1. Overview

With the help of Walmart Mexico Magento® 2 Integration, you can easily list yourMagento® 2 store products on the Walmart Mexico.com Web site to sell the products and earn ample revenue. It is a solution that enables you to synchronize the inventory, price, and other product details between the Magento® 2 store and the Walmart Mexico.com website.

Integration also offers management of inventory, with greater flexibility, providing you with several ways to manage it at discrete levels with Walmart Mexico Order cancellations from the customer's end are retrieved simultaneously to cancel the order ensuring that you don´t ship items that were canceled.

Key Features of Walmart Mexico Integration Extension by CedCommerce:

- **Stock Update:** Stocks are updated automatically on both ends as stock status updated in your local shop or as an order is marked shipped by Walmart Mexico.
- **Walmart Mexico Order Management:** The orders can be easily acknowledged or canceled through the centralized order management system.
- **Product Upload Based on Profile::** Enables the admin to create a profile based on a single category, and then assign the products to the profile to automate the product upload.
- **Synchronization:** Auto synchronization of the product listing, order, inventory, return and refund, and pricing at regular intervals is established betweenMagento® 2 and Walmart Mexico.
- **Bulk upload Methodology:** Admin gets the authority to upload bulk products on Walmart Mexico but just selecting the products and upload in one go.
- **Email Notification:** Admin receives the notification through mail on new order creation, low stock and if the product is rejected from Walmart Mexico.
- **Cons:** Crons automate the process of Price, Inventory and Order management.
- **Rejected Products Notification:** If any product containing some invalid details is rejected, then its information is fetched from the automatically synchronized requests along with the error due to which it is rejected.
- **Return And Refunds:** Refunds are processed back to the original payment method used to purchase the order. Refund is also possible through extension.

2. Walmart Mexico Integration Extension Installation

To install the extension

1. Log in the **ftp**, and then go to Magento 2 root folder (generally present under the *public_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
    - Upload or Drag and Drop *app/code/Ced/WalmartMx* directory.
    - After successfully uploading the directory, the extension will be installed or upgraded.
    - Now run the following upgrade command in *cmd*

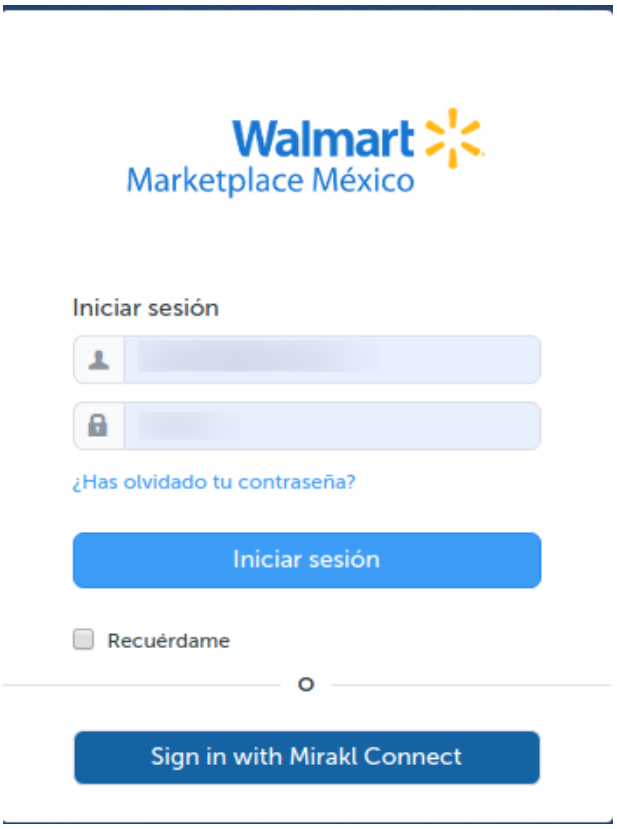
      php bin/magento setup:upgrade
      php bin/magento setup:di:compile
      php bin/magento setup:static-content:deploy
      chmod -R 777 generated/
      chmod -R 777 pub/
      chmod -R 777 var/

3. Retrieve API Credentials from the Walmart Mexico

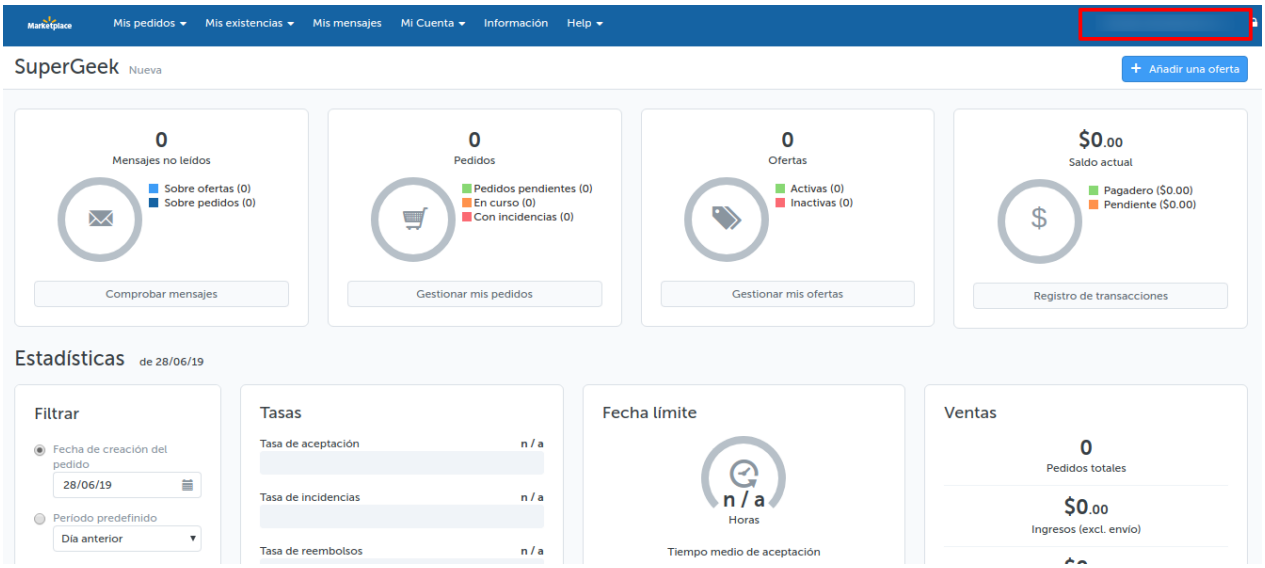
Once the extension is successfully installed in the Magento 2 store, the **Walmart Mexico Integration** menu appears on the left navigation bar of the Admin Panel. The store owner has to fill out the retrieved the ***API Key*** value in the respective field displayed on the **Walmart Mexico Configuration** page of the admin panel.

To retrieve the API Key from the Walmart Mexico Seller Account

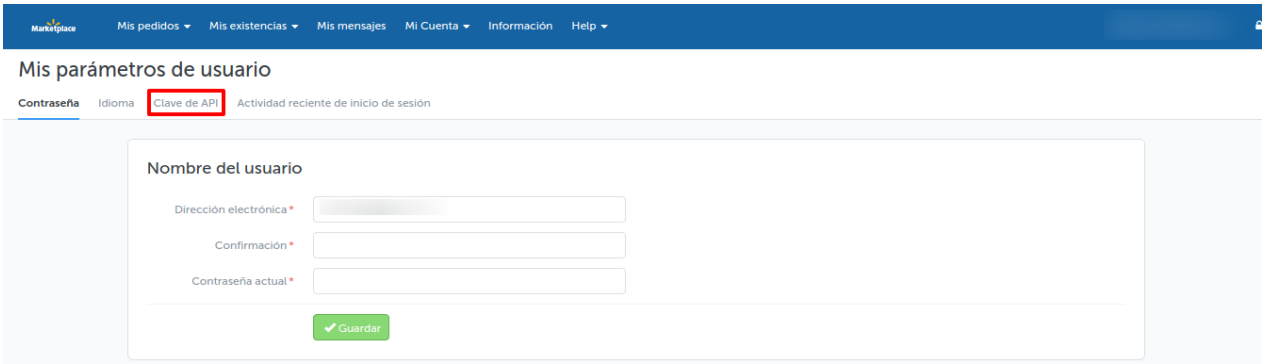
1. Go to the https://walmartmx-prod.mirakl.net/(https://walmartmx-prod.mirakl.net/) link for Sandbox Mode. Or Go to the https://marketplace.catch.com.au/login(https://marketplace.catch.com.au/login) link for Live Mode. *(It should be in accordance with the Mode that you will be choosing while doing the Configuration).*
   The Login page appears as shown in the following figure:



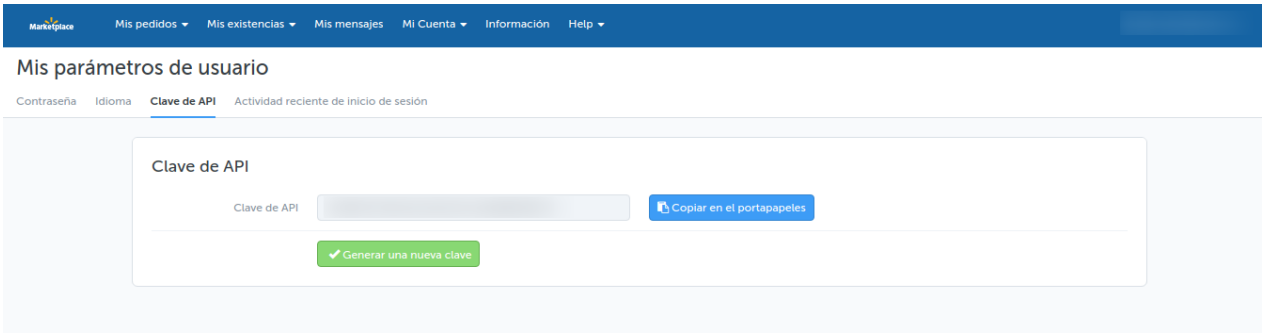
2. Enter the login credentials, and then click the **Sign In** button.
   The page appears as shown in the following figure:



3. Click the username as highlighted in the figure.
   The page appears as shown in the following figure:



4. In the left navigation panel, click the **API Key** menu.
   The **API Key** value appears in the right panel as shown in the following figure:



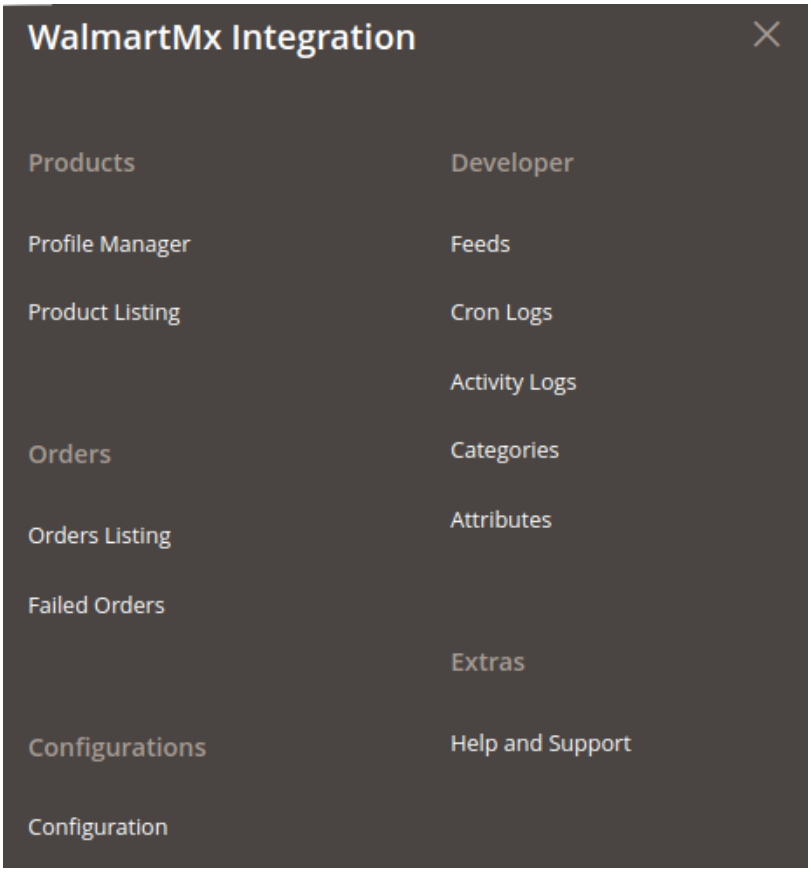
5. Click the **Copy to clipboard** button to copy the API key value.
6. Save the corresponding value in some text editor or the in Word file to use it later on while setting up the configuration in the Magento 2 store admin panel.

4. Walmart Mexico Configuration

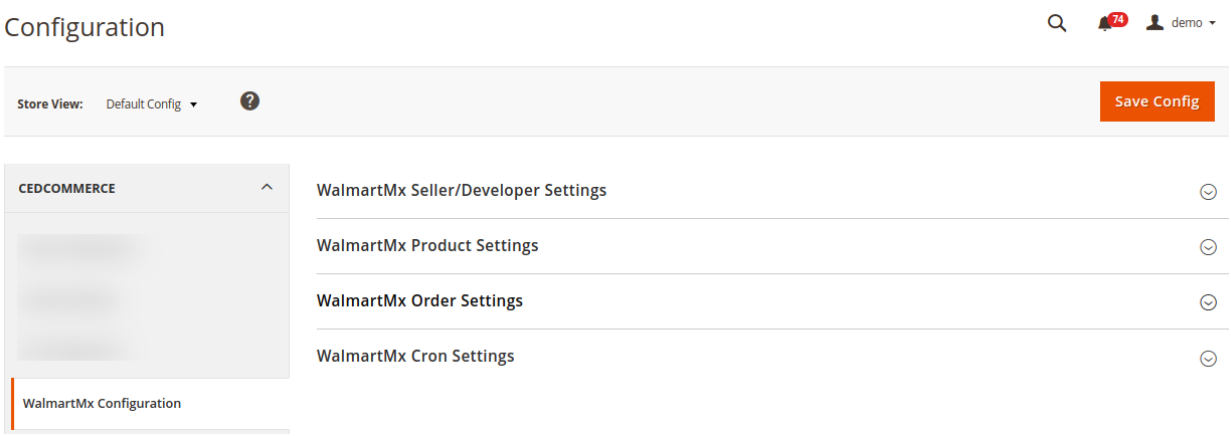
Once the extension is successfully installed in the Magento 2 store, the **Walmart Mexico Integration** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the Walmart Mx seller panel. Once the seller account is created and is approved by Walmart, the Magento 2 store owners have to obtain the API Key value from the Walmart Seller account, and then the Magento® 2 store owners have to paste it in the respective field displayed on the **Walmart Mexico Configuration** page of the admin panel.

To set up the configuration settings in the Magento 2 Admin panel

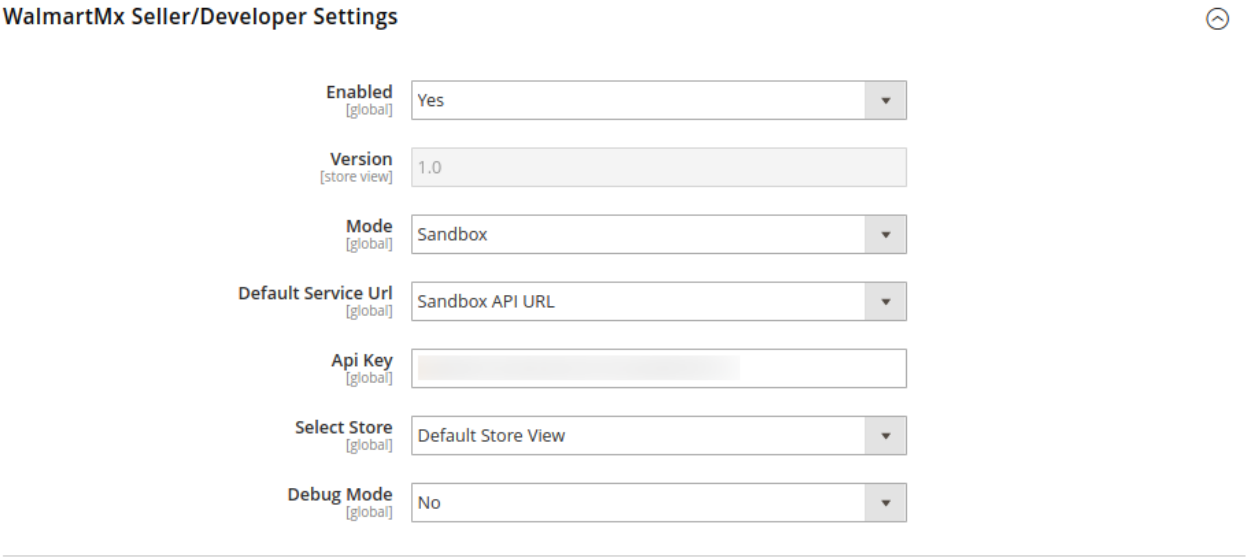
1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **WALMART MEXICO INTEGRATION** menu.
   The menu appears as shown in the following figure:



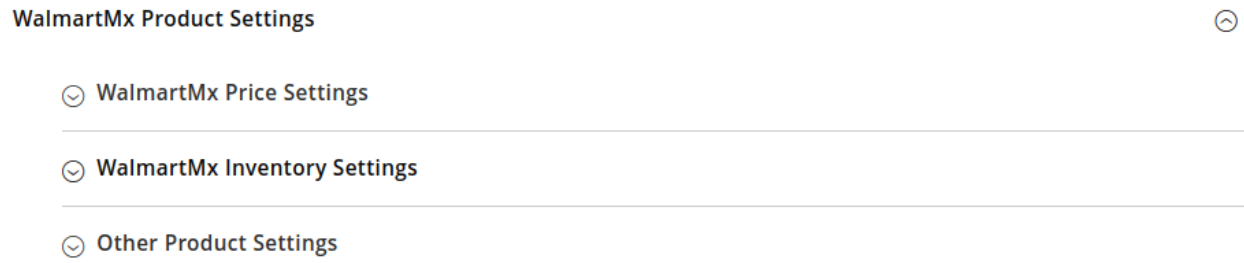
3. Click **Configuration**.
   The Configuration page appears as shown in the following figure:



4. In the right panel, click the **WalmartMx Seller/Developer Settings** tab.
   The **WalmartMx Seller/Developer Settings** tab is expanded and the relevant fields appear as shown in the following figure:

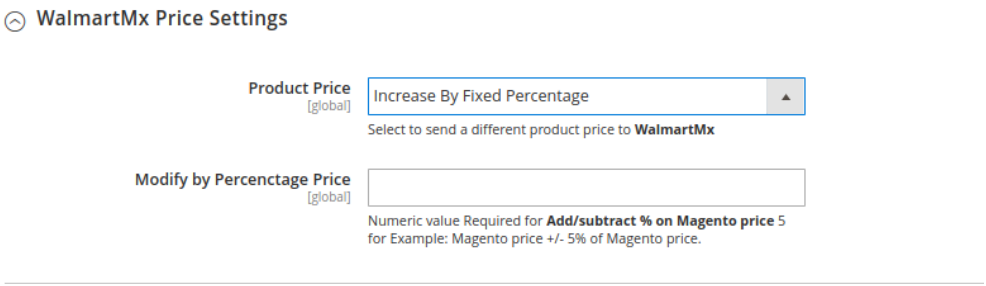


5. Under **WalmartMx Seller/Developer Settings**, do the following steps:
   - In the **Enabled** list, select the **Yes** option.
   - In the **Version** box, select the version
   - In the **Mode** list, select the **Sandbox** option.
   - In the **Default Service Url** list, select the **Sandbox API URL** option.
   - In the **API Key** box, enter the **API Key value** copied from the WalmartMx seller account.
   - In the **Select Store** list, select the required store.
   - In **Debug Mode**, select **Yes** if you want the log to be created.
6. Click the **Save Config** button to save the entered values.
7. Scroll down to the **WalmartMx Product Settings** tab, and then click the tab.
   The **WalmartMx Product Settings** tab is expanded and the expanded section appears as shown in the following figure:



8. Under **WalmartMx Products Settings**, do the following steps:
   a. Click the **WalmartMx Price Settings** tab.
   The **WalmartMx Price Settings** tab is expanded and the section appears as shown in the following figure:

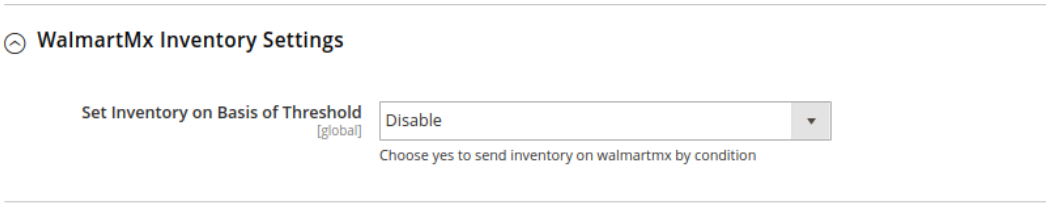
   b. Under **WalmartMx Price Settings**, do the following step:
      i. In the **Product Price** list, select one of the following options:
      Increase by Fixed Price: If selected, then the **Modify by Fix Price** field appears.
      Increase by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.
      Enter the numeric value to increase the price of the **WalmartMx**, product price by the entered value % of Magento 2 price.



For Example,
Magento 2 price + 5% of Magento 2 price.
Magento 2 Price = 100
Select **Increase By Fixed Percentage** option
Modify by Percentage Price = 5
100 + 5% of 100 = 100 + 5 = 105
Thus, WalmartMx Product Price = 105
Decrease by Fixed Price: If selected, then the **Modify by Fix Price** field appears.
Decrease by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.
Enter the numeric value to decrease the price of the **WalmartMx** product price by

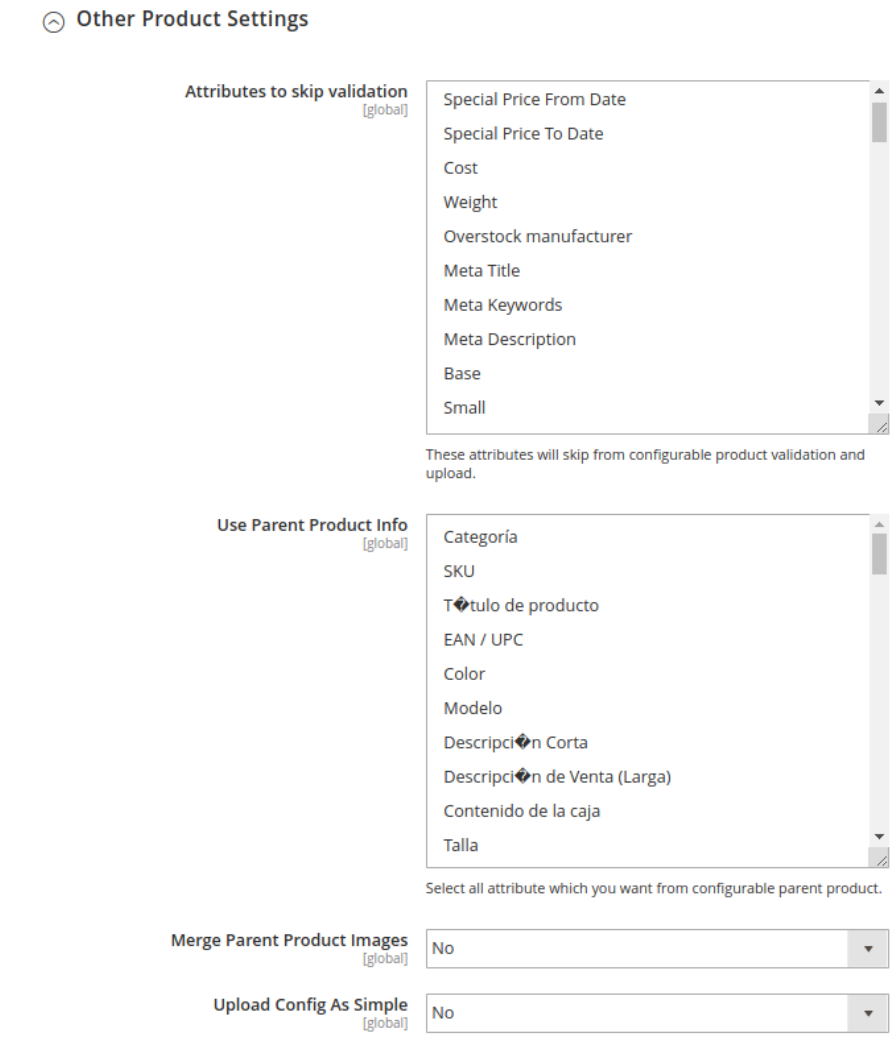
the entered value % of Magento 2 price
For Example,
Magento 2 price – 5% of Magento 2 price.
Magento 2 Price = 100
Select **Decrease By Fixed Percentage** option
Modify by Fix Price = 5
100 – 5% of 100 = 100 – 5 = 95
Thus, WalmartMx Product Price = 95

ii. Click the **WalmartMx Inventory Settings** tab.
The **WalmartMx Inventory Settings** tab is expanded and the section appears as shown in the following figure:



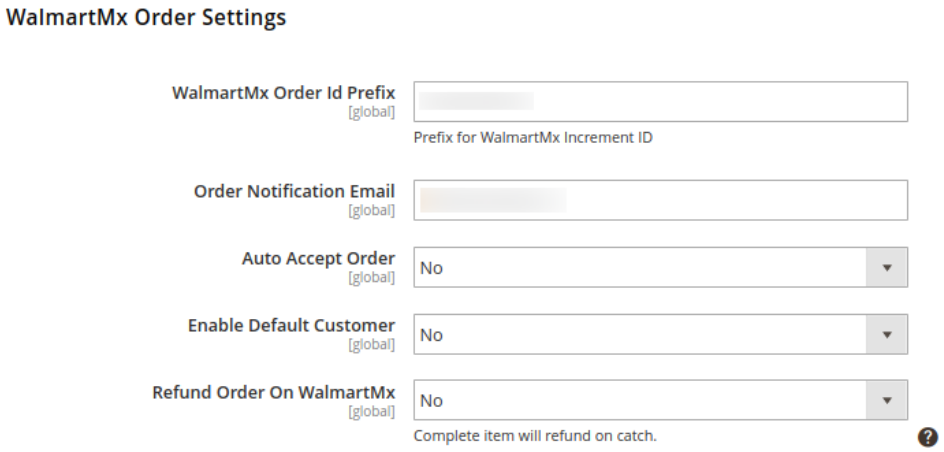
iii. Under **WalmartMx Inventory Settings** tab, do the following steps:
   i. In the **Set Inventory on Basis of Threshold** list, select the **Enable** option if required to set the inventory based on a threshold.
   Note: Only when the admin selects **Enable**, the other fields appear. Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock.
   The section appears as shown in the following figure:
   ii. In the **Inventory Threshold Value** box, enter the required value.
   iii. In **the Send Inventory for Lesser Than Threshold Case** box, enter the required value.
   iv. In **the Send Inventory for Greater Than Threshold Case** box, enter the required value.

iv. Click the **WalmartMx Other Product Settings** tab.
The**WalmartMx Other Product Settings** tab is expanded and the section appears as shown in the following figure:



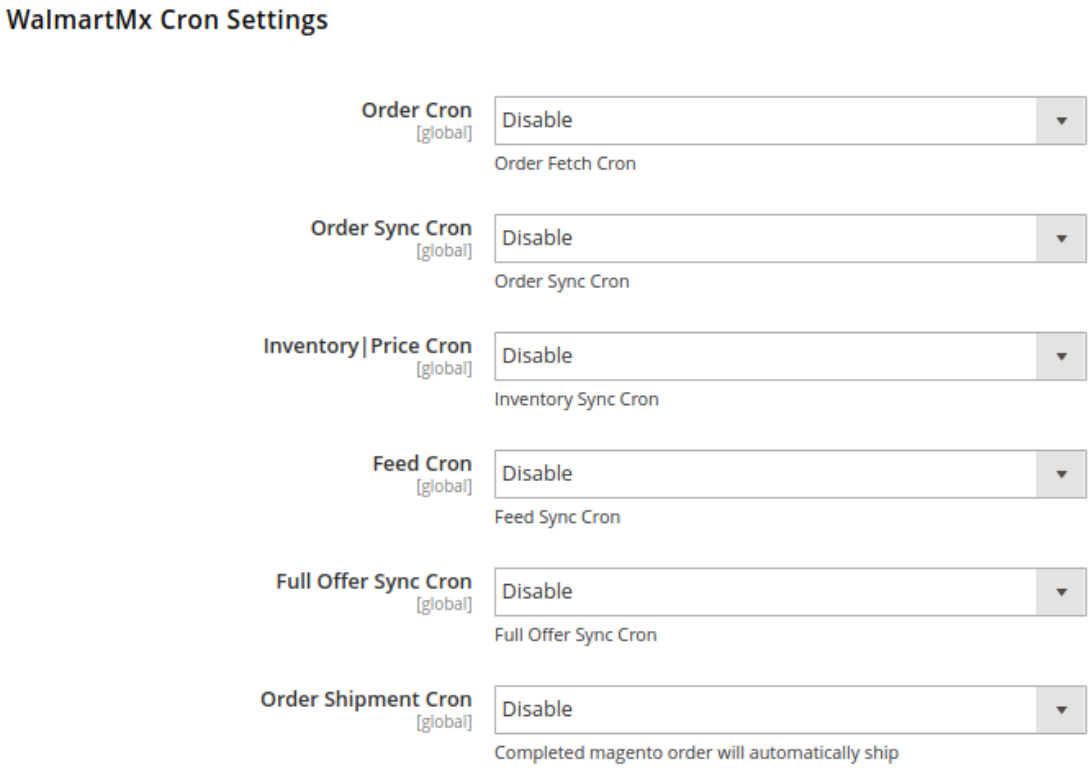
v. Under **WalmartMx Other Product Settings** tab, do the following steps:
   i. In the **Attributes to Skip Validation** list, select the attributes which you want to skip from configurable product validation and upload.
   ii. In the **Use Parent Product Info** list, select all the attributes which you want configurable parent product.
   iii. In the **Merge Parent Product Images** tab, select the **Yes** option to merge the parent product images.
   iv. In the **Upload Config As Simple** tab, select the **Yes** option to upload config as simple products.

9. Click the **Save Config** button to save the entered values.
10. Scroll down to the **WalmartMx Order Settings** tab, and then click the tab.
    The tab is expanded and the section appears as shown in the following figure:



11. Under **WalmartMx Order Settings**, do the following steps:
    a. In the **WalmartMx Order Id Prefix** box, enter the required order Id prefix.
    b. In the **Order Notification Email** box, enter the required email Id.
    c. In the **Auto Accept Order** box, selecy the **Yes** option to auto accept order.
    d. In the **Enable Default Customer** list, select the **Yes** option to enable the default customer.
    The field appears as shown in the following figure:
    e. In the **Default Customer** list, select the required customer name.

12. Click the **Save Config** button to save the entered values.
13. Scroll down to the **WalmartMx Cron Settings** tab, and then click the tab.
    The tab is expanded and the section appears as:



14. Under **WalmartMx Cron Settings**, do the following steps:
    a. In the **Order Cron** list, select the **Enable** option to enable the fetch order cron.
    b. In the Order Sync Cron list, select the Enable option to enable the sync order cron.
    c. In the **Inventory |Price Cron** list, select the **Enable** option to enable the Inventory & Price Sync cron.
    d. In the **Feed Cron** list, select the **Enable** option to enable the feed sync cron.

    A confirmation dialog box appears.
    iv. Click the **OK** button.
    The selected products inventories and prices updating process is executed and the page appears as shown in the following figure:

v. Click the **Back** button to go back to the **WalmartMx Product Listing** page.

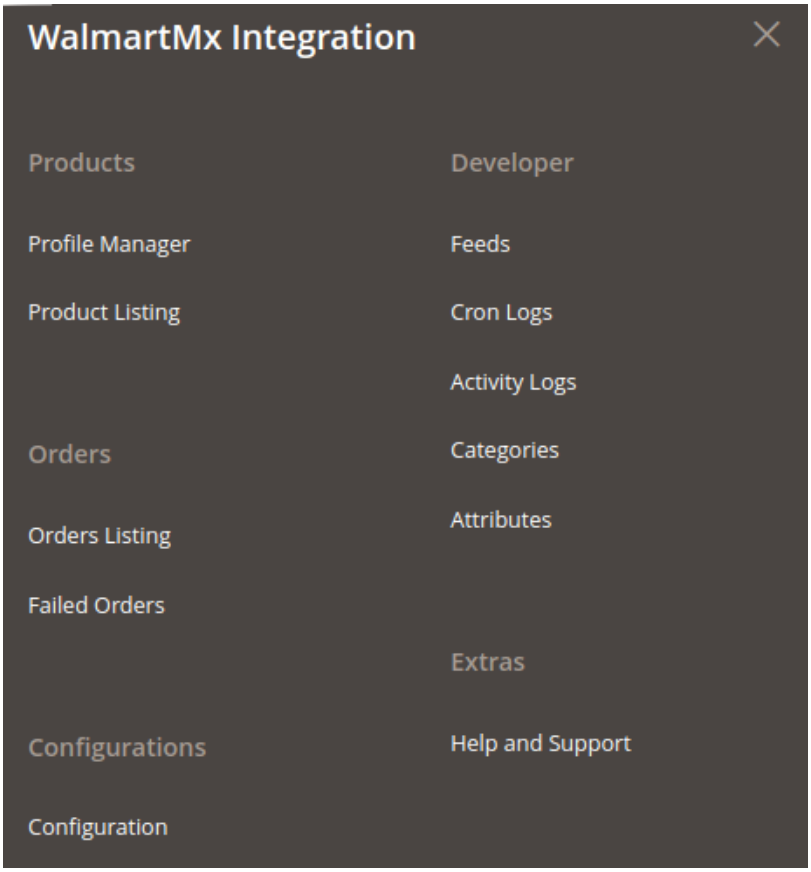
7. Manage Walmart Mexico Orders

7.1. Ship and Delete the Walmart Mexico Orders

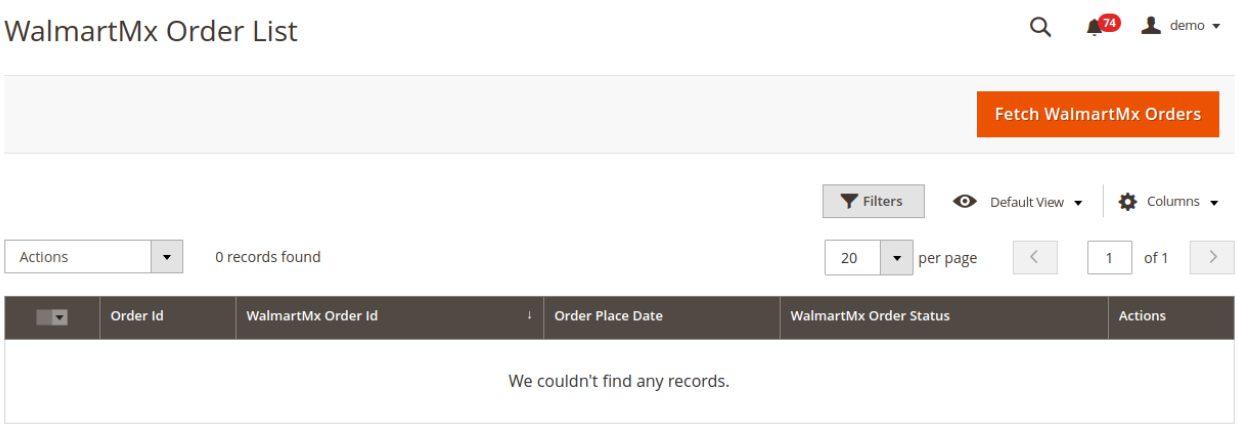
The Magento 2 store owners can fetch the new orders and view all the order details fetched from WalmartMx. They can also ship the required orders and can delete the orders those are no more required.

To fetch and view new orders

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **WALMARTMX INTEGRATION** menu.
   The menu appears as shown in the following figure:



3. Click **Order Listing**.
   The **WalmartMx Order List** page appears as shown in the following figure:



4. Click the **Fetch WalmartMx Orders** button.
   If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.
   Notes:

   - Orders are automatically imported through CRON in every 10 minutes.
   - Whenever the latest orders are imported from WalmartMx, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento 2 store admin panel.
   - If no Order is imported, then check the Failed orders listed on the **WalmartMx Failed Order** page.

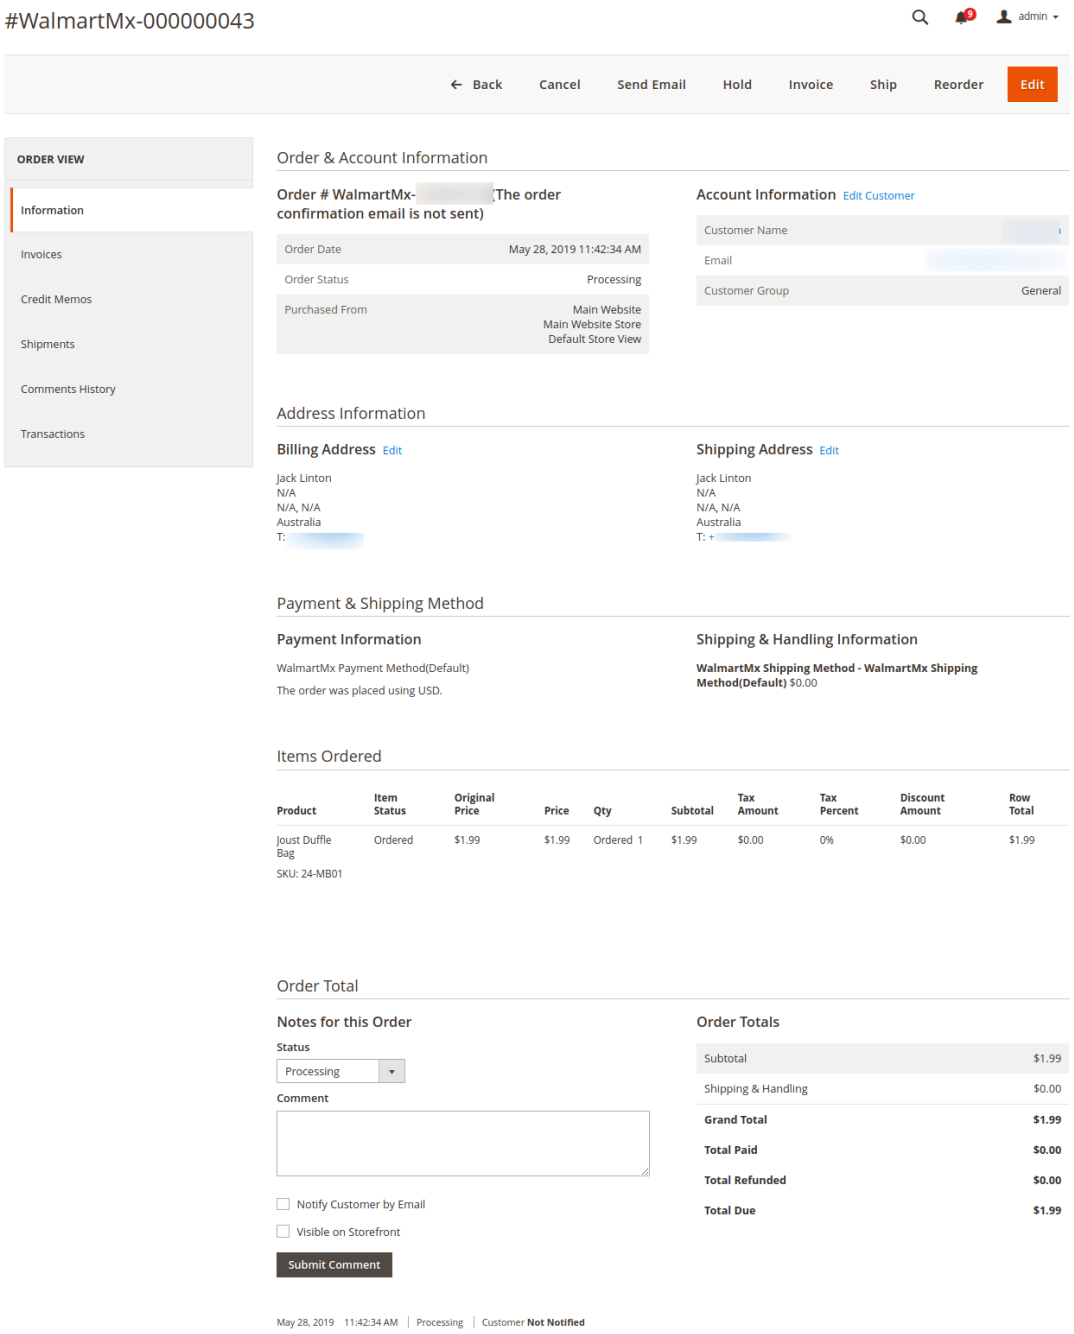
   - Orders are auto-rejected on WalmartMx in the following conditions:
     - When WalmartMx Product SKU does not exist in Magento 2 store.
     - When Product is Out of Stock in Magento 2 store.
     - When a product is disabled in Magento 2 store.

5. ***To ship the WalmartMx order***
   a. Go to the **Magento 2 Admin** panel.
   b. On the left navigation bar, click the **WALMARTMX INTEGRATION** menu, and then click **Order Listing**.
   The **WalmartMx Order List** page appears as shown in the following figure:

   c. Scroll down to the required row of the order to ship.
   d. In the **Action** column of the respective row, click the **Edit**

icon.
The Order view page appears

i. In the left navigation panel, click the **WalmartMx Order** menu.
The page appears in the right panel as shown in the following figure:



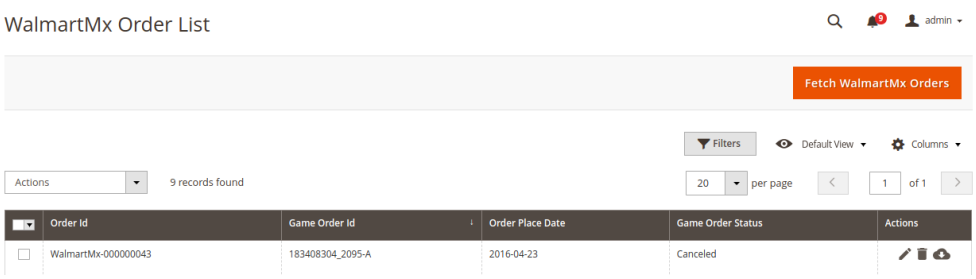
ii. In the right panel, under **WalmartMx Order Information**, do the following steps:
    i. In the **Shipping Provider** list, select the required carrier.
    ii. In the **Tracking Number** box, enter the required value.
iii. Click the **Submit Shipment** button.

A success message appears if the order is shipped successfully.

iv. ***To delete the WalmartMx orders***

i. Go to the **Magento 2 Admin** panel.

ii. On the left navigation bar, click the **WALMARTMX INTEGRATION** menu, and then click **Orders Listing**.
The **WalmartMx Order List** page appears as shown in the following figure:



iii. *To delete the single order*, do the following steps:

i. Scroll down to the order row no more required.

ii. In the **Action** column of the respective row, click the **Delete**

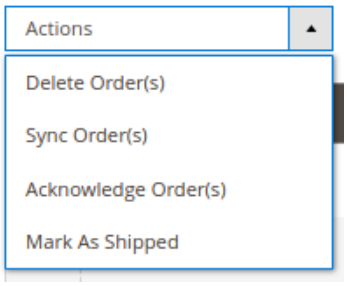
icon.
A confirmation dialog box appears.

iii. Click the **OK** button.
The order is deleted from the WalmartMx Marketplace.

iv. *To delete the selected WalmartMx orders in bulk*, do the following steps:

i. Select the check boxes associated with the orders those are no more required.

ii. Click the **Arrow** button next to the **Actions** list.
A menu appears as shown in the following figure:



iii. Click **Delete Order(s)**.
A confirmation dialog box appears.

iv. Click the **OK** button.
The selected orders are deleted from the WalmartMx Marketplace.

7.2. View and Delete the Failed Orders

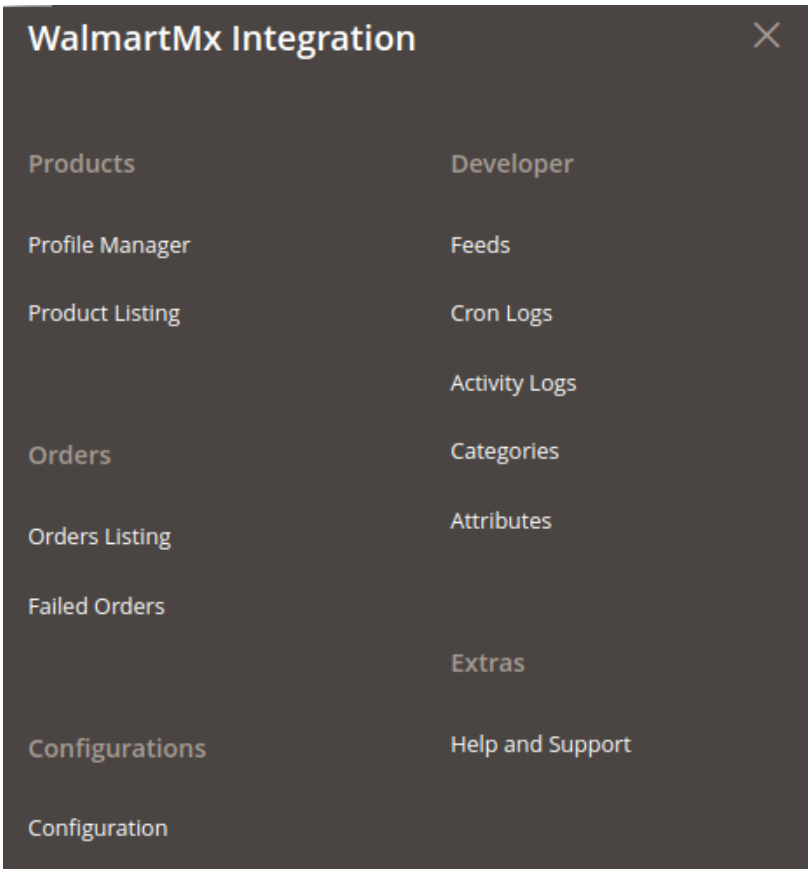
The users can view the list of failed WalmartMx orders on the WalmartMx Failed Orders page.

In the following conditions, Orders are not imported from WalmartMx:

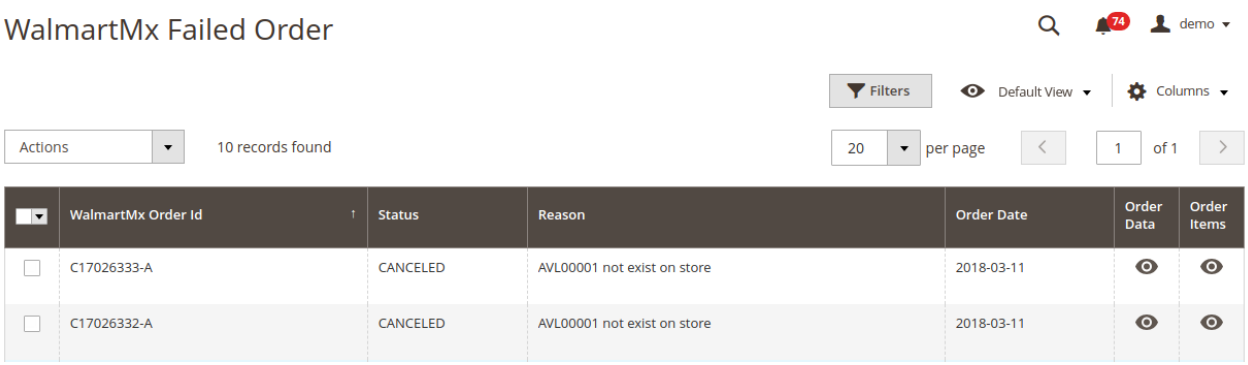
- If any product in the WalmartMx Order is Out of Stock in the Magento 2 store.
- If any product in the WalmartMx Order is disabled in the Magento 2 store.
- If any Product does not exist in Magento 2 store or is deleted from the Magneto 2 store after uploading on WalmartMx.
- If the selected Payment Method in WalmartMx System Configuration Setting is not available in the Magento 2 store.

To view, WalmartMx failed orders

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **WALMARTMX INTEGRATION** menu.
   The menu appears as shown in the following figure:



3. Click **Failed Orders**.
   The **WalmartMx Failed Order** page appears as shown in the following figure:



This page displays the failed orders with the order id and the reason for the failure.

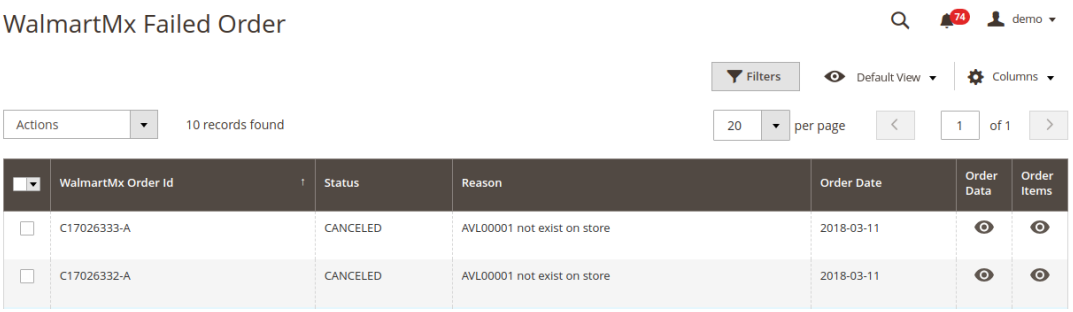
4. *To view the order data details*, do the following steps:
   a. Scroll down to the required failed order row.
   b. In the **Order Data** column of the respective row, click the **View**

   icon.
   The Order Data page appears as shown in the following figure:

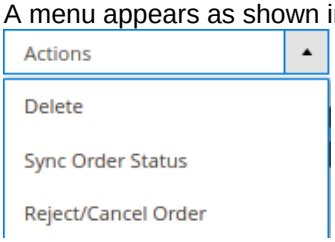
   The specific order data details appear on this page.
   c. Click the **Cancel** button to close the page.
5. *To view the order item details*, do the following steps:
   a. Scroll down to the required failed order row.
   b. In the **Order Items** column of the respective row, click the **View**

   icon.
   The Order Data page appears as shown in the following figure:

   The specific order item details appear on this page.
   c. Click the **Cancel** button to close the page.
   d. *To delete the selected failed orders*, do the following steps:
      i. Go to the **WalmartMx Failed Order** page.
      ?



ii. Select the check boxes associated with the failed orders those are no more required.
iii. Click the **Actions** list Arrow button.
A menu appears as shown in the following figure:



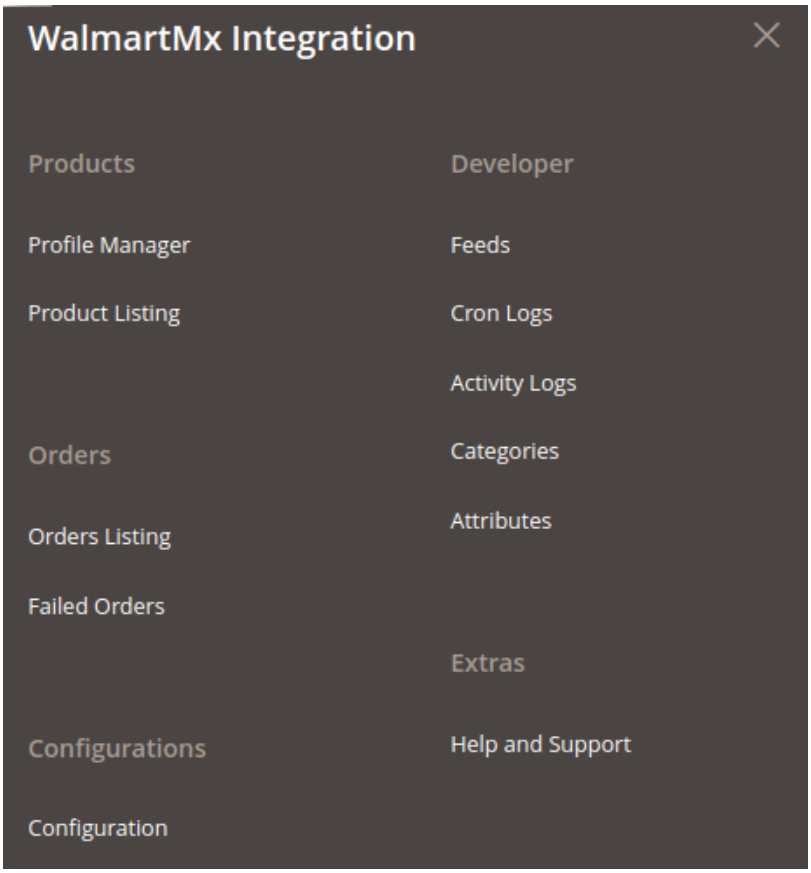
iv. Click **Delete**.
A confirmation dialog box appears.
v. Click the **OK** button.
The selected failed orders are deleted.
vi. Click **Sync Order Status**. A confirmation dialog box appears.
vii. Click the **OK** button.
The selected failed orders get synced.
viii. Click **Reject/Cancel Orders**. A confirmation dialog box appears.
ix. Click the **OK** button.
The selected failed orders get rejected/canceled.

8. WalmartMx Feeds

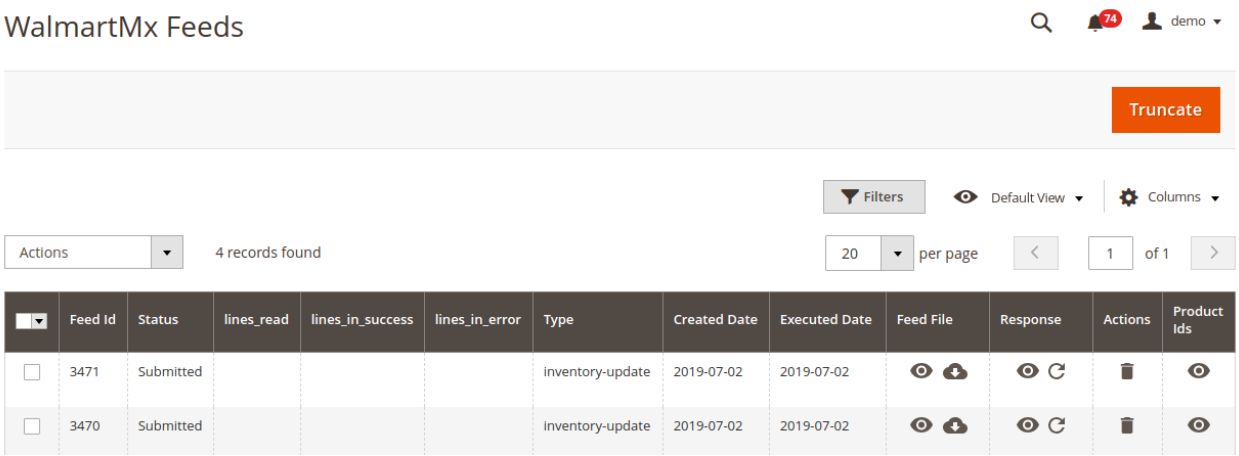
After uploading the product on WalmartMx or after updating the product inventory or the product price, the user can check the status of the feed and sync the selected feeds from the **WalmartMx Feeds** page.

To view and manage the product feeds

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **WALMARTMX INTEGRATION** menu.
The menu appears as shown in the following figure:

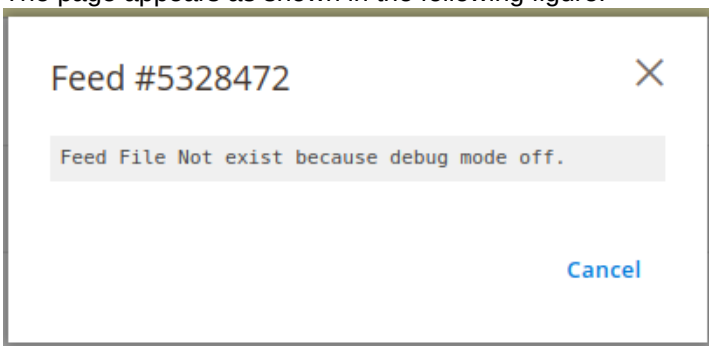


3. Click **Feeds**.
   The **WalmartMx Feeds** page appears as shown in the following figure:



4. Do the following tasks if required:
   a. View the status of the feed in the **Status** column.
   b. *To view the **Feed File***, do the following steps:
      i. Scroll down to the required row.
      ii. In the **Feed File** column of the respective row, click the **View Feed file** icon.

The page appears as shown in the following figure:



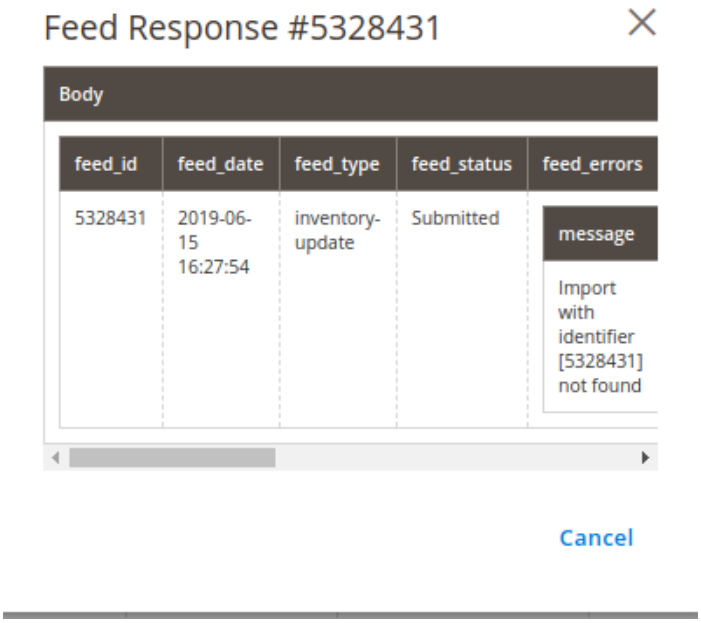
iii. *To download the **Feed File***, do the following steps:
   i. Scroll down to the required row.
   ii. In the **Feed File** column of the respective row, click the **Download file**

   icon.

iv. *To view the Feed response*, do the following steps:
   i. Scroll down to the required row.
   ii. In the **Response** column of the respective row, click the **View Feed Response**

   icon.

   The page appears as shown in the following figure:



v. *To synchronize the specific feed between WalmartMx and Magento 2*, do the following steps:
   i. Scroll down to the required row.
   ii. In the **Response** column of the respective row, click the **Sync**

   icon.

vi. *To delete the specific feed*, do the following steps:
   i. Scroll down to the required row.
   ii. In the **Actions** column of the respective row, click the **Delete Feed** icon.

vii. *To delete the selected feeds*, do the following steps:
   i. Select the check boxes associated with the feeds those are not required.
   ii. In the **Action** list, click the **Arrow** button.
