1. Overview

Making its name in the eCommerce world, OnBuy is a true marketplace. With the aim to grow strong partnerships with business sellers and maintaining healthy metrics via customer reviews, efficient shipping times and customer service ratings Onbuy currently has over thousands of sellers and over 10 million products listed on it.

Onbuy Integration for Magento by CedCommerce offers Management of your products on a centralized platform, wherein you can easily list your products on Onbuy directly from existing Magento marketplace. Management of inventory and price is synchronous and gets updated followed by any activity. Furthermore, tracking and order fulfillment can be achieved through CedCommerce integration.

Integration also offers management of inventory, with greater flexibility, providing you with several ways to manage it at discrete levels with Onbuy.com Order cancellations from the customer's end are retrieved simultaneously to cancel the order ensuring that you don't ship items that were canceled.

Key Features of Onbuy Integration Extension by CedCommerce:

- **Bulk Upload System:** Bulk product upload service from cedcommerce is your ultimate solution to be spared from hassles of operational overload in product uploading.
- **Profile-based product upload:** It allows the admin to upload their product to profile based on Onbuy Marketplace.
- **Stock Update:** Stocks are updated automatically on both ends as stock status updated in your local shop or as an order is marked shipped by Onbuy.
- **Onbuy Order Management:** The orders can be easily acknowledged or canceled through the centralized order management system.
- **Synchronization:** Auto synchronization of the product listing, order, inventory, return and refund, and pricing at regular intervals is established between Magento and Onbuy.com.
- **Notification Errors:** If any error occurs, there is a feed error feature helping you to know what the error is.
- **Crons:** Crons automate the process of Price, Inventory and Order management.
- **Rejected Products Notification:** If any product containing some invalid details is rejected, then its information is fetched from the automatically synchronized requests along with the error due to which it is rejected.
- **Return And Refunds:** Refunds are processed back to the original payment method used to purchase the order. Refund is also possible through extension.

2. Installation of Onbuy Magento Extension

To install the extension follow the given steps:

1. Go to the **Magento Admin Panel**.
2. On top, you will find a navigation bar. Point to the **System** menu. You will see a drop-down menu like this,

3. Point to the **Magento Connect** menu, and then click on **Magento Connect Manager**. The page then appears as shown in the following figure:

The screenshot shows the Magento Connect Manager interface. At the top, there's a dark header with the 'Magentoconnect MANAGER' logo. Below the header, there are tabs for 'Extensions' and 'Settings', and links for 'Return to Admin' and 'Log Out'. The main content area is divided into several sections:

- Settings:** A section with a checkbox for 'Put store on the maintenance mode while installing/upgrading/backup creation' (checked), and a checkbox for 'Create Backup' with a dropdown menu set to 'Database'.
- Install New Extensions:** A section with two numbered steps: '1 Search for modules via [Magento Connect](#).' and '2 Paste extension key to install:' followed by an input field and an 'Install' button.
- Direct package file upload:** A section with two numbered steps: '1 Download or build package file.' and '2 Upload package file:' followed by a 'Browse...' button, the text 'No file selected.', and an 'Upload' button.
- Manage Existing Extensions:** A section with a 'Check for Upgrades' button and a 'Commit Changes' button. Below this, it says 'Channel: Magento Community Edition' and 'Clear all sessions after successfull install or upgrade: '. Below this is a table of installed extensions.

Package Name	Installed	Actions	Summary
Cm_RedisSession	1.9.2.4 (stable)	<input type="text" value="v"/>	Redis session
Interface_Adminhtml_Default	1.9.2.4 (stable)	<input type="text" value="v"/>	Default interface for Adminhtml
Interface_Frontend_Base_Default	1.9.2.4 (stable)	<input type="text" value="v"/>	This is a Magento themes base
Interface_Frontend_Default	1.9.2.4 (stable)	<input type="text" value="v"/>	Default interface for Frontend

4. Scroll down to the **Onbuy_Integration** Package.

5. In the **Actions** column, select the **Install** option from the list.

6. Click the **Commit Changes** button.

7. Auto-scroll console contents screen appears and the extension is installed after the process.

3. Onbuy Configuration Settings

After installing the extension, you need to move to the configuration settings.

To set up the configuration settings in the Magento Admin panel

- Go to the **Magento Admin** panel.
- On the top navigation bar, point to the **Onbuy** menu.

The menu appears as shown in the following figure:

Click **Configuration**.

The **Onbuy Configuration** page appears as shown in the following figure:

Click the **Onbuy Settings** tab.

The tab is expanded and the relevant field appears under the **Onbuy Settings** section.

Onbuy Setting		
Enabled	<input type="text" value="Yes"/>	[WEBSITE]
Api Url	<input type="text" value="https:// /v2/"/> <small>▲ Enter Folloing URL-- https://api.onbuy.com/v2/</small>	[GLOBAL]
Onbuy consumer Key	<input type="text" value="xxx"/>	[GLOBAL]
Onbuy secret Key	<input type="text" value="xxx"/>	[GLOBAL]
Debug mode	<input type="text" value="No"/> <small>▲ Choose Yes to Start Onbuy Integration in debug mode. It will capture log for the debug process.</small>	[GLOBAL]
Select Store	<input type="text" value="Default Store View"/> <small>▲ Select only single store.</small>	[GLOBAL]
Choose Default Payment Method for Onbuy Orders	<input type="text" value="No Payment Information Required"/>	[GLOBAL]
Order Prefix for Onbuy Orders	<input type="text" value="xxx"/> <small>▲ Odrer Prefix for Onbuy Order Id.Example: For Fg_10001 Use : Fg_ , for FG-10001 use : FG-</small>	[GLOBAL]
Store Admin Email Id	<input type="text" value="xxx@xxx.com"/> <small>▲ Get Email When New Onbuy Order Imported.Example: owner@example.com</small>	[GLOBAL]
Enable Automated Shipment	<input type="text" value="No"/> <small>▲ Automated Shipment is supported for shipstation and shipworks only .</small>	[WEBSITE]
Enable Order For Disabled or Out of Stock Product	<input type="text" value="No"/> <small>▲ Product which is out of stock or disabled at a time of order fetch, those items included in order item or not.</small>	[WEBSITE]

Under **Onbuy Settings**, do the following steps:

- In the **Enabled** list, select **Yes** to enable the extension features.
- In the **API Url** enter the Following URL- **https://api.onbuy.com/v2/**
- In the **Consumer key**, enter the key that you are provided by Onbuy once you register yourself with its seller panel.
- Enter the **Onbuy Secret Key** enter in the next column.
- Choose Yes in the **Debug Mode**. By doing so the extension will start capturing the log for the debug process.
- In the **Select Store**, choose the store from where you want your products to be integrated into Onbuy marketplace.
- In the **Choose Default Payment Method for Onbuy Orders** list, select **Onbuy.com**.
- In the **Order Prefix for Onbuy Orders** select the Order Prefix for Onbuy Order Id. This is for your own recognition. For example, you can use the prefix "ON" in front of the order id. The product can be identified as ON154832.
- In the **Store Admin Email Id** box, enter the email Id on which you want to receive a mail whenever an order is placed for your product, on Onbuy.
- Through this extension, sellers can **Enable Automated Shipment** which is supported for Shipstation and Shipworks by selecting Yes.
- In **Enable Order For Disabled or Out of Stock Product**, choose Yes if you wish to sell the items which are out of stock or disabled at a time of order fetch.

- Click on **Save Config** to save the details that you have entered.

Now move on to the **Cron Settings** by clicking on the tab to view the following fields.

Onbuy Cron Management		
Cron Chunk Size	500	[GLOBAL]
	▲ Select chunk size for cron jobs to sync product on onbuy.com	

- In **Cron Chunk Size** enter the chunk size for the cron jobs to sync product on **onbuy.com**
- Click on **Save Config** to save the entered details.

Now move to product edit settings. Click and the section expands as shown:

Auto Sync With Onbuy	No	[GLOBAL]
	▲ If product is disabled or deleted it auto archive the product on onbuy.com.	
Show Upload Button	Yes	[GLOBAL]
	▲ Show product upload button to onbuy on product edit page.	
Send Configurable (Parent) Product's Name	No	[GLOBAL]
	▲ Choose yes if you want to send parent product's name during configurable products upload	
Send Configurable (Parent) Product's Price	No	[GLOBAL]
	▲ Choose yes if you want to send parent product's price (as same as display in magento frontend) during configurable products upload	
	description (as same as display in magento frontend) during configurable products upload	
Disable Child Products	No	[GLOBAL]
	▲ Choose whether child product need to be archived on onbuy.com once it's parent config product is disabled or deleted	

- In the **Item Inventory Threshold**, enter the minimum value of the inventory for which you want to show your products out of stock. The product will be out of stock if you have inventory items equal or less than the entered number.
- In the **Auto Sync With Onbuy** option, choose yes if you want to automatically sync the inventory and price at regular intervals
- Choose Yes if you want to **Show Upload Button** on the product edit page.
- In the next section, Choose Yes if you want to **send parent product's name** during **configurable**

products upload.

- Now, choose Yes if you want to **send parent product's price** during **configurable** products upload.
- Same goes for the rest, Choose Yes if you want to **send parent product's price, image and description** during **configurable** products upload.
- You can Choose whether child product need to be archived on onbuy.com once it's parent config product is disabled or deleted by selecting Yes or No in the **Disable Child Products** section.

Now move on to **Onbuy Required Fields Mapping With Magento Attributes**. The section opens up as:

Onbuy Required Fields Mapping With Magento Attributes

Choose product attribute codes from dropdown used for sending information on Onbuy.

Identifier Mapping

Identifier	Magento Attribute
UPC	Choose Magento At
EAN	Choose Magento At

[GLOBAL]

▲ Map Identifier with your magento attributes if already exist.

Brand

onbuy_brand

[GLOBAL]

▲ Attribute type - Text or
1 to 100 characters

Summary Points

- aliexpress_brand
- aliexpress_productid
- aliexpress_product_status
- aliexpress_product_url
- aliexpress_product_validation
- allegro_images_url
- allegro_item_id
- allegro_offer_create
- allegro_offer_id
- allegro_offer_update

[GLOBAL]

▲ Attribute type - Text or
1 to 100 characters

Product Title

name

[GLOBAL]

▲ Attribute type -Text
5 to 500 characters

Product Description

description

[GLOBAL]

▲ Attribute type -Text
1 to 2000 characters

Onbuy Product Price

Increase By Fixed Percentage

[GLOBAL]

▲ Select to send different product price to **onbuy.com**

Enter Percentage

12

[GLOBAL]

▲ Numeric value Required for **Add % on Magento price**
5 for Example: Magento price + 5% of Magento price.
Off % on Magento price
5 for Example: 5% off on Magento price.

Product Price

Attribute type - Text

[GLOBAL]

▲ Attribute type - Text
Choose to send price with vat or without vat.

Price Vat Rate

0

[GLOBAL]

▲ Attribute type - Text
Do not include % or any other symbols. For example:
20. And This field To be listed as 0 for non-EU based
retailers where VAT is not applicable.

Shipping Settings

Magento Carrier	Onbuy Carrier	
DHL (Deprecated)	Unknown	Delete
		Add Shipping Methods

[GLOBAL]

▲ Set shipping methods.

- In the **Identifier Mapping** section, Perform the identifier settings with the desired product attribute codes from the dropdown list.
- In the **Brand**, select the attribute type brand from the dropdown list.
- In the **Summary Points**, select the points from the list to send to OnBuy.
- In the **Product Title**, map the title of the product from the dropdown list.
- In the **Product description**, map the description of the product from dropdown list.
- In OnBuy Product Price, you may select the price option from the dropdown list.
 - **Default Magento Price:** If this option is selected, the price for which your product will be available on OnBuy will be the same as the price of your product on Magento store.
 - **Increase By Fixed Price:** You may select this option if you want your product price to be increased on Onbuy as compared to your Magento store.
 - By choosing this option, you may enter the amount in the **Enter Amount** box by which you want your product price to be increased on OnBuy as compared to your Magento store. Suppose if you enter 50 in this field and your product is for 100 on your Magento store, then the amount that your product will be available for on OnBuy would be 150 (as the amount entered is 50 for Increase by fixed amount, so the price entered would be added to the price for which product is available on Magento store).
 - **Increase By Fixed Percentage:** You may use this option if you want the price of your Magento product to be increased on OnBuy by a certain percentage. By choosing this option, you may enter the **Enter Amount** box the percentage amount by which you want your product price to be increased on OnBuy as compared to your Magento store. Suppose if you enter 20 in this field and your product is for 100 on your Magento store, then the amount that your product will be available for on OnBuy would be 120 (as 20% of 100 is 20 which gets added to 100).
 - **Decrease By Fixed Price-** You may use this option if you want the price of your Magento product to be decreased on OnBuy. By choosing this option, you may enter the **Enter Amount** box the amount by which you want your product price to be decreased on OnBuy as compared to your Magento store. Suppose if you enter 50 in this field and your product is for 100 on your Magento store, then the amount that your product will be available for on OnBuy would be 50 (as the amount entered is 50 for Decrease by fixed amount, so the price entered would be subtracted from the price for which the product is available on Magento store).
 - **Decrease By Fixed Percentage-** You may use this option if you want the price of your Magento product to be decreased on OnBuy by a certain percent. By choosing this option, you may enter the **Enter Amount** box the percentage amount by which you want your product price to be decreased on OnBuy as compared to your Magento store. Suppose if you enter 20 in this field and your product is for 100 on your Magento store, then the amount that your product will be available for on OnBuy would be 80 (as 20% of 100 is 20 which gets subtracted from 100).
- In the **Product Price**, you can map with the price attribute.
- In **Price Vat Rate**, enter the Vat rate you wish to apply to the product.
- In **Shipping settings**, Magento carriers are mapped with onbuy carriers. You can add the shipping Methods by clicking on the button.

Now move on to **Onbuy Recommended Fields Mapping With Magento Attributes**. The section opens up as:

Onbuy Recommended Fields Mapping With Magento Attributes

Choose product attribute codes from dropdown used for sending information on Onbuy.

Language	<input type="text" value="en"/>	[GLOBAL]
	▲ Attribute type - Text Two digit ISO code (lower case) of the language of the text fields of the feed, such as Title, Description, AttributeColor etc.	
Attribute Size	<input type="text"/>	[GLOBAL]
	▲ Attribute type - Text Map onbuy attribute size with magento attribute.	
Attribute Color	<input type="text" value="color"/>	[GLOBAL]
	▲ Attribute type - Text Map onbuy attribute color with magento attribute.	
Currency	<input type="text" value="EUR"/>	[GLOBAL]
	▲ Attribute type - Text Three letter ISO code (Upper Case) of the currency of the price fields of the feed.	
Discount Price	<input type="text" value="Discount Price Without VAT"/>	[GLOBAL]
	▲ Attribute type - Text Choose to send discount price with vat or without vat.	
Discount Price Without Vat	<input type="text"/>	[GLOBAL]
	▲ Attribute type - Text Choose to send discount price with vat or without vat.	

- In the **Language** option, select the language code.
- In the **Attribute Size**, map the OnBuy attribute size with the Magento attribute.
- In **Attribute Color**, map OnBuy attribute color with Magento Attribute.
- In the **Currency** option, select the currency for the product price.
- In **Discount Price**, select the price to be sent with VAT.
- In **Discount Price Without Vat**, select if you want to send a discount price without Vat.

Now move on to **Onbuy Optional Fields Mapping With Magento Attributes**. The section opens up as:

Onbuy Optional Fields Mapping With Magento Attributes

Choose product attribute codes from dropdown used for sending information on Onbuy.

ISBN-13	<input type="text" value=""/>	[GLOBAL]
	▲ Attribute type -Text The type of standard product code - 13 digits	
ISBN-10	<input type="text" value=""/>	[GLOBAL]
	▲ Attribute type -Text The type of standard product code - 10 digits	
Manufacturer	<input type="text" value="country_of_manufacture"/>	[GLOBAL]
	▲ Attribute type - Select or Text Manufacturer information must be within - 100 characters	
Restock Date	<input type="text" value=""/>	[GLOBAL]
	▲ Attribute type - Select or Text Map attribute which can select the date when a product which is currently marked as OUTFSTOCK in 'StockStatus' will be back in stock and available for order.	
Lead Time	<input type="text" value="€"/>	[GLOBAL]
	▲ Attribute type - Select or Text It indicates the approximate number of days delay from order to the item being dispatched from the warehouse. Note: Only to be used if the time exceeds 24 hours as 1 day is the default product value.	
Package Weight	<input type="text" value="weight"/>	[GLOBAL]
	▲ Attribute type - Numeric Map Shipping weight information with magento attribute. Value must be >= 0.01	
Discount Price Start Date	<input type="text" value=""/>	[GLOBAL]
	▲ Attribute type -Text 5 to 500 characters	
Discount Price End Date	<input type="text" value=""/>	[GLOBAL]
	▲ Attribute type -Text 5 to 500 characters	

- In **ISBN-13**, select the type of product code of 13 digits.
- In **ISBN-10**, select the type of product code of 10 digits.
- In the **Manufacturer**, select the manufacturer information.
- In **Restock Date**, select the date when you want the out of stock products to be stocked and available.
- In **Lead Time**, select the approximate number of days delay for the order to be dispatched.
- In **Package Weight**, map shipping weight information with the Magento attribute.
- In **Discount Price Start date**, select the date on which discount starts.
- In **Discount Price End Date**, select the date on which discount ends.

4. Onbuy Brands Settings

Onbuy only allows sellers to sell with selective brands. It's not necessary that all the products listed on your store are with the same attribute name and value as the Onbuy marketplaces.

To perform Onbuy brand settings:

- Go to the **Magento Admin** panel.
- On the top navigation bar, point to the **Onbuy** menu.

The menu appears as shown in the following figure:

- Click **Onbuy Brands**.
- The **Onbuy Brand Search** page appears as shown in the following figure:

- Enter the brand of products you wish to sell on Onbuy.
- As you do so the brand with the related name appears with the brand id as shown in the figure:

- From here you can know about the brand id and name and can start selling products of this brand.

5. Manage Onbuy Profile

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento attributes to the Onbuy attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add a new profile
- Edit the existing profile
- Delete the profile

5.1. Add A New Profile

To add a new profile

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the Onbuy tab, and then point to the **Manage Profiles** menu.

The menu appears as shown in the following figure:

3. Click **Manage Profiles**. The Onbuy profile listing page appears as shown:

Onbuy Profile Listing [Add New Profile](#)

Page 1 of 1 pages | View 20 per page | Total 1 records found [Reset Filter](#) [Search](#)

Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected Actions [Submit](#)

ID	Profile Name	Status	Total Item	Active Item	Inactive Item	Action
6	test	Active	8	0	8	Action

4. Click the **Add New Profile** button.

The **Add Onbuy Profile** page appears as shown in the following figure:

5. In the right panel, under **Profile Information**, do the following steps:

1. In the **Profile Code** box, enter a profile code.
Note: It is only for internal use. Use the unique profile code with no spaces. Start with small letters.
2. In the **Profile Name** box, enter the name of the profile.
Note: Use the unique name to identify the profile.
3. In the **Status** list, select **Active** to enable the profile.
Note: The Inactive option disables the profile.

- Click the **Save and Continue** button.

6. In the left navigation panel, click the **Onbuy Category Mapping** menu. The page appears as shown in the following figure:

The screenshot shows the 'Add Onbuy Profile' form. On the left is a navigation menu with 'Profile Information', 'Profile Info', 'Onbuy Category Mapping', and 'Profile Products'. The main form has a top bar with 'Add Onbuy Profile' and buttons for 'Back', 'Reset', 'Save', 'Save and Continue Edit', and 'Save and Upload Product'. Below this is the 'Onbuy Category Mapping' section with a search box and a dropdown. The 'Onbuy / Magento Attribute Mapping (Required/ Variant mapping)' section contains a table for mapping attributes.

Required Attribute	Onbuy Attribute	Magento Catalog Attribute	Default Value	Action
	product_name	Name		Map Options
	mpn	MPN		Map Options
	product_codes	Onbuy Product Code		Map Options
	price	Price		Map Options
	summary_points	Onbuy summary points		Map Options
	description	Description		Map Options
	brand_name	Onbuy Brand		Map Options
	rrp	Onbuy Price		Map Options
	handling_time	Onbuy Handling Time		Map Options
	product_condition	Onbuy Product Condition [select]		Map Options

1. In the right panel, go to the Onbuy **Category Mapping** section.
2. In the **Category** list, select the required **Onbuy** category that the admin wants to map. Depending upon the selected category, the **Onbuy** and the **Magento** attributes appear under the **Onbuy / Magento Attribute Mapping (Required/ Optional mapping)** section, if exist.
3. Go to the **Onbuy / Magento Attribute Mapping (Variant attribute mapping)** section. Map the configurable attributes to Magento attributes.
4. Click **Save and Continue Edit** button.

7. In the left navigation panel, click the **Profile Products** menu. The page appears as shown in the following figure:

The screenshot shows the 'Add Onbuy Profile' form with the 'Profile Products' section active. It displays a table of products with various columns and filtering options.

Id	Product Name	Type	Attrib. Set Name	SKU	Price	Qty	Status
2	test	Simple Product	Default	test	\$324.00	9259	Enabled
5	test	Simple Product	Default	2prod	\$324.00	0	Enabled

- All the products assigned to the profile are listed in this table.

8. Click the **Reset Filter** button. All the products are listed in the table.

- Select the check boxes associated with the required products to assign them to the new profile.

Note: Admin can assign the product to only one profile.

9. Click the **Save** button. The created profile is saved and listed on the **Onbuy Profile Listing** page.

Or

Click the **Save and Continue Edit** button to save the created profile and continue editing, if required.

Or

Click the **Save and Upload Product** button to save the profile and make ready to upload the product on **Onbuy**. The assigned products are listed on the **Product Manager** page and the success message appears:

5.2. Edit An Existing Profile

To edit the existing profile

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the **Onbuy** tab, and then point to the **Manage Profiles** option and click on it. The menu appears as shown in the following figure:

3. The **Onbuy Profile Listing** page appears as shown in the following figure:

The screenshot shows the 'Privalia Profile Listing' page. At the top right is an 'Add New Profile' button. Below it, there are pagination controls: 'Page 1 of 1 pages | View 20 per page | Total 1 records found'. There are also 'Reset Filter' and 'Search' buttons. Below these are selection controls: 'Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected'. An 'Actions' dropdown menu is set to 'Submit'. The main table has the following structure:

	ID	Profile Name	Status	Total Item	Action
Any	1	Test Profile 1	Active	9	[Dropdown]

- On this page, all the available profiles are listed.

4. Click the required row of the profile that the admin wants to edit.

OR

In the **Action** column, click the arrow button, and then click **Edit Profile**.

The **Edit Onbuy Profile** page appears.

Profile Information

- Profile Info

Profile Information

Profile Code *	<input type="text" value="test"/> <p style="font-size: 0.8em; margin-top: 5px;">▲ For internal use. Must be unique with no spaces. ▲ Profile code must start with small letters.</p>
Profile Name *	<input type="text" value="test"/> <p style="font-size: 0.8em; margin-top: 5px;">▲ Give some name to profile to identify them</p>
Status *	<input type="text" value="Active"/> <p style="font-size: 0.8em; margin-top: 5px;">▲ Make active to enable the profile</p>

5. Make the changes as per requirement.

6. Click the **Save** button.

The edited profile is saved and listed on the **Onbuy Profile Listing** page.

Or

Click the **Save and Continue Edit** button to save the created profile and continue editing, if required.

Or

Click the **Save and Upload Product** button to save the profile and make ready to upload the product on Onbuy.com.

The assigned products are listed on the **Product Manager** page.

✔ **The configuration has been saved.**
The profile has been successfully saved.

5.3. Delete A Profile

To delete an existing profile

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the Onbuy tab, and then point to the **Manage Profiles** menu.

The menu appears as shown in the following figure:

3. The **Onbuy Profile Listing** page appears as shown in the following figure:

1. On this page, all the available profiles are listed.

4. Click the required row of the profile that the admin wants to delete.

OR

In the **Action** column, click the arrow button, and then click **Delete**. Confirm your action in the dialog box by clicking ok.

5. The profile is deleted and the success message appears:

 Onbuy Profiles deleted successfully

6. Manage Onbuy Products

On the **Product Manager** page, the admin can perform the following tasks:

- View and edit the product information
- Upload a single product
- View the error log if any error exists in any product details
- Submit certain actions on the selected products

6.1. Bulk Actions on Products

The admin can perform the following actions on the selected products available on the **Product Manager** page:

- **Validate Selected Product(s)**: Validates the product before uploading it to the Onbuy website. It displays the corresponding validation error if any. If there is no error, it confirms that the product is ready to upload.
- **Validate and Upload Product(s)**: Uploads all the validated products on Onbuy at one time. It means, the user can upload all the validated products in one click.
- **Sync Onbuy Item Status**: Update and sync the current status of the products from your Magento store to Onbuy.
- **Sync Inventory Offer(s)**: Update and synchronize the inventory offers in an instant.

To validate Products

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the Onbuy tab, and then point to the **Manage Products** menu.

The menu appears as shown in the following figure:

3. Click **Manage Products**. The Onbuy Product Manager listing page appears as shown:

Product Manager Back

<input type="checkbox"/>	7 M001-GREEN	\$12.00	TEST GREEN	0	Catalog, Search	Enabled	Simple Product	NOT_UPLOADED	INVALID	Edit

3. Scroll down to the required product.

4. Click the **Edit** button in the last column named action, adjacent to the product.

ID	SKU	Price	Name	Qty	Visibility	Status	Type	Onbuy Product Status	Validation	Action
Any		From: <input type="text"/> To: <input type="text"/> In: USD		From: <input type="text"/> To: <input type="text"/>						
<input type="checkbox"/>	2 test	\$324.00	test	9259	Catalog, Search	Enabled	Simple Product	NOT_UPLOADED	VALID	Edit
<input type="checkbox"/>	5 2prod	\$324.00	test	0	Catalog, Search	Enabled	Simple Product	NOT_UPLOADED	VALID	Edit
<input type="checkbox"/>	6 M001-RED	\$12.00	TEST RED	2	Catalog, Search	Enabled	Simple Product	NOT_UPLOADED	INVALID	Edit

A red arrow points to the 'Edit' button in the 'Action' column for the first product row (ID 2), which is also highlighted with a red box.

The selected product information page appears as shown in the following figure:

The screenshot shows the 'General' tab of the product edit page for 'T Shirt (Default)'. The form contains the following fields and values:

- Name: T Shirt
- Description: test
- Short Description: test
- SKU: test
- Weight: 452.0000
- Set Product as New from Date: (empty)
- Set Product as New to Date: (empty)
- Status: Enabled
- URL Key: test
- Visibility: Catalog, Search
- Country of Manufacture: (empty)

5. In the left navigation panel, click the **Onbuy** menu. The page appears as shown in the following figure:

The screenshot shows the 'Catch' tab of the product edit page for 'T Shirt (Default)'. The form contains the following fields and values:

- Catch Product Id: (empty)
- Catch Brand: Nike
- Catch Product Validation: ^valid*
- Catch Product Feed Id: (empty)
- Catch Product Errors: 0
- Catch Product Status: Uploaded
- Shipping Length: (empty)
- Shipping Width: (empty)
- Color: (empty)
- Shipping Height: (empty)
- Shipping Weight: (empty)
- Mature Content: No
- Product Offer Condition: NEW

6. Enter the required information, and then click the **Save** button.

7. To sync the Magento Product with **Onbuy**, click the **Sync With Onbuy** button.

7. Manage Onbuy Orders

Using the **Manage Orders** menu, the admin can perform the following tasks:

- View Onbuy Orders
- View Failed Orders
- Delete Orders
- Cancel Orders

7.1. View Onbuy Orders

The user can fetch and view all the order details fetched from **Onbuy**.

To fetch and view Onbuy Orders

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the **Onbuy** menu, and then point to the **Manage Orders** menu.

