1. Overview

Walmart Mexico improves the communities where their associates and customers live and work. With the assistance of the Walmart Mexico Foundation, Walmart supports four primary pillars and they are fighting hunger, sustainable communities, volunteerism, and natural disaster relief.

Continuous investment in sustainable facility design has resulted in more than half of their stores in Mexico being powered by wind and other clean energy sources.

Hypermarket stores of Walmart provide the widest assortment of merchandise from groceries to apparel and general merchandise. Walmart was the first format that emerged from the joint venture of Cifra S.A. de C.V. with Wal-Mart Stores, Inc. combining the best of both businesses.

Walmart Mexico Prestashop Integration extension renders the Real-Time Synchronization of orders, products, pricing, and inventory through establishing the interaction between the Walmart Mexico APIs and the Prestashop store.

Prestashop store owners can very smoothly create the Walmart Mexico Categories and its dependent attributes in the Prestashop store. Hence, it enables them to establish a mapping of the desired product category on the Prestashop store for automatic submission of the selected product to the same category on Walmart Mexico.com.

It makes the process easier for the Prestashop store owners to manage the Walmart Mexico orders in the Prestashop stores without making any significant changes in the operational functionalities.

It synchronizes the product listing between your Prestashop store and the Walmart Mexico.com retailers. Products modified on the Prestashop store gets modified on Walmart Mexico.com.

Key features are as follows:

- **Easy Product Upload:** Products are uploaded with a single click when they are ready to upload.
- **Product Data Validation:** The extension enables validating the product information in accordance with Walmart standard and values.
- **Bulk Uploading:** The Walmart marketplace API integration extension enables sellers to upload products in a large number and thus minimize the manual work.
- **Real-time stock updates:** Stocks are updated automatically on both ends as stock status updated in your local shop or as per the order is marked for shipment by Walmart.
- **Centralized order management:** The orders can be easily acknowledged or canceled through centralized order management system.
- **Shipment:** This feature helps to supports high volume shippers with commercial pricing.
- **New Order Notifications:** Whenever a new order is fetched from Walmart.com, the admin receives a notification.
- **Order Cancellation:** It facilitates the admin to cancel the Orders. Once orders get canceled, a fee credit gets issued.
- **Refund:** Refunds are processed back to the original payment method used to purchase the order. Refund is also possible through extension.

2. Retrieve API Credentials from the Walmart Seller Account

The Prestashop store owner has to fill in the API credentials on the **Walmart Integration** page of the admin

panel.

The user has to log in the Walmart Seller account to retrieve the following API credentials:

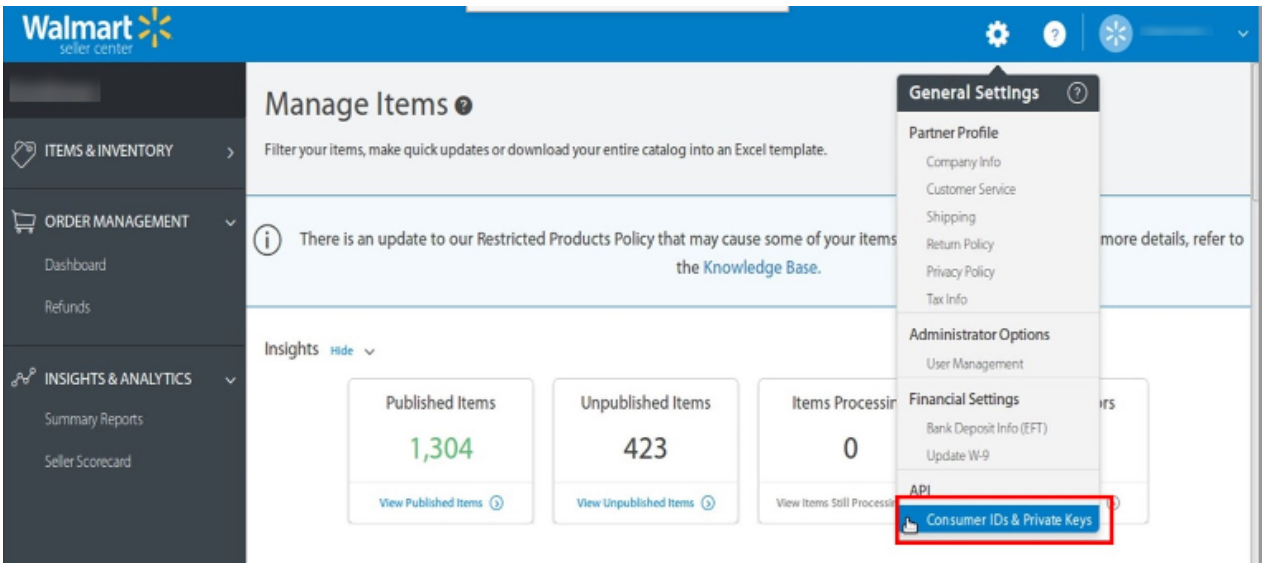
- **Consumer Id**
- **Private Key**

After retrieving the **Consumer Id** and the **Private Key,** the merchant has to copy all of them one by one from the Walmart Seller account and paste it one by one to the **Walmart Integration** page of the admin panel of the merchant.

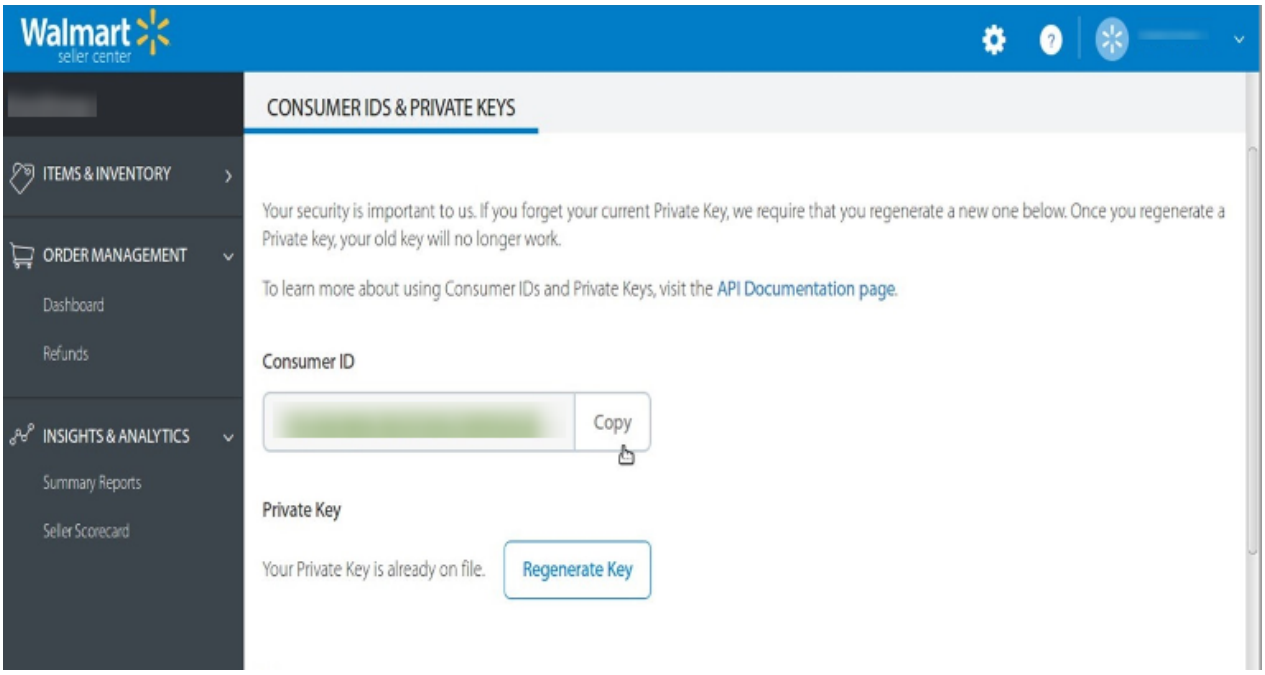
To copy the API Credentials from the Walmart Seller account

1. Open the **Walmart Seller** account.
2. Click the **Settings**

   icon.
   The **General Settings** menu appears as shown in the following figure:

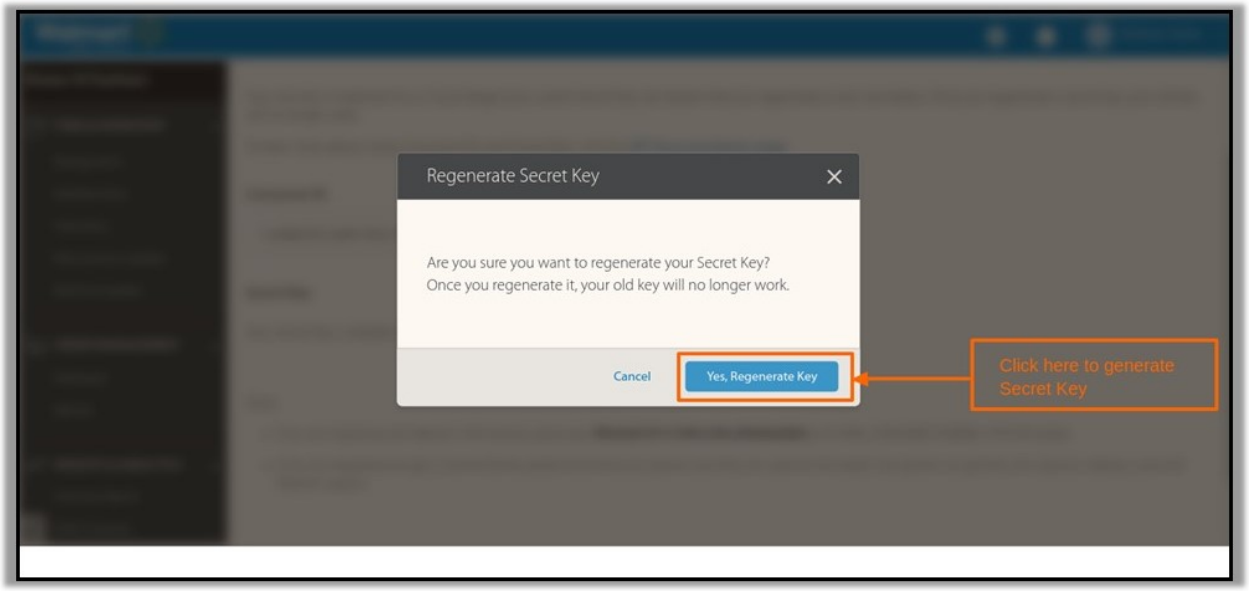


3. Under **API**, click **Consumer IDs & Private Keys**.
   The page appears as shown in the following figure:



4. Under **Consumer ID**, click the **Copy** button.

5. Under **Private Key**, click the **Regenerate Key** button.
   The **Regenerate Secret Key** dialog box appears as shown in the following figure:



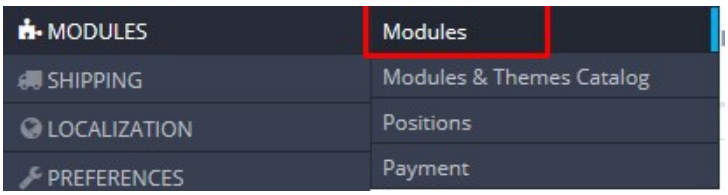
6. Click the **Yes, Regenerate Key** button.
   The key is generated. Copy the generated key.

3. Walmart Integration Configuration Settings

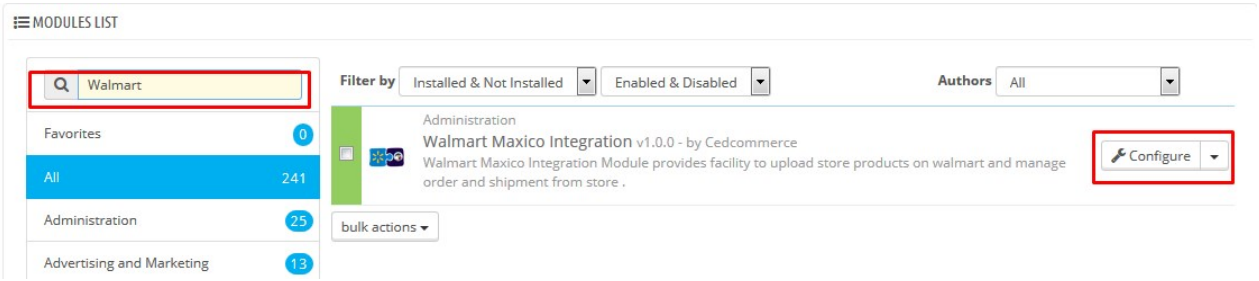
After obtaining the **Consumer Id** and the **Private Key** from the Walmart Seller account, the Prestashop store owner has to paste them on the **Walmart Integration** page of the admin panel of the merchant.

To Set up the Walmart Integration settings in the Prestashop Admin panel

1. Go to the **Prestashop Admin** panel.
2. On the left navigation bar, click the **MODULES** menu.
   The menu appears as shown in the following figure:



3. Click **Modules**.
   The **MODULES LIST** page appears as shown in the following figure:



4. In the **Search** box, enter the **Walmart Mexico Integration** module name.
   The **Walmart Mexico Integration** module appears in the right panel.
5. Click the **Configure** button.
   The **Configure Walmart Integration** page appears as shown in the following figure:

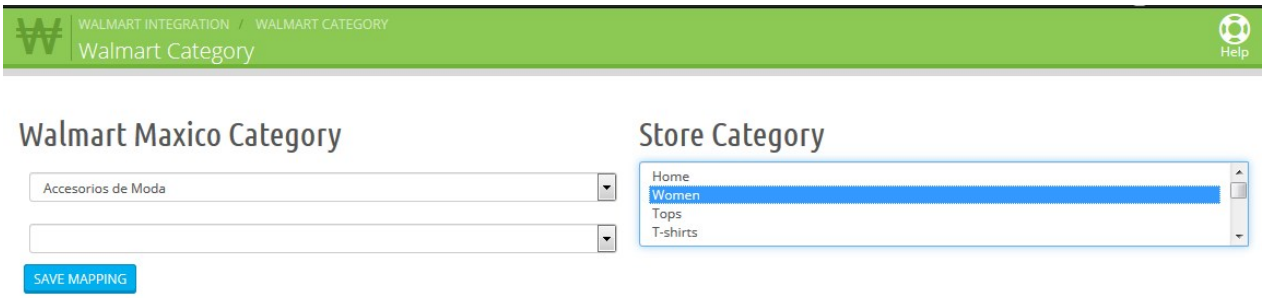
    - **Debug**: Logs data while request sends on Walmart.
12. Click the **Save** button.

4. Manage Walmart Mexico Category to Prestashop Category

The Prestashop store owner can map the Walmart Mexico Categories to the Prestashop Categories.

To map the Walmart Mexico categories to the Prestashop categories

1. Go to the Prestashop Admin panel.
2. On the left navigation bar, move the cursor over the **WALMART INTEGRATION** menu, and then click **Walmart Category**.
   The **Walmart Maxico Category** page appears as shown in the following figure:



3. Under **Walmart** Maxico **Category**, select the required category from the list.
   If the selected category has sub-categories then another list appears.
4. In the list, select the required sub-category of the selected parent category.
5. In the **Store Category** list, select the required category to map.
6. Click the **SAVE MAPPING** button.

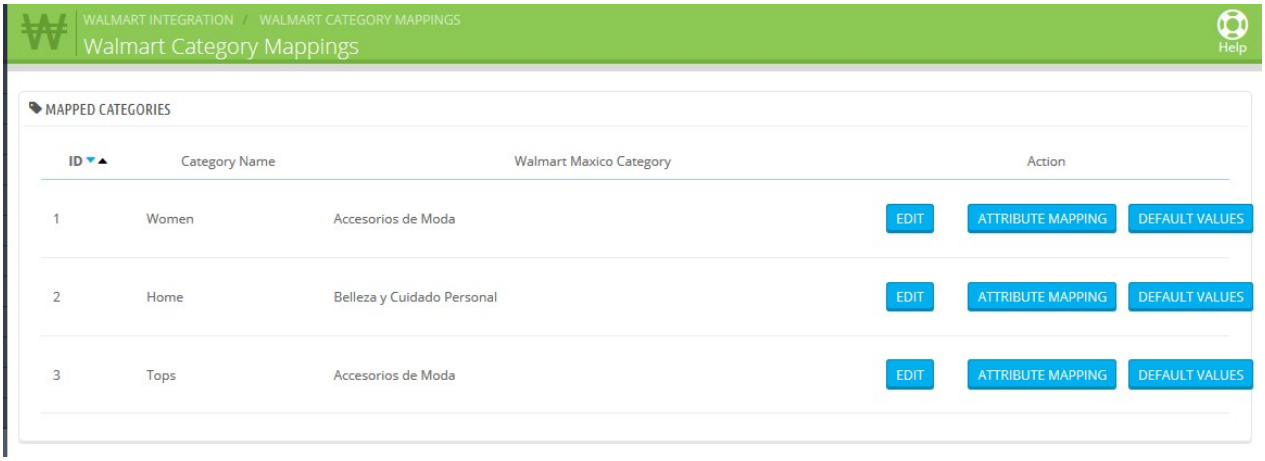
5. Manage Categories and Attributes

The Prestashop store owner can perform the following tasks:

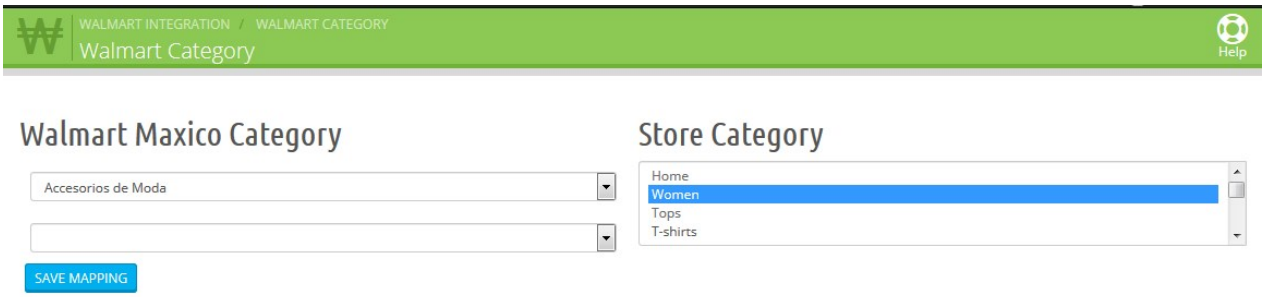
- Edit Category mapping.
- View the Walmart Mexico and store Attributes and map the Attributes of the selected category
- Set the default value of the attribute of the selected mapped category for all products

To edit the category mapping

1. Go to the Prestashop Admin panel.
2. On the left navigation bar, move the cursor over the **WALMART INTEGRATION** menu, and then click **Walmart Category Mappings**.
   The **Mapped Categories** page appears as shown in the following figure:



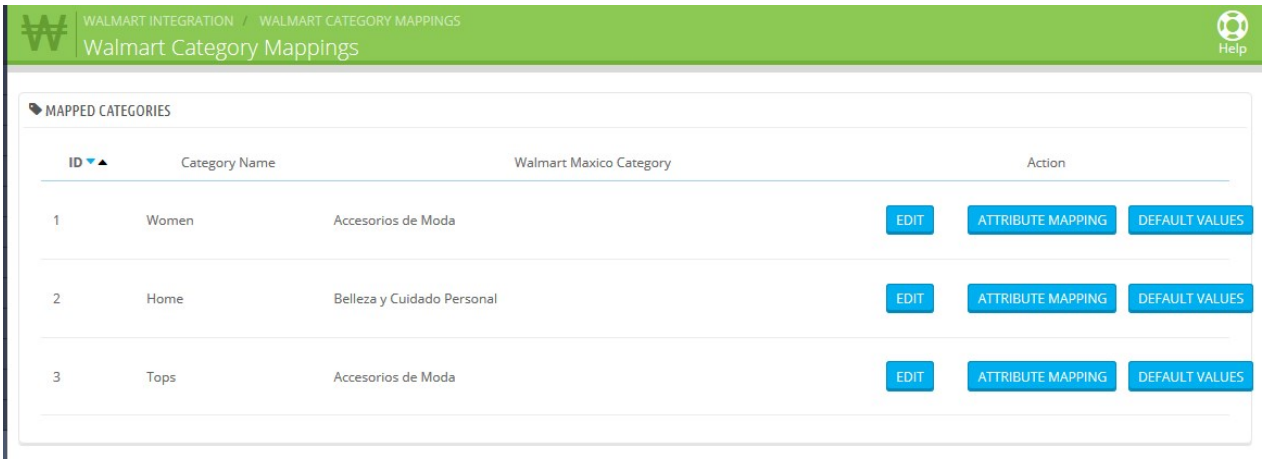
3. Scroll down to the required category, and then click the corresponding **EDIT** button.
   The page appears as shown in the following figure:



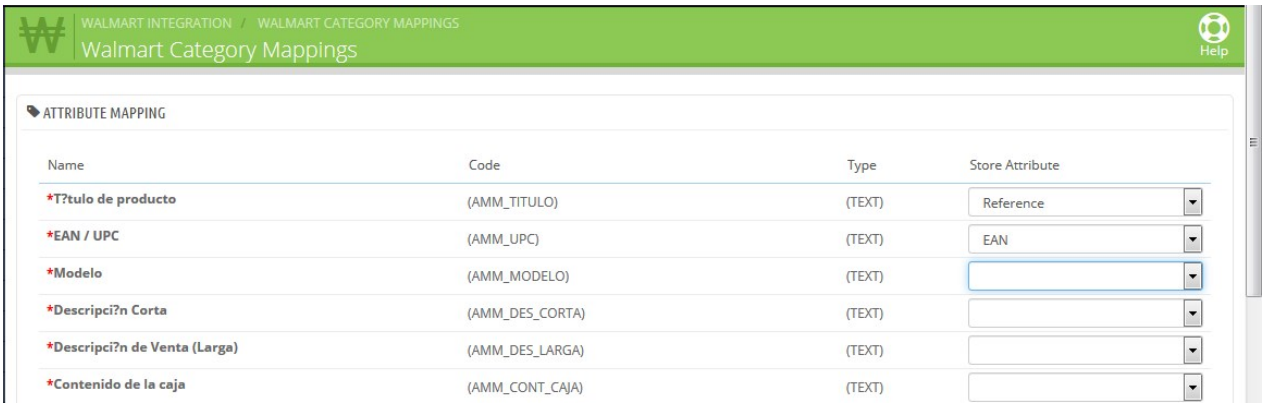
4. Select the required category from the respective list, and then click the **SAVE MAPPING** button.

To map the attributes of the selected category

1. Go to the **MAPPED CATEGORIES** page.



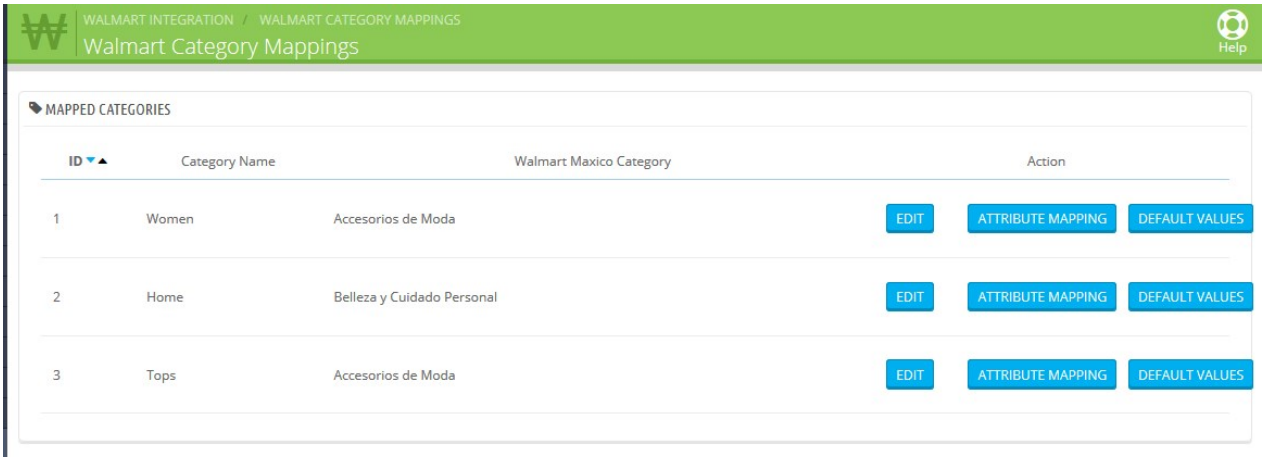
2. Scroll down to the required category, and then click the corresponding **ATTRIBUTE MAPPING** button. The page appears as shown in the following figure:



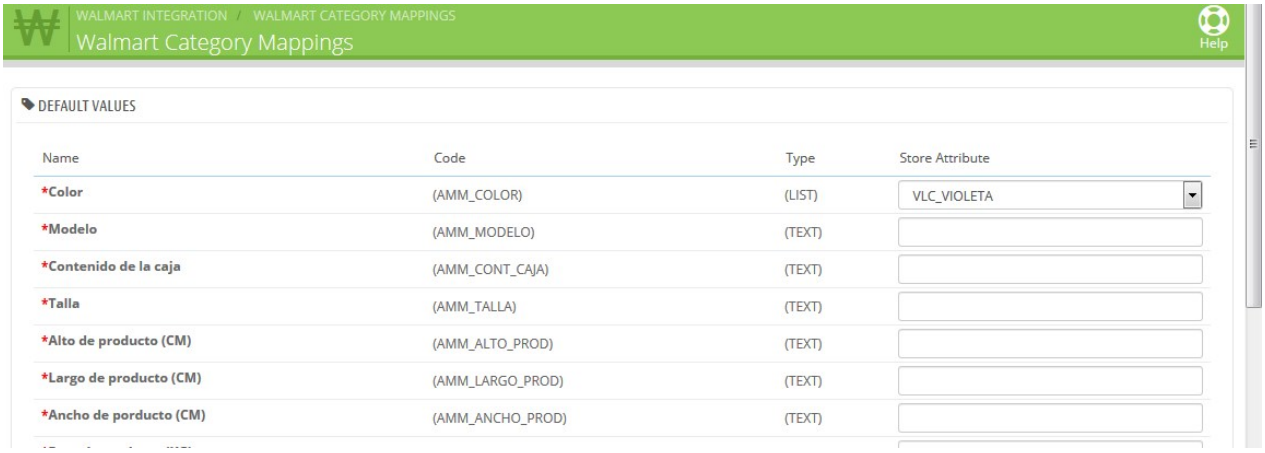
3. Scroll down to the required attribute row.
4. In the **Store Attribute** column, select the required attribute from the list.
5. Click the **SAVE** button.

To set the default value of the attribute of the selected mapped category for all products

1. Go to the **MAPPED CATEGORIES** page.



2. Scroll down to the required category, and then click the corresponding **DEFAULT VALUES** button. The page appears as shown in the following figure:



3. Scroll down to the required attribute row.
4. In the **Store Attribute** column, select the required value from the list.
5. Click the **SAVE** button.

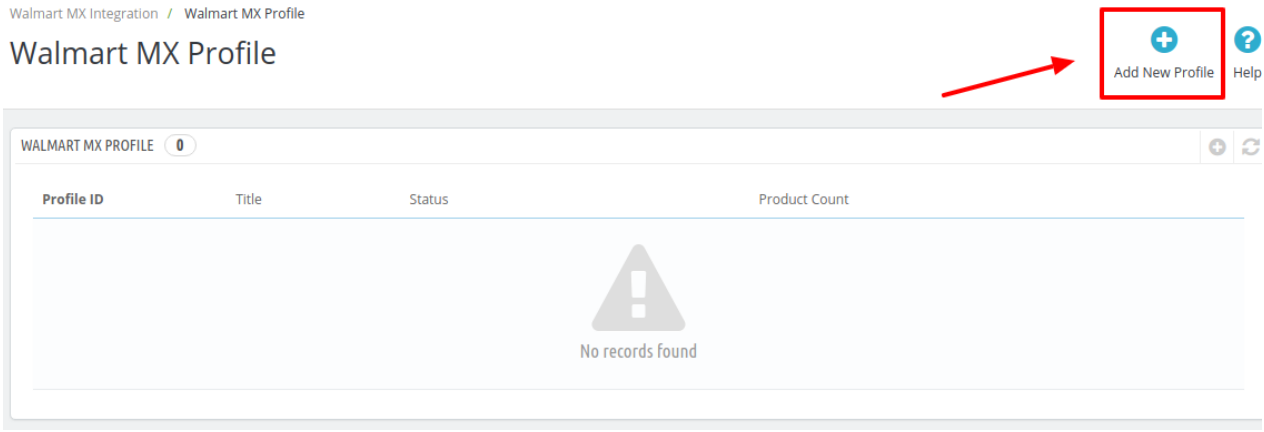
6. Manage Walmart Mexico Profiles

Note: A profile is where you may assign multiple products to be sold on Walmart Mx from the Prestashop store.

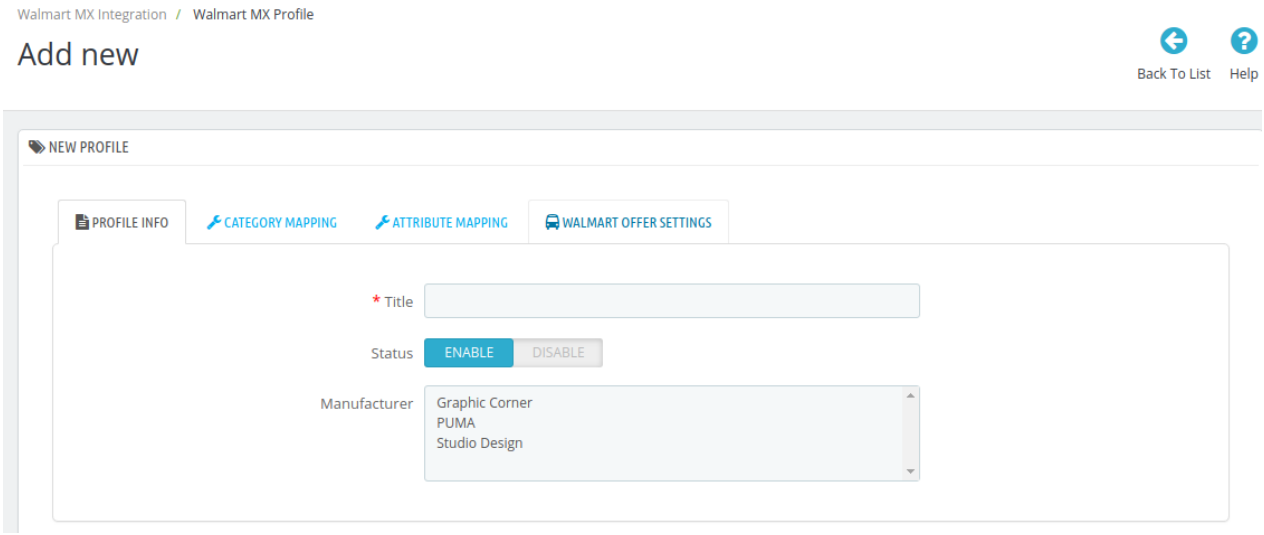
To add a new profile

1. Go to Prestashop Admin Panel
2. On the left navigation bar, place the cursor on Walmart Mx Integration and you will see it getting expanded as below:

3. Click on **Walmart Mx Profile** and you will be navigated to a page as shown below:

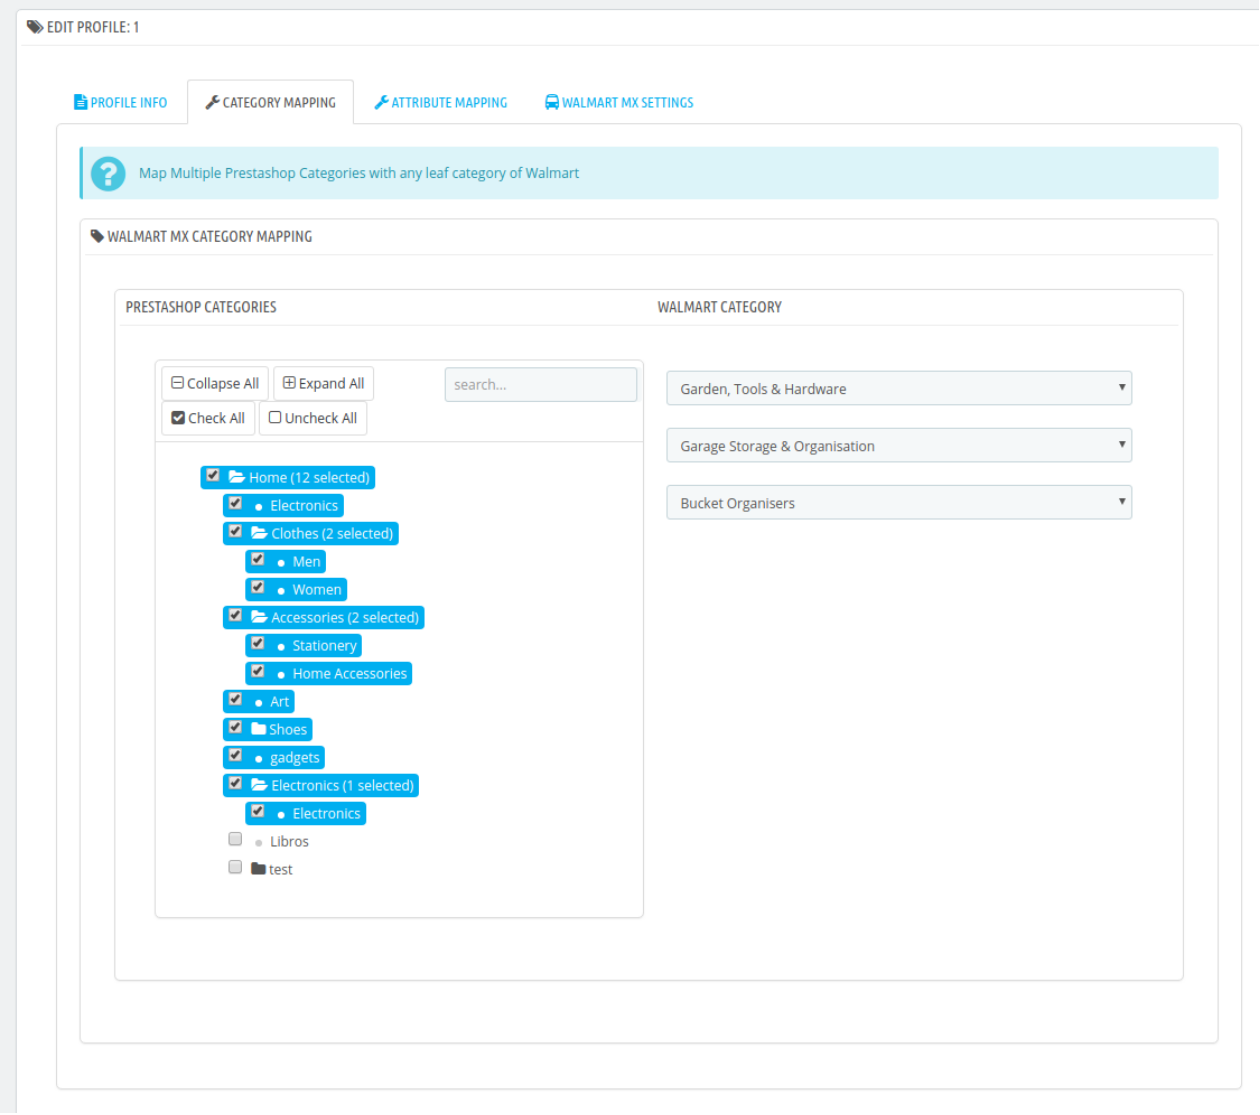


4. Click on **Add New Profile,** to add a profile. On clicking, you'll see the page as below:

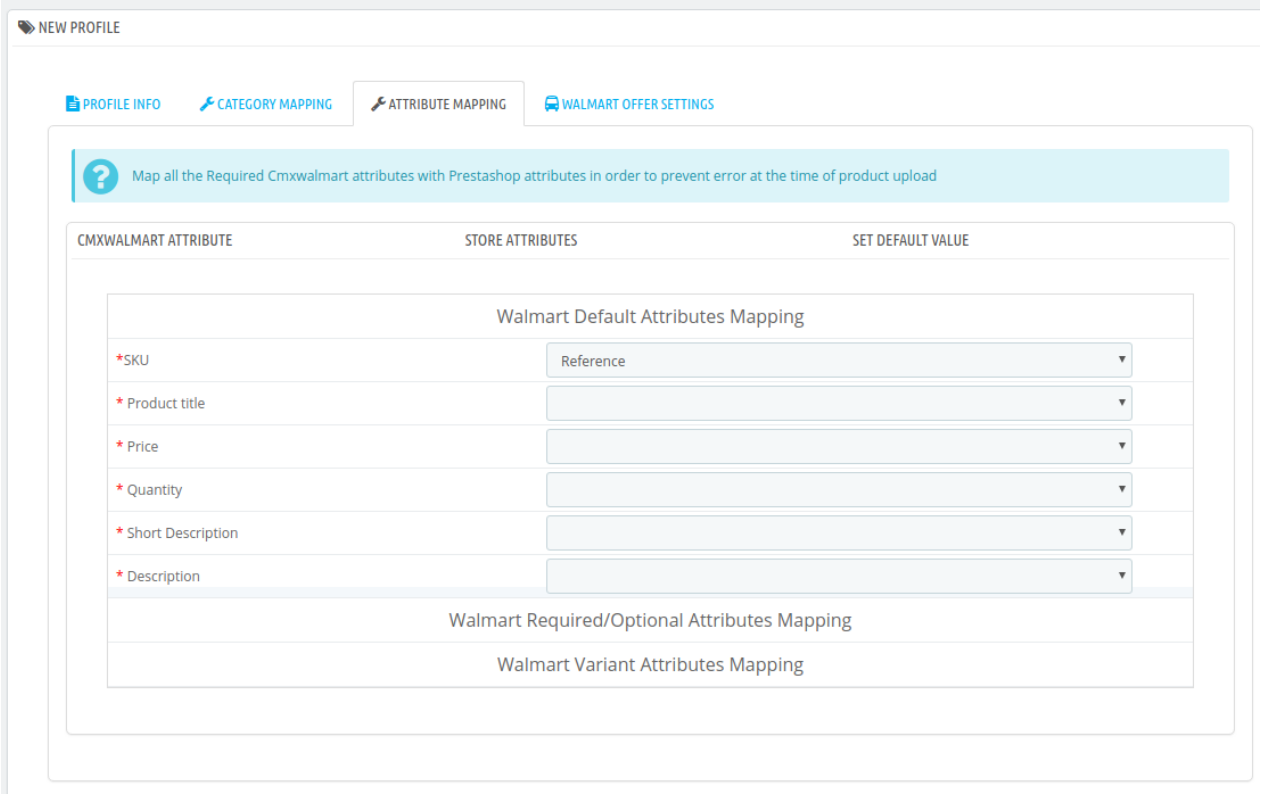


- In the **Title,** enter the name of your profile. This is for your own identification.
- Select **Enable** as the status to enable the profile.
- Choose the desired **Manufacturer** for the profile.

5. Now move to **category mapping** and the section expands as:

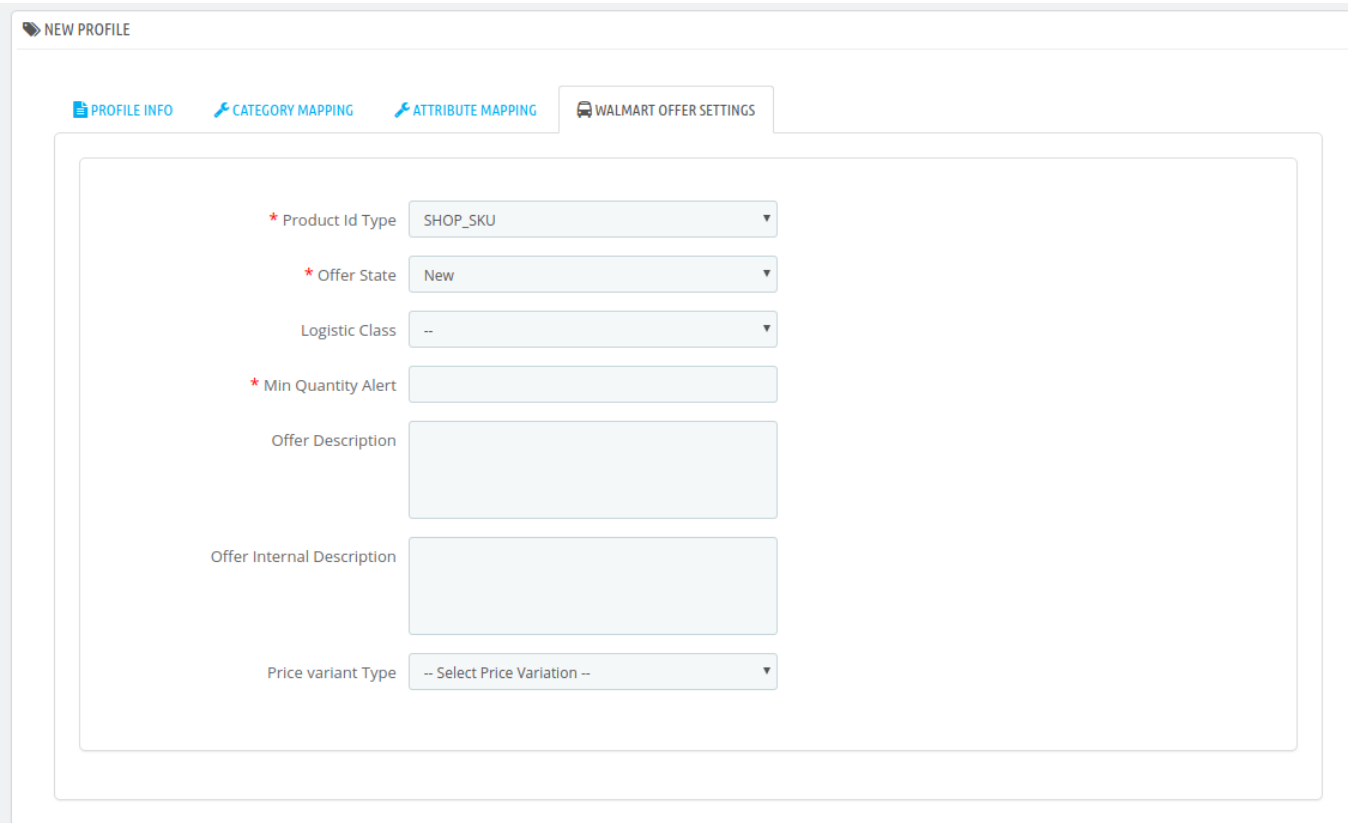


6. In this section
   - You have to map your PrestaShop category with a **suitable Walmart leaf category**.
   - The PrestaShop categories are mentioned on the left & Walmart MX Categories on the right.
   - Map **Multiple Prestashop categories** with a single Walmart leaf category.
7. Now Click on **Attribute Mapping** adjacent to the **Profile Info** tab, and you'll come across a section as below:



8. Map the desired Walmart MX attributes with Prestashop store attributes.
9. The Prestashop attributes mentioned on the right can be selected via the dropdown menu.

Now move on to the last section of the Configuration settings, ie Walmart MX Settings:



- In the **Product ID Type** choose the product id type.
- In the **Offer State** enter the current state of the products ie. new or refurbished.
- In **Logistic Class**, select the type of weight class the item belongs to.
- If you wish to receive an alert when the stock runs below a specific number, then enter the threshold value in **Min Quantity Alert.**
- Enter **Offer Description** and **Offer External Description** in the columns below.
- In the Price Variant type you have the options to select the pricing to be reflected on **Walmart** for your products, as shown below:
    - **Increase by Fixed Amount:** If you select this option, a bar gets opened as shown in the image below:
      Now suppose if your product price on Prestashop is 100 and you enter 50 in this tab, the price of the product that will be reflected on Walmart will be 150 now. It is because you have selected Increase By Fixed Amount and entered 50 in the corresponding field suppose, your product is available on Prestashop for 100 and you enter 50 in the corresponding box, then the 50% of your product's Prestashop price will be added to it and it will be reflected on Walmart. So now your product will be available on Walmart for 150. (As 50% of 100=50.)
    - **Increase by Fixed Percentage:** If you select this option, you may increase the product price by a fixed percentage.
    - **Decrease by Fixed Amount:** It works in the same manner as an Increase by Fixed Amount works, **but** it decreases the price of the Prestashop product on Walmart marketplace by a fixed amount.
    - **Decrease by Fixed Percentage:** It works in the same manner as Increase by Fixed Percentage works, **but** it decreases the price of the Prestashop product on Walmart marketplace by a fixed percentage.
- Click on save button to save the profile.

7. Walmart Products

On the **WALMART PRODUCTS** page, the store admin can perform the following tasks:

- Select All or Unselect All products(https://docs.cedcommerce.com/prestashop/walmart-mexico-prestashop-integration/walmart-mexico-prestashop-integration-guide-0-0-1?section=select-all-or-unselect-all-products)

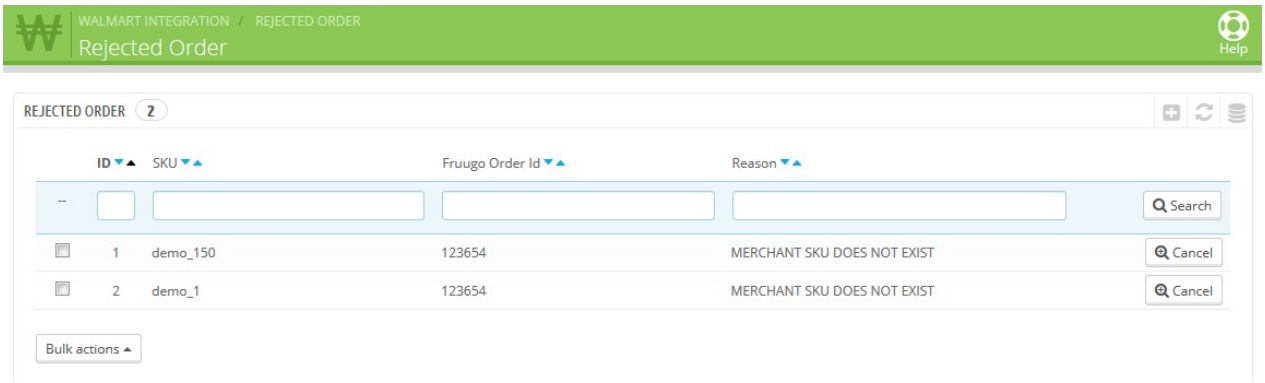
11. Click the **SHIP ORDER** button.
    A success message appears.

9. Manage Walmart Rejected Orders

The store admin can manage the rejected orders from the **REJECTED ORDER** page**.** The store admin can view and cancel the rejected orders.

To cancel the single rejected order

1. Go to the **Prestashop Admi**n panel.
2. On the left navigation bar, move the cursor over the **WALMART INTEGRATION** menu, and then click **Rejected Order**.
   The **REJECTED ORDER** page appears as shown in the following figure:



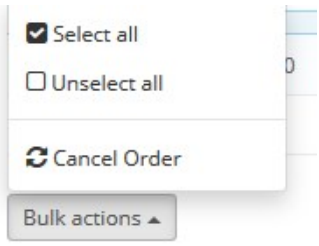
All the rejected orders are listed on the page.

3. Scroll down to the required order.
4. In the respective row click the **Cancel** button.
   The rejected order is canceled and the success message appears on the page.

To cancel the selected rejected order

1. Go to the **Prestashop Admi**n panel.
2. On the left navigation bar, move the cursor over the **WALMART INTEGRATION** menu, and then click **Rejected Order**.
   The **REJECTED ORDER** page appears as shown in the following figure:

   All the rejected orders are listed on the page.
3. Click the **Bulk actions** button.
   The menu appears as shown in the following figure:



4. Click the **Cancel Order** option.
   The selected orders are canceled.

10. Option Mapping

The store owner view the Walmart options, which are actually Walmart attributes. Options are the attributes that the front-end users can use based on their requirement while placing an order for the product. Also, admin can map the store options (store attributes) with the corresponding Walmart attributes.

The admin can perform the following tasks:

- Add New Attribute Mapping(https://docs.cedcommerce.com/prestashop/walmart-mexico-prestashop-integration/walmart-mexico-prestashop-integration-guide-0-0-1?section=add-new-attribute-mapping)

- Edit the Mapping(https://docs.cedcommerce.com/prestashop/walmart-mexico-prestashop-

integration/walmart-mexico-prestashop-integration-guide-0-0-1?section=edit-the-attribute-mapping)

- Delete the Attributes(https://docs.cedcommerce.com/prestashop/walmart-mexico-prestashop-integration/walmart-mexico-prestashop-integration-guide-0-0-1?section=delete-the-attribute-mapping)
