1. Overview

Qoo10 Magento 2 Integration is an eCommerce solution by CedCommerce that connects your Magento 2 store with the Qoo10 marketplace. It provides a centralized dashboard that helps you to sell effortlessly and automate the selling from a single platform.

Qoo10 Magento 2 integration is packed with various features that help in the selling. It synchronizes the inventory, price and other product details for smooth selling on the Qoo10 marketplace.

Below are the key features of Qoo10 Magento 2 Integration.

Key Features:

- **Bulk Product Upload:** Upload products in bulk on the Qoo10 marketplace and save your time.
- **Smooth Inventory Management**: With Qoo10 marketplace integration, all the figures are kept updated via regular inventory synchronization that enables a hassle-free flow of orders through the inventory.
- **Monitored Order Management:** Stop the blind juggle and constant monitoring instead manage all the orders from Magento 2 seller panel dashboard with Magento 2 integration for Qoo10.
- **Order Auto Acknowledgement:** CedCommerce Qoo10 Magento 2 Integration benefits sellers from the feature of automatic order acknowledgment, as soon as they receive new orders on Qoo10 marketplace.

2. Qoo10 Integration Extension Installation

To install the extension,

- Log in the **FTP**, and then go to Magento 2 root folder (generally present under the *public_html* folder).
- Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
- Upload or Drag and Drop *app/code/Ced/Qoo10* directory.
- After successfully uploading the directory, the extension will be installed/upgraded.
- Now run the following upgrade command in *cmd*
  php bin/magento setup:upgrade.

3. Configuration

Once the extension is successfully installed in the Magento 2 store, the **Qoo10 INTEGRATION** menu appears on the left navigation bar of the Admin Panel. The merchant has to first create a seller account on the Qoo10 seller panel.

To Set Up the Configuration Settings in the Magento 2 Admin Panel,

1. Go to the **Magento Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:
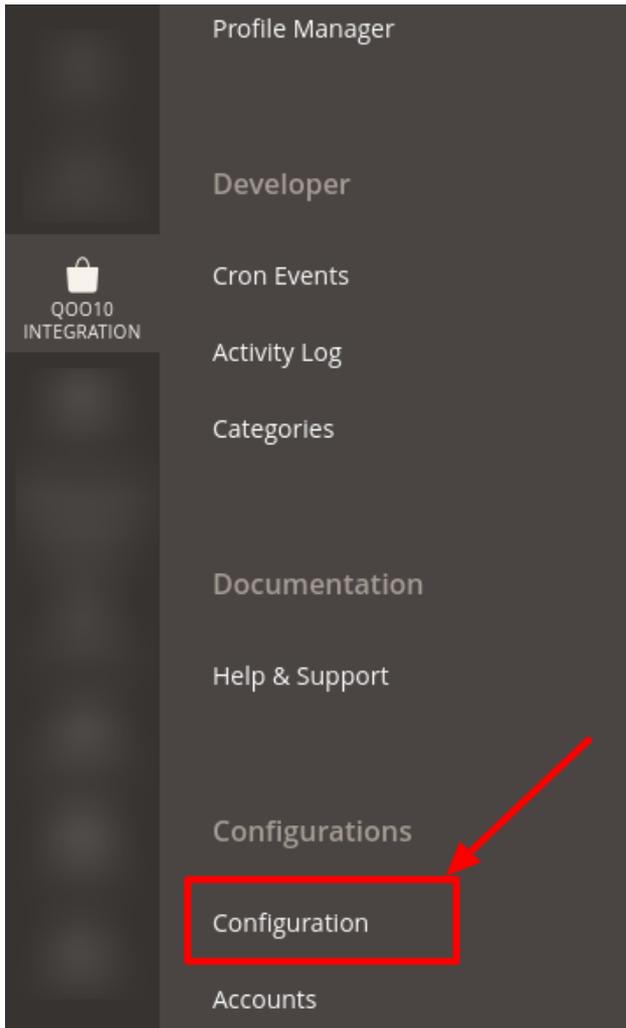

3. Click **Configuration**.
   The Configuration page appears as shown in the following figure:
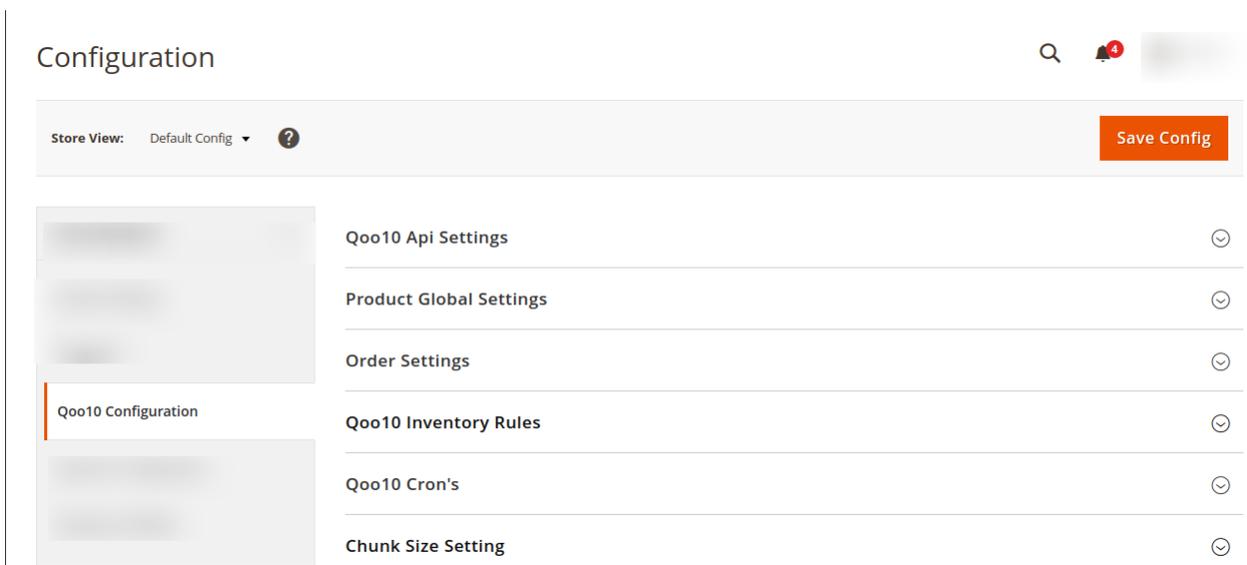

4. In the right panel, click on **Qoo10 API Settings**, and the section expands as:

Qoo10 Api Settings

Enabled [global]	Yes
Use Multi Account [global]	Yes
Debug Log [global]	No
Select Store [global]	Default Store View

- In the **Enabled** list, select **Yes** to enable the extension features.
- In **Use Multi-Account**, select **Yes** to handle multiple Qoo10 Accounts.
  (*Note: It is mandatory to select 'Yes' in multi Account list option.)
- In the **Debug Log** list, select **Yes** to start Qoo10 Integration in the debug mode.
- Select the view of the store you wish to, from the next section of **Select Store.**

5. Now move to **Product Global Settings**, and click on it do the following steps:

Product Global Settings

Please set the global settings for Qoo10.com

Qoo10 Product Price [global]	Default Magento Price

Select to send a different product price to **qoo10.com**

a. In the **Qoo10 Product Price** list, select one of the following options:
   i. **Increase by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.
   ii. **Increase by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears. Enter the numeric value to increase the price of the Qoo10, product price by the entered value % of Magento price
   For Example,
   Magento price + 5% of Magento price.
   Magento Price = 100
   Select **Increase By Fixed Percentage** option
   Enter Percentage = 5
   100 + 5% of 100 = 100 + 5 = 105
   Thus, Qoo10 Product Price = 105
   iii. **Decrease by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.
   iv. **Decrease by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.
   Enter the numeric value to decrease the price of the Qoo10 product price by the entered value % of Magento price.
   For Example,
   Magento price – 5% of Magento price.

Magento Price = 100
Select **Decrease By Fixed Percentage** option
Enter Percentage = 5
100 – 5% of 100 = 100 – 5 = 95
Thus, Qoo10 Product Price = 9

6. Click on the **Order Settings** tab and the section will expand as:

Order Settings

| Create Product [global] | No ▾ |
| | Create Product if product Not exist in magento. |

| Qoo10 Order Id Prefix [global] | |
| | Prefix for Qoo10 Increment ID |

| Customer Email [global] | |
| | Enter the Email for which customer will be created for Qoo10 Orders. |

a. In **Create Product** field, select **Yes** if you want to create a product if it does not exist in Magento and yet has been ordered on Qoo10.
b. In the **Qoo10 Order Id Prefix** box, enter the text as a prefix for Qoo10 Increment ID.
c. In the **Customer Email** field, enter the email for which customers will be created for Qoo10 Orders.

7. Click on **Qoo10 Inventory Rules** tab and it expands as:

Qoo10 Inventory Rules

| Set Inventory on Basis of Threshold [global] | Disable ▾ |
| | Choose yes to send inventory on qoo10 by condition |

a. In the **Set Inventory on Basis of Threshold** list, select **Enable** to send the inventory based on the threshold.
   Note: Only when the admin selects **Enable**, the other fields appear.
b. The section appears as shown in the following figure:

Qoo10 Inventory Rules

Set Inventory on Basis of Threshold
[global]

| Enable | ▼ |

Choose yes to send inventory on qoo10 by condition

Inventory Threshold Value
[global]

Set inventory quantity on which lesser and greater condition can control.

Send Inventory for Lesser Than Threshold Case
[global]

Send Quantity to Qoo10 for those products, whose inventory is LESSER than the inventory threshold.

Send Inventory for Greater Than Threshold Case
[global]

Send Quantity to Qoo10 for those products, whose inventory is GREATER than the inventory threshold.

       c. In the **Inventory Threshold Value** box, enter the required value.
       d. In the **Send Inventory for Lesser Than Threshold Case** box, enter the required value.
       e. In the **Send Inventory for Greater Than Threshold Case** box, enter the required value.
8. Now Click on **Qoo10 Cron's** tab, it expands as:

Qoo10 Cron's

Order Cron
[global]

| Disable | ▼ |

Order Fetch Cron

Inventory/ Price Cron
[global]

| Disable | ▼ |

Inventory And Price Sync Cron

       a. In the **Order Cron** list, select **Enable** to enable the order to fetch cron.
       b. In the **Inventory/Price Cron** list, select **Enable** to enable the inventory and price sync cron.
9. Click on the **Chunk Size Setting** tab and it will expand as:

Chunk Size Setting

Validation Size [global]: `10`
Chunk size for validate Product .

Upload [global]: `10`
Chunk size for Upload Product .

Inventory/ Price Update [global]: `1`
Chunk size for Inventory And Price Update .

Sync Status [global]: `10`
Chunk size for Product Status Sync.

a. In the **Validation Size** field, enter the chunk size for the products. The products that will get validated before being uploaded on Qoo10 would be the same as the number you enter in this field.

b. In the **Upload** field, enter the number of products that you want to upload in one go from Magento to Qoo10.

c. In the **Inventory/Price Update** field**,** enter the chunk size of the products. The inventory will be updated in one batch for the number of products that you enter in this field.

d. In the **Sync Status** field**,** enter the chunk size of the products. The number of products that you will be able to sync the status for the number that you enter in this field.

Click on **Save Config** Button and the configurations will get saved and the success message appears.

4. Account Settings

To Manage Accounts on Qoo10,

- Go to the Magento 2 admin panel.
- On the left navigation bar, click **Qoo10 Integration.**
- When the menu appears, click **Accounts.**
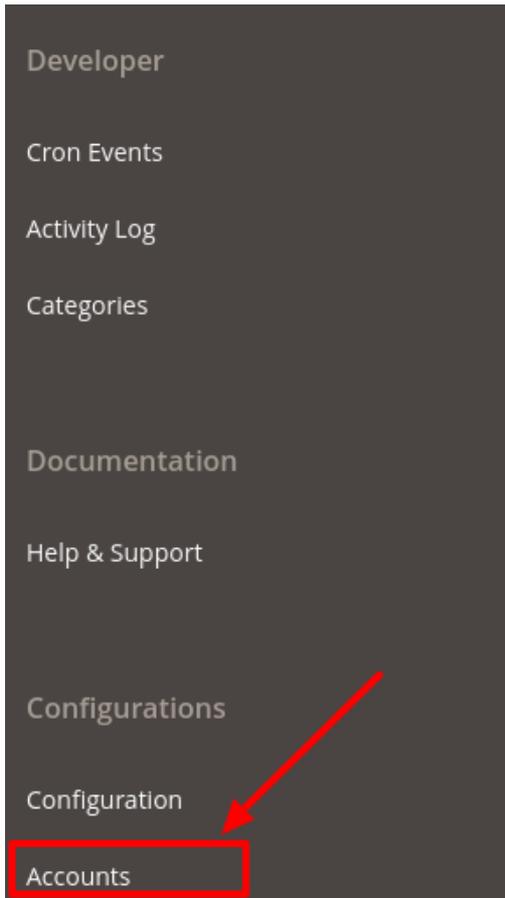

- On clicking it, you will be navigated to the page as shown below,

- To add a new account, click on the **Add Account** button on the top right corner.

Manage Account

- You'll be redirected on a new accounts page:

- In the **Account Information** tab, enter the following:
    - Enter the **Account Code** in the first section
      NOTE: The account code is for your own recognition
    - You can choose the current status of the account under the section **Account Status.**
    - In the **Account Store** section choose the view of the store.
    - Once all the actions have been taken so far, click on the **Save** button on the top right of the page.
- Now click on Shop Information Tab, and enter the following details:

Shop Information

Country ∗	Qoo10 Global ▼
Language	Default ▼
Shop Name ∗	
User Id ∗	
Shop Password ∗	
Signature Key ∗	
Token	

Token autometically filled when you authorized your shop.

Valid/Invalid	Un Authorized ▼

- In **Country**, select the Qoo10 country.
- In **Language**, select the language you want to choose.
- In **Shop Name**, enter the name of your shop.
- In **User Id**, enter your user id of the qoo10 shop User Id.
- In **Shop Password**, enter the password you want for your shop.
- In the **Signature Key** option, enter the key.
- In the **Token** option, it gets filled automatically once you authorize your account.
- Once all the actions have been taken so far, click on the **Save** button on the top right of the page.
- You are redirected back to the accounts page.

To Validate the Account:

- Click on the authorize button associated with the account you wish to validate as shown in the figure below:

Manage Account

5. Manage Profile

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento Store attributes to the Qoo10 attributes. These attributes are applicable to all

the products that are assigned to the profile.

Note: You need to Import Category before creating the profile. To learn about how to import categories, Click here(https://docs.cedcommerce.com/magento-2/33525/?section=qoo10-categories)
.

Admin can perform the following tasks:

- Add a new profile
- Edit the existing profile
- Delete the profile
- Submit Actions on the Manage Profile page

5.1. Add New Profile

To Add a New Profile,

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:

3. Click **Profile Manager**.
   The **Manage Profile** page appears as shown in the following figure:

4. Click the **Add New Profile** button.

The **New Profile** page appears as shown in the following figure:

5. In the left panel, under the **Profile Information** section, do the following steps:
    a. In the **Profile Code** box, enter a profile code.
       Note: It is only for internal use. Use the unique profile code.

b. In the **Profile Name** box, enter the name of the profile.
    Note: Use the unique name to identify the profile.
c. In the **Profile Status** list, select **Enable** to enable the profile.
    Note: The Disable option disables the profile

6. Click the **Save Profile** button.

7. In the left navigation panel, click the **Profile Configurations** menu.
   The page appears as shown in the following figure:

a. Under the **Product Global Settings**, if you want to change any setting at profile level then you can edit here else you can select the **Use Default** checkbox adjcant to it and the configuration settings will be updated.
b. Under the **Qoo10 Inventory Rules**, if you want to change any setting at profile level then you can edit here else you can select the **Use Default** checkbox adjacent to it and the configuration settings will be updated.

8. Click the **Save Profile** button.

9. In the left navigation panel, click the **Mapping** menu.
   The page appears as shown in the following figure:

Add Attribute

a. In the right panel, go to the **Category Mapping** section.
b. Under **Category Mapping**, do the following steps:
   i. In the Account, select the account.
   ii. In the **Root Level Category** list, select the required **Qoo10** category that you want to map.
   iii. In the **Child Level Category** list, select the required child category.
      Depending upon the selection of the category and the sub-categories, the Qoo10, and Magento attribute appear under the **Qoo10 / Magento Attribute Mapping (Required/ Optional mapping)** section if exist.
c. Go to the **Qoo10 / Magento Attribute Mapping (Required/ Optional mapping)** section.

d. Under **Qoo10 / Magento Attribute Mapping (Required/ Optional mapping)**, do the following steps:
   i. In the **Qoo10 Attribute** column, select the required Qoo10 attribute to map it with the corresponding Magento store attribute.
   ii. In the **Magento Catalog Attribute** column, select the required Magento store attribute to map it with the corresponding Qoo10 attribute.
   iii. Click the **Add Attribute** button to add more attributes, if required.

iv. Repeat the steps to map all the required Qoo10 attributes to the corresponding Magento store attributes.

e. Goto **Qoo10/Magento Attribute Mapping for Update Product** section.

f. Under **Qoo10/Magento Attribute Mapping for Update Product,** do the following steps:

    i. In the **Qoo10 Attribute** column, select the required Qoo10 attribute to map it with the corresponding Magento store attribute.

    ii. In the **Magento Catalog Attribute** column, select the required Magento store attribute to map it with the corresponding Qoo10 attribute.

    iii. In the **Default Value**, enter the value.

    iv. Click the **Add Attribute** button to add more attributes, if required.

    v. Repeat the steps to map all the required Qoo10 attributes to the corresponding Magento store attributes.

g. Go to the **Qoo10 / Magento Attribute Mapping (Variant Attribute Mapping)** section.

h. Under **Qoo10 / Magento Attribute Mapping (Variant Attribute Mapping)**, do the following steps:

    i. In the **Qoo10 Attribute** column, select the required Qoo10 attribute to map it with the corresponding Magento store attribute.

    ii. In the **Magento Catalog Attribute** column, select the required Magento store attribute to map it with the corresponding Qoo10 attribute.

    iii. Click the **Add Attribute** button to add more attributes, if required.

    iv. Repeat the steps to map all the required Qoo10 attributes to the corresponding Magento store attributes.

i. Click the **Save Profile** button.

j. In the left navigation panel, click the **Profile Products** menu.

The page appears as shown in the following figure:
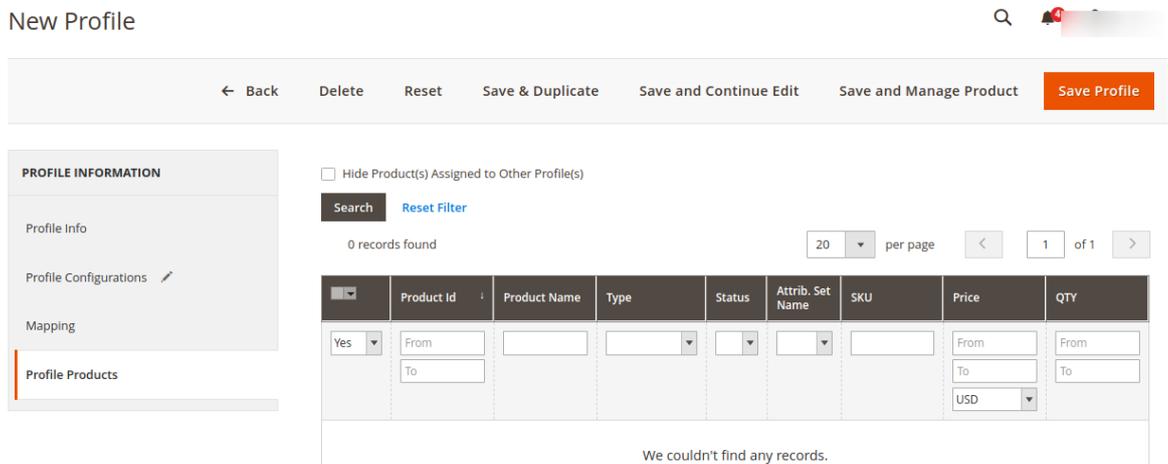

Since no products are assigned to the profile, there are no products listed in the table.

k. Click the **Reset Filter** link.

All the products are listed in the table will be shown.

l. Select the checkboxes associated with the required products that you want to assign to the new profile.

Note: Admin can assign a product only to one profile.

If the selected product is already assigned to some other profile, then a warning dialog box appears.

Click the **OK** button to remove the selected product from the profile to which it is already assigned.

m. Click the **Save Profile** button.

The profile is saved and listed on the **Manage Profile** page.

## 5.2. Edit the existing Profile

To Edit Existing Profile,

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:

3. Click **Profile Manager**.
   The **Manage Profile** Page appears as shown below:

4. Scroll down to the required profile.
5. In the **Action** column, click **Edit**.
   The required profile page appears as shown in the following figure:

6. Make the changes as per the requirement.
7. Click the **Save Profile** button.
   The profile is saved and listed on the **Manage Profile** page.
   OR
   To save and manage the products, click the **Save and Manage Product** button.
   OR
   To save and continue the editing, click the **Save and Continue Edit** button.
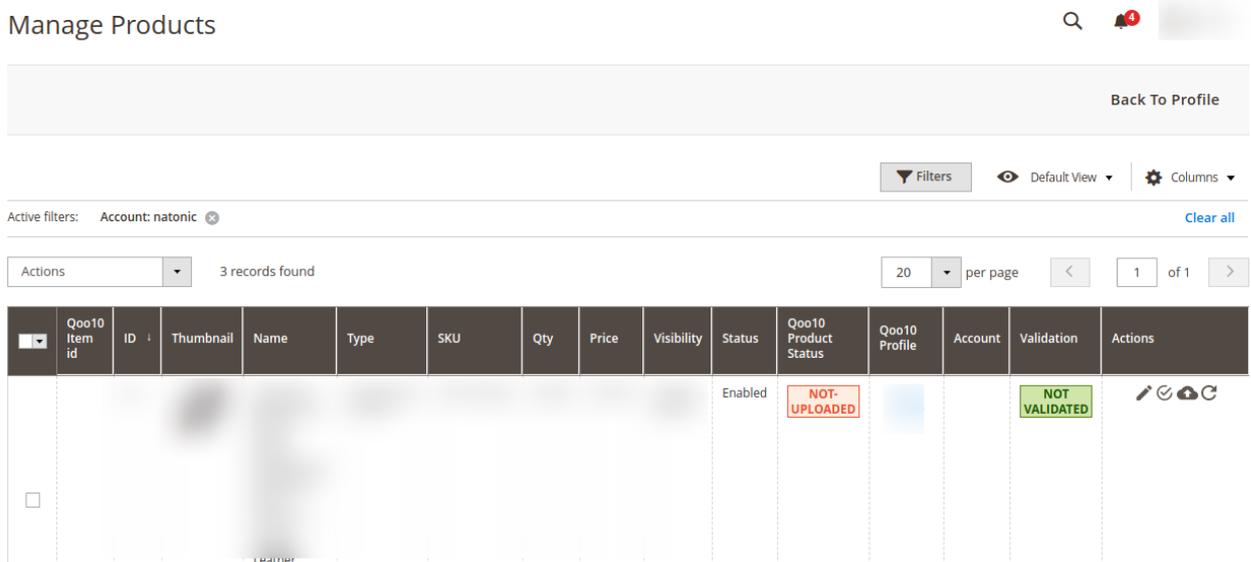

5.3. Delete a Profile

To Delete Existing Profile,

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:
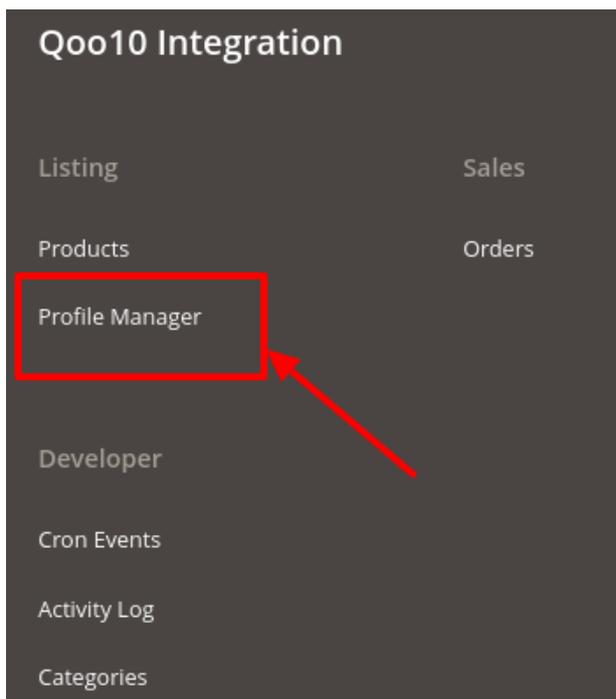

3. Click **Profile Manager**.
   The **Manage Profile** page appears as shown in the following figure:
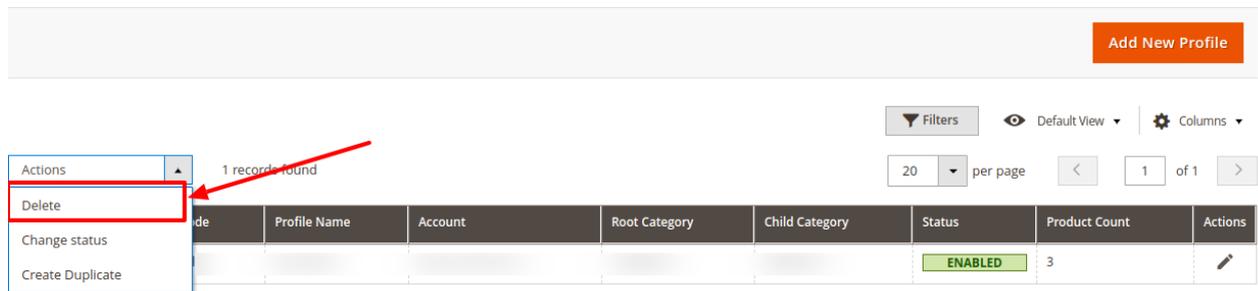

4. Scroll down to the required profile and check the box associated with it.
5. In the **Action** column, click the **Arrow** button.
   A menu appears.
6. Click the **Delete** button.
   A confirmation dialog box appears.
7. Click the **OK** button.
   The profile will be deleted.

5.4. Submit Actions On the Manage Profile Page

In Qoo10 Magento 2 Integration, admin can delete, change the status or create a duplicate of the profiles in bulk.

To Delete the Selected Profiles in Bulk,

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:
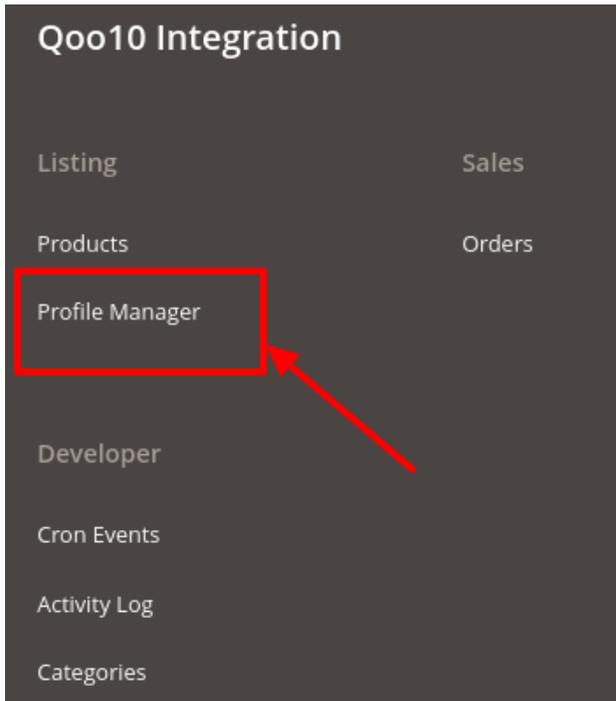

3. Click **Profile Manager**.
   The **Manage Profile** page appears as shown below:
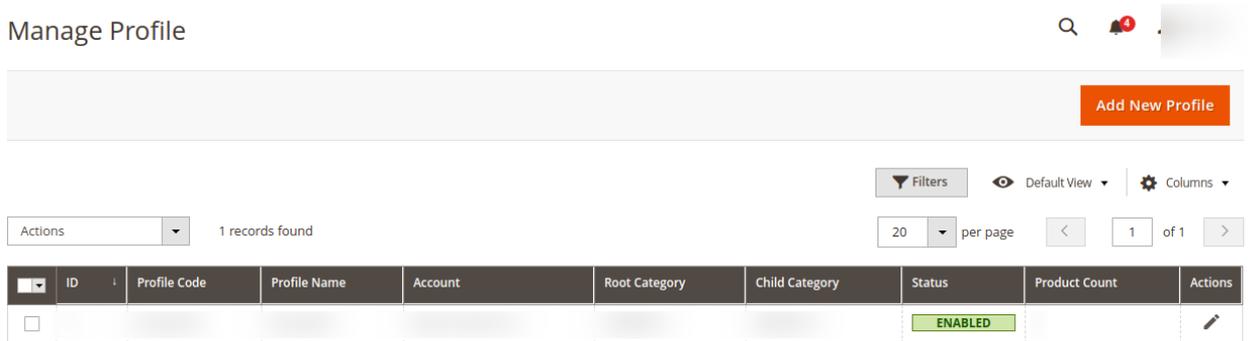

4. Select the checkboxes associated with the required profiles.
5. Click the **Arrow** button next to the **Actions** field.
   The **Actions** list appear as shown in the following figure:
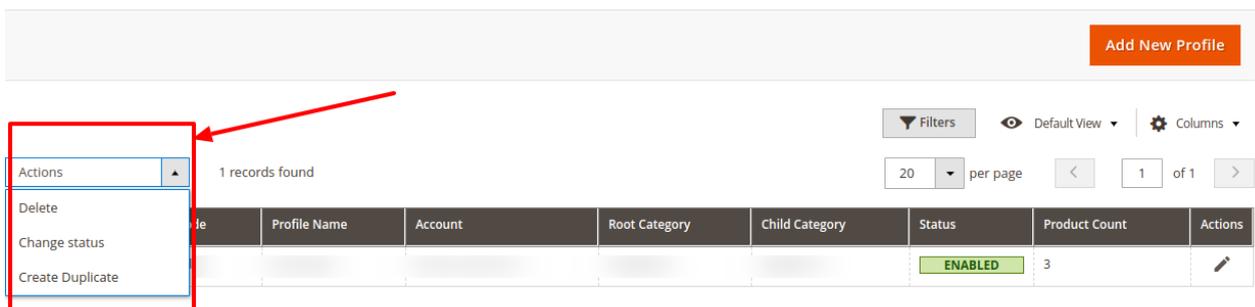

6. In the **Actions** list, click **Delete.**
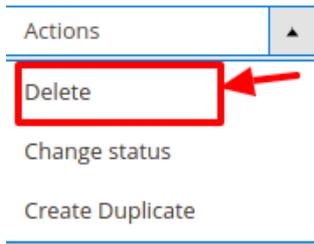

7. A confirmation dialog box appears. Click the **OK** button.
The selected profiles are deleted.

To Change the Status(Enable or Disable) the Selected Profiles in Bulk,
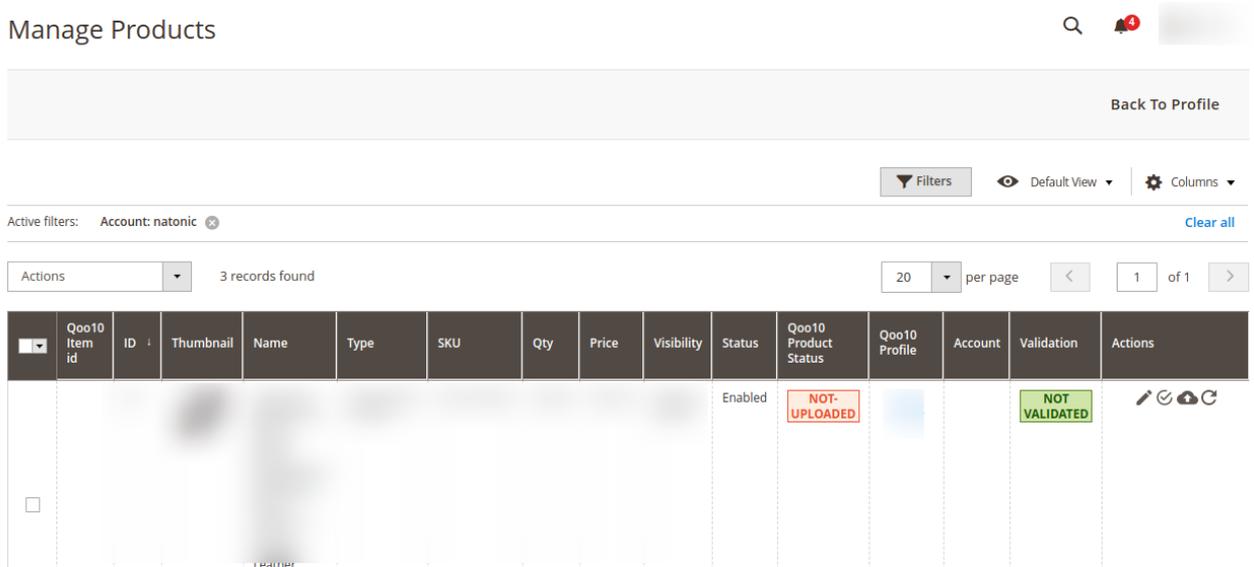

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Profile Manager**.
The **Manage Profile** page appears as shown below:

4. Select the checkboxes associated with the required profiles.
5. Click the **Arrow** button next to the **Actions** field.
   The **Actions** list appear as shown in the following figure:

6. In the **Actions** list, click **Change Status.**

7. Click **Enable** or **Disable** as per your requirement.

8. The selected profiles will be enabled/disabled.

To Create a Duplicate of Profiles,

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:
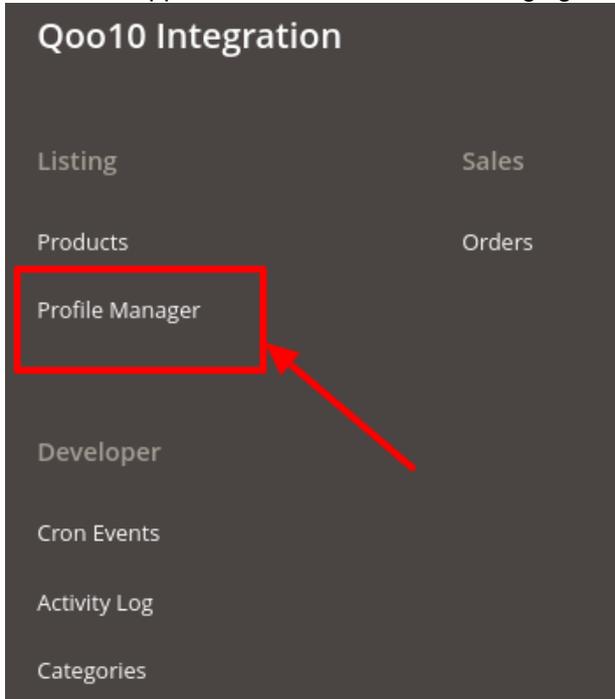

3. Click **Profile Manager**.
   The **Manage Profile** page appears as shown below:
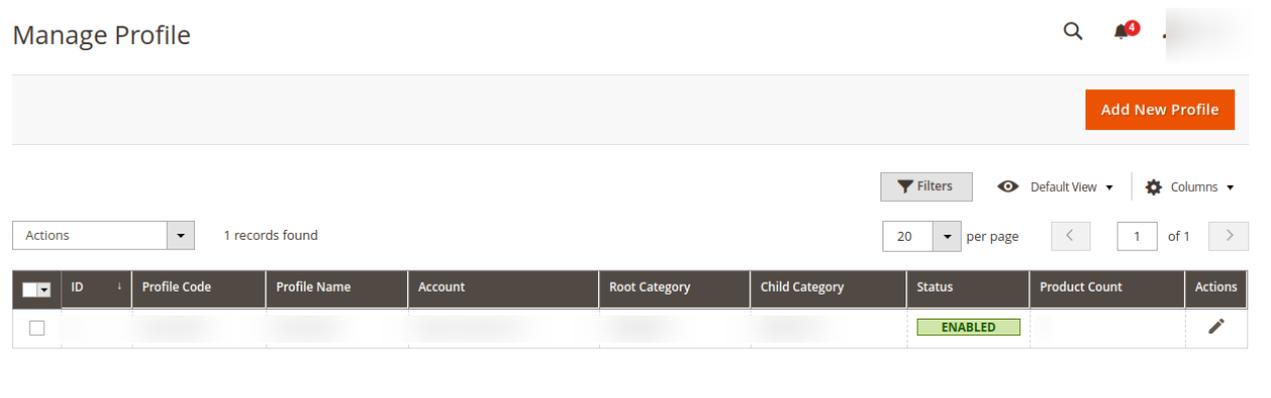

4. Select the checkboxes associated with the required profiles.
5. Click the **Arrow** button next to the **Actions** field.
   The **Actions** list appear as shown in the following figure:
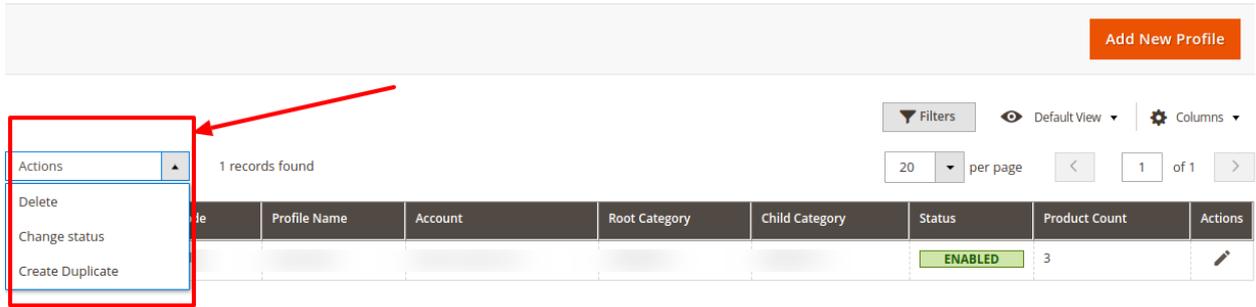

6. In the **Actions** list, click on **Create Duplicate.**
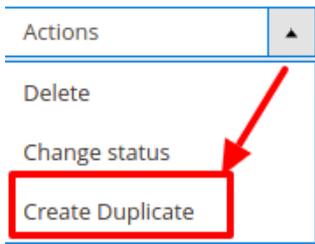

7. The profile gets duplicated and appears on the page.

6. Qoo10 Products

Admin can manage products, create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento store attributes to the Qoo10 attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can perform the following tasks:

- Validate Products
- Validate and Upload Products
- Sync Product Status
- Retire Products
- Update Inventory/Price
- Update Attribute

6.1. Edit a Product

To Edit a Single Product,

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:
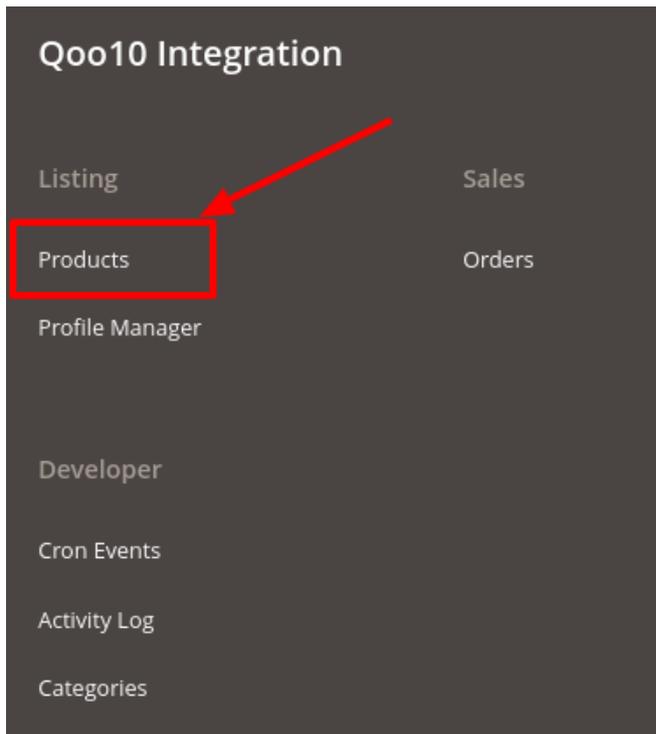

3. Click **Products.**
The **Manage Products** page appears as shown in the following figure:

4. Click the **Edit** button adjacent to the product under the **Actions** column.

5. The required product page appears as shown in the following figure:

6. Enter the required information, and then click the **Save** button.

6.2. Validate a Single Product

To Validate a Single Product,

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:
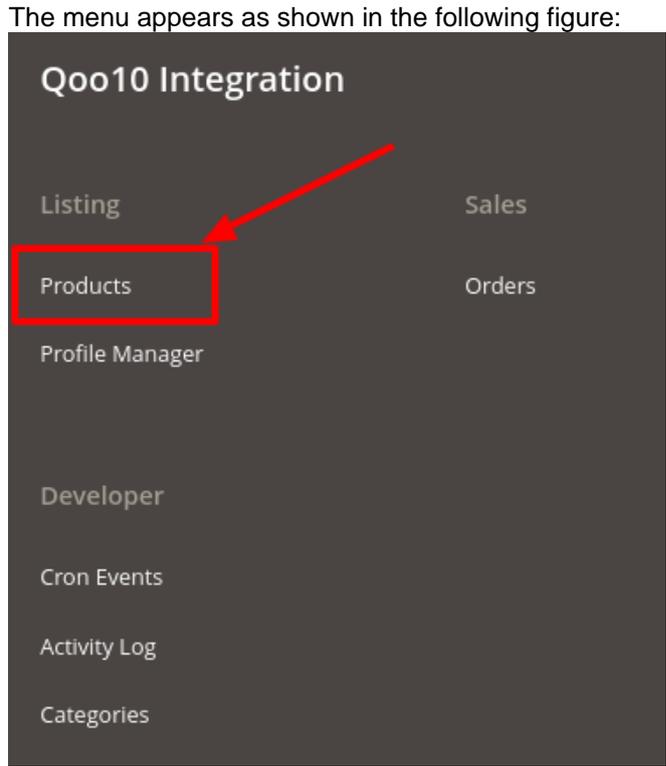

3. Click **Products.**
   The **Manage Products** page appears as shown in the following figure:

4. Click the **validate** button adjacent to the product under the **Actions** column.

5. The product validation message will appear.

6.3. Upload Single Product

To Upload a Single Product,

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:
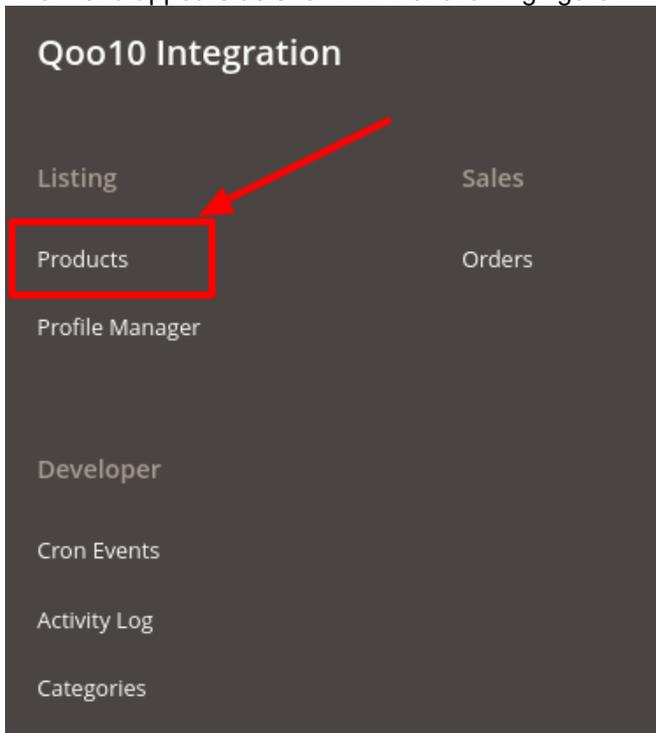

3. Click **Products.**

The **Manage Products** page appears as shown in the following figure:
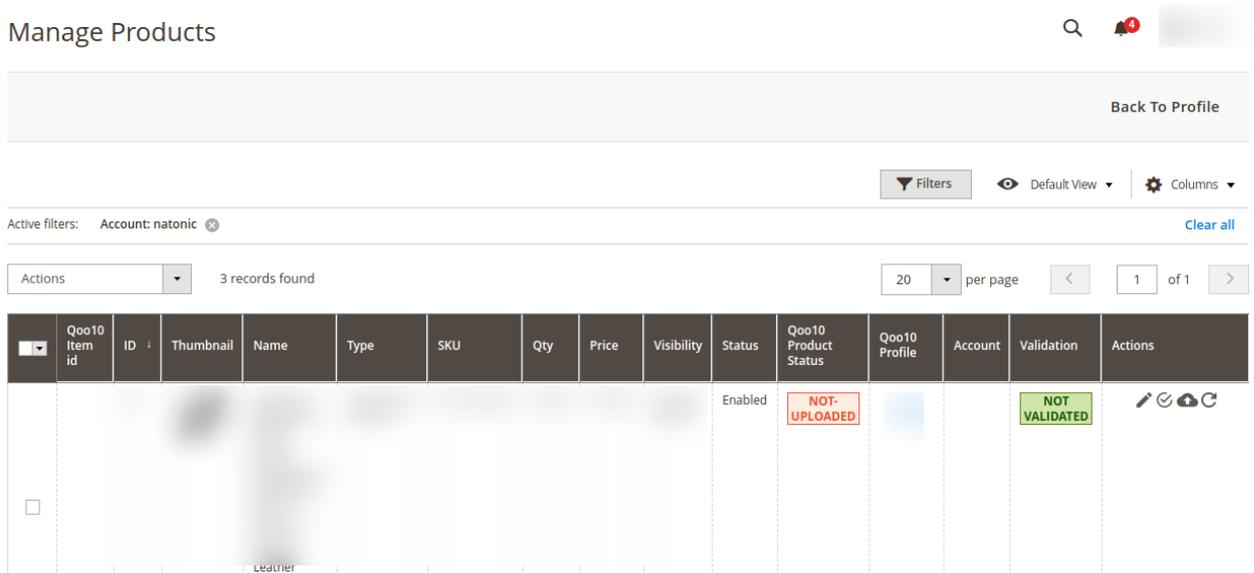

4. Click the **Upload** button adjacent to the product under the **Actions** column.
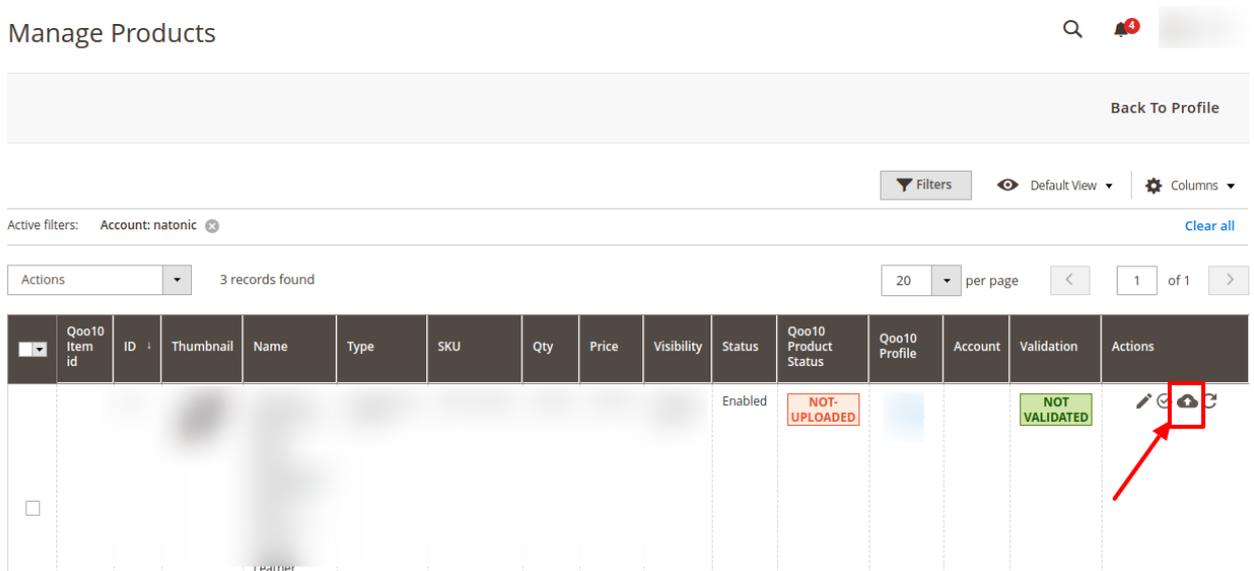

5. If the product is uploaded successfully, then the success message appears on the top of the page.
If there is an error, then the error message appears on the top of the page.

6.4. Sync a Single Product

To Sync a Single Product,

1. Go to the **Magento 2 Store Admin** panel.

2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu.
   The menu appears as shown in the following figure:
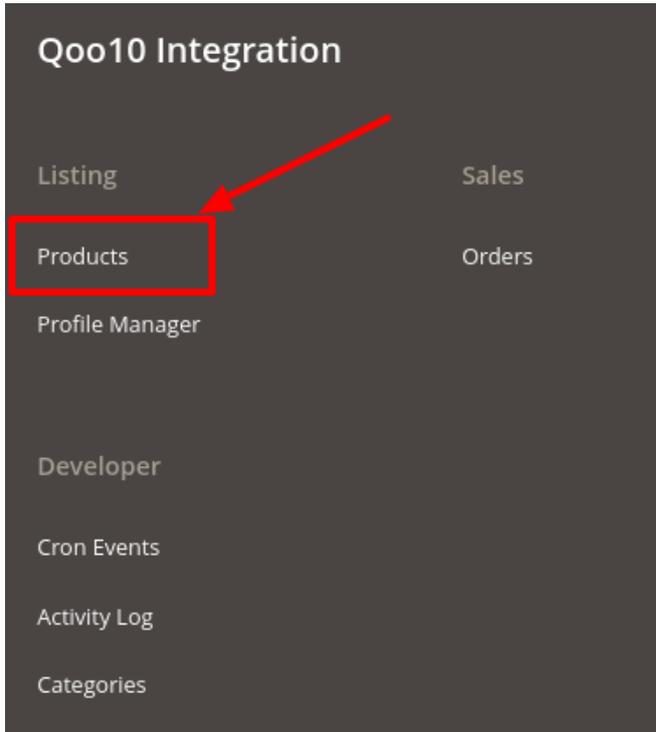

3. Click **Products.**
   The **Manage Products** page appears as shown in the following figure:

4. Click the **Sync** button adjacent to the product under the **Actions** column.

5. The product will be synced.

7. Qoo10 Orders

Admin can do the following tasks while managing the Qoo10 orders:

- Fetch New Orders
- View Qoo10 Orders

7.1. Fetch New Qoo10 Orders

To Fetch New Orders,

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 Integration** menu.
   The menu appears as shown in the following figure:
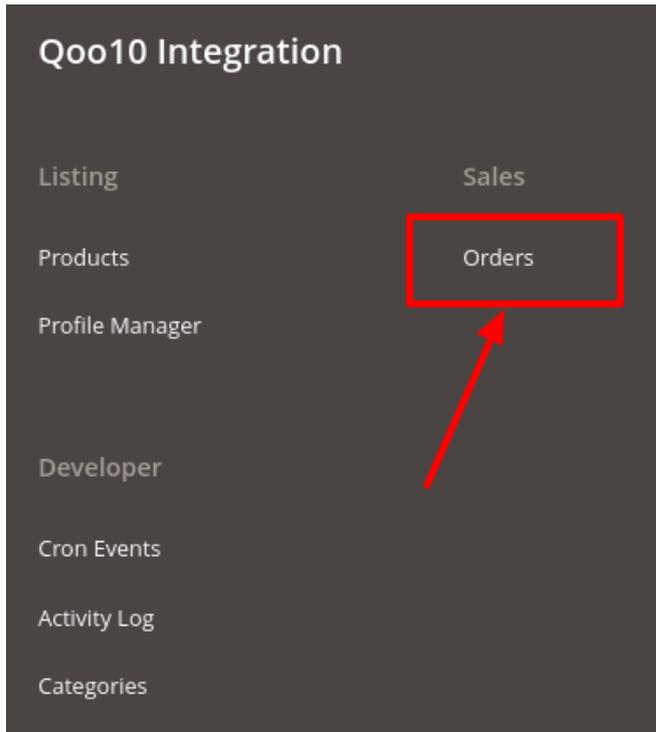

3. Click **Orders**.
   The **Qoo10 Order** page appears as shown in the following figure:
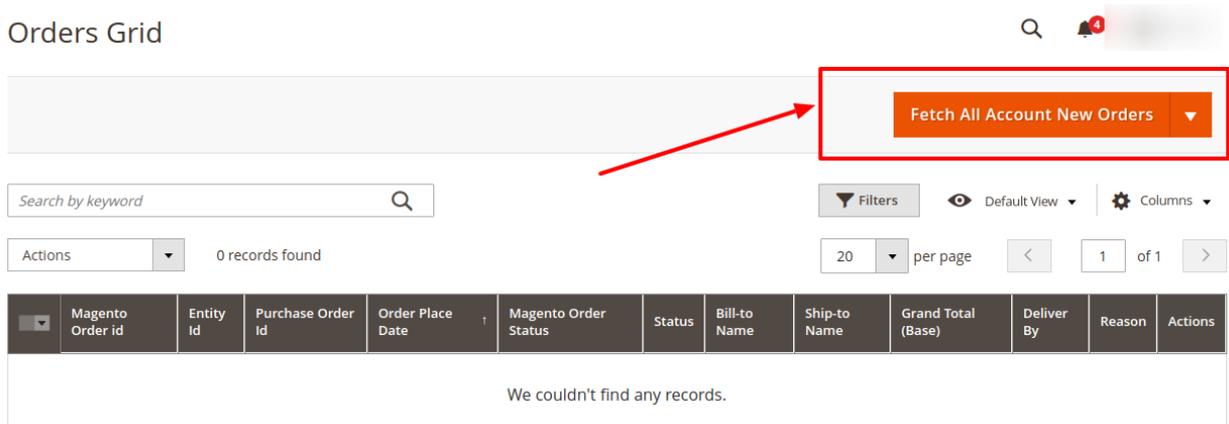

4. Click on **Fetch All Account New Orders,** and all the orders will get fetched from the Qoo10.
5. If the order is imported successfully then, a new record is found in the Orders Grid table.

7.2. View Qoo10 Orders

To View Qoo10 Orders,

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **Qoo10 Integration** menu.
   The menu appears as shown in the following figure:

3. Click **Orders**.
   The **Qoo10 Order** page appears as shown in the following figure:

4. Now Click on the Magento ID associated with the order you wish to view.
5. You will be redirected to a page containing the full information pertaining to the order.
6. Then under Shipment details, you can enter the shipment details of the order.

8. Developer Options

The Developer section covers the following information:

- Cron Events
- Activity Log
- Categories

8.1. Cron Events

To View Qoo10 Cron Grid,

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu, and then click **Cron Events**
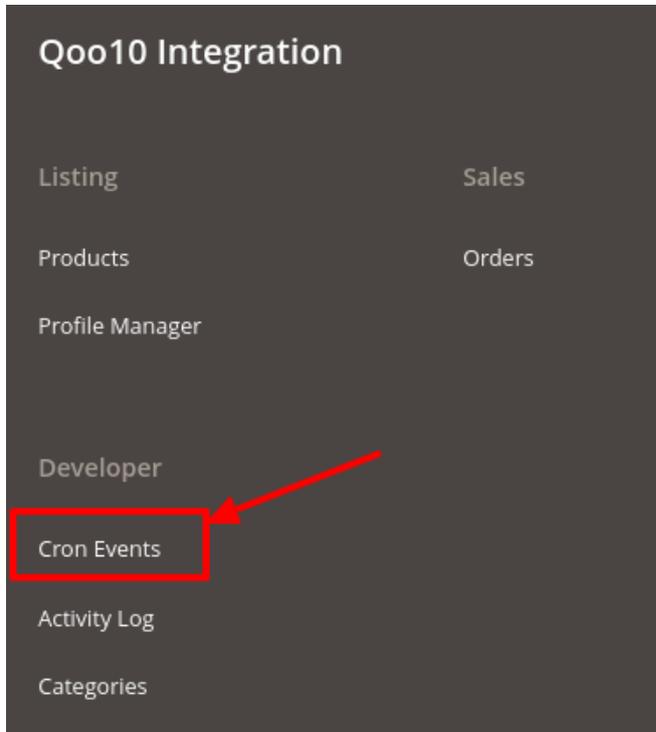

3. The **Cron Grid** page appears as shown in the following figure:

To Delete Selected Crons:

1. Select the crons by checking the corresponding boxes.
2. Click on **Actions** on the top left side of the page.
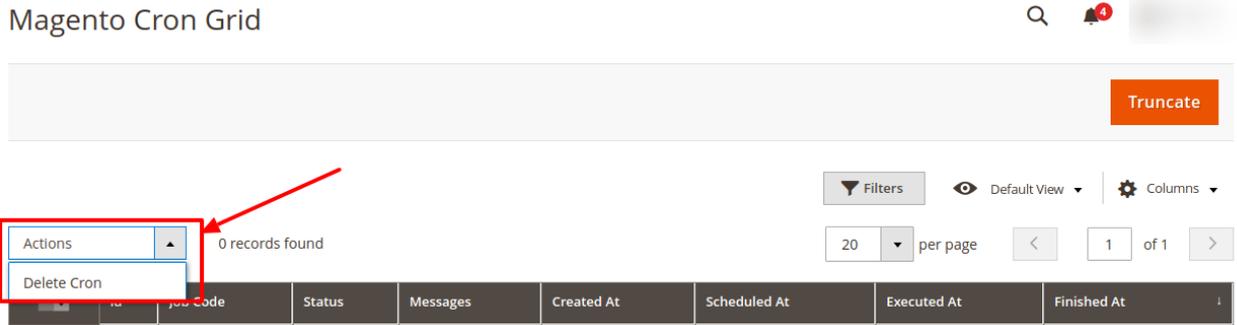

3. Click **Delete**.
4. Selected crons will be deleted.

To Truncate the Crons,

1. Select the crons by checking the corresponding boxes.
2. Click on the **Truncate** button on the top right side of the page.
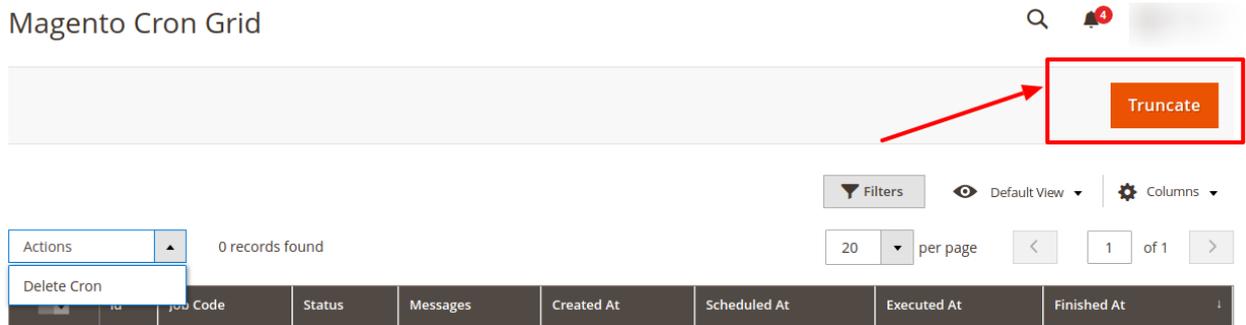

3. All the selected crons will be truncated.

8.2. Activity Logs

To View Qoo10 Log Grid,

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu, and then click **Activity Logs**
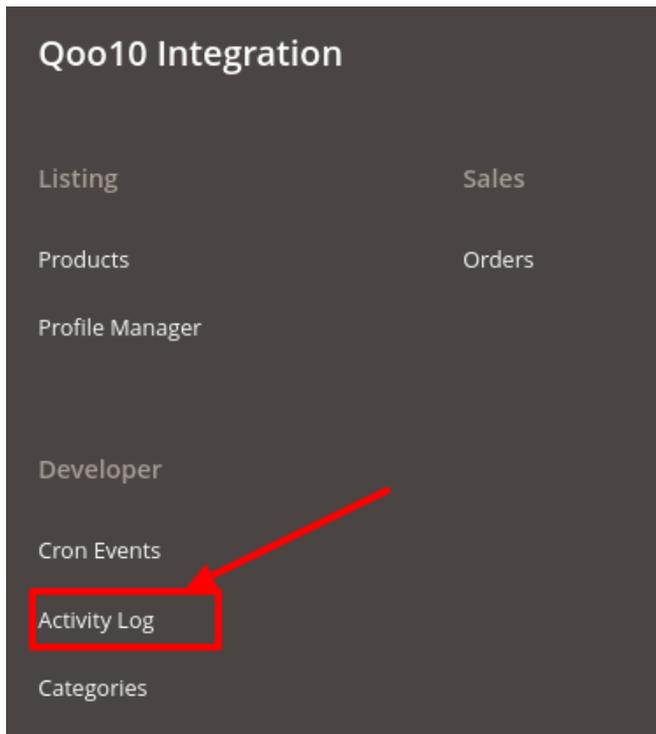

3. The **Qoo10 Log Grid** page appears as shown in the following figure:

To Delete Selected Logs:

1. Select the logs you want to delete.
2. Click **Actions** on the top left side of the page.
3. Click **Delete Logs.**
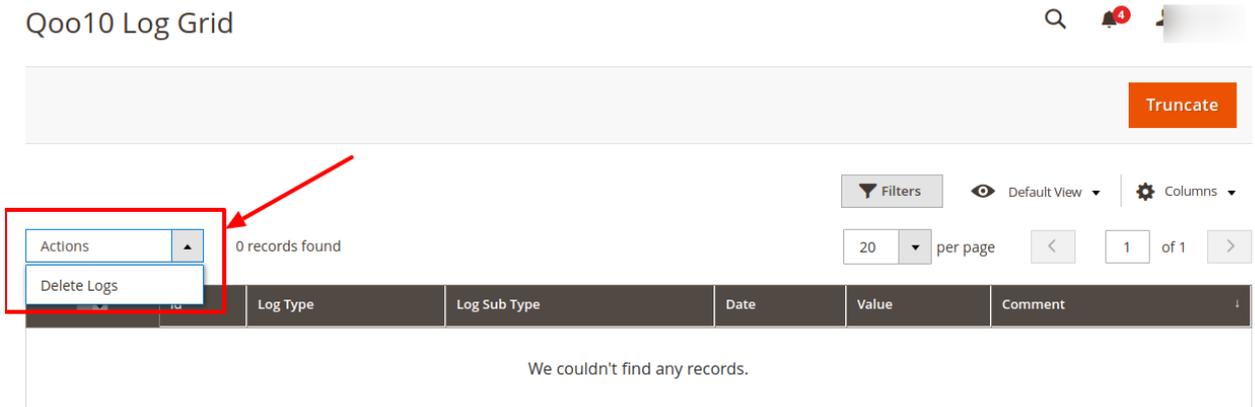

4. Selected logs will be deleted.

To Truncate Logs,

1. Click the **Truncate** button on the top right side of the page.
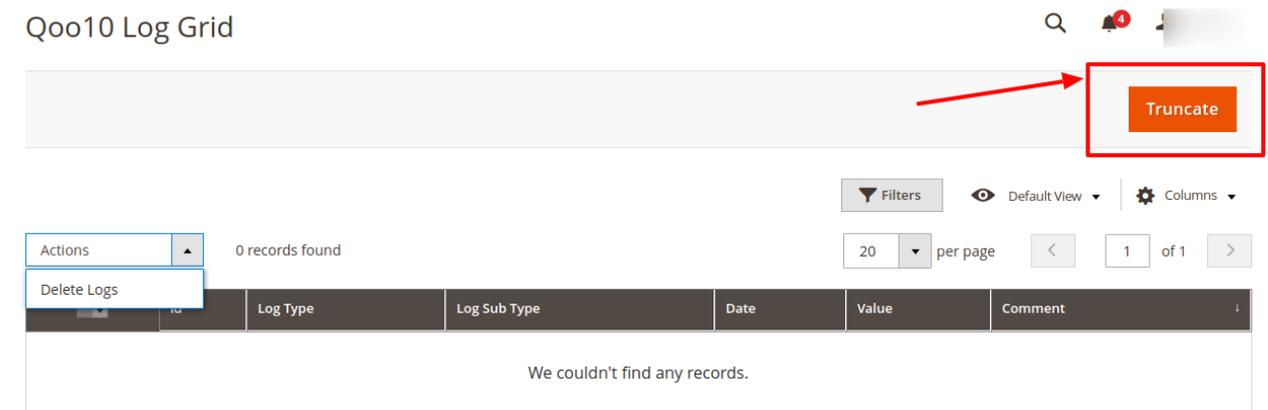

2. All the selected logs will be truncated.

8.3. Categories

To View Qoo10 categories Details,

1. Go to **Magento Admin** Panel.
2. On the **Qoo10 Integration** menu, click **Categories**.
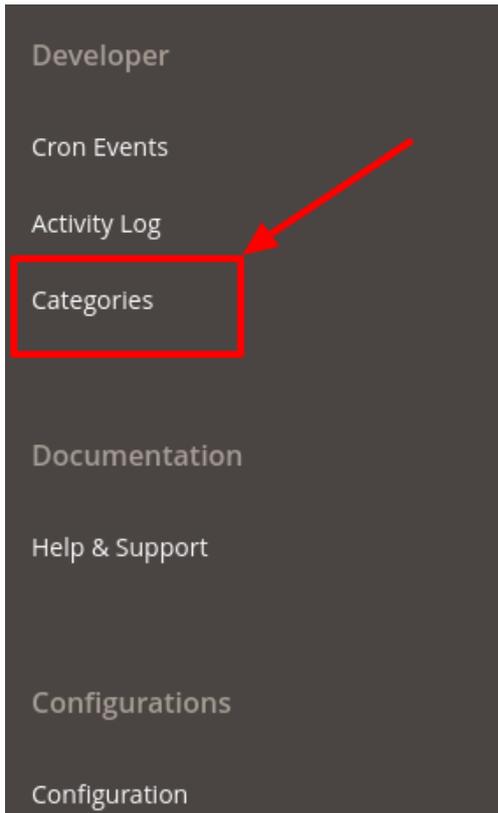

The **Manage Categories** page appears as shown in the following figure:
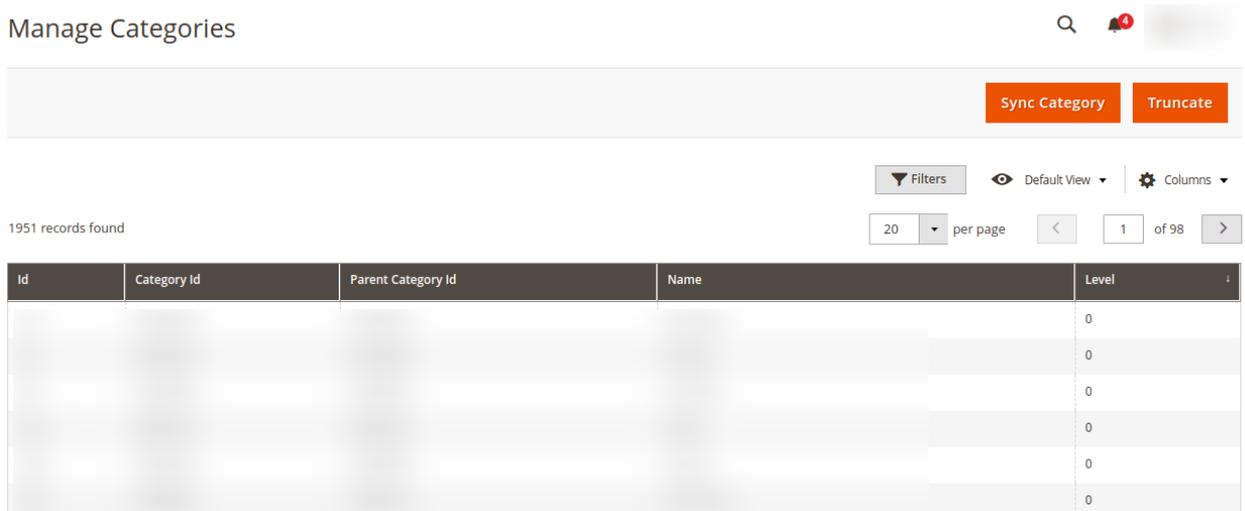

3. Now in order to sync the Qoo10 categories with your Magento 2 store categories, click on **Sync Categories** Button on the top.
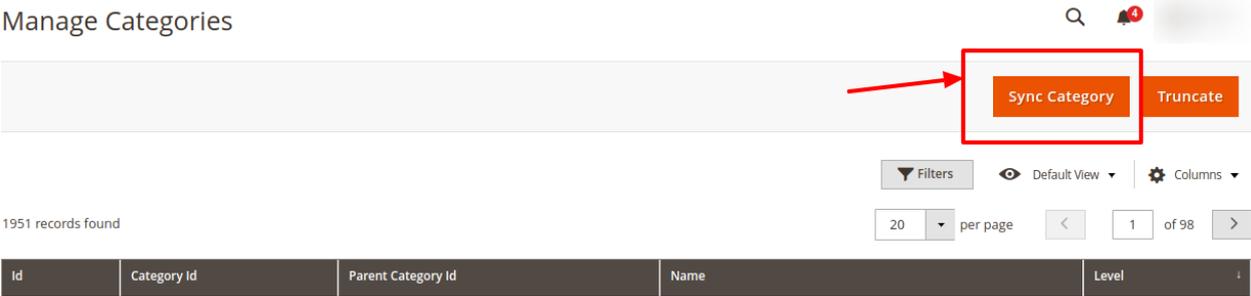

4. A confirmation message appears.
5. If you wish to remove the previous categories or make amends, Click on the **Truncate Button** the top right corner:
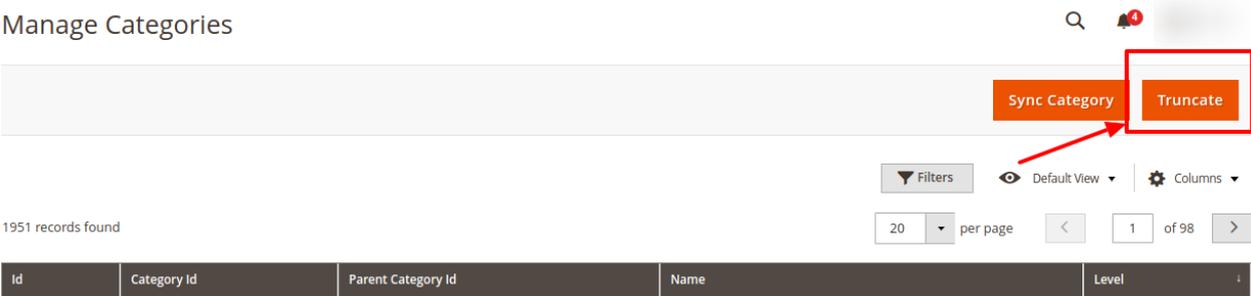

6. All the previous categories will get removed.

9. Help & Support

To View Help and Support Section,

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **Qoo10 INTEGRATION** menu, and then click **Help & Support**.

3. The **Help & Support** page appears as shown in the following figure:

4. Under **Quick Support,** you may see the different ways to get in touch with us.
   a. You may **call** us at the number given on the page.
   b. Click **Send us an E-mail** and your mailbox will get opened and you may mail us your question or query.
   c. Click **Connect via Skype** and you will be able to join us on Skype instantly where we are available 24×7.
5. In the **Documentation section,** On clicking the Qoo10 Integration Extension User Guide By CedCommerce, the user will be navigated to the guide/document to integrate the Magento store with Qoo10.
