## 1. Overview

Rakuten Marketplace Integration App has been developed with a view to helping Shopify sellers easily list and manage their Shopify products on Rakuten.

The app comes with the following features:

**1) Seamless Product Listing:** Upload your products in a bulk through CSV on Rakuten Marketplace and carry out changes in the product listings – title, description, quantity, etc.

**2) Efficient Order Acknowledgement:** As soon as you receive orders on Rakuten, the orders are synced with the app and then they are created on Shopify store so that you can easily manage your orders by confirming it on your store.

**3) Easy Price Customization:** The app makes the task of setting prices for your products easy. You can set the desired prices and adjust them periodically as per requirements.

**4) Regular Rakuten Feeds:** Get regular notifications from your Marketplace (Rakuten) about the status of your products. This helps you to keep track of successful orders, failed orders, etc.

**5) Threshold Inventory Setup:** You can set a minimum quantity for your products so that you get updated as soon as your products are on the verge of going out of stock. This will help you from overselling.

**6) Auto Cancellation Of Orders:** The app automatically cancels the orders as soon as the product has gone out of stock so that you do not receive a warning of “late delivery” for any of your orders.

This doc has an elaborative description to help you through the following:

- 1) Onboarding process of the app
- 2) Exploration of the Dashboard
- 3) Product Management through the app
- 4) Profiling
- 5) Order Management through the app
- 6) Discovering the help section
- 7) Settings

## 2. Onboarding

This is the initial step that you need to execute right after installing it to use the app to its full potential.

The Onboarding process of the app comprises of the following three processes:

- 1) Registration**
- 2) API Configuration**
- 3) Import Products**

## **2.1. Registration**

This is the first step of the onboarding process, which requires you to fill the following form:

# Registration

Registration form fields:

- First name
- Last name
- Email
- Time zone (dropdown: Choose time zone)
- Time slot (dropdowns: Choose time slot, Choose format)
- Shipping source (checkboxes: Shipwork, Shipstation, Others)
- How do you hear about us? (dropdown: Please choose options)
- Terms and conditions (checkbox: Accept terms & conditions)
- View & Download button
- Next button

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/registration-page.png>)

## 2.2. API Configuration

In this step, you have to enter the Shop URL & Authentication Token or API Keys provided by Rakuten.

Refer to the screenshot below to view the important fields to be filled:

## Rakuten API

- 1 Don't have Rakuten seller account? [Click Here](#)
- 2 Enter your Rakuten Shop URL.
- 3 Enter Rakuten **Authentication Token** OR Enter Rakuten **Secret Key & License Key**.  
( Contact to [merchants@marketplace.rakuten.com](mailto:merchants@marketplace.rakuten.com) if you don't have **Authentication Token Or API Keys**)

Authentication by TOKEN    Authentication By API Keys

Rakuten Shop URL

Authentication TOKEN

[Next](#)

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/api-config.png>)

## 2.3. Import Products

This step helps in bringing the details of the Shopify products to the app.

You can select one of the following options from the dropdown menu:

- 1) **All Products:** This imports all the Shopify products to the app.
- 2) **Published Products:** This option imports all the Published Shopify products to the app.

**Note:** You can import up to 10,000 SKUs for free.

### Import Products

Note :: Switch to Custom Paid Plan to Import more than 10K SKUs.

#### Import Product Options

- Select import options
- Select import options
- All Products
- Published Products

View the sales statistics in the form of a chart.

**SALES CHART**

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/order-sales-chart.png>)

## 4. Products

This section helps you to view all the important product details. You can also perform multiple actions on a single product or group of products as desired. Also view the status of products, as available on Rakuten. In this arena of our solution, you can also view the product feed (id, status, date of creation).

### 4.1. Manage Product

This section helps you to view the product details, status, etc. You can also perform various actions on products from this section on either bulk products or individual products.

**Product Details:** This section helps you to view the following relevant details about your product:

- 1) **Product Image:** The product image visible is, the one you upload on Shopify.
- 2) **Title:** See the Product Title as appears on Shopify.
- 3) **Product Type:** This displays the product type as updated on Shopify.
- 4) **Inventory:** View the number of products, available on Shopify.
- 5) **Price:** View the product prices as fetched from your Shopify store.

**Note:** You can view the following information about the following action icon in the product grid:

<input type="checkbox"/>	+	TITLE	PRODUCT TYPE	INVENTORY	PRICE	ACTION
<input type="checkbox"/>	+	 4 in 1 Pull Up Body Trainer	sports	1000 in stock	61.99	
<input type="checkbox"/>	+	 Arched Stretch Mate Orthope...	sports	1000 in stock	35.99	

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/product-details.png>)

**Product Status:** These help in identifying the state of the product on Rakuten. Products can have any one of the following statuses:

- 1) **Active:** These are the products which are available for purchase on Rakuten.
- 2) **Inactive:** These are the products which are unavailable for purchase on Rakuten.
- 3) **Item Processing:** These are the products under review before being live on Rakuten.
- 4) **Not Uploaded:** Products that have been imported to the app from Shopify but are not uploaded on Rakuten.

### Manage Products Sync with Rakuten

All Active Inactive Item Processing Not Uploaded

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/product-status.png>)

**Product Action:** The actions provided ensure that you can easily upload a product, update the product, carry out synchronization and more.

One can perform any of the following actions:

- 1) **Upload Product:** This action helps in listing the desired products on Rakuten.
- 2) **Update Product:** This action helps in reflecting the edited product details on Rakuten.
- 3) **Sync from Shopify:** This will sync details of products from your Shopify store to the Marketplace.
- 4) **Update Product Status:** This will fetch the status of the product and update it on the app.

Update Product Status

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/actions-1.png>)

### The blue bold button:

**Sync with Rakuten:** This button at the top-right corner of the “Products” section, will help to sync the details of the Shopify products in bulk with Rakuten.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/sync-1.png>)

## 4.2. Product Feed

Rakuten accepts data in the form of feeds and every feed had its unique feed ID. These feed IDs help you to track your feed status so that you can resolve any errors that occur when you submit your feeds.

You can view the following details about your products:

**Feed Id:** This is the id assigned to the feed of products for easy identification and follow up.

**Feed Status:** Feed Status is necessary to know the status of your products.

The product can fall in any of the following states:

**DONE:** The request has been processed.

**INCOMPLETE:** The request is incomplete and has been terminated. Please contact Rakuten

**IN PROGRESS:** The request is being processed.

**SUBMITTED:** The request has been received, but it has not yet started processing.

**Created at:** View the date of feed status creation.

**Action:** You can perform the following two actions on your feed status:

Showing 1-20 of 153 items.

25 per page << 1 of 8 >>

	FEED ID	FEED STATUS	CREATED AT ▲	ACTION
<input type="checkbox"/>	745cf9a5-c074-4706-b7c9-eda650bee64f	In Progress	2019-07-11 05:53:15	 
<input type="checkbox"/>	d1e306b7-6de9-46fa-8445-dd22e28d51a5	In Progress	2019-07-11 05:53:12	 
<input type="checkbox"/>	7b219e41-116a-4afa-a889-3db5171947e8	In Progress	2019-07-11 05:53:10	 

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/feed-details.png>)

**View:** This will allow you to view the SKUs and the error message from Rakuten once the feed is processed.

**File Download:** This will allow you to download the log data sent to Rakuten in that feed you can check the exact data being sent via the app to Rakuten.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/act.png>)

## 5. Profiling

This section helps to group products based on Product Type & Vendor.

In this section, you can either create a new Profile or view and manage the existing ones.

### To Create a New Profile:

- 1) Click on the 'Create Profile' button on the top-right corner of the product grid.
- 2) Enter the Profile Name in the General Information Section.

### Profiling

## 7. Help

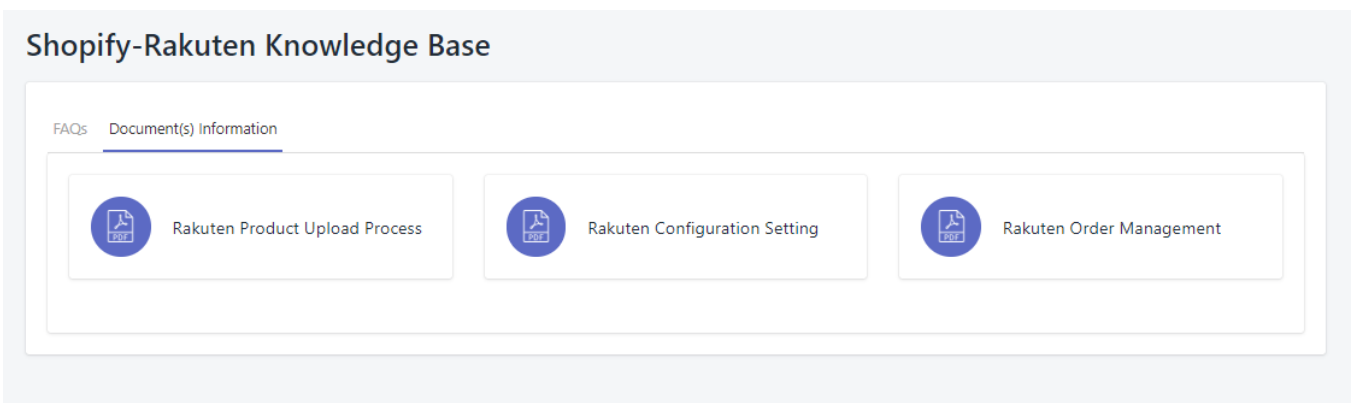

This section has a set of informative FAQs to suffice most relevant search queries.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/help.png>)

This section also has Help docs for the following three processes:

- 1) Product Upload
- 2) Configuration Settings
- 3) Order Management

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/help-doc.png>)

## 8. Settings

This section will help you to execute API Settings, Product Management Settings & Order Management Settings.

**1) Rakuten API Settings:** This section is to establish connections between Rakuten & Shopify.

API connection can be established by any one of the following methods:

**i) Authentication by token:** For this, you need to enter the details shown in the fields below:

The screenshot shows the CedCommerce Settings interface. On the left is a navigation menu with options: Home, Product, Profiling, Order, Help, Settings, and Pricing Plan. The main content area is titled 'Settings' and contains a sidebar with 'Rakuten API Settings', 'Product Management', and 'Order Management'. The 'Rakuten API Settings' section is active, showing two tabs: 'Authentication By Token' (selected) and 'Authentication By Credentials'. Under the 'Authentication By Token' tab, there are two input fields: 'Rakuten Shop URL' and 'Authentication Token'. A 'Save' button is located in the top right corner of the settings area.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/authByToken.png>)

**ii) Authentication by API Credentials:** In this method, you need to enter the following:

The screenshot shows the CedCommerce Settings interface, similar to the previous one. The 'Authentication By Api Credentials' tab is now selected. The form includes three input fields: 'Rakuten Shop URL', 'Secret Key', and 'License Key'. The 'Save' button remains in the top right corner.

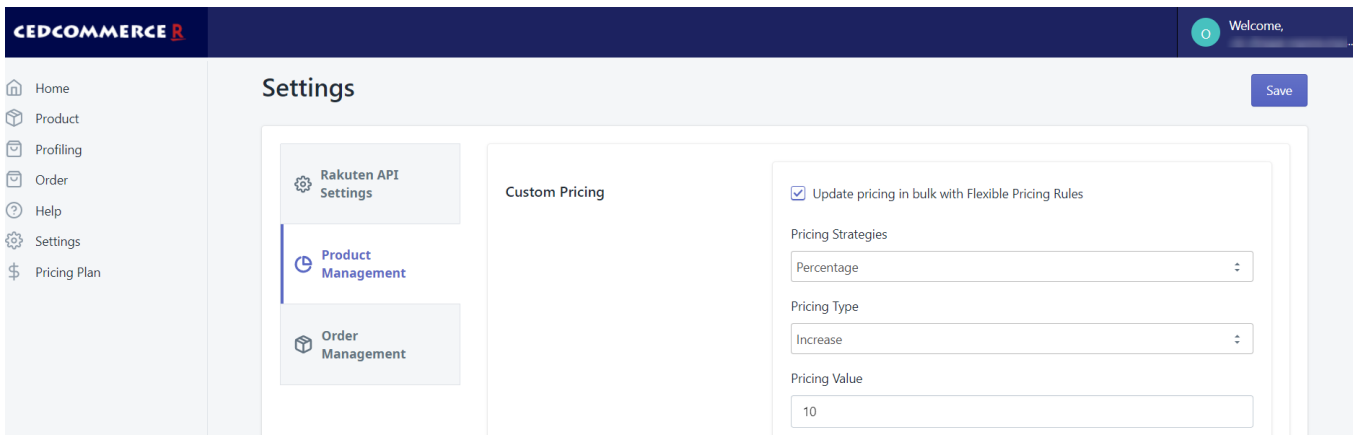

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/authByKey.png>)

**Note:** Rakuten provides you Authentication Token, Secret Key & License Key via e-mail as soon as you get the Rakuten Seller Panel.

**2) Product Management Settings:** This section will help you to set custom prices, set inventory & bring about syncing.

**i) Custom Pricing:** To set the desired price to your product, you need to tick-mark the following check-box:

The following fields will appear:

([https://docs.cedcommerce.com/wp-content/uploads/2019/07/custom\\_pricing.png](https://docs.cedcommerce.com/wp-content/uploads/2019/07/custom_pricing.png))

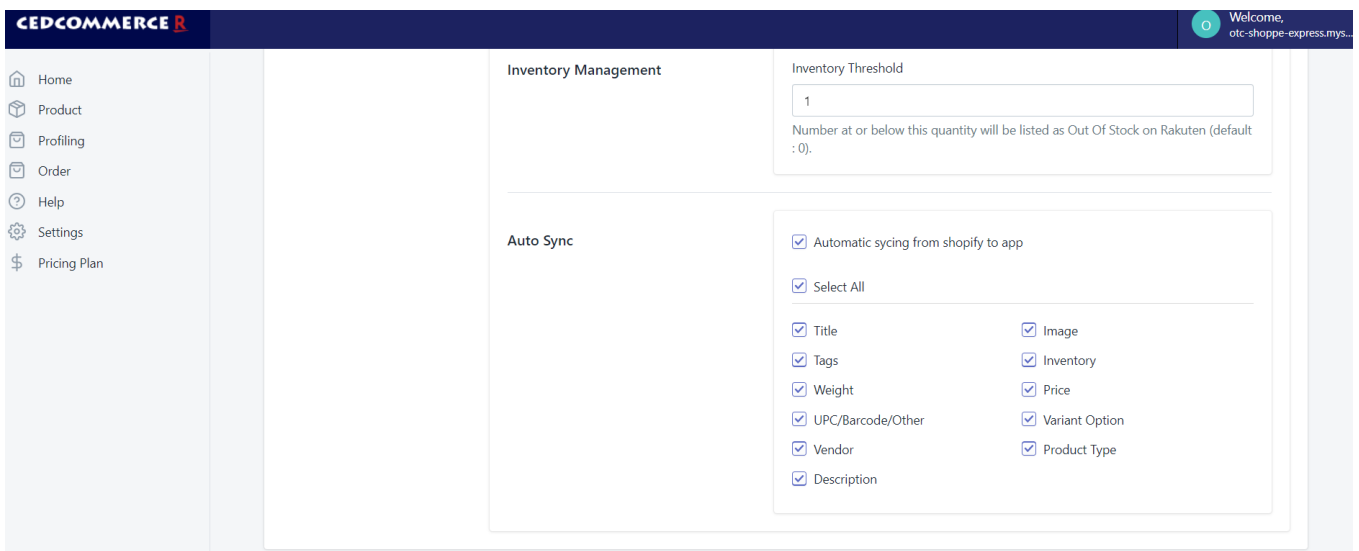

**Pricing Strategies:** From here, you can choose to set custom price to your product either by a fixed price or a percentage.

**Pricing Type:** You can choose to either increase or decrease your product prices.

**Pricing Value:** Set a percentage price or fixed value by which you want to increase or decrease the product prices.

**ii) Inventory Management:** You can set a minimum value (quantity) to your products.

**iii) Auto Sync:** You can enable auto-syncing to synchronize any of the product fields from Shopify to the app.

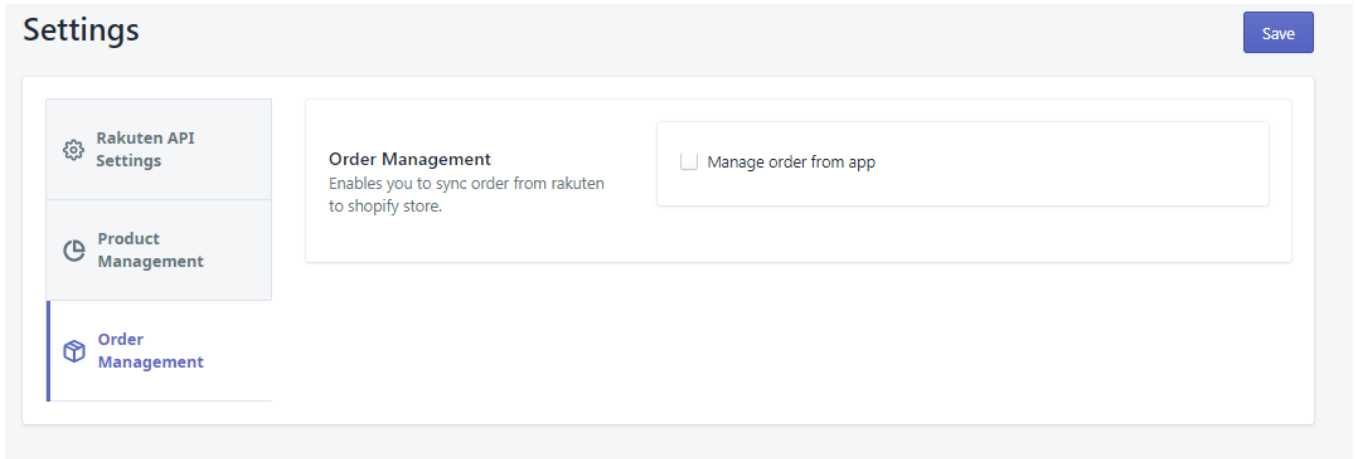

([https://docs.cedcommerce.com/wp-content/uploads/2019/07/auto\\_sync.png](https://docs.cedcommerce.com/wp-content/uploads/2019/07/auto_sync.png))

**3) Order Management:** From this section, you can opt to manage orders from the app.

**Note:** You can manage orders directly from the Marketplace.

After this, click on the 'Save' option to make all the settings applicable.

(<https://docs.cedcommerce.com/wp-content/uploads/2019/07/order-manage.png>)
