recent activities but also the currently running processes of the app.

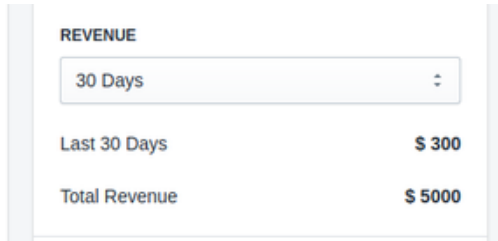

In this section (currently running processes), you can view the activities going on in the background of the app.

For eg: if the order syncing is in the process, the percentage of task completion will be visible here.

### 3.7. Revenue

View the total income of your eBay orders, that have been managed through the app.

You can set the time range for which you want to fetch the data.

REVENUE	
30 Days	:
Last 30 Days	\$ 300
Total Revenue	\$ 5000

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/AK21.png>)

### 3.8. Products Status

Know the number of new products and failed products.

**New products-** These are the newly imported products from Shopify.

**Failed products-** These are the products that could not be uploaded on eBay.

PRODUCTS STATUS	
New products	15
Failed products	18

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/ps21.png>)

## 4. Products

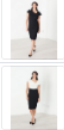

Product section helps to easily manage your Shopify products on eBay. You will be able to see all the Shopify products that you have imported to the app. You can view the Product Details (Title, Profile Name, eBay Item Id, etc), Product Status (Uploaded/Not Uploaded/Ended), Bulk Actions (that can be performed on mass actions) and select & perform (to perform actions on chosen products).

**Products** Uploaded on eBay Ended on eBay Not uploaded on eBay Failed to upload on eBay

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/products-21.png>)

### What will you be able to see about your products?

The app helps to see the important Product Details, Product Status, Recent Updates. You can also perform bulk actions and actions on the desired product(s) from the grid.

## 4.1. Product Details

You can view the Product images, Title (as appears on Shopify), Profile Name (as assigned to the product), eBay Item Id (clicking on this id will help you see details of your products, as visible on eBay).

**Products** Uploaded on eBay Ended on eBay Not uploaded on eBay Failed to upload on eBay

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/product-details-1-1.png>)

## 4.2. Product Status

You can see the Uploaded, Not Uploaded & Ended products separately since we have separate sections for both. You can also view the error encountered while uploading certain products which now fall in in the Not Uploaded category.

Uploaded products are the Shopify products that are listed on eBay and Not Uploaded products, obviously, aren't listed on eBay.

**Products** Uploaded on eBay Ended on eBay Not uploaded on eBay Failed to upload on eBay

## 4.3. Bulk Action

These are the actions which can be performed on a group of products.

The screenshot displays the CEDCOMMERCE eBay interface. The left sidebar contains navigation options: Dashboard, Products, Orders, Profiles, Templates, Business policy, Configuration, Pricing, and Activities. The main area is titled 'Products' and features a 'Bulk actions' dropdown menu. The menu options are: Import products from Shopify, Upload and revise on eBay, Sync inventory, and Sync details. Below the menu, a table lists products with columns for Title, eBay Item ID, Profile, Inventory, and eBay Status. Two products are visible: '24 MB01' and 'Duffle Bag', both with an 'Uploaded' status.

Title	eBay Item ID	Profile	Inventory	eBay Status
24 MB01	110396332271	Default Profile	786 in stock for 1 variant	Uploaded
Duffle Bag	110396332271	Default Profile	21 in stock for 1 variant	Uploaded

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/bulk-actions.png>)

- i) Import Products From Shopify:** This action helps to fetch Product Details from Shopify to the app in a single go.
- ii) Upload And revise on eBay:** One can List the Shopify products to eBay through the app with a single click of the mouse.
- iii) Sync Inventory:** Update the quantity of your Shopify products on eBay through the app.
- iv) Sync Details:** Fetch the product details from your Shopify store to the app and update the edited details, if any, on eBay (if the products already exist on eBay).

#### 4.4. Select & Perform

You can choose the desired products from the grid and perform the following actions:

The screenshot shows the 'Products' section of the app. The top navigation bar includes 'Dashboard', 'Products', 'Orders', 'Profiles', 'Templates', 'Business policy', 'Configuration', 'Pricing', and 'Activities'. The main content area is titled 'Products' and features a 'Bulk actions' dropdown menu. Below this, there are tabs for 'All', 'Uploaded', 'Not Uploaded', 'Ended', and 'Error'. A 'Reset Filters' button is visible on the right. The product list is displayed in a table with columns for 'eBay Item ID', 'Profile', 'Inventory', and 'eBay Status'. A context menu is open over the first product, showing options: 'End from eBay', 'Sync details', 'Sync inventory', 'Upload and revise on eBay', and 'Relist on eBay'. The table contains three rows of product data.

	eBay Item ID	Profile	Inventory	eBay Status
<input checked="" type="checkbox"/>	DFGHEH	-	0 in stock for 1 variant	Error
<input type="checkbox"/>	The Scout Skincare Kit ebay <a href="#">110403847452</a>	Default Profile	12 in stock for 1 variant	Uploaded
<input type="checkbox"/>	Lodge	-	5 in stock for 5 variants	Error

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/product-2020-1.png>)

- i) **End From eBay:** This will help to remove the selected product(s) from eBay.
- ii) **Sync Details:** This action will help to bring the edited/updated product details, if any, from Shopify to the app.
- iii) **Sync Inventory:** Have a track of the number of your products and convey the same on eBay through the app.
- iv) **Upload & Revise on eBay:** List the selected Shopify product(s) from the grid on eBay in a single go.
- v) **Relist on eBay:** Enables a seller to relist a listing that has recently ended on a specified eBay site.

**Note:** The app consists of relevant messages to guide you through each step you perform.

## 5. Orders

This section is dedicated to syncing eBay orders with Shopify store to successfully create and fulfill them from your Shopify store. You can also view the order status (Unfulfilled/Fulfilled/Failed/Canceled). This section also helps to view important order details such as eBay order Id, Customer name, Shopify order name and such information as visible in the image below.

You can also sync new orders received on eBay Marketplace to fulfill them easily from your Shopify store through the app.

**Orders** Sync order(s)

i

- New Order(s), whose payment has been done, is synced from eBay to Shopify within 30 minutes.
- For syncing old order(s) [contact us](#).
- It is recommended that sellers must fulfill orders after 1 hour of their creation.

←
→
20

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/sync-orders.png>)

You can view the order syncing status in the “Activities” Section, which has been later explained.

## 5.2. Order Status

In the order section, you can view the state and progress of an order.

The orders can fall in any one of the following statuses:

- 1) Unfulfilled:** These are the orders that have been received on eBay but are not yet shipped from Shopify.
- 2) Fulfilled:** These are the orders (received on eBay), that have been successfully shipped from Shopify.
- 3) Failed:** The orders that have been received on eBay but cannot be created on Shopify due to insufficient inventory or missing SKU details.
- 4) Canceled:** These are the orders that have been canceled by you due to lack of required inventory, missing SKU, etc.

The screenshot displays the 'Orders' management page in CedCommerce. The interface includes a sidebar with navigation options and a main content area. The main content area has a 'Sync order(s)' button and an information box with the following text:

- New Order(s), whose payment has been done, is synced from eBay to Shopify within 30 minutes.
- For syncing old order(s) [contact us](#).
- It is recommended that sellers must fulfill orders after 1 hour of their creation.

Below the information box, there is a filter bar with tabs for 'Unfulfilled', 'Fulfilled', 'Failed', and 'Cancelled'. The 'Unfulfilled' tab is selected and highlighted with a red box. Below the filter bar, there is a table with the following columns: 'eBay order ID', 'Customer Name', 'Shopify Order Name', 'Imported At', and 'Fulfillment'. A single order is listed with the following details:

eBay order ID	Customer Name	Shopify Order Name	Imported At	Fulfillment
eBay order ID		Shopify Order Name	21/04/2019	Unfulfilled

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/order-status.png>)

## 5.3. Order Details

The order section elaborates on all the important order details such as eBay order ID, Customer Name, Shopify Order Name, etc.

Let's give you crystal clear description about each order detail that you can view in the order details:

**1) eBay order ID:** This is a hyphened numeric value assigned to orders received on eBay.

On clicking eBay order ID, you can view the following order details:

The screenshot shows a 'View Order' page with the following details:

- Order timeline:**
  - Order id: 254186049055-2443042300015
  - Order placed at: Thu Jun 13 2019 13:04:48 GMT+0530 (India Standard Time)
  - Purchased from: ebay
  - Line items ordered: 1
- Account details:**
  - CUSTOMER: [Redacted]
  - CONTACT INFORMATION: [Redacted]
- Pricing details:**
  - Price: 256.5
  - Inclusive tax: 0.00
  - Total price: 256.5
- Line orders table:**

ID	MPN	Price	Quantity
254186049055	254186049055	256.5	3

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/view-order.png>)

**2) Customer Name:** Know the name of the person, who placed the order.

**3) Shopify Order Name:** This is a record number which assigned by eBay for the order. we can call it sequence number on eBay.

**4) Imported At:** Reflects the date on which you brought your products from Shopify to the app.

**5) Fulfillment:** Know whether the order has been fulfilled or not.

The screenshot shows an order list table with the following data:

eBay order ID	Customer Name	Shopify Order Name	Imported At	Fulfillment
254186049055-2443042300015	gary brown	#1062 Order ID - 963762028623	4/21/2019	Unfulfilled

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/order-123.png>)

## 6. Profiles

Profiles refer to a group of products created, on the basis of different product properties such as title, vendor, etc. In a profile, one can assign different business policies(Return, Payment, Shipping) and templates(Category, Title, Price & inventory). As a seller, if you create feasible profiles, it becomes very easy for you to upload products on eBay.

You can select profiles at the time of product upload.

As soon as you open this section of the app, you can see the following relevant details about already existing profiles:

**i) Action:** From here, you can delete the created profiles.

**ii) Name:** View the name of the product.

**iii) Query:** This is the condition type used to filter products.

**iv) Product Count:** Updates you about the number of products assigned to a particular profile.

Showing 0 to 5 of 1 Profile(s)

Reset Filters

Action	Name	Query	Product Count
<input type="button" value="Name"/>			
	My first profile	(title == T shirt)	1 product in profile

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/existing-profiles.png>)

To create a new profile, you need to click on the “Create” button, present on the upper-right corner of the screen as shown in the image below:

### Important fields to fill during profile creation:

**1) PROFILE NAME:** Fill in the **desired name** for the profile you are creating.

**2) BUSINESS POLICIES:** These are the policies that either you may already have if you are an existing eBay seller or must have created during the onboarding process. You need to have business policies to sell on eBay.

The following three types of business policies find existence on eBay:

**i) Shipping Policy:** This policy is concerned with Shipping Configurations such as the number of shipping days, shipping charges, etc.

**ii) Payment Policy:** This, majorly, is regarding, the mode of payment, you want to offer to the buyers.

**iii) Return Policy:** This business policy is regarding the number of days within which, you will accept the returned products & other related conditions. It also is concerned with money return terms in case a buyer returns a product.

**3) TEMPLATES:** This subsection will help you to choose the following templates\* for your products-

- i) Inventory**
- ii) Pricing**
- iii) Title**
- iv) Category**

**Note:** You can create the aforementioned templates from the succeeding “**Templates**” section.

**4) FILTER PRODUCTS:** You can filter products that you want to assign in a particular profile. The app provides feasibility to add conditions based on the following product properties:

- Id
- Title
- SKU
- Price
- Description
- Product Type
- Vendor

### **Usage of Add Rule & Add Rule Group buttons:**

In the Filter Products section, click on “Add Rule” button, will help to add conditions. For example, if you have two conditions created using the “Add Rule” button, your products will be filtered if both the conditions hold true.

If you add conditions using “Add Rule Group”, then the products will be filtered if any one of the conditions holds true.

## 7. Templates

The concept of “templates” has been introduced to ensure that sellers can easily edit/update the essential details about their products such as Category, Title, Price & Inventory. We have a dedicated section for users to edit an existing template or to create a new one. However, Category Template is one such template which we provide to be created at the time of onboarding as this is the mandatory template (on eBay).

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/Templates.png>)

## 7.1. Category Templates

You can view the number of existing category templates and the details about them. You can also create a new Category Template to suit your needs.

To create a new Template, you must fill the following fields:

**i) Template Name:** We provide flexibility to let you assign the desired name to the templates. You can choose a name as per your convenience.

**ii) Primary Category Mapping:** We have listed all the available eBay categories for you to assign to your products. Also, you can search for the desired category using the “Category Search” Bar.

You can assign categories up to 6 levels to be very specific about your product category.

**Product Condition:** The seller can choose any one of the following options from the dropdown to tell about his product condition.

**Additional Information:** eBay recommends sellers to the seller all the relevant details about his product such as ISBN, UPC, EAN, etc.

**iii) Secondary Category Mapping:** You can also execute Secondary Category Mapping by clicking on “Enable secondary category” as shown in the figure below.

eBay allows you to sell a product in two different categories. Thus, we have provided the option to choose an additional category, apart from the primary category.

< Back

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/attribute-mapping-1.png>)

## 7.2. Inventory Template

You can see the existing inventory templates (as created on eBay). You can create a new inventory template to manage your Shopify products well on the app as well as on eBay.

**i) Template Name:** Enter the template name as per your choice.

**ii) Fixed Inventory:** You can give a fixed value to the products (that will be assigned this template) if you do not want to manage product quantity on Shopify.

**iii) Threshold Inventory:** Set a minimum quantity to the product that will use a particular template. Once a product reaches its minimum value, it will be shown as “out of stock”. The app also provides you the option to delete such products.

**iv) Delete out of stock product:** This option helps to delete those products from eBay which are out of stock.

**v) Quantity restriction per buyer:** You can fix the quantity of a product that you want to offer to each buyer. For example- if you enter 2 as Quantity restriction per buyer in a template, then all the products that will be assigned this template can be purchased by a single buyer just twice.

< Back

## Create Template

**Save**

### Inventory Template

**i** With the use of **Inventory template** you can assign properties like how much should be the inventory, what is its limit (threshold), restriction per buyer and whether to delete products when they are out of stock. So by simply using the template all of these conditions can be applied while listing on eBay.

Template name

\*required

Fixed inventory

\*When quantity is not managed through Shopify

Threshold inventory

\*Below this inventory product will become out of stock

Delete out of stock product

Quantity restriction per buyer

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/inventory-template.png>)

## 7.3. Pricing Templates

View the existing pricing templates or create a new one. To create a pricing template enter the following details:

**i) Template Name:** Enter the template name of your choice.

**ii) Selling Configurations:** From here, you can choose the method for selling your products as eBay allows selling products at a fixed price or you can auction your products.

**Format(Listing Type):** Either select “**Fixed Price**” or “**Auction-Style**” for your products.

If you choose “**Fixed Price**”, the following price listing format will open up:

In this price listing format, you can choose one of the following pricing options:

**1) Custom price:** From here, you can increase/decrease the prices of your products either by a fixed value or a percentage.

**2) Flat price:** This is the fixed price that you can set for your product.

**3) Default:** On selecting this option, the price of the product, as available on Shopify, will be fetched.

< Back

## Create Template Save

**Pricing template**

**Pricing template** helps you to assign your eBay listing title, subtitle, and description, so that they can be automatically filled when you create or update a listing.

To sell an item at a fixed price, your feedback score must be 0 or higher, and the item you're listing must be priced at \$0.99 or higher.

**TEMPLATE NAME**

\*required

**CONFIGURATION**

**Fixed price listings** are set to **Good 'Til Cancelled (GTC)** duration by default. This means your item will be listed on eBay until it sells or you end it.

Format (Listing type) Listing Duration

Fixed Price GTC

\*Select how you want to sell the items you're listing \*Duration for which your listing will run. If your item doesn't sell, you can choose to relist it.

**FIXED PRICE LISTING FORMAT**

A buyer knows the exact price they need to pay for your item, and can complete their purchase immediately. There is **no bidding on flat price listings**.

**FINAL PRICE**

Default

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/pricing-template-1.png>)

If you choose auction-style, the following price listing format will open up:

**a) Start price:** This is the price at which bidding of your product will start.

**b) Buy it now price:** By specifying a 'Buy It Now' price, a seller is allowing prospective buyers the opportunity to purchase the item in the auction listing at this price immediately. When a buyer uses the 'Buy It Now' option to purchase the item, the auction listing will end immediately.

The "Buy It Now" price should at least be 30% above the start price.

**c) Reserve price:** The lowest price at which a seller is willing to sell an auction item. (Reserve price must be greater than start price).

“Auction-Style”, the following format will appear:

In Auction-Style, you can put your products out for bidding.

< Back

## 7.4. Title Templates

Title template helps you map desired Shopify attributes to Title, subtitle & description attribute of eBay. You can even pass a combination of Shopify attributes and custom values to the aforementioned eBay attributes. You can map Title, Sub Title & Description (on eBay) with the following Shopify fields:

- Title
- Vendor
- Description
- Product Type

You can also create custom values for Title, sub-title & description (on eBay) in combination with above-mentioned attributes to have personalized mapping process by choosing “**set custom value**” from the dropdown.

## 8. Business Policy

eBay requires its sellers to create business policies to ensure a seamless selling process. You can edit an existing business policy or you can create a new business policy (Shipping/Return/Payment) as per your choice.

In this section, you can create multiple business policies as per your choice.

**Business Policy**

**Business policies** let your buyers know how they can pay you, how long it will take you to ship an item, the delivery services you offer - including shipping and packaging costs - and whether you accept returns. So instead of applying the same on each listing you can simply create policies and apply it on multiple listing.

**Shipping Policy** 91 >

**Payment Policy** 43 >

**Return Policy** 15 >

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/Business-Policy-1.png>)

## 8.1. Shipping policy

This is associated with the shipping services and charges that you provide to the buyers.

First of all, you need to enter the Shipping Profile Name in the field shown below:

< Back

**Create Business policy** Save

**Shipping policy** helps you to assign shipping services, handling time, charges and much more both for global and domestic shipping.

Shipping policy

Shipping Profile Name

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/shipping-profile-name.png>)

You can choose one of the following **Service Type** (The shipping cost model offered by the seller. This is not returned for various calls since shipping type can be deduced):

**i) Flat:** This service includes choosing a fixed shipping price. You need to fill the details shown in the image

below. This is applicable for both Domestic & International shipping services.

Service Type

Flat  Global Shipping

**Domestic Shipping Services** [Add services](#)

#1 [Delete service](#)

Shipping Services	Charges	Additional charges	COD fee	
Select...	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input checked="" type="checkbox"/> Free shipping

Handling Time

1 Day  Promotional shipping discount

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/flat-1.png>)

You can even opt for free shipping by marking the check-box.

**ii) Calculated:** the cost of shipping is determined in large part by the seller-offered and buyer-selected shipping service.

**iii) Calculated Domestic Flat International:** The seller specified one or more calculated domestic shipping services and one or more flat international shipping services.

**iv) Flat Domestic Calculated International:** The seller specified one or more flat domestic shipping services and one or more calculated international shipping services.

**NOTE:** For each Shipping service type you select, you have Domestic Shipping Services fields and International Shipping Service fields(visible when you tick-mark the following checkbox).

Service Type

Flat  Global Shipping

**Domestic Shipping Services** [Add services](#)

#1 [Delete service](#)

Shipping Services: Select... Charges: [ ] Additional charges: [ ] COD fee: [ ]  Free shipping

Handling Time: 1 Day  Promotional shipping discount

**International Shipping Services** [Add services](#)

#1 [Delete service](#)

Shipping Services: Select... Charges: [ ] Additional charges: [ ] COD fee: [ ] Choose Destination: [ ]  Worldwide  Canada

Promotional shipping discount  Choose global shipping destinations  Worldwide  Canada

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/global-shipping.png>)

Let's brief you on the **fields to be filled** the Shipping Services:

- 1) Handling Time:** Describes the number of days the seller wants the listing to be active (available for bidding/buying). The duration specifies the seller's initial intent at listing time.
- 2) Shipping Service:** offered by the seller to ship an item to a buyer who is located within the same country as the item.
- 3) Charges:** The base cost of shipping one unit of the item using the shipping service specified in the corresponding Shipping Service field.
- 4) Additional Charges:** The cost of shipping each additional item if the same buyer purchases multiple quantities of the same line item. This field is required when creating a multiple-quantity, fixed-price listing.
- 5) COD fee:** This dollar value indicates the money due from the buyer upon delivery of the item.
- 6) Free Shipping:** This boolean field indicates whether or not the corresponding domestic shipping service option is free to the buyer.
- 7) Promotional Shipping Discount:** This specifies whether to offer the promotional shipping discount for the domestic shipping services of this listing (only applicable if the seller has a promotional shipping discount in effect at the moment).
- 8) Ship To Locations:** An international location or region to which the seller is willing to ship, regardless of shipping service. The country of the listing site is added by eBay.

You can select an individual location for each Shipping Service option from below:

The screenshot displays the 'International Shipping Services' configuration page. At the top right, there is a blue 'Add services' link. Below it, a table is shown with the following columns: '#1', 'Shipping Services', 'Charges', 'Additional charges', and 'COD fee'. A 'Delete service' link is located to the right of the table. Two red boxes highlight specific areas: one around the 'Choose Destination' dropdown menu and another around the 'Choose global shipping destinations' section. Both of these sections contain checkboxes for 'Worldwide' and 'Canada'.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/int-shipping-1.png>)

or you can set a location to all the Shipping Service options from the checkboxes as shown above.

## 8.2. Payment Policy

This is concerned with filling in Payment Information that you want to set up for your products.

You need to fill in the "Payment Profile Name" as per your choice.

You can either choose "immediate pay" option or you can choose one of the payment options, shown in the image below:

The screenshot shows the 'Create Business policy' form. At the top right, there is a blue 'Save' button. Below it, a teal banner contains an information icon and the text: 'Payment policy helps you to assign multiple payment options also you can provide checkout instructions.' The main form area is titled 'Payment policy' and contains the following elements: a 'Payment Profile Name' text input field, a '\*required' label, an 'Immediate Pay' checkbox, a 'Payment Options' section with a red border containing checkboxes for 'PayPal', 'VisaMC', 'Discover', 'AmEx', 'IntegratedMerchantCreditCard', and 'CashOnPickup', and an 'Additional checkout instruction' text area. Below the text area, a note states: 'This free-form string field allows the seller to give payment instructions to the buyer. These instructions will appear on eBay's view item and checkout pages.'

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/payment-op-1.png>)

In order for a seller to apply an **immediate payment** requirement for an item, the following must be true:

- the seller must have a Premier or Business PayPal account;
- the Buy It Now price (if applicable) cannot be higher than \$10,000 USD;
- the listing site supports PayPal payments;
- the category supports PayPal payments;
- the listing type is fixed-price or auction (with Buy It Now option).

You can enter your PayPal email id in the field shown below:

The screenshot shows the 'Create Business policy' form. At the top left is a '< Back' link. The title 'Create Business policy' is in bold, with a 'Save' button in the top right corner. Below the title is a teal banner with an information icon and the text: 'Payment policy helps you to assign multiple payment options also you can provide checkout instructions.' The main form area is titled 'Payment policy' and contains several sections:

- Payment Profile Name:** A text input field with a '\*required' label below it.
- Immediate Pay:** A checkbox labeled 'Immediate Pay'.
- Payment Options:** A section with a checked 'PayPal' option and several unchecked options: 'VisaMC', 'Discover', 'AmEx', 'IntegratedMerchantCreditCard', and 'CashOnPickup'.
- Paypal email:** A text input field highlighted with a red border, with a '\*required' label below it.
- Additional checkout instruction:** A large text area for providing instructions to buyers.

At the bottom of the form, there is a note: 'This free-form string field allows the seller to give payment instructions to the buyer. These instructions will appear on eBay's view item and checkout pages.'

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/paypal-email-1.png>)

If you want your buyers to see any relevant message at the time of checkout, then you can type the message in the field shown below:

Additional checkout instruction

This free-form string field allows the seller to give payment instructions to the buyer. These instructions will appear on eBay's view item and checkout pages.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/checkout-message.png>)

### 8.3. Return Policy

This section helps you to modify an existing return policy or create a new one.

You can choose whether you want to accept returns or not.

Enter the **Return Profile Name** as per your choice.

**Refund Options:** This field indicates how the seller compensates buyers for returns.

**Note:** You must set this value to MoneyBack for all eBay marketplaces except for the US marketplace.

You can also select the number of days of return acceptance from the buyer (calculated from the date of the item received by the buyer).

This section has a field where you can enter the number of days, after receiving the item, your buyer should contact you within.

You can also select as to who will pay the shipping charges while the return of an item from the dropdown.

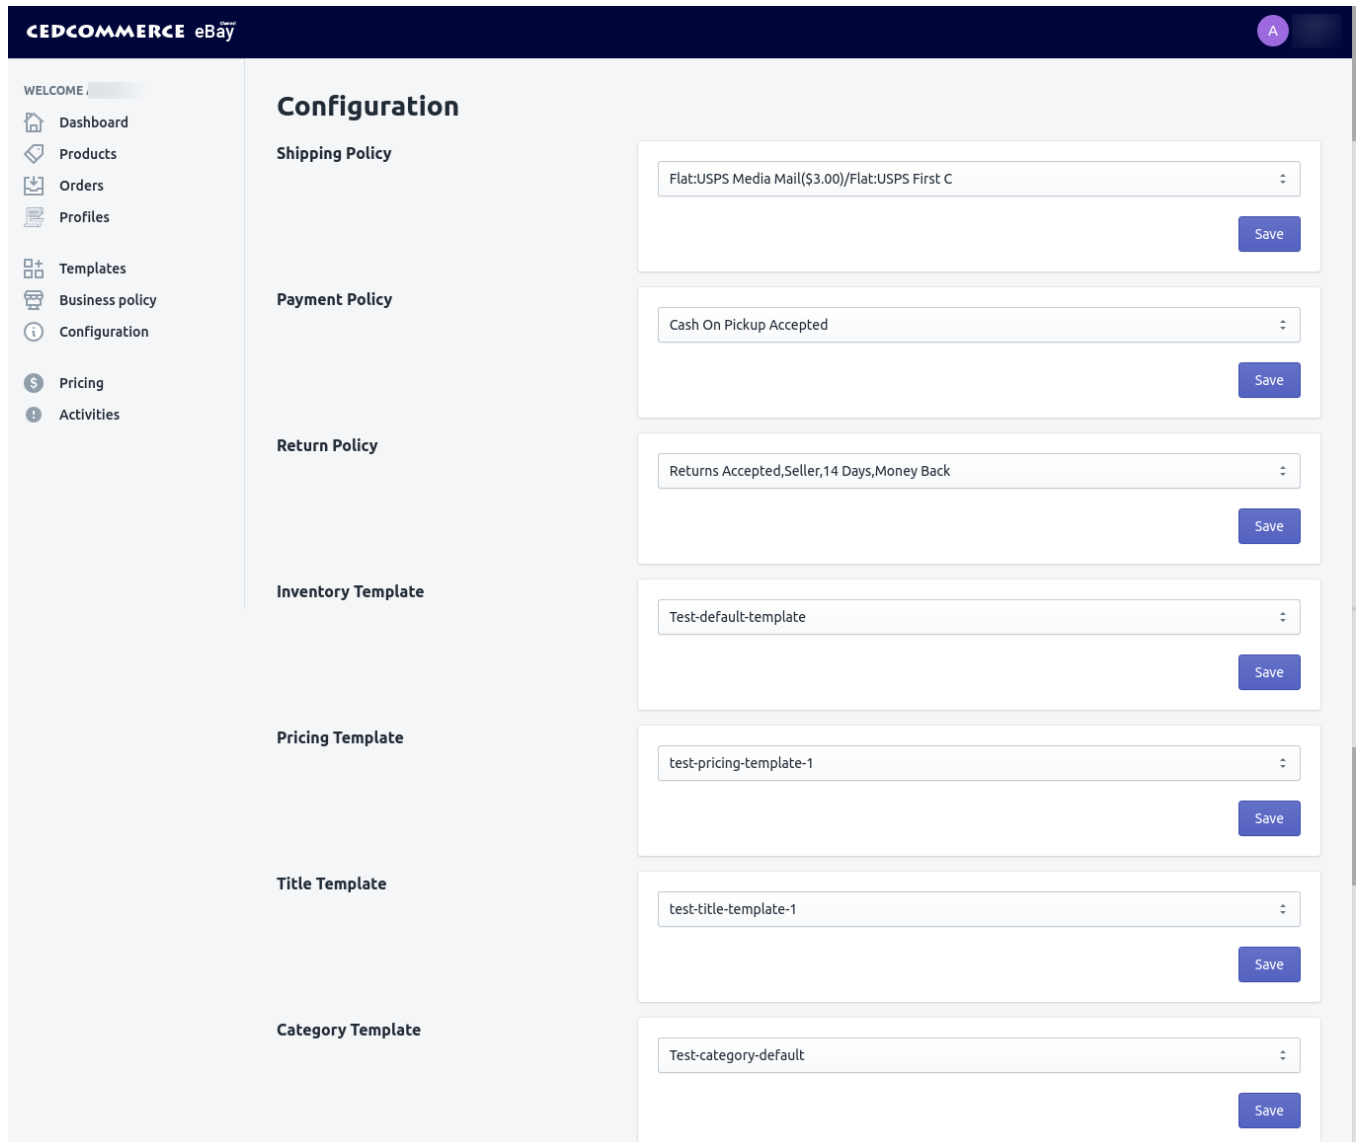

The screenshot shows a web interface for editing a business policy. At the top left is a '< Back' link. The main heading is 'Edit Business policy' with a 'Save' button on the right. Below the heading is a light blue information box with an 'i' icon: 'Return policy helps you to assign features like whether you accept returns or not and if yes then you can provide refund options ,contact duration and who will pay for return shipping.' The main form area is titled 'Return Policy' and contains several fields: 'Return Profile Name' with the value 'Returns Accepted,Buyer,30 Days,Money Back#0' and a '\*required' label; a checked checkbox for 'Returns accepted'; 'Refund Option' with a dropdown menu showing 'Money Back'; 'After receiving the item, your buyer should contact you within:' with a dropdown menu showing '30 Days'; and 'Return shipping will be paid by:' with a dropdown menu showing 'Buyer'.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/06/21.png>)

## 9. Configuration

This section is dedicated to filling in all the relevant configurations, required to make the process of product listing & management on eBay seamless.

This section had been created with a view to helping Shopify sellers, selling on eBay, to manage shipping policies & templates from a single interface.

**Configuration**

**Shipping Policy**