The menu appears as shown in the following figure:

3. Click **View Onbuy Orders** and the **Onbuy Orders Details** page appears as shown in the following figure:

Onbuy Orders Details Fetch Latest Onbuy Orders

Page 1 of 1 pages | View 20 per page | Total 1 records found Export to: CSV Export Reset Filter Search

If the order is imported successfully then, a new record is found in the **Onbuy Order Details** table as shown in the above figure.

Notes:

- Orders are automatically imported through CRON every 10 minutes.
- Whenever the latest orders are imported from **Onbuy**, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported into the Magento admin panel.
- If no Order is imported, then check the Failed order log on the **Failed Onbuy Orders Import Log** page.
- Order are auto-rejected on **Onbuy** in the following conditions:
 - When **Onbuy** Product SKU does not exist in Magento.
 - When Product is Out of Stock in Magento.
 - When a product is disabled in Magento.

7.2. View Failed Orders

The users can view the list of failed Onbuy orders on the **View Failed Orders** page.

In the following conditions, Orders are not imported from Onbuy:

- If any product in the Onbuy Order is Out of Stock in Magento.
- If any product in the Onbuy Order is disabled in Magento.
- If any Product does not exist in Magento or is deleted from Magneto after uploading to Onbuy.
- If the selected Payment Method in Onbuy System Configuration Setting is not available in Magento.

To view Onbuy failed orders

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the **Onbuy** menu, and then point to the **Onbuy Orders** menu.

The menu appears as shown in the following figure:

3. Click **Onbuy Failed Orders**. The Failed Onbuy Orders Import Log page appears as shown in the following figure:

[Clear Failed Import Order Logs](#)

5. You can **cancel** the order(s) by selecting and clicking on submit.

6. The selected order(s) will be canceled.

8. Onbuy Developer Settings

Under the developer section the admin will be able to perform the following actions:

- Onbuy Crons
- Onbuy Categories

8.1. Onbuy Categories

As already mentioned in the profile section, the admin has to Map the Onbuy Category to the Magento Category to upload products on Onbuy.com.

To map the Onbuy categories to the Magento categories

1. Go to **Magento Admin Panel**.
2. On the top navigation bar, move the cursor over the **Onbuy** menu, and then point to the **Extras** menu. The menu appears as shown in the following figure:

3. Click **View Onbuy Category**.

The **Onbuy Category Listing** page appears as shown in the following figure:

Onbuy Category Listing

Page 1 of 492 pages | View 20 per page | Total 9823 records found [Reset Filter](#) [Search](#)

ID	Category Id	Name
2	2	Clothing & Shoes > Jewelry & Watches > Rings
3	3	Clothing & Shoes > Jewelry & Watches > Watches & Accessories > Watches
4	4	Clothing & Shoes > Jewelry & Watches > Watches & Accessories > Watches
5	5	Clothing & Shoes > Jewelry & Watches > Watches & Accessories > Watches
6	7	Clothing & Shoes > Jewelry & Watches > Pendants & Necklaces > Pendants

On this page, all the **Onbuy Categories** details are listed.

8.2. Onbuy Crons

The Onbuy Crons page displays all the **Cron** details scheduled in Onbuy.

To view the Onbuy Cron details:

1. Go to the **Magento Admin** panel.
2. On the top navigation bar, move the cursor over the Onbuy menu.

The menu appears as shown in the following figure:

3. Under Extras, Click **Onbuy Cron**.

The **Onbuy Cron Status** page appears as shown in the following figure:

Onbuy Cron Status

Page 1 of 1 pages | View 20 per page | Total 0 records found Reset Filter Search

ID	Job Code	Status	Messages	Created At	Scheduled At	Executed At	Finished At

All the running crons are listed here.

9. Onbuy Knowledge Base

This page displays a knowledge base link to view and understand the working of the extension properly and get the clarifications on **Onbuy Integration for Magento**.

To view the Onbuy Knowledge Base:

1. Go to the Magento Admin panel.
2. On the top navigation bar, move the cursor over the Onbuy menu.

The menu appears as shown in the following figure:

3. Click **Onbuy Knowledge Base / Support** .

The page appears as shown in the following figure:
