## 1. Overview

The GAME marketplace is one of the renowned marketplaces of Britain that allows third-party sellers to sell their unique gaming and technology. Each seller bringing their own catalog of products for selling on Game Marketplace.

GAME Marketplace sells new and pre-owned games as well as other game-related items, such as PC hardware, toys, memorabilia, books, and clothes.

**Game Integration for Magento® 2** by Cedcommerce helps you in managing your products on a centralized platform, where you can easily list your products on Game marketplace from your existing Magento® 2 store.

This extension interacts with the Game Marketplace to integrate the synchronized product listing between Magento® 2 store and the Game.com retailers.

Synchronizing orders, products, pricing, and inventory is possible through establishing communication between Game APIs and the Magento store.

Admin can manage the Game orders on the seller's Magento® 2 without making any significant changes to operational functionalities.

### Key features of Game Integration Extension by Cedcommerce

- **Bulk Products Upload:** Admin has the flexibility to upload any number of products on Game.com using the bulk products upload feature.
- **Upload Products Based on Profile:** Enables the admin to create a profile based on a single category, and then assign the products to the profile to automate the products upload.
- **Stock Update:** Stocks are updated automatically on both ends as stock status updated in your local shop or as an order is marked shipped by Game.
- **Game Order Management:** The orders can be easily acknowledged or canceled through the centralized order management system.
- **Notifications:** Admin receives a notification if any new order is created, low stock or if the product is rejected from Game due to invalid data.
- **Crons:** Cron job automates the process for Inventory, Price, and Order management.
- **Auto Acknowledgement of Order:** Admin receives an acknowledgment of Orders automatically as soon as orders are created.
- **Low Stock Notifications:** Whenever the stock diminishes lower than the threshold, a notification is sent informing the status of the same.

## 2. Game Integration Extension Installation

### To install the extension

1. Log in the **ftp**, and then go to Magento 2 root folder (generally present under the *public\_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
  - Upload or Drag and Drop *app/code/Ced/Game* directory.
  - After successfully uploading the directory, the extension will be installed or upgraded.
  - Now run the following upgrade command in *cmd*  
`php bin/magento setup:upgrade.`

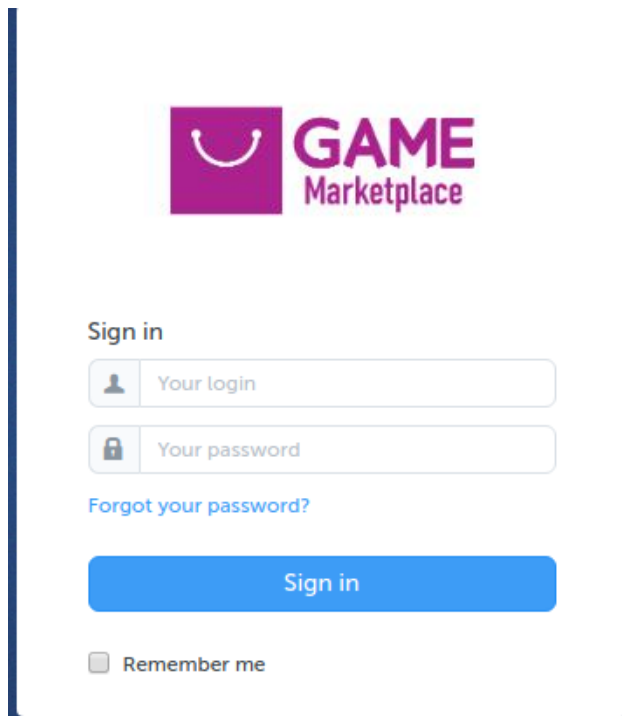

## 3. Retrieve API Credentials from the Game Seller Account

Once the extension is successfully installed in the Magento 2 store, the GAME INTEGRATION menu appears on the left navigation bar of the Admin Panel. The store owner has to fill out the retrieved the *API Key* value in the respective field displayed on the Game Configuration page of the admin panel.

### **Retrieve API Credentials from the Game Seller Account**

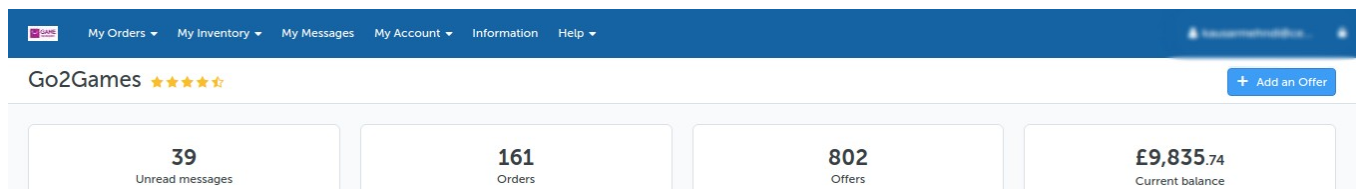

1. Go to the <https://marketplace.game.net/mmp/shop>(<https://marketplace.game.net/mmp/shop>) link.

The Login page appears as shown in the following figure:

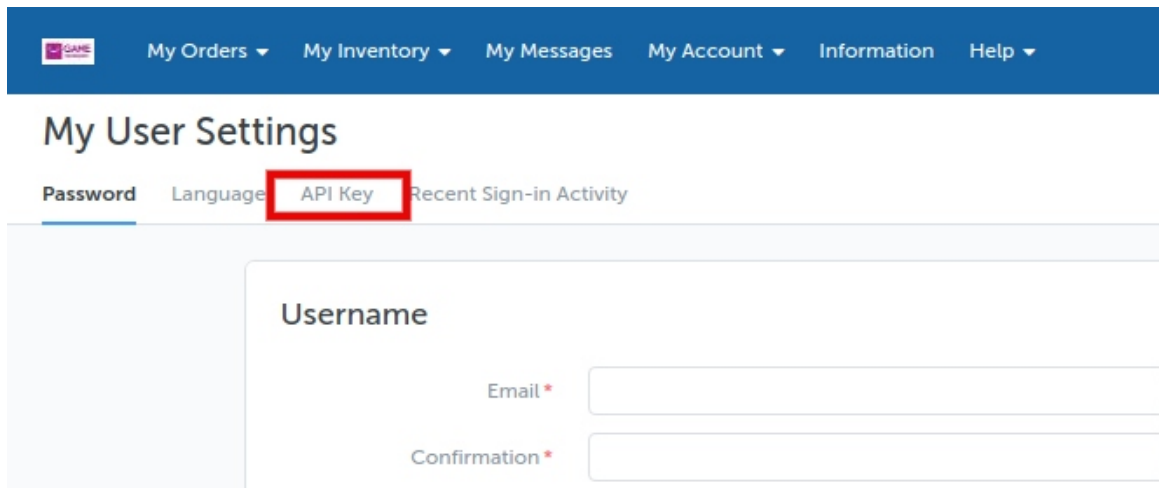

2. Enter the login credentials, and then click the **Sign In** button.

The page appears as shown in the following figure:

3. Click the username as highlighted in the figure.

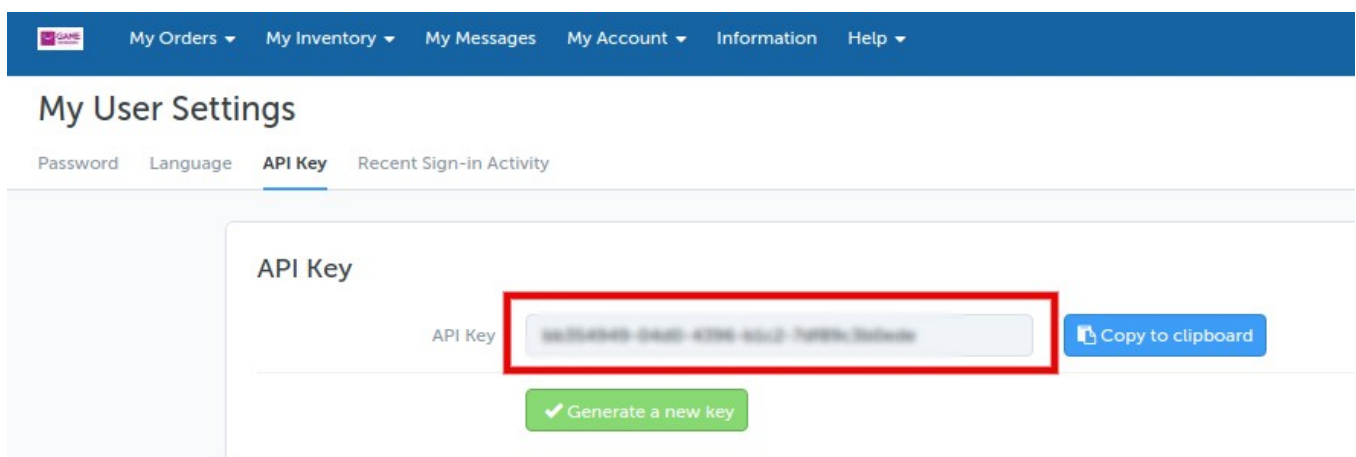

The page appears as shown in the following figure:

The screenshot shows the 'My User Settings' page. At the top, there is a navigation bar with links: My Orders, My Inventory, My Messages, My Account, Information, and Help. Below this, the 'My User Settings' title is followed by four tabs: Password, Language, API Key (highlighted with a red box), and Recent Sign-in Activity. The main content area shows a 'Username' label and two input fields for 'Email' and 'Confirmation', both marked with a red asterisk.

4. In the left navigation panel, click the **API Key** menu.

The **API Key** value appears in the right panel as shown in the following figure:

The screenshot shows the 'My User Settings' page with the 'API Key' tab selected. The main content area displays the 'API Key' label and a text input field containing a long alphanumeric string. A red box highlights the input field. To the right of the input field is a blue button labeled 'Copy to clipboard'. Below the input field is a green button labeled 'Generate a new key'.

5. Click the **Copy to clipboard** button to copy the API key value.

6. Save the corresponding value in some text editor or the in Word file to use it later on while setting up the configuration in the Magento 2 store admin panel.

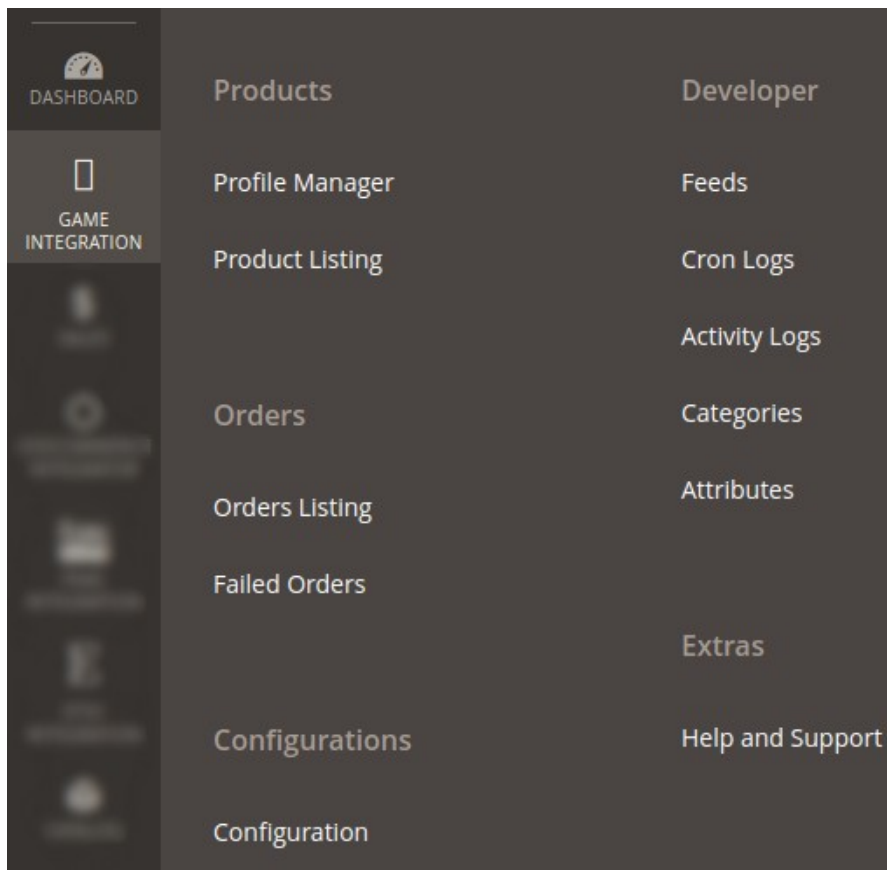

## 4. Game Configuration Settings

Once the extension is successfully installed in the Magento 2 store, the **GAME INTEGRATION** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the Game seller panel. Once the seller account is created and is approved by Game, the Magento 2 store owners have to obtain the API Key value from the Game Seller account, and then the Magento® 2 store owners have to paste it in the respective field displayed on the **Game Configuration** page of the admin panel.

### *To set up the configuration settings in the Magento 2 Admin panel*

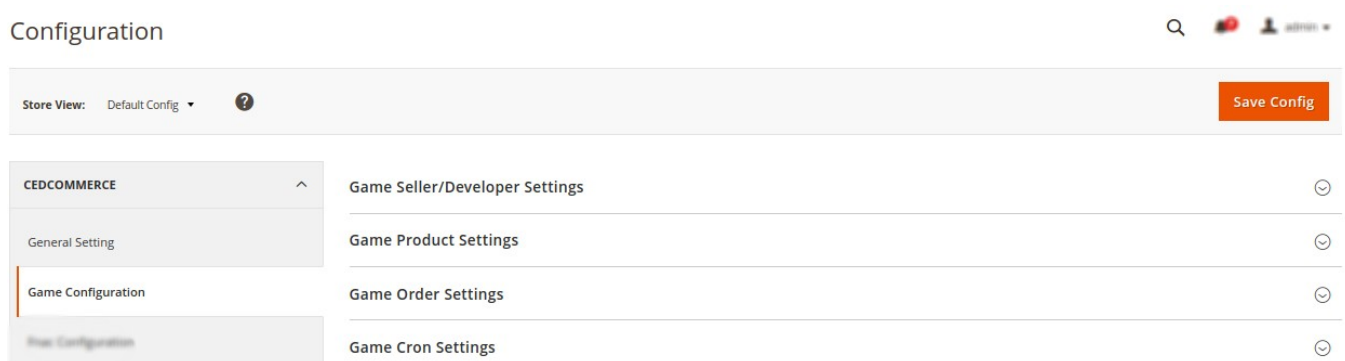

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **GAME INTEGRATION** menu.

The menu appears as shown in the following figure:

### 3. Click **Configuration**.

The Configuration page appears as shown in the following figure:

### 4. In the right panel, click the **Game Seller/Developer Settings** tab.

The **Game Seller/Developer Settings** tab is expanded and the relevant fields appear as shown in the following figure:

## Game Seller/Developer Settings

<b>Enabled</b> [global]	Yes	▼
<b>Version</b> [store view]	1.0	
<b>Mode</b> [global]	Live	▼
<b>Default Service Url</b> [global]	Live API URL	▼
<b>Api Key</b> [global]	bb354949-04d0-4396-b1c2-7df89c3b0ede	
<b>Select Store</b> [global]	Default Store View	▼
<b>Debug Mode</b> [global]	No	▼

5. Under **Game Seller/Developer Settings**, do the following steps:

- In the **Enabled** list, select the **Yes** option.
- In the **Mode** list, select the **Sandbox** option.
- In the **Default Service Url** list, select the **Sandbox API URL** option.
- In the **API Key** box, enter the **API Key value** copied from the Game seller account.
- In the **Select Store** list, select the required store.
- In **Debug Mode**, select Yes if you want the log to be created.

6. Click the **Save Config** button to save the entered values.

7. Scroll down to the **Game Product Settings** tab, and then click the tab.

The **Game Product Settings** tab is expanded and the expanded section appears as shown in the following figure:

## Game Product Settings

⌵ Game Price Settings

⌵ Game Inventory Settings

⌵ Other Product Settings

8. Under **Game Products Settings**, do the following steps:

1. Click the **Game Price Settings** tab.

The **Game Price Settings** tab is expanded and the section appears as shown in the following figure:

## Game Product Settings

## Game Price Settings

Product Price [global]

Select to send a different product price to **Game**

2. Under **Game Price Settings**, do the following step:

1. In the **Product Price** list, select one of the following options:

i. **Increase by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.

ii. **Increase by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears. Enter the numeric value to increase the price of the **Game**, product price by the entered value % of Magento 2 price.

## Game Product Settings

## Game Price Settings

Product Price [global]

Select to send a different product price to **Game**

Modify by Fix Price [global]

*For Example,*

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

**Modify by Percentage Price** = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Game Product Price = 105

iii. **Decrease by Fixed Price**: If selected, then the **Modify by Fix Price** field appears. iv. **Decrease by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the **Catch** product price by the entered value % of Magento 2 price. *For Example,*

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

**Modify by Fix Price** = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Game Product Price = 95

3. Click the **Game Inventory Settings** tab.

The **Game Inventory Settings** tab is expanded and the section appears as shown in the following figure:

## ⌵ Game Inventory Settings

Set Inventory on Basis of Threshold  
[global]

Disable

Choose yes to send inventory on game by condition

4. Under **Game Inventory Settings** tab, do the following steps:

- i. In the **Set Inventory on Basis of Threshold** list, select the **Enable** option if required to set the inventory based on a threshold.

**Note:** Only when the admin selects **Enable**, the other fields appear. Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock.

The section appears as shown in the following figure:

- ii. In the **Inventory Threshold Value** box, enter the required value.
- iii. In the **Send Inventory for Lesser Than Threshold Case** box, enter the required value.
- iv. In the **Send Inventory for Greater Than Threshold Case** box, enter the required value.

2. 9. Click the **Save Config** button to save the entered values.
3. 10. Scroll down to the **Game Other Product Settings** tab, and then click the tab.
4. The tab is expanded and the section appears as shown in the following figure:

## ⏮ Other Product Settings

### Attributes to skip validation [global]

Activity  
Barcode  
Brand  
Game Club Eligibe  
Category Gear  
Categories  
Climate  
Collar  
Color  
Cost

These attributes will skip from configurable product validation and upload.

### Use Parent Product Info [global]

Category  
Shop SKU  
Full Title  
BBFC Rating  
Condition  
Developers  
Edition Code  
EditionDescription  
ELSPA Rating  
Franchise Iteration

Select all attribute which you want from configurable parent product.

### Merge Parent Product Images [global]

No

### Upload Config As Simple [global]

No

5. 11. Under **Game Other Product Settings**, do the following steps:

- In the **Attributes to skip validation** box, selected attributes will skip from configurable product validation and upload.
- In the **Parent Product Info** box, select all attribute which you want from configurable parent product.
- In the **Merge Parent Product Images** box, select the **Yes** option to merge parent product images.
- In the **Upload Conf As Simple** box, select the **Yes** option to upload configurable as a simple product.

12. Scroll down to the **Game Order Settings** tab, and then click the tab.  
The tab is expanded and the section appears as shown in the following figure:

## Game Order Settings

<b>Game Order Id Prefix</b> <small>[global]</small>	<input type="text" value="Game"/>
<small>Prefix for Game Increment ID</small>	
<b>Order Notification Email</b> <small>[global]</small>	<input type="text" value="admin@cedcoss.com"/>
<b>Auto Accept Order</b> <small>[global]</small>	<input type="text" value="No"/> ▼
<b>Enable Default Customer</b> <small>[global]</small>	<input type="text" value="No"/> ▼
<b>Refund Order On Game</b> <small>[global]</small>	<input type="text" value="No"/> ▼
<small>Complete item will refund on game.</small>	

13. Under **Game Order Settings**, do the following steps:
- In the **Game Order Id Prefix** box, enter the required order Id prefix.
  - In the **Order Notification Email** box, enter the required email Id.
  - In the **Auto Accept Order** box, select the **Yes** option to enable automatic order to accept.
  - In the **Enable Default Customer Email** list, select the **Yes** option to enable the default customer email.
- The field appears as shown in the following figure:
- In the **Default Customer** list, select the required customer email.

<b>Default Customer Email</b> <small>[global]</small>	<input type="text"/>
--	----------------------

6. In the Refund Order Game list, select the Yes option to enable the item refund on Game.  
The field appears as shown in the following figure:

<b>Refund Reason For Game</b> <small>[global]</small>	<input type="text" value="--Please Select Reason--"/> ▼
<small>This reason will applied for all refund items.</small>	

7. In the **Refund Reason** box, select the reason will be applied for all refund items.
14. Click the **Save Config** button to save the entered values. 15. Scroll down to the **Game Cron Settings** tab, and then click the tab.

The tab is expanded and the section appears as:

## Game Cron Settings

<b>Order Cron</b> [global]	Disable	▼
	Order Fetch Cron	
<b>Order Sync Cron</b> [global]	Disable	▼
	Order Sync Cron	
<b>Inventory   Price Cron</b> [global]	Disable	▼
	Inventory Sync Cron	
<b>Feed Cron</b> [global]	Disable	▼
	Feed Sync Cron	
<b>Full Offer Sync Cron</b> [global]	Disable	▼
	Full Offer Sync Cron	
<b>Order Shipment Cron</b> [global]	Disable	▼
	Completed magento order will automatically ship	

16. Under **Catch Cron Settings**, do the following steps:

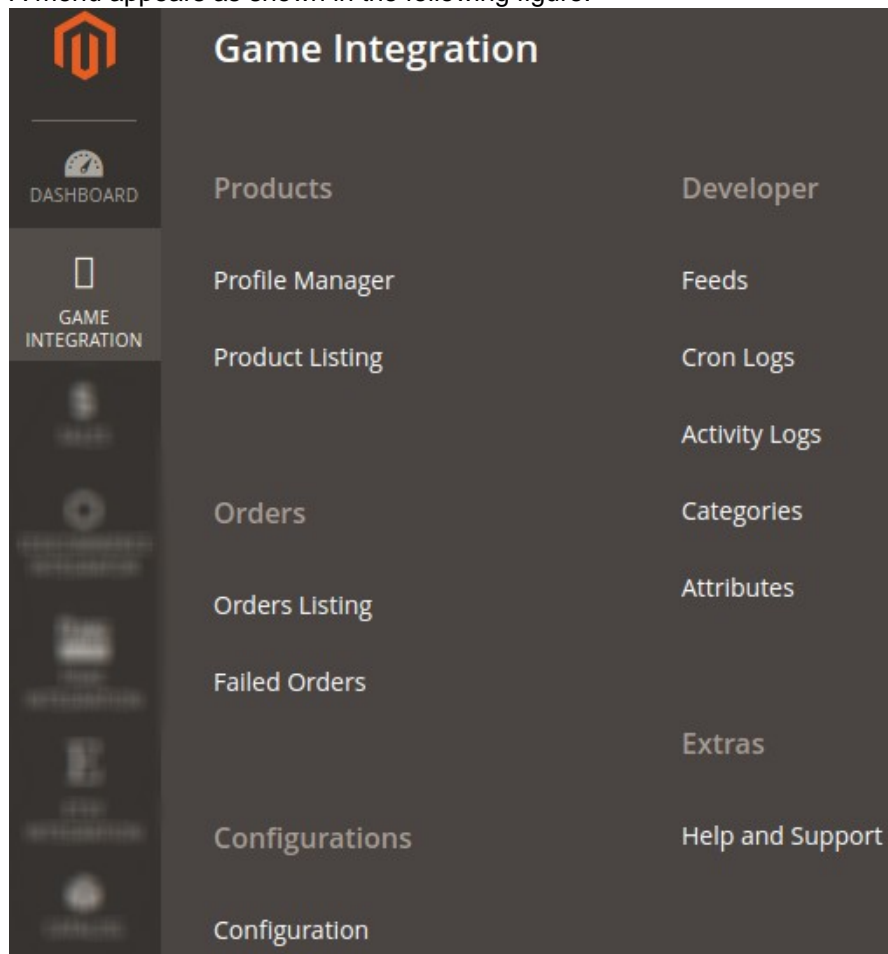

1. In the **Order Cron** list, select the **Enable** option to enable the fetch order cron.
2. In the **Order Sync Cron** list, select the **Enable** option to enable the sync order cron.
3. In the **Inventory | Price Cron** list, select the **Enable** option to enable the Inventory & Price Sync cron.
4. In the **Feed Cron** list, select the **Enable** option to enable the sync feed cron.
5. In the **Full Offer Sync Cron** list, select the **Enable** option to enable the full offer sync cron.
6. In the **Oder Shipment Cron** list, select the **Enable** option to complete Magento orders automatically shipped cron.

## 5. Manage Game Profiles

### 5.1. Add a New Profile

#### *To add a new profile*

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **GAME INTEGRATION** menu.  
A menu appears as shown in the following figure:

3. Click **Profile Manager**.

The **Manage Profile** page appears as shown in the following figure:

The prices and the inventories of the selected products are updated on the Game website.

iv. *To update the price with the offer of the selected products*, do the following steps:

- i. Select the check boxes associated with the required products.
- ii. In the **Actions** list, click the arrow button.

A list appears as shown in the figure:

iii. Click **Update Product with Offer**

A confirmation dialog box appears.

iv. Click the **OK** button.

The selected products inventories and prices updating process is executed and the page appears as shown in the following figure:

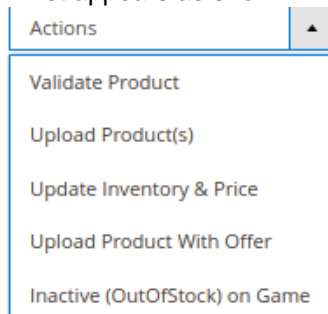

The prices with an offer of the selected products are updated on the Game website.

v. *To Inactive on Game*, do the following steps:

i. Select the check boxes associated with the required products.

ii. In the **Actions** list, click the arrow button.

A list appears as shown in the figure:

iii. Click **Inactive(OutOfStock) on Game**

A confirmation dialog box appears.

iv. Click the **OK** button.

The selected products inventories and prices updating process is executed and the page appears as shown in the following figure:

v. Click the **Back** button to go back to the **Game Product Listing** page.

## 7. Manage Game Orders

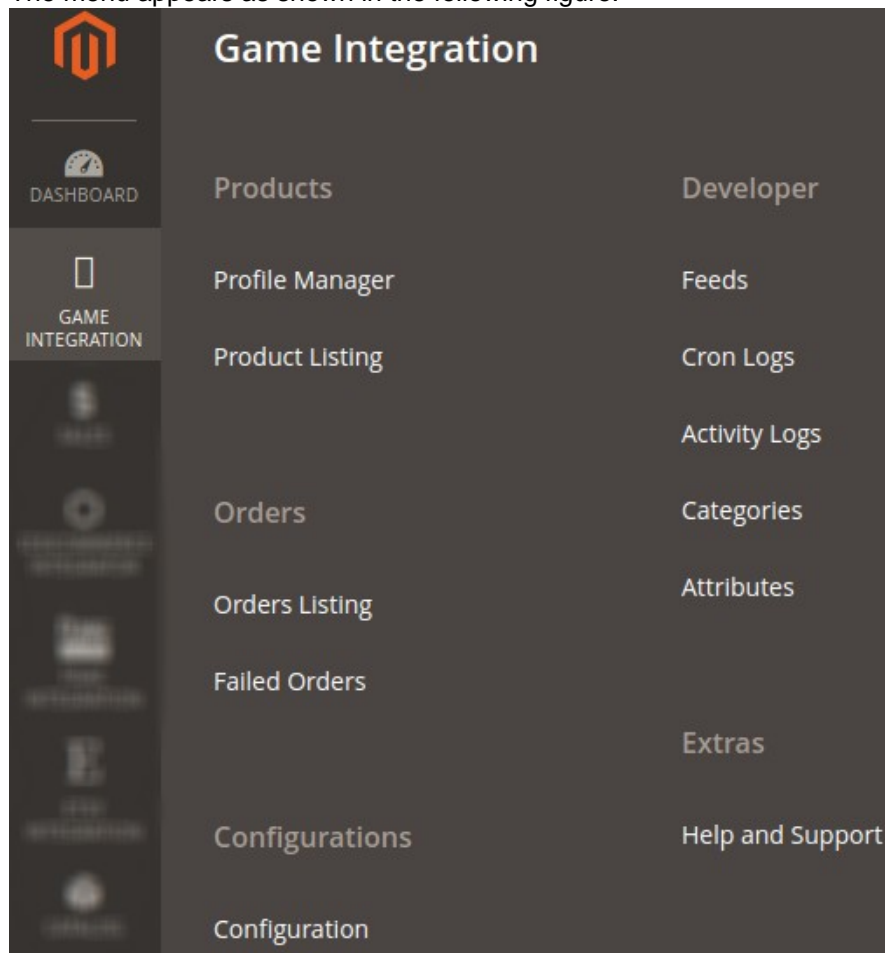

### 7.1. Ship and delete the Game Orders

The Magento 2 store owners can fetch the new orders and view all the order details fetched from Game. They can also ship the required orders and can delete the orders those are no more required.

#### *To fetch and view new orders*

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **GAME INTEGRATION** menu.

The menu appears as shown in the following figure:

3. Click **Order Listing**.

The **Game Order List** page appears as shown in the following figure:

<input type="checkbox"/>	Game-000000046	183624189_2095-A	2016-05-08	Canceled	

4. Click the **Fetch Game Orders** button.

If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.

**Notes:**

- Orders are automatically imported through CRON in every 10 minutes.
- Whenever the latest orders are imported from Game, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento 2 store admin panel.
- If no Order is imported, then check the Failed orders listed on the **Game Failed Order** page.
- Orders are auto-rejected on Game in the following conditions:
  - When Game Product SKU does not exist in Magento 2 store.
  - When Product is Out of Stock in Magento 2 store.
  - When a product is disabled in Magento 2 store.

5. **To ship the Game order**

a. Go to the **Magento 2 Admin** panel.

b. On the left navigation bar, click the **GAME INTEGRATION** menu, and then click **Order Listing**.

The **Game Order List** page appears as shown in the following figure:

iii. To delete the single order, do the following steps:

- i. Scroll down to the order row no more required.
- ii. In the **Action** column of the respective row, click the **Delete**

icon.

A confirmation dialog box appears.

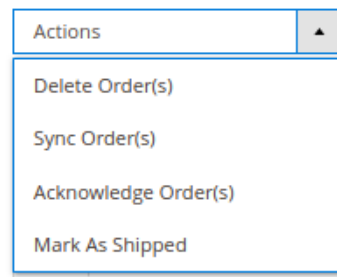

iii. Click the **OK** button.

The order is deleted from the Game Marketplace.

iv. To delete the selected Game orders in bulk, do the following steps:

- i. Select the check boxes associated with the orders those are no more required.
- ii. Click the **Arrow** button next to the **Actions** list.

A menu appears as shown in the following figure:

iii. Click **Delete Order(s)**.

A confirmation dialog box appears.

iv. Click the **OK** button.

The selected orders are deleted from the Game Marketplace.

## 7.2. View and Delete the Failed Orders

The users can view the list of failed Game orders on the Game Failed Orders page.

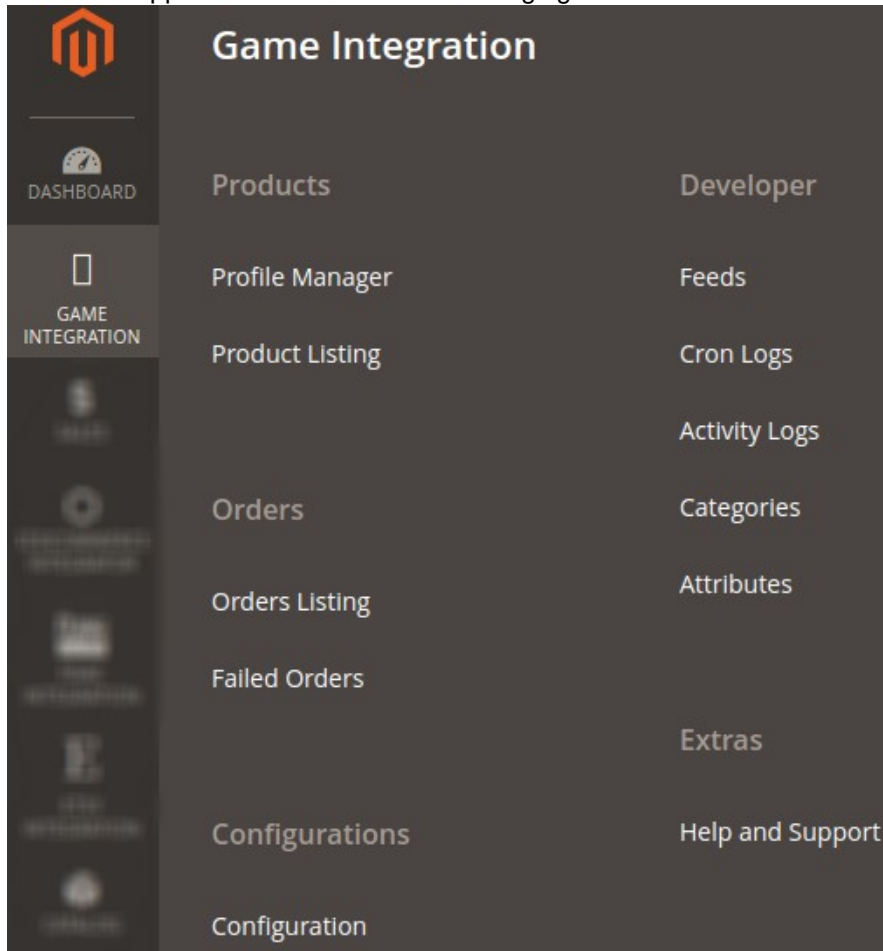

**In the following conditions, Orders are not imported from Game:**

- If any product in the Game Order is Out of Stock in the Magento 2 store.
- If any product in the Game Order is disabled in the Magento 2 store.
- If any Product does not exist in Magento 2 store or is deleted from the Magneto 2 store after uploading on Game.
- If the selected Payment Method in Game System Configuration Setting is not available in the Magento 2 store.

**To view Game failed orders**

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **GAME INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Failed Orders**.

The **GameFailed Order** page appears as shown in the following figure:

4. This page displays the failed orders with the order id and the reason for the failure.
5. To view the order data details, do the following steps:
  - a. Scroll down to the required failed order row.
  - b. In the **Order Data** column of the respective row, click the **View**

icon.

The Order Data page appears as shown in the following figure:
