1. Overview

Linio, one of the biggest online e-commerce marketplace in Latin America, also stated in 8 countries more with arond 300+ million registred users. Countries include: **Argentina, Chile, Colombia, Ecuador, Mexico, PanamaPeru, Venezuela.**

Linio receives an average of 50 million website visits per month, hosts more than 10 thousand marketplace stores and has over 3 million products available for purchase in the category.

Linio Prestashop Integration Extension by CedCommerce is a native addon that establishes a perfect synchronization of the inventory, pricing, orders & other product details between your Prestashop store and Linio Marketplace. This ‘easy to use’ integration addon simplifies product creation and its management.

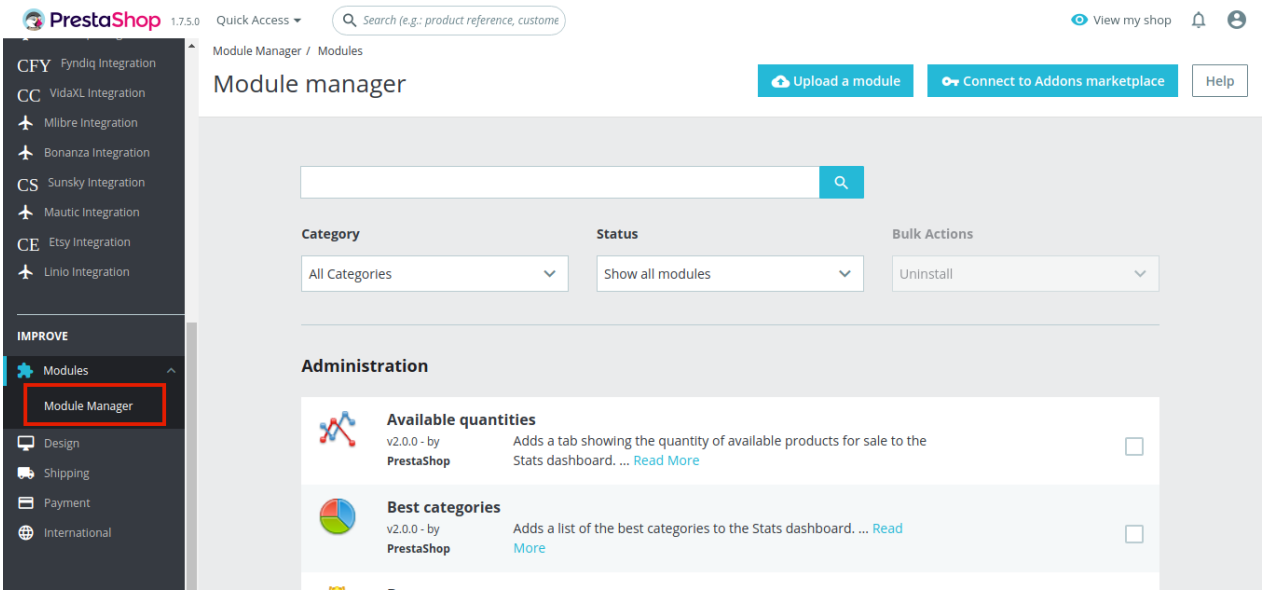
Key features are as follows:

- **Synchronized Inventory and Profile Based Pricing:** Inventory Synchronization at regular intervals and product Listing is established between Prestashop store and Linio website. There is a profile based price increase or decrease.
- **Profile based product Upload:** Admin can create a profile and map the Linio category and attributes to the Prestashop category and attributes, and then after assigning the products to the profile can easily upload products to the Linio website.
- **Simple and Configurable Product Upload:** Our Opencart Linio Integration empowers the admin to upload both simple and configurable type of products from the Opencart store to Linio.
- **Archive and Unarchive Products:** Merchants can close and reopen the products on the Linio website using this feature. Archive disables the products on the Linio website and Unarchive enables the archived product.
- **Creation of Prestashop Orders:** The newly placed orders on the Linio website are automatically created in the Prestashop store with all the required details as it is on the Linio website.
- **Product Category Mapping:** Follows many-to-one category mapping philosophy. Admin can map many categories of the Prestashop store to the single category of the Linio website.

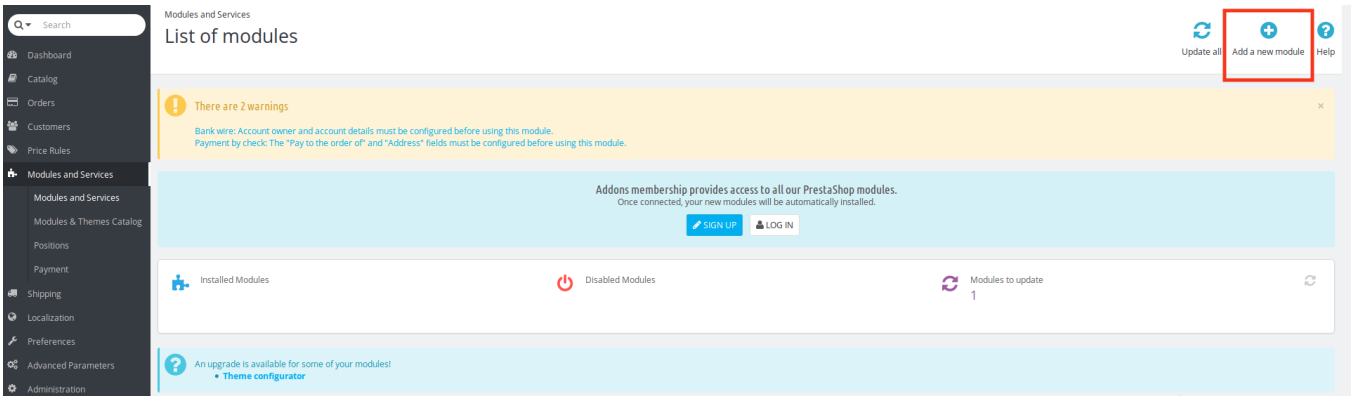
2. Linio Prestashop Integration Extension Installation

To install the extension:

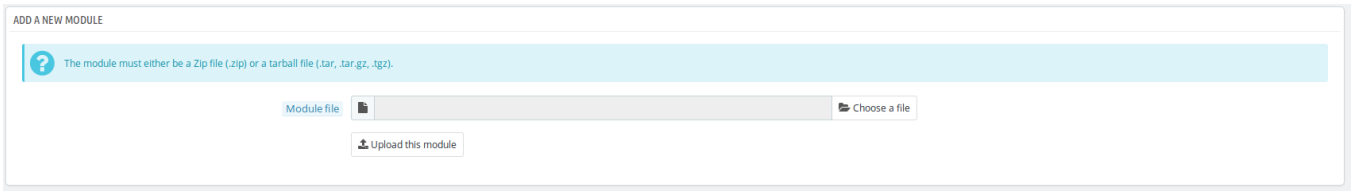
- Go to the **Prestashop Admin panel**.
- On the left navigation bar, point cursor to the **Modules and Services**.
  The menu appears as shown in the following figure:



- Now click the **Modules and Services** menu, and you will come across a page like shown below.

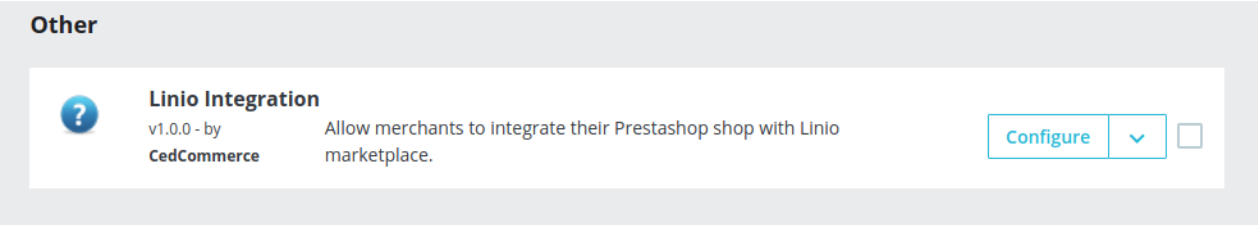


- Now you need to click on **Add a New Module** on the top right corner of the page.
- On doing so, the page opens a section like shown in the image below:



- Now in the Module File tab, choose the package file of Wish marketplace from your system.
- Once selected, click on the **Upload this module button.**

- On the same page, scroll down and in the Modules list, search for Wish and it will be listed in the right side like shown in the image below. You have to click on the **Install** button shown in the image.



- Once you click on **Install** button, you can see a message like shown below, on the same page, asking you if you wish to proceed with the installation. You may click on **Proceed with the installation.**
- The module will be installed and you will be navigated to the **Configuration** page for further steps to be taken.

3. Linio Configuration Settings
