1. Overview

This extension from CedCommerce provides Admin with the authority to create Fyndiq Categories and the dependent attributes on the Prestashop store. It also enables the store owners to establish a mapping of the desired product category on the Prestashop stores for automatic submission of the selected product to the same category on Fyndiq.com.

Fyndiq Integration for the Prestashop Stores enables the admin to manage the Fyndiq orders in their Prestashop stores without making any significant changes to the operational functionalities.

This extension interacts with the Fyndiq Marketplace to integrate the synchronized product listing between Prestashop store and the Fyndiq.com retailers.

It synchronizes the orders, products, pricing, and inventory through establishing the communication between Fyndiq APIs and the Prestashop store.

Key Features of Fyndiq Integration Extension by CedCommerce:

- **Profile Based Product Upload:** Admin can create a profile and map the category and attributes to Prestashop store category and attributes. Then, after assigning the product to the profile can easily upload the product to Fyndiq.
- **Product Category Mapping:** Follows many-to-one category mapping philosophy. Enables the admin to map many categories of the Prestashop stores to the single category of Fyndiq.
- **Synchronized Inventory and Profile Based Pricing:** Auto synchronization of the inventory at regular intervals and product listings along with all the details is established between Prestashop store and Fyndiq.com. Profile-based price increase or decrease.
- **Easy Order Import:** Easy import of orders from Fyndiq marketplace to Prestashop panel.
- **New Order Notifications:** Whenever a new order is fetched from Fyndiq.com, the admin receives a notification.
- **Rejected products notification:** If any product containing some invalid details is rejected, then its information is fetched from the auto synchronization request along with the error due to which it is rejected.
- **Simple and Configurable Product Upload:** Admin can upload the Simple and Configurable types of Prestashop store product on Fyndiq.com. The configurable product in Prestashop stores is treated as a variation product on Fyndiq.com.
- **Automated Shipment:** The shipment process can be automated with Shipstation, Shipworks, Stamps.com, Linnworks, Xtento, ShipRush.
- **Crons:** Cron job automates the process for Inventory, Price, and Order management.
- **Easy Deletion of Products:** Admin can easily delete the products (if required) – either one by one or in bulk.
- **Easy Debug:** Easy debug process for hassle-free products upload on the Fyndiq website.
- **Creation of Prestashop Orders:** Newly placed orders on Fyndiq.com are automatically created in the Prestashop store as well with all the required details as on Fyndiq.com.

2. Fyndiq Integration for Prestashop Extension Installation

To install the module

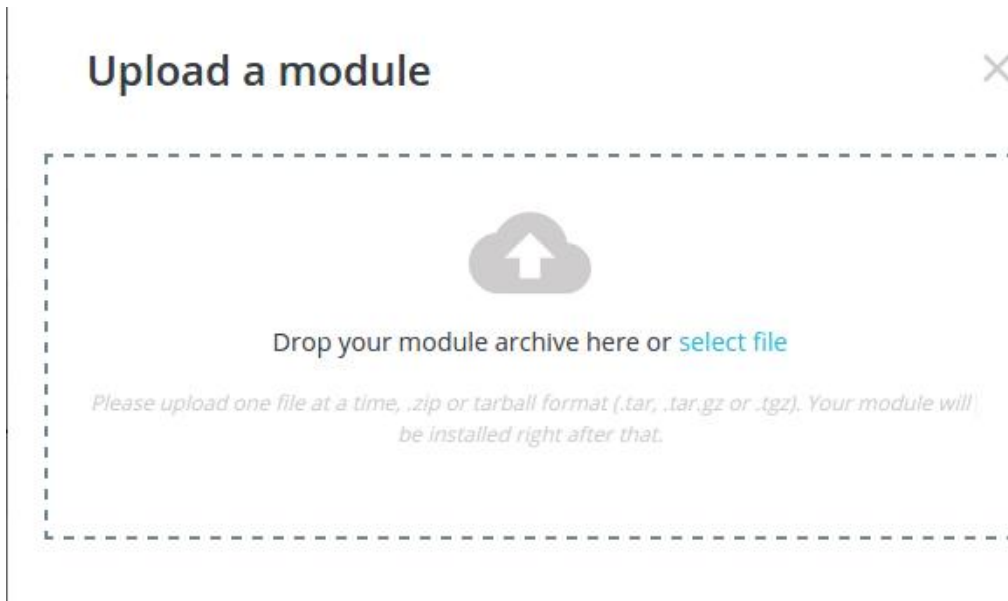

- Go to the **Prestashop Admin** panel.
- In the left navigation panel, place cursor on **Modules** menu. The menu appears as shown in the following figure:

- Click **Modules & Services**. The page appears as shown in the following figure:

- In the right panel, click the **UPLOAD A MODULE** button. A dialog box appears as shown in the following figure:

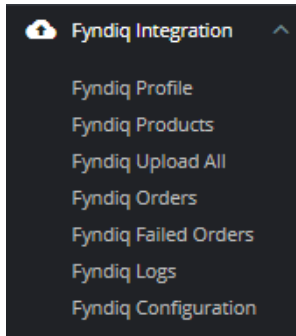

- **Drag and Drop** the module or click the **select file** link to upload the Fyndiq PrestaShop Integration module. The modules are installed and the **Configure** button appears to set the configuration settings. The admin has two options to configure the settings. Either click the **Configure** button that appears while module installation or go to the **Installed Modules** tab and then configure the Integration settings.

3. Fyndiq Configuration Setting

After installing the **Fyndiq PrestaShop Integration** module, the store owner (admin) has to set up the Fyndiq Integrations configurations. Prior to this, the admin has to first create a seller account on Fyndiq seller panel. Once the seller account is created and is approved by Fyndiq, the store owner can use the Fyndiq **Username** and **Password** while setting up the Fyndiq Configuration settings in the PrestaShop Admin panel.

To set up the configuration settings in the PrestaShop Admin panel

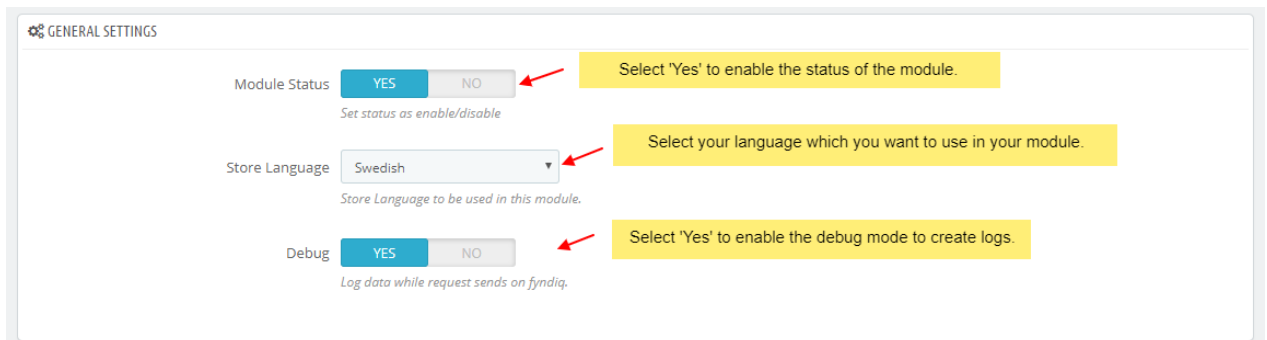

1. Go to the **Prestashop Admin** panel.

2. On the left navigation bar of your dashboard, place cursor on Fyndiq Integration, and click **Fyndiq Configuration** button. The configuration page appears as shown below.

3. General Settings:

Under **General Settings**, do the following steps:

- a. In the Module Status, click the **YES** button in **Enable** to enable the module.
- b. In the **Store Language**, select the language of your store.
- c. In **Debug**, select **YES** if you want the data log to be created.

4. Now Go to **API Settings** section.

The tab appears as shown in figure:

a. In this API Settings, do the following steps:

i. In the Api Mode, select your API mode between Sandbox or Live.

ii. For **Fire URL, Merchant ID** and **Token** data you can get from Fyndiq Seller Account.

5. Now Go to **Product Settings** section.

The tab appears as shown in figure:

6. In the **Product Settings**, do the following steps:

a. In **Price Variant Type**, select the price option that you want for your products on Fyndiq marketplace.

i. **Regular Price:** If you don't want any change in the price of your PrestaShop store products on Fyndiq marketplace.

ii. **Increase Fixed Amount:** You may select this option if you want your product price to be increased on Fyndiq as compared to your PrestaShop store. If you select this option, a box appears as shown below:

- iii. By choosing this option, you may enter in the **Price Variant Value** box the amount by which you want your product price to be Increased on Fyndiq as compared to your PrestaShop store. Suppose if you enter 50 in this field and your product is for 100 on your PrestaShop store, then the amount that your product will be available for on Fyndiq would be 150 (as the amount entered is 50 for **Increase** by fixed price, so the price entered would be added to the price for which product is available on PrestaShop).
- iv. **Decrease Fixed Amount-** You may use this option if you want the price of your PrestaShop product to be decreased on Fyndiq.
 - i. By choosing this option, you may enter in the **Price Variant Value** box the amount by which you want your product price to be decreased on Fyndiq as compared to your PrestaShop store. Suppose if you enter 50 in this field and your product is for 100 on your PrestaShop store, then the amount that your product will be available for on Fyndiq would be 50 (as the amount entered is 50 for **Decrease** by fixed price, so the price entered would be subtracted from the price for which product is available on PrestaShop).
- v. **Increase Fix Percentage-** You may use this option if you want the price of your PrestaShop product to be increased on Fyndiq by a certain percent.
 - i. By choosing this option, you may enter in the **Price Variant Value** box the percentage amount by which you want your product price to be increased on Fyndiq as compared to your PrestaShop store. Suppose if you enter 20 in this field and your product is for 100 on your PrestaShop store, then the amount that your product will be available for on Fyndiq would be 120 (as 20% of 100 is 20 which gets added to 100).
- vi. **Decrease By Fix Percent-** You may use this option if you want the price of your PrestaShop product to be decreased on Fyndiq by a certain percent.
 - i. By choosing this option, you may enter in the **Price Variant Amount** box the percentage amount by which you want your product price to be decreased on Fyndiq as compared to your PrestaShop store. Suppose if you enter 20 in this field and your product is for 100 on your PrestaShop store, then the amount that your product will be available for on Fyndiq would be 80 (as 20% of 100 is 20 which gets subtracted from 100).
- b. In **Disabled Product Upload**, select the status for your products which are disabled, from **Skip Disabled Products** and **Upload with Out Of Stock status**.
- c. In the **Update Product on Product edit**, select **Yes** to enable the cron update product on fyndiq when you edit on store.
- d. In the **Update Inventory/Price on Product Edit**, select **Yes** to enable the update inventory/Price on Fyndiq when you edit product on store.
- e. In the **Delete Product Data on Product delete**, select **Yes** to enable the cron if you delete product on store then it gets disable on Fyndiq.

7. Order Settings:

Now move to the order setting section. These settings are displayed:

- j. In the **Auto fill order**, Select 'Yes' to enable the order will auto fulfilled & tracking details will be send automatically.
- k. In the **Auto Cancel Order**, Select 'Yes' to enable the order will automatically cancelled & refund will be made to customer after import.

8. Cron Info

Now move to the last section of the configuration setting which is cron info:

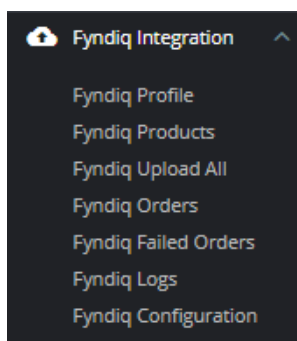

9. You can see Cron Info in this section. It is by default added as set by you on the server.
 - a. In **Cron Secure Key**, you can make a combination of secure key consisting of the alphabet, number, and special characters.
 - b. You may see cron URL, name and recommended time.
10. Click the **Save** button and the configuration will be saved.

4. Fyndiq Profiles

This tab contains information about creating product profiles which can later be utilized to implement bulk product functionality for particular product types.

To set up the Fyndiq Profile settings in the PrestaShop Admin panel

1. Go to the **Prestashop admin** panel.
2. In the left navigation panel, place cursor on **Fyndiq Module** menu.
The menu appears as shown in the following figure:

3. Once you click on **Fyndiq Profile**,
The following page appears:

Fyndiq Profile

In this section, you can see your created profile and also add new profile by clicking on 'Add New Profile' button on the right corner.

[+](#) Add New Profile [?](#) Help

Profile ID	title	Status	Product Count
1	Mobile Phone Cases	✓	5

4. Now click on **Add New Profile**. You will be taken to the page as shown below:

EDIT PROFILE: 1

PROFILE INFO | FYNDIQ CATEGORY | ATTRIBUTE MAPPING | VARIANT ATTRIBUTE MAPPING | DEFAULT MAPPING

* Title: Test Profile Enter the title of the profile.

* Status: **ENABLE** / DISABLE Select 'Enable' to enable the module.

Manufacturer: Graphic Corner / Studio Design Select your Product Manufacturer.

* Language: English (English) / Bahasa Melayu (Malay) Select your language which you want to use.

Cancel Save

- In the **title**, enter the title for the profile you are making.
- Select **Enable** as the status to enable the profile.
- In the **Manufacturer**, select your Product manufacturer.
- In the **Language**, select your language which you want to use.

5. Now Click on **Fyndiq Category** adjacent to the **Profile Info** tab, and you'll come across a section as below:

PROFILE INFO | **FYNDIQ CATEGORY** | ATTRIBUTE MAPPING | VARIANT ATTRIBUTE MAPPING | DEFAULT MAPPING

FUNNY CATEGORIES

Enter and select your fyndiq product category.

Select Fyndiq Category

Cancel Save

a. In this section, enter and select your Fyndiq products category.

Note: You can choose maximum 5 category.

6. Now Click on **Attribute Mapping** adjacent to the **Fyndiq Category** tab, and you'll come across a section as below:

Map all the Required Fyndiq attributes with Prestashop attributes in order to prevent error at the time of product upload

Map your Fyndiq Attributes to your Prestashop store attributes on the right side. The field marked with * are mandatory.

FYNDIQ ATTRIBUTE	STORE ATTRIBUTES
* shy	Reference Your unique ID for the article
parent_sku	Reference Group-identifier for the product, same as the sku for the main article
legacy_product_id	Product ID The merchant's product ID that ties together a group of articles. This must be unique for each product within the feed. Fyndiq will use it during the reading of the feed, but never save it.
* quantity	Quantity The quantity in stock of this article that is to be offered to Fyndiq at the reading of the feed.
brand	Manufacturer The brand name of the product.
gtin	EAN Article's GTIN (EAN, UPC etc.) reference.
* title	Name Name of the article.
* description	Description Detailed text describing the article (no html).
* price	Final Price Price of the article.
* original_price	Base Price Price of the article, before sell on Fyndiq.

a. In this tab, map the relevant attributes of the product profiles with that of attributes of items on Fyndiq.

7. Now Click on **Variant Attribute Mapping** adjacent to the **Attribute Mapping** tab, and you'll come across a section as below:

shoe_size_us_women	<input type="text" value="-- Select Store Attribute --"/> Women's shoe size, US measurements.
connection_type	<input type="text" value="-- Select Store Attribute --"/> Free text description of connection type.

- a. In this section, choose your fyndiq variant attribute with your Store Attributes on the right side.
8. Now Click on **Default Mapping** adjacent to the **Variant Attribute Mapping** tab, and you'll come across a section as below:

The screenshot shows the 'Default Mapping' configuration page. It features a navigation bar with tabs: PROFILE INFO, FYNDIQ CATEGORY, ATTRIBUTE MAPPING, VARIANT ATTRIBUTE MAPPING, and DEFAULT MAPPING (selected). The main content area is split into two columns: 'FYNDIQ ATTRIBUTE' and 'ATTRIBUTE VALUE'. The 'FYNDIQ ATTRIBUTE' column contains several sections, each with a red asterisk indicating a required field. These sections include:

- Status:** A dropdown menu set to 'For Sale'.
- Brand:** An empty text input field.
- Currency:** A dropdown menu set to 'SEK'.
- Vat Rate:** A dropdown menu set to '0.25'.
- Markets:** A list box containing 'I KNOW' and 'OF'.
- Shipping Time:** A table with columns 'Market', 'Min', and 'Max'. The 'I KNOW' market has a range of 5 to 7 days.
- Price:** A table with columns 'Market', 'Amount', 'Currency', and 'Vat Rate'. The 'I KNOW' market has a 'Final Price' in 'SEK' with a '0.25' vat rate.
- Original Price:** A table with columns 'Market', 'Amount', 'Currency', and 'Vat Rate'. The 'I KNOW' market has a 'Base Price' in 'SEK' with a '0.25' vat rate.
- Title:** A table with columns 'Language', 'Title Value', and 'Action'. It shows entries for 'English (English)' (Name en-us) and 'Bahasa Melayu (Malay)' (Name ms-my).
- Description:** A table with columns 'Language', 'Description Value', and 'Action'. It shows entries for 'English (English)' (Description en-us) and 'Bahasa Melayu (Malay)' (Description ms-my).

 The 'ATTRIBUTE VALUE' column contains corresponding dropdown menus for each attribute. At the bottom of the page, there are 'Cancel' and 'Save' buttons.

- a. In this tab, map the relevant attributes of the product profiles with that of attributes of items on Fyndiq.
9. Once you're done profiling everything proceeds to **Save** to store the changes and **Cancel** to discard them.

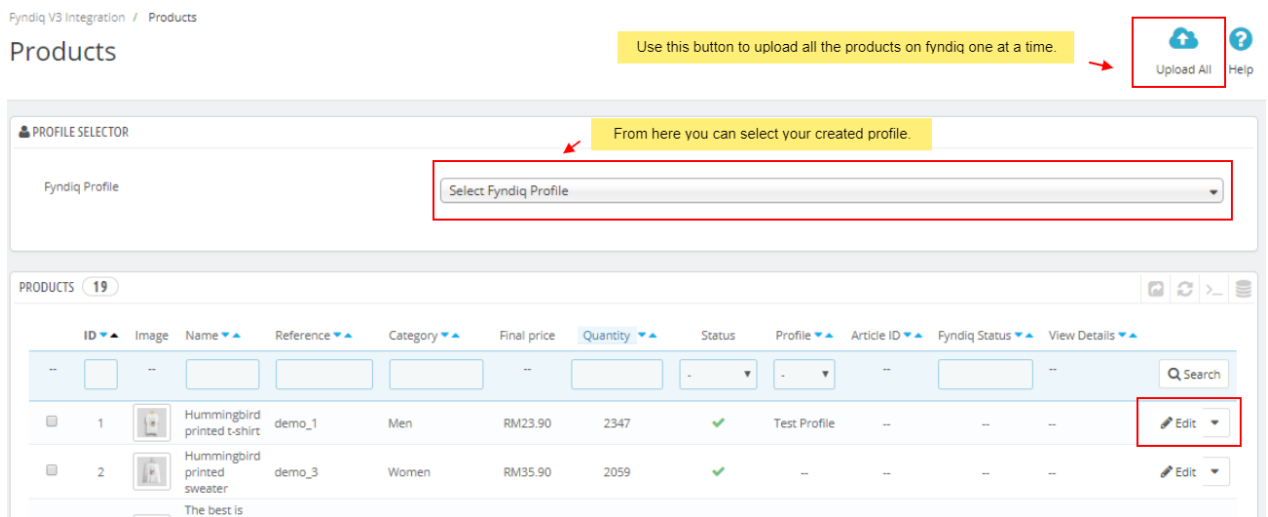

5. Manage Fyndiq Products

To manage Fyndiq Products
