## 1. Overview

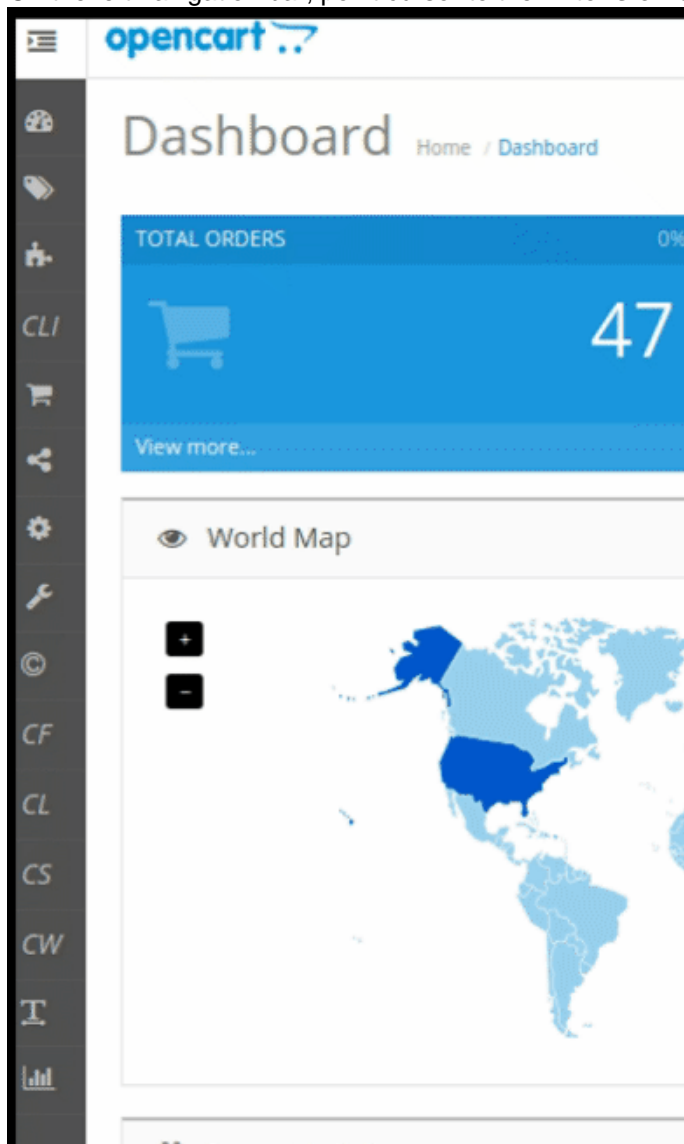

To help merchants who are already selling with an Opencart store, can import the products directly from Taobao/Tmall Marketplace. CedCommerce brings you the Taobao/Tmall Product Importer for Opencart! With this 'Opencart Product Import Extension', the sellers may easily import a huge number of products from Taobao/Tmall Marketplace to their Opencart admin panel and their store.

Read on to discover more about the uncomplicated procedure of importing Taobao products to Opencart. A seller needs to make smart decisions in order to make the business a huge success, with unprecedented results.

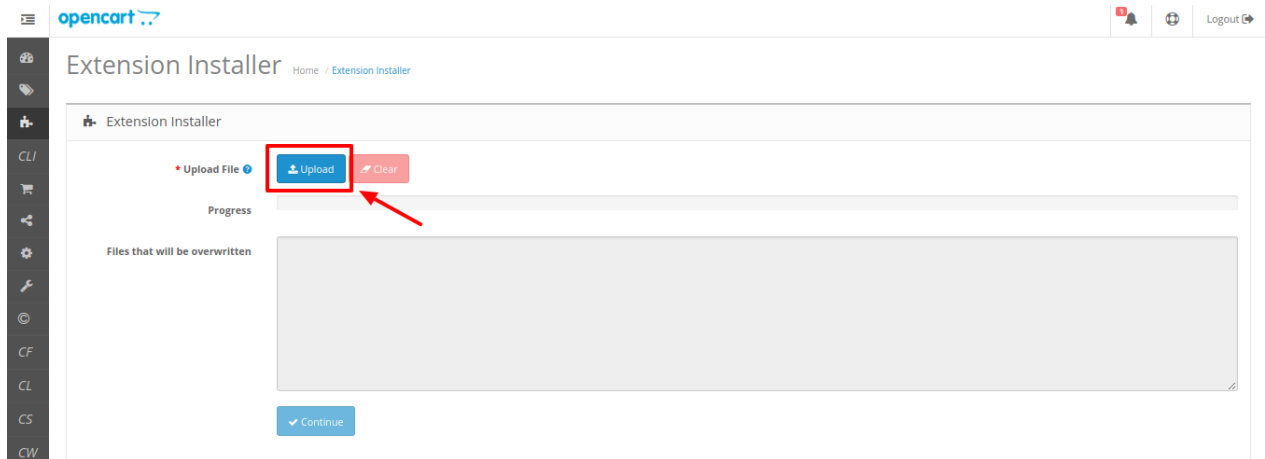

## 2. To install the extension

*To install the Extension,*

- Go to the **Opencart Admin panel**.
- On the left navigation bar, point cursor to the **Extension & Installation**.

The **Extension Installer** page appears as shown in the following figure:

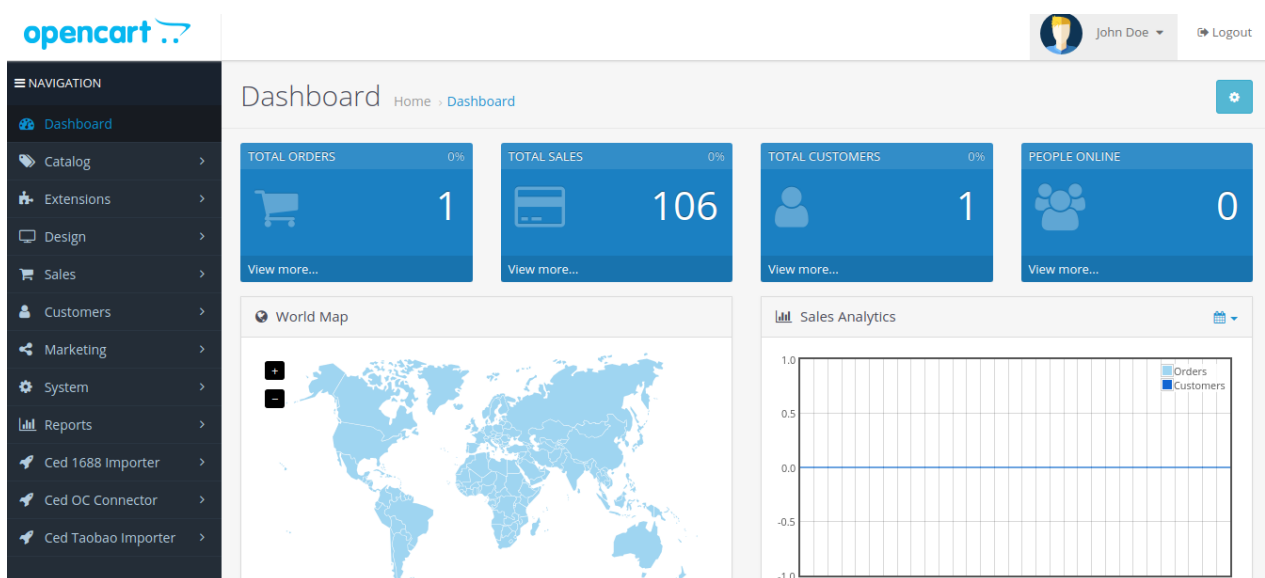

- Now you need to click on **Upload** on the top right corner of the page.
- Choose the package file of Taobao/Tmall marketplace from your system.
- Once selected, click on the **Upload this module button**.
- The module will be installed and you will be navigated to the **Configuration** page for further steps to be taken.

### 3. Configuration Settings

Once the module has been installed, the first necessary step needs to be taken by the admin is to complete the Configuration.

#### To do the Configuration Settings

1. Go to your OpenCart Admin panel.  
The page appears as shown in the following figure-

2. Click on **Ced Taobao Importer** which is on the left navigation bar.  
The tab appears as shown in the following figure:

3. From the menu that appears as shown in the image above, click on **Configuration**.
4. On clicking Configuration, you will be navigated to the Taobao Importer Configuration page as shown below:

 The screenshot shows the 'Taobao Importer By Cedcommerce' configuration page. At the top right, there is a user profile for 'John Doe' and a 'Logout' link. The page title is 'Taobao Importer By Cedcommerce' with a breadcrumb 'Home > Taobao Module'. Below the title is a tabbed interface with 'Edit Importer Configuration' as the main title and three tabs: 'Setting' (active), 'Default Values', and 'Field Mapping'. The 'Setting' tab contains several fields:
 

- Status**: A dropdown menu currently set to 'Enabled'.
- \* OT-Commerce Instance Key**: A text input field.
- \* Default Language**: A dropdown menu currently set to 'English'.
- Save And Validate**: A blue button.
- Google Translator API Key**: A text input field containing the placeholder text 'Google Translator API Key'.

5. In **Taobao Configuration Settings**, do the following steps:
  - a. In the **Status** box, select the **Enable** option to enable the module.
  - b. In the **OT-Commerce Instance Key** box, enter the OT-Commerce Instance key.
  - c. In the **Default Language** option, select your language option.
  - d. In the **Google Translator API key** box, enter the API key to translate the products description in various languages.
6. Click on **Save and Validate** option to save the information.
7. Now move to the 2nd section of the Configuration settings ie – **Default Values**. This page opens up as:

Taobao Importer By Cedcommerce Home > Taobao Module

Edit Importer Configuration

Setting **Default Values** Field Mapping

Available Date Available Date

Tax Class Taxable Goods ▾

Length Class Centimeter ▾

Weight Class Kilogram ▾

Category ⓘ Category

Default Store  (Default)

8. In **Default Values** options, do the following steps:
  - a. In the **Available date** enter the date associated with the product import.
  - b. From the **Tax Class**, choose the tax imposed on the products as downloadable or taxable.
  - c. From the **Length Class**, Choose the desired length you wish either centimeter, millimeter or inch.
  - d. From the **Weight Class**, Select the desired weight as kilogram, gram, pound or ounce.
  - e. Choose the **Default Category** of the product from the next section.
9. Now move to the last section of the Configuration, ie **Field Mapping**.  
The page appears as shown in the following figure:
