2. Product Description

QuickBooks is cloud-based accounting software that helps your business accounting data accurate and up-to-date. You can get your Magento 2 QuickBooks integration, a platform that will provide automated software to manage your business.

Magento QuickBooks Integration – An Accounting Solution Software

QuickBooks Integration for Magento 2 by Cedcommerce is a powerful tool which helps you automatically synchronize all accounting information like Customer's Information, Guest Customer Information, Products, Category, Invoices, Guest Invoice, Taxes, Credit Memo from your Magento 2 store to your QuickBooks Online.

3. Product Features

- Track income from your Magento 2 store in QuickBooks Online
- Synchronize Guest user orders from Magento 2 to Quickbooks Desktop automatically and manually as set by the administrator from the configuration.
- Sync Magento Customer Information to Quickbooks automatically and manually as set by the administrator from the configuration.
- Automates product inventory and price synchronization on QuickBooks automatically and manually as set by the administrator from the configuration.
- Sync Invoices to Quickbooks automatically and manually as set by the administrator from the configuration.
- Tax Rates Synchronization automatically and manually as set by the administrator from the configuration.
- Sync credit memo from Magento 2 store to Quickbooks automatically and manually as set by the administrator from the configuration.
- Cron job automates the process to upload all information Magento 2 Stores to QuickBooks.
- At the moment, this extension supports one-way synchronization from Magento 2 to QuickBooks.

Benefit

- 100% open source
- Easy Installation and Extension Configuration Process
- User-friendly interface

4. Integration Requirement

Before completely setting up a QuickBooks Integration configuration you need to create an account on QuickBooks Intuit and subscribe accordingly.

- QuickBooks Integration for Magneto 2 is fully compatible with QuickBooks Online.

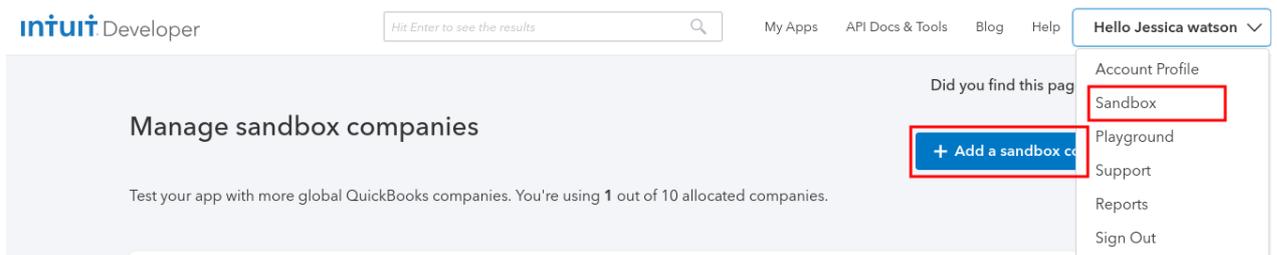

- You need to have API credentials – OAuth Consumer Key, OAuth Token Secret, and OAuth Consumer Secret.
- Quickbooks Integration by cedcommerce support one-way synchronization from Magento 2 e-commerce store to QuickBooks.

Getting QuickBooks API Credentials

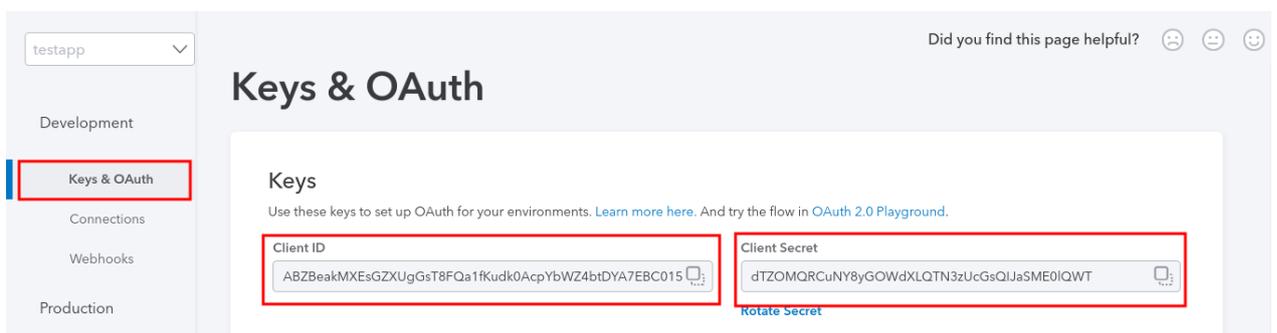

1. To get the **Client Id** and **Client Secret** for the **Quickbooks Integration authentication** navigate to <https://developer.intuit.com/app/developer/qbo/docs/get-started> (https://developer.intuit.com/app/developer/qbo/docs/get-started) , create an **account** by clicking the **SignUp** button.

2. After your Account is created on QuickBooks, you will see a page that has an option to choose “My Apps” on the top and then navigate to “Create an App”
3. After Creating an app You need to create a **Sandbox Company**, for that, you need to move to your account section and click on Sandbox and then click on “**Add a Sandbox Company**”

4. Now to Get the **Client Id** and **Client Secret Key** move to **My Apps < (APP NAME)**, Click on the App name and then after getting redirected to **Develop your App Page**, Move to **Development < Key & OAuth**.

5. Scrolling the page further below you will be finding an option of **Redirect URIs** *Redirect URI that your store address serves to users upon authentication. Redirect URI requests must come from a web server. All Production URI requests must use HTTPS.*

Redirect URIs

[Add URI](#)

Redirect URI that your app serves to users upon authentication. Redirect URI requests must come from a web server. The URI itself cannot be an IP address or a URI fragment or relative path. All Production URI requests must use HTTPS. You can create up to Redirect 25 URIs.

ORDER	LINK	ACTIONS
1	<input type="text" value="http://demo.cedcommerce.com/magento2.3/vamaship/quickbook/gateway/autho"/>	

Note

- You must set the redirect URL and click the save button after that below. As shown above.
- If you are using the Quickbooks Magento Integration in the **Sandbox/Testing Mode** then you can make use of it.
- If you are using the Quickbooks Magento Integration in the **Live Mode** then you can make use of the Production keys.

5. General Configuration

Magneto Configuration setting will allow you to connect with the QuickBooks solution, for that you need to move to Magento store Admin panel, click on **QuickBooks Integration > Quickbooks Configuration**

Cedcommerce QuickBooks Integration Configuration

Enable QuickBooks Integration System <small>[store view]</small>	<input type="text" value="Yes"/>
API Mode <small>[store view]</small>	<input type="text" value="Sandbox"/>
Enter Client Id <small>[store view]</small>	<input type="text" value="ABZBeakMXEsGZXUgGsT8FQa1fKudk0AcpYbWZ4btDY."/>
Enter Client Secret <small>[store view]</small>	<input type="text" value="dTZOMQRCuNY8yGOWdXLQTN3zUcGsQlJaSME0IQWT"/>
Chunk Size for Mass Upload <small>[store view]</small>	<input type="text" value="10"/>
Redirect Url <small>[store view]</small>	<input type="text" value="http://demo.cedcommerce.com/magento2.3/vamashi"/>
	Add This Url To QuickBook Account
Enable Cron Schedule Upload <small>[store view]</small>	<input type="text" value="Yes"/>

Authorized

CONFIGURATION SETTING

Enable Quickbooks Integration System This helps the customer to enable and disable the Magento Quickbooks integration extension, by setting the field to Yes or No.

API Mode When the admin has integrated his Magento store to his Quickbooks account, so he has two option that is Sandbox and Production, So before making data and complete solution live admin can check at sandbox mode.

Sandbox Mode: Testing Mode

Production Mode: Live Mode

Enter Client ID / Enter Client Secret you will be further getting a Client ID and Client Secret from the Quickbooks panel as described above and need to insert that in the column.

Chunk Size for Mass Upload This is the Bunch of data that is imported by creating a queue, at the time when the cron is scheduled.

Redirect URL is the store URL that is used, Redirect URL is that your store serves to users upon authentication. Redirect URL requests must come from a web server.

Enable Cron Schedule Update Select Yes or No to further automatically schedule the cron.

If Selected **Yes** all the changes that have been marked for the period of time will be automatically updated on the Quickbooks account at the time when scheduler runs.

If the option is selected **No**, the change (Product, Invoice, Customer, and others) that are resulted in the system have to be manually updated by the admin, and this can be done by clicking the **AUTHORIZED** button at the bottom of the Configuration setting page.

6. Manually Sync Data to QuickBooks

When the Automatic updation process is not enabled by the admin configuration, the data for the e-commerce store updation has a need to be done via manual updation process

To mark the **Automatic** and **Manual** updation process is done via enabling the **Cron Schedule Upload**.

Enable Cron Schedule Upload [store view]

If the option is set to **Yes** all the entries in the system are automatically mapped to Quickbooks account when the scheduler run.

when the option is set to **No**, all the new update in the entry like *Customers / Products / Invoice / Credit Memo / Category, etc.* need to be mapped manually by admin.

6.1. Manually Sync Customers to QuickBooks Panel

When the admin needs to upload the customer data to Quickbooks account he can navigate to **Magento Admin < Customer**

from there whichever customers entry admin requires can select and sync to QuickBooks account.

Customers

Search by keyword

21 records found

20 per page

	ID ↑	Name	Email	Group	Phone	ZIP	Country	State/Province	Customer Since	Web Site	Confirmed email	Account Created in	Date of Birth
<input type="checkbox"/>	21	steven steven	steven@gmail.com	General	33333	10001	United States	California	Jun 22, 2019 8:10:37 AM	Main Website	Confirmation Not Required	Default Store View	
<input type="checkbox"/>	20	cron cron	cron@gmail.com	General	123	123	United States	Colorado	Jun 21, 2019 2:38:29 PM	Main Website	Confirmation Not Required	Default Store View
