1. Overview

Lazada is the topmost online shopping and selling e-commerce platform in South East Asia, It has 27,000 active sellers and more than 48 million sites visit them in a month and it is growing uniformly.

Lazada Group has become the Top-most online shopping and selling destination in South-east Asia. It was launched in 2012. As the explorer of the e-commerce in south-east Asia, Lazada has more than 1,45,000 local and international sellers, as well as 3,000 brands serving and 560 million consumers, are connected through this marketplace.

Lazada has very low demands from the sellers. They provide a very fast and easy fulfillment of orders. They have very low shipping rates across the board.

Lazada Integration for OpenCart is an API integration that helps OpenCart store owners to sell their products on Lazada and also to synchronize inventory, price, and other product details for product creation and management between OpenCart store and Lazada marketplace.

Lazada OpenCart Integration extension interacts with Lazada marketplace to integrate the synchronized product listing between OpenCart and Lazada retailers.

Key Features:

Easy Product Listing: Export all products of the store to Lazada.com.

Order Management: Manipulate the Lazada orders from YOUR store.

Information Update: Any change in your store's product(s) gets reflected on Lazada.

Error Notification: Get notified of the errors while uploading the products and their details.

Inventory Update: Inventory changes are tracked and updated.

Bulk Upload: Upload as many products as you want, with the Bulk Product Upload mechanism.

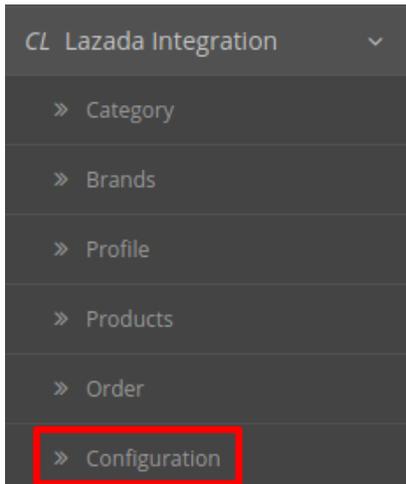

Order Automation: Fulfill the order shipment the easiest way in few clicks.

2. Configuration Settings

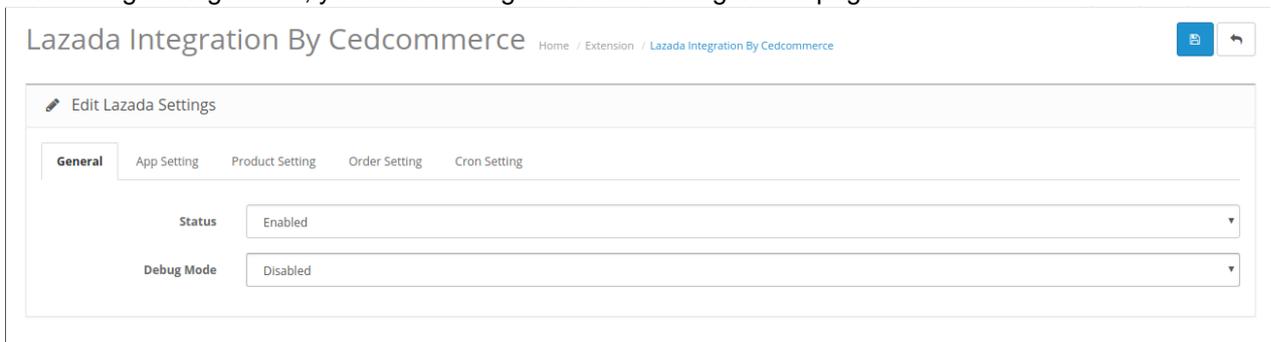

Once the module has been installed, the first necessary step needs to be taken by the admin is to complete the Configuration.

To do the **Configuration Settings:**

- Go to your OpenCart admin panel.
- Place the cursor on **CL Lazada Integration** which is on the left navigation bar, as shown in the figure below:

- From the menu that appears as shown in the image below, click on **Configuration**.
- On clicking Configuration, you will be navigated to the Configuration page as shown below:

- In **Status**, select **Enabled** to enable the module.
- In **Debug Mode**
 - Select **Enable**, to activate the debug mode.
 - Select **Disable**, to deactivate the debug mode.

Product Price

- In **Default Store**, select the store in which you want your entire system to be processed.
- In **Product Price**, you may select the price that you want for your products on Lazada marketplace. The options for sending different prices are shown in the image below:

Product Price

- Default Price
- Default Price**
- Increase By Fix Price
- Decrease By Fix Price
- Increase By Fix Percent
- Decrease By Fix Percent

- **Default Price:** Choose this if you don't want any change in price between OpenCart store and Lazada.

- **Increase Fixed Amount:** You may select this option if you want your product price to be increased on Lazada as compared to your OpenCart store. If you select this option, a box appears as shown below:
- By choosing this option, you may enter in the **Price Variant Amount** box the amount by which you want your product price to be Increased on Lazada as compared to your OpenCart store. Suppose if you enter 50 in this field and your product is for 100 on your OpenCart store, then the amount that your product will be available for on Lazada would be 150 (as the amount entered is 50 for **Increase** by fixed price, so the price entered would be added to the price for which product is available on OpenCart).
- **Decrease Fixed Amount-** You may use this option if you want the price of your OpenCart product to be decreased on Lazada.
- By choosing this option, you may enter in the **Price Variant Amount** box the amount by which you want your product price to be decreased on Lazada as compared to your OpenCart store. Suppose if you enter 50 in this field and your product is for 100 on your OpenCart store, then the amount that your product will be available for on Lazada would be 50 (as the amount entered is 50 for **Decrease** by fixed price, so the price entered would be subtracted from the price for which product is available on OpenCart).
- **Increase Fix Percentage-** You may use this option if you want the price of your OpenCart product to be increased on Fruugo by a certain percent.
