1. Overview

Amazon is the largest online retailer in the worldwide. The company was originally a bookseller but has expanded to sell a wide variety of consumer goods and digital media and also its own electronic devices such as the e-book reader, tablet, and so on.

Amazon Marketplace is an e-commerce platform owned and operated by Amazon.com that enables the third-party sellers to sell new or used products on a fixed-price online marketplace alongside the regular offerings of Amazon. Using Amazon Marketplace, the third-party sellers can gain the access to the customer base of Amazon, and it expands the offerings on its website without having to invest in additional inventory.

Amazon Integration for Magento 2 store is an amazing API integration that helps Magento® 2 store owners to synchronize inventory, price, and other product details for product creation and management between Magento® 2 store and the Amazon marketplace.

The **Amazon Integration for Magento 2 Integration** extension interacts with the Amazon marketplace to integrate the synchronized product listing between Magento® 2 store and Amazon retailers. After the installation, the merchant can create Amazon categories and the dependent attributes on the Magento® 2 store.

It enables admin to perform product related task such as product upload and product view using bulk management system.

With the help of this extension, the store owners can create a profile in which they can assign the products and then can upload to Amazon.com. It enables the Magento store owner to manage the Amazon orders on the Magento stores without making any significant changes in the operational functionalities.

You can boost up your business at Amazon by integrating your store as it interacts with the Amazon APIs to connect your Magento store to the Amazon marketplace and thus, you have the opportunity to cover a wide range of customers.

The Magento® 2 store owners can boost their business at Amazon by integrating their store as it interacts with the Amazon APIs to connect their Magento store to the Amazon marketplace and thus, they have the opportunity to cover a wide range of customers.

Key features are as follows:

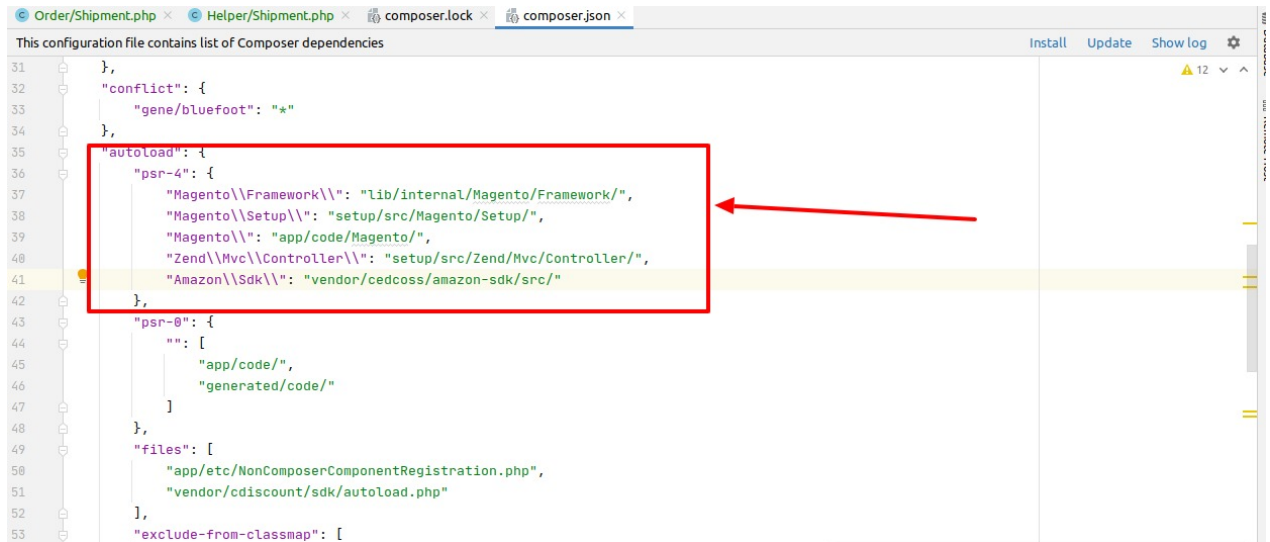

- **Cron:** Cron jobs automate the process to fetch the Amazon orders from the Amazon marketplace to the Magento® of customers.
- **Debug Mode:** Provides easy debug process for hassle-free product upload to the Amazon marketplace.
- **Product Category Mapping:** Follow many to one category mapping methodology. Admin can map many categories of Magento® 2 store to a single category of Amazon.
- **Profile Based Products Upload:** Admin can create a profile and after assigning the products to the profile can easily upload on Amazon.
- **Simple & Configurable Product Upload:** It enables admin to upload both simple & configurable type of product on Amazon.com.
- **Auto Acknowledgement of Order:** Admin receives an acknowledgement of Orders automatically as soon as orders are created.
- **Automated Synchronization:** Auto synchronization of the product listing, order, inventory, return, and refund, and pricing at regular intervals is established between Magento® 2 store and Amazon.com.
- **Product Data Validation:** The extension enables the admin to validate the product information in accordance with Amazon standard and values.
- **Low Stock Notifications:** Whenever the stock diminishes lower than the threshold, a notification is sent informing the status of the same.
- **New Order Notifications:** Whenever a new order is fetched from Amazon.com, the admin receives a notification.
- **Rejected products notification:** If any product containing some invalid details is rejected, then its information is fetched from the auto synchronization request along with the error due to which it is rejected.

2. Amazon Magento 2 Store Integration Extension Installation

To install the extension

1. Create a new folder named `code` (if not exists) under the `app` folder.
 - a. Extract the Ced.zip on your system and then Drag and Drop `app/code/Ced/Amazon` and `app/code/Ced/Integrator` directory inside `code`.
2. **To install Amazon SDK**
 - a. You have to download the `SDK Zip file` from the Cedcommerce account.
 - b. Copy `amazon-sdk` into `/vendor/cedcross Directory`
3. Update composer.json file by adding the code written below and as shown in the image:

```
"Amazon\\Sdk\\": "vendor/cedcross/amazon-sdk/src"
```

4. Now run the following upgrade command in `cmd`
 - `composer require cedcommerce/validator`
 - `composer dump`
 - `php bin/magento setup:upgrade`
 - `php bin/magento setup:di:compile`
 - `php bin/magento setup:static-content:deploy -f`
 - `php bin/magento indexer:reindex`
 - `php bin/magento cache:flush`

5. After successfully uploading the directory, the extension will be installed/upgraded.

3. Amazon Integration Configuration Settings

To set up the configuration settings in the Magento 2 Admin panel

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Configuration**.
The **Configuration** page appears as shown in the following figure:

Configuration

Store View: Default Config ? Save Config

CEDCOMMERCE ^

- Amazon Settings ⌵
- Amazon Product Settings ⌵
- Amazon Order Settings ⌵
- Amazon Strategy Settings ⌵
- Amazon Cron Settings ⌵
- Amazon Developer Settings ⌵

Amazon Configuration

4. In the right panel, click the **Amazon Settings** tab.

The **Amazon Settings** tab is expanded and the relevant fields appear as shown in the following figure:

Amazon Settings ⌵

Enabled [global] ▼

5. Under **Amazon Settings**, do the following:

a. In the **Enabled** list, select the **Yes** option.

6. Scroll down to the **Amazon Product Settings** tab, and then click the tab.

The **Amazon Product Settings** tab is expanded and the expanded section appears as shown in the following figure:

Amazon Product Settings ⌵

- ⌵ Profile Settings
- ⌵ Amazon Chunk Settings
- ⌵ Amazon Price Settings
- ⌵ Amazon Inventory Settings

7. Click on **Profile Settings**, the section will expand as:

⌵ Profile Settings

Auto Upload Product <small>[global]</small>	<input type="text" value="No"/>	<input type="button" value="v"/>
	The product assigned to profile will be Auto upload on Amazon.	
Auto Add Product On Profile <small>[global]</small>	<input type="text" value="No"/>	<input type="button" value="v"/>
	The Product Auto Add On Profile By Magento Category And Upload on Amazon	
Remove Product from profile on Conflict <small>[global]</small>	<input type="text" value="Yes"/>	<input type="button" value="v"/>
	While saving products to profile, remove product from previous profile if marketplace is same on both the profiles .	

8. Under this **Profile Settings**, do the following steps:

- In **Auto Upload Product**, select **Yes** if you to automatically upload the product on Amazon.
- In **Auto Add Product On Profile**, select **Yes** if you want to automatically add products to profile and upload on Amazon.
- In **Remove Product from Profile on Conflict**, select **Yes** if you want to remove the products from the profile if the marketplace is the same on both the profile while saving the products.

9. Click **Amazon Chunk Settings**, the section will expand as:

⌵ Amazon Chunk Settings

Product Queue Chunk Size <small>[global]</small>	<input type="text" value="100"/>
	Enter the size of a chunk for a product upload queued task
Product Feed Chunk Size <small>[global]</small>	<input type="text" value="1000"/>
	Enter the size of a chunk for a product upload feed
Price Queue Chunk Size <small>[global]</small>	<input type="text" value="500"/>
	Enter the size of a chunk for a price queued task
Price Upload Feed Chunk Size <small>[global]</small>	<input type="text" value="5000"/>
	Enter the size of a chunk for a price feed
Inventory Queue Chunk Size <small>[global]</small>	<input type="text" value="500"/>
	Enter the size of a chunk for a inventory queued task
Inventory Feed Chunk Size <small>[global]</small>	<input type="text" value="5000"/>
	Enter the size of a chunk for a inventory feed
Status Queue Chunk Size <small>[global]</small>	<input type="text" value="500"/>
	Enter the size of a chunk for a status queued task
Status Feed Chunk Size <small>[global]</small>	<input type="text" value="5000"/>
	Enter the size of a chunk for a status feed

In the **Product Queue Chunk Size** box, enter the size number of a chunk for a product upload queued task.

In the **Product Feed Chunk Size** box, enter the size number of a chunk for a product

upload feed.

In the **Price Queue Chunk Size** box, enter the size number of a chunk for a price queued task.

In the **Price Upload Feed Chunk Size** box, enter the size number of a chunk for a price feed.

In the **Inventory Queue Chunk Size** box, enter the size number of a chunk for an inventory queued task.

In the **Inventory Feed Chunk Size** box, enter the size number of a chunk for an inventory feed.

In the **Status Queue Chunk Size**, enter the size of the chunk for the queued status.

In the **Status Feed Chunk Size**, enter the size of the chunk for status feed.

10. Click **Amazon Price Settings**, the tab gets expanded as:

⊖ Amazon Price Settings

Product Price [global] Default Magento Price ▼
Select to send a different product price to **Amazon**

Allow Sale Price [global] No ▼
Enable it to send **Sale Price** along with **Standard Price** to Amazon. [BETA]

Send Price Feed marketplace wise [global] No ▼

Currency Conversion Marketplace Wise [global] No ▼

i. In the **Product Price** list, select one of the following options:

Increase by Fixed Price: If selected, then the **Modify by Fix Price** field appears.

Increase by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the **Amazon**, product price by the entered value % of the Magento 2 store price.

For Example,

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

Modify by Percentage Price = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Amazon Product Price = 105

Decrease by Fixed Price: If selected, then the **Modify by Fix Price** field appears.

Decrease by Fixed Percentage: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the Amazon product price by the entered value % of Magento 2 price

For Example,

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

Modify by Fix Price = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Amazon Product Price = 95

ii. In **Allow Sale Price**, select **Yes** if you want to enable the Sale Price along with the

standard price.

- iii. In **Send Price Feed Marketplace wise**, select **Yes** to send separate price feed for every marketplace
- iv. In **Currency Conversion Marketplace wise**, select **Yes** if you want to send price after converting it to marketplace currency.

11. Now click on **Amazon Inventory Settings**, the section is expanded as:

Amazon Inventory Settings

Inventory Fulfillment Latency [global]

The number of days between the order date and the ship date (a whole number between **1 and 30**).

Inventory Fulfillment Channel [global]

Use **AFN** for FBA fulfilment type (if availed). Use **MFN** for merchant fulfilment type.

Set Inventory on Basis of Threshold [global]

Choose yes to send inventory on amazon by condition. [BETA]

Inventory Threshold Breakpoint Value [global]

Set inventory quantity on which lesser and greater condition will act upon.

Inventory Value for Less Than [global]

Send Quantity to Amazon for those products, whose inventory is LESS than or equal to the inventory threshold breakpoint.

Inventory Value for Greater Than [global]

Send Quantity to Amazon for those products, whose inventory is GREATER than the inventory threshold breakpoint.

Override Inventory [global]

Choose yes to override inventory for syncing. Magento inventory will be taken from the product **qty** field, irrespect of any rules or condition set (like 'Manage Stock' is No).[BETA]

Map Attribute [global]

Account	Magento Attribute	Action
<input type="button" value="Add Attribute"/>		

Map your **qty** attribute for the marketplace with any **custom** attribute using 'Add Attribute' [BETA]

12. Under **Amazon Inventory Settings**, do the following steps:

- o In **Inventory Fulfillment Latency**, enter the number of days for the inventory fulfilment from the order date to the Shipment date.
- o In **Inventory Fulfillment Channel**, select the channel for fulfilment i.e, FBA or FBM.
- o In **Set Inventory on Basis of Threshold**, select **Enable** it if you want Threshold value for your inventory.
- o In **Inventory Threshold Breakpoint Value**, enter the threshold quantity for inventory.
- o In **Inventory Value for Less Than**, enter the inventory value which will send to Amazon if it is less than the set threshold value.
- o In **Inventory Value for Greater Than**, enter the inventory value which will send to Amazon if it is greater than the set threshold value.
- o In **Override Inventory**, select **Enable** if you want the inventory to be synced from product 'qty' field despite any other setting or customization for inventory.
- o In **Map Attribute**, map Amazon qty attribute with the Magento Attribute.

13. Scroll down to the **Amazon Order Settings** tab, and then click the tab.

The tab is expanded and the section appears as shown in the following figure:

Amazon Order Settings

Status for auto import [global]

- Failed
- Imported
- Not Imported
- Acknowledged
- Shipped
- Completed
- Cancelled
- Unfulfillable
- Pending Availability

Cron auto import order from Amazon for the selected "Amazon Status".

Time for auto import [global]

Cron auto import order from Amazon by reducing the current time with above selected.

Auto invoice imported order [global]

Auto Invoice Order Imported from Amazon in any case of successful import.

Auto acknowledge imported orders [global]

Auto acknowledge order on Amazon in any case of successful import.

Auto cancel failed order [global]

Auto Cancel Order on Amazon in any case of failure such as 'No Inventory'.

Increment Id Rules [global]

- Add Marketplace Code
- Add Amazon Order Id
- Add Prefix
- Add Fulfillment Channel

- **Add Marketplace Code:** It will add the Marketplace Code as prefix in the Magento Order Increment Id.
Ex: US-1100001
- **Add Amazon Order Id:** It will replace the Magento Order Increment Id with Amazon Order Id.
Ex: 111-111111-111111
- **Add Prefix:** It will add a prefix provided in the Magento Order Increment Id.
Ex: AMZN-1100001
- **Add Fulfillment channel:** It will add Fulfillment channel AFN or MFN in the Magento Order Increment Id.
Ex: AFN-1100001 or MFN-1100001
- **All Rules Applied:** the increment id will look like
Ex: **AMZ-AFN-US111-111111-111111**

Amazon order id prefix [global]

Prefix for Amazon increment ID

Enable Email Notification [global]

Order import notification via email to store admin

Enable Order Import Notification [global]

Order import notification in Notifications for store admin

Create Backorder [global]

Create Backorder in case the Magento product qty is 'out of stock' or 'less than the order qty'.

Enable Default Customer [global]

Enable Guest Customer [global]

All customer will be created as Guest on order import.

Import Tax [Only For GA, FL, NC] US Marketplace [global]

Import Shipping Tax [global]

Create Region/State [global]

Allow to create the state or region in Magento Directory on order import if state/region is not available.

Create Default Region [global]

Create and Use Default value "" if state/region is not available.

Alternate SKU [global]

- If you have different Amazon SKU then Magento SKU. Then map the custom SKU field in above and provide the values as mentioned.
- **Single Amazon SKU:** Just add the value of SKU in the selected attribute.
- **Multiple Amazon SKU:** Just add the value of SKU in the selected attribute separated by pipe.
Ex: "||AMZ-SKU-1||AMZ-SKU2||AMZ-SKU-3||"
- Default value is Magento "sku" attribute.

Is Tracking Number Required [global]

If Required, then empty tracking number shipments will be ignored.

Automatically create unavailable product [global]

If yes, then it will automatically create unavailable product during order import.

- In **Status for Auto Import**, select the status of the Amazon orders for auto import.
- In **Time for Auto Import**, select the time for which cron will automatically import the order.
- In **Auto Invoice Imported Order**, select **Enable** to create an invoice in Magento for imported order.
- In **Auto Acknowledge Imported Orders**, select **Enable** if you want to automatically acknowledge the imported orders on Amazon.
- In the **Auto Cancel Failed Order** box, select the **Enable** option to auto-cancel the orders on Amazon in any case of failure such as **No Inventory**.
- In **Increment Id Rules**, you have the rules to **Add Marketplace Code**, **Add Amazon Order Id**, **Add Prefix**, **Add Fulfillment Channel**.
- In the **Amazon Order Id Prefix** box, enter the required order Id prefix.
- In **Enable Email Notification**, select **Enable** to receive notifications via email.
- In **Enable order Import Notification**, select **Enable** to receive notifications of orders import.
- In the **Create Backorder**, select **Yes** if you want to create an order if the product is out of stock.
- In **Enable Default Customer**, select **Yes** if you want to create an order with default customer, no new customer will be created during order import.

Enable Default Customer [global] Yes

Default Customer [global]

Provide the email for the default customer for order import

Use Default Customer's Billing Address [global] No

- Once you select **Yes**, a field appears of **Default Customer**, enter the email of the customer.
- In **Use Default Customer's Billing Address**, select **Yes** if you want to use the billing address of the customer.
- In **Enable Guest Customer**, select **Yes** if you want to create guest customers on order import.
- In **Import Tax [Only For GA, FL, NC] US Marketplace**, select **Yes** if you want to add the tax in order for these regions in the US.
- In **Import Shipping Tax**, select **Yes** if you want to enable the tax on Shipping.
- In **Create Region/State**, select **Yes** if you want to create the region or state in the Magento directory if it is not present at the time of order import.
- In **Create Default Region**, select **Yes** if you want to create the region for the order by default.
- If Magento SKU does not match with amazon SKU, then select alternate Magento attribute which consist of Amazon SKU.
- In **Is Tracking Number Required**, select **Yes** if you want to sync tracking number for the order to amazon.
- In **Automatically create unavailable product**, select **Yes** to create the product automatically if it is not available.

14. Click **Amazon Cron Settings** and the section will expand as:

4. Manage Accounts

The merchant has to first create a seller account in the Amazon seller panel. Once the seller account is created and is approved by Amazon, the Magento 2 store owners have to obtain the AWS API Key values from the Amazon Seller account, and then the Magento® 2 store owners have to paste it in the respective fields displayed on the Amazon Account Form of the admin panel.

To add the account.

1. Go to the **Magento 2 Store Admin**
2. On the left navigation bar, click the **AMAZON INTEGRATION**

A menu appears as shown in the following figure:

3. Click **Manage Accounts**.

The **Manage Accounts** page appears as shown in the following figure:

Amazon Accounts

Id	Account Name	Seller Id	Marketplace	Active	Status	Actions	Mode
2			US	Active	Valid		Mock
6			US	Active	Valid		Live
3			IN	Active	Valid		Live
4			IN	Active	Valid		Live
5			IN	Active	Valid		Live

4. Click the **Add Account**
The page appears as shown in the following figure:

Account Information

Validate

8. In **Authorize Via CedCommerce**, select **Yes** if you want the authorization to be done from our end.
9. To know the information that you need to fill in this section(**Seller Id, Aws Access Key Id, Secret Key**), you need to go to the **Amazon** seller account. For that,
 - a. Log in to the Amazon seller account.
 - b. On the top right side of the Amazon seller central, place cursor on **Settings**.
 - c. When the menu appears, click **User Permission**.

The screenshot shows the Amazon Seller Central dashboard. At the top right, the 'Settings' link is highlighted in the navigation bar. A dropdown menu is open, showing various settings options. The 'User Permissions' option is highlighted with a red box and a red arrow pointing to it. The dashboard also displays 'Your Orders' (0 pending, 0 guaranteed delivery unshipped, 0 unshipped, 0 return requests), 'News' (Faster processing of TDS reimbursement claim with digitally signed Form 16A), and 'Payments Sur' (Balance, View Paym).

- d. You will be navigated to the User Permission page which looks like this:

- e. Here you will have **three cases**:
- f.

Case 1: You already have an Amazon developer account.

- i. Well, in this case, you need to scroll down to **Amazon MWS Developer Access Keys** section and click on **View Developer Credential Buttons**.

Amazon MWS Developer Access Keys

To register as a developer, or to view your API Access keys, visit the Developer Credentials page by clicking below

- ii. On clicking you will be redirected to the Developer Central Page where all the desired info is listed:

Developer Central

My developer information

Authorisation date	MWS developer ID	MWS credentials	Status
07/20/2018	[Redacted]	View	Active

- iii. Click on View Button and all the details will appear:

Your Developer Credentials ×

AWS Access Key ID

Client secret ▼

Done

The required **Aws Access Key Id** and the **Secret Key** is mentioned here.

NOTE: Move on to case 2 or 3 Only if you Don't have a Developer Account.

Case 2: You don't have a developer account and you wish us to use our developer keys.

1. Go to the User Permission page of the Amazon Seller Central and move to the **Third-party developer and apps**. The page appears as shown:

Third-party developer and apps

To authorise a new developer, or to manage your authorised third-party developers and apps, visit the Manage Your Apps page by clicking below

[Visit Manage Your Apps](#) ←

2. Click on Visit Manage Your Apps Button and you'll be redirected to **Manage your Apps** Page.

Manage your apps

Manage access to your seller data

Authorise new developer

3. Click on Authorize new Developer to allow CedCommerce to aid in creating a amazon developer account for you.
4. You will be redirected to

5. Enter the Name and ID provided by one of our customer executives and you are good to go.

Case 3: You do not have a seller account and you want to create your own account.

- a. In this case go to the User Permission Page of the Amazon Seller Central. Click on **Visit Developer Credentials** under the heading **Amazon MWS Developer Access Keys**.

- b. A form opens up for new sellers to register.
- c. Fill the form and retrieve the access key as the same in case 1.

Once you get the **Aws Access Key Id** and the **Secret Key** from here move back to the Magento panel to fill all these necessary details:

Api ⊞

4			IN	Active	Valid		Live

2. On clicking it, the Amazon account will be deleted and the message will appear on the same page.

5. Manage Amazon Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 attributes to the Amazon attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add new profile(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=add-a-new-profile-29>)
- Edit the existing profile(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=edit-the-existing-profile-39>)
- Upload profile products to Amazon(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=upload-the-profile-products-on-amazon>)
- Deleting profiles(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=delete-the-profiles-19>)
- Bulk Action on the Selected Profiles(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=submit-bulk-action-on-the-selected-profiles-7>)

5.1. Add a New Profile

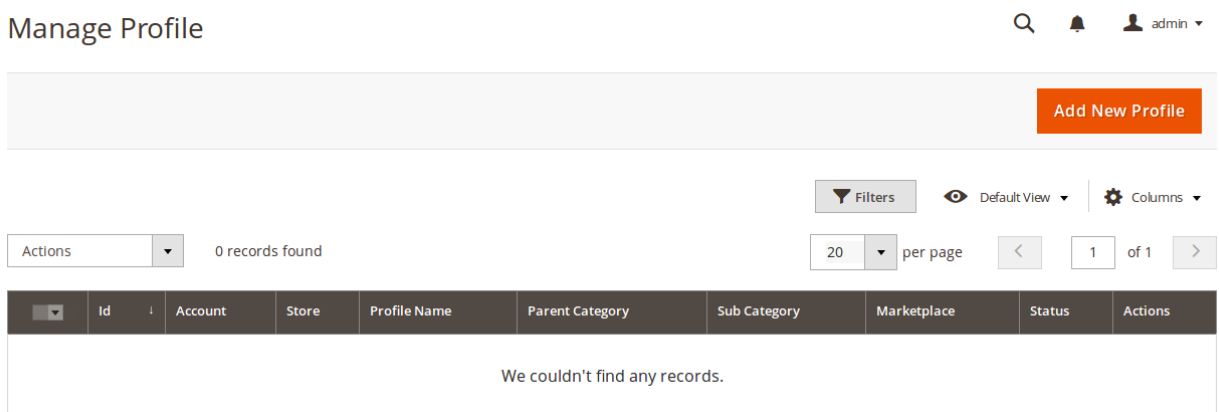

To add a new profile

1. Go to the **Magento 2 Store Admin**
2. On the left navigation bar, click the **AMAZON INTEGRATION**
A menu appears as shown in the following figure:

3. Click on **Profiles**.

The **Manage Profile** page appears as shown in the following figure:

4. Click the **Add New Profile**

The **New Profile** page appears as shown in the following figure:

Edit Profile

Information

Enable Yes

Name

Type

Mappings

Products

5. In the right panel, under **Information**, do the following steps:
 - a. In the **Enable Profile**, select **Yes** to enable the profile that you are creating.
 - b. In **Profile Name**, enter the name for the profile.
 - c. In the **Type**, select the uploading type.
6. Scroll down and click the **Mappings** section. The section will expand as:

Barcode Exemption No

- If you are a **Manufacturer** and have permission by **Amazon** to create product without barcode, please enable the **Barcode Exemption**.
- Enabling the Barcode Exemption will make the barcode attribute an optional field (which is currently required as per Amazon).

Account

Marketplace

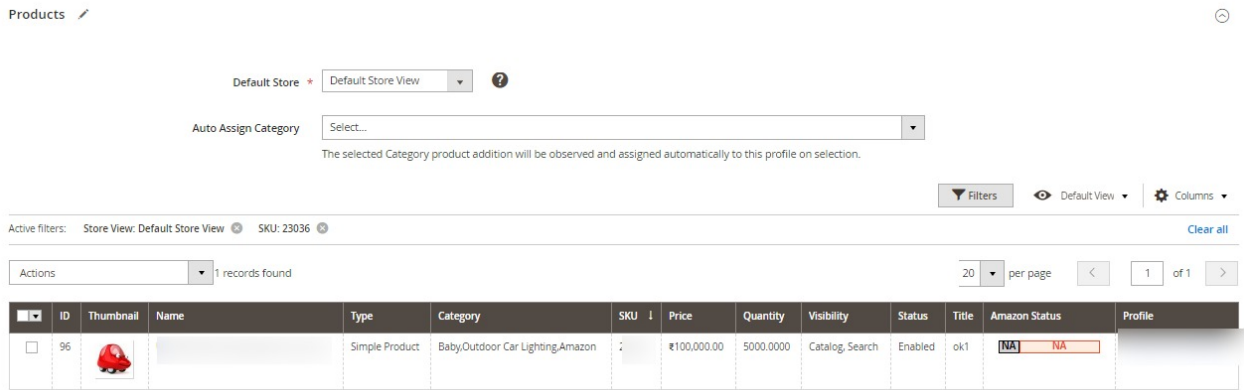

Category (ProductType)

- The Category acts as an **"Attribute Set"** to render the required, recommended and optional attributes and should be used for product upload.
- Use **"Default Category"** for syncing the product inventory and price only.

Please map all Amazon attributes with Magento attributes.

Amazon Attribute	Magento Catalog Attribute	Default Value	Action
<input type="text" value=""/>	<input type="text" value=""/>	<input type="text" value=""/>	<input type="button" value="Delete"/>
<input type="button" value="Add Attribute"/>			

7. Under the **Mappings** section, do the following steps:
 - In **Barcode Exemption**, select **Yes** if you have permission from Amazon to upload products without barcode for your Brand.
 - In **Account**, select the account.
 - In **Marketplaces**, the marketplace will be automatically selected.
 - In **Category**, select the product category.
 - Select 'Default Category' as amazon category if products are already present in amazon either in your account or in any other seller's account.
 - Select the relevant Amazon category if you are going to upload a new product to Amazon.
 - Now map the attributes. You may also add attributes by clicking on the **Add Attribute** button.
8. Scroll down to **Products** and the section will appear as:

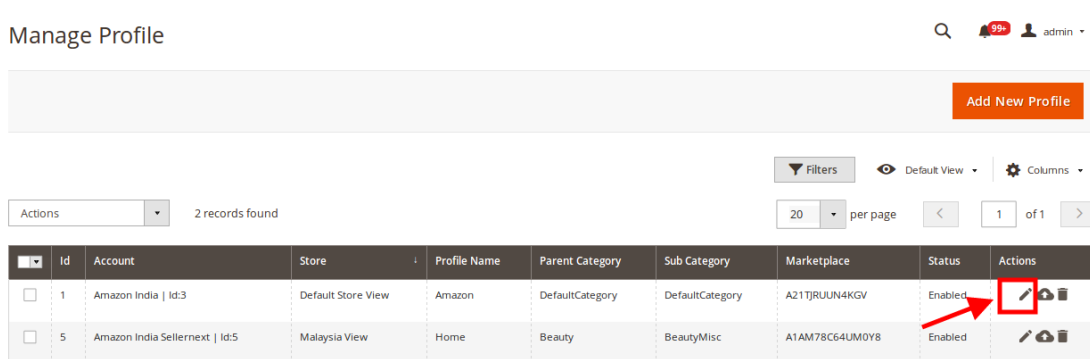

- In the **Default Store**, select the Magento store from where you want product details to be updated on Amazon.
- In **Auto Assign Category**, select the Magento category, whenever a new product is created in that category, that product will automatically assign to this profile. Enable 'Auto Add Product On Profile' setting from the configuration for this.
- Click **Save** on the top right side of the page. The profile will be created.

5.2. Edit the Existing Profile

To edit the existing profile

- Go on **Magento 2 Store Admin** panel.
- On the left navigation bar, click the **AMAZON INTEGRATION** menu, and then click **Profile Manager**. The **Manage Profile** page appears as shown in the following figure:

- Scroll down to the required profile row.
- In the **Action** column of the respective row, click the **Edit** button as highlighted in the above image. The profile editing page appears as shown in the following figure:

Edit Profile 91

← Back **Delete** **Save** **Save and Continue Edit**

Information

Enable Yes

Name

Type

Mappings ⊙

Products ⊙

- Click the required section, and then make the changes as per requirement in the respective section.
- Click the **Save** button.
The edited profile is saved and the success message appears on the **Manage Profile** page.

5.3. Upload the profile products on Amazon

To upload the profile products

- Go on **Magento 2 Store Admin** panel.
- On the left navigation bar, click the **AMAZON INTEGRATION** menu, and then click **Profile Manager**.
The **Manage Profile** page appears as shown in the following figure:

6. Amazon Product Listing

On this page, admin can view, edit, and validate the individual product. Also, the admin can view the error message if any error exists in any product details. After uploading the product on Amazon or after updating the product inventory or the product price, the user can check the status of the feed. Also, the admin can view the feed error if any. The admin can submit certain actions on the selected products available on the **Amazon Product Listing** page.

This section covers the following topics:

- View the Product Details(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=view-the-product-details-7>)
- Edit the Amazon Products(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=edit-the-amazon-products>)
- Synchronize the Single Product(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=synchronize-the-amazon-products-between-amazon-and-the-magento-2-store>)
- Submit Bulk Action on the Selected Products(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=submit-bulk-action-on-the-selected-products-7>)

6.1. View the Product Details

To view the product details

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click on **Products**.

The **Amazon Products Listing** page appears as shown in the following figure:

4. Scroll down to the required product row.

5. In the **Action** column of the respective row, click the **View**

icon.

A page appears where the user can view all the product-related details present in Amazon. If that SKU is not present on amazon, then it will show an error message.

6. Click the **Cancel** button to close the page.

6.2. Edit the Amazon Products

To edit the Amazon product details

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click on **Products**.

The **Amazon Products Listing** page appears as shown in the following figure:

Feed Errors	<input type="text"/>
<small>[global]</small>	
	<small>Amazon Feed Errors</small>

7. Enter the required information or edit the values in the required fields, and then click the **Save** button.

The changes are saved and the success message appears on the **Amazon Product Listing** page.

6.3. Synchronize the Amazon Products between Amazon and the Magento 2 Store

To synchronize the Amazon product details

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Manage Products**.

The **Amazon Products Listing** page appears as shown in the following figure:

4. To synchronize all the Amazon Products, click the **Sync** button on the top right.

All the Amazon products are synchronized and a success message appears.

5. To synchronize the specific Amazon Product, do the following steps:
 - a. Scroll down to the required product row.
 - b. In the **Action** column of the respective row, click the **Sync**

icon.

The specific product is synchronized and a success message appears.

6.4. Submit Bulk Action on the Selected Products

To submit the selected bulk action on the selected products

1. Go to the **Magento 2 Store Admin**
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
A menu appears as shown in the following figure:

3. Click **Manage Products**.

The **Amazon Product Listing** page appears as shown in the following figure:

4. In the **Actions** list, click the arrow button.

A list appears as shown in the figure:

5. Select the checkboxes associated with the required products.

6. To update products, click on the **Update Product**. Selected Products will be updated.

7. To upload products, click on the **Upload Product**. Selected products will be uploaded.

8. To upload inventory, click on **Upload Inventory**. The inventory will be uploaded.

9. To upload price, click on **Upload Price**. The price for selected products will be uploaded.

10. To upload images, click on **Upload Image**. The image for selected products will be uploaded.

11. To upload a relationship, click on **Upload Relationship**. The relationship for selected products will be uploaded.

12. To synchronize status, click on **Sync Status**. The status of selected products will be synced.

13. To delete products, click on **Delete Product**. The selected products will be deleted.

7. Manage Amazon Orders

Admin can do the following tasks while managing the Amazon orders:

- Fetch, View, Ship, and delete the Amazon Orders(<https://docs.cedcommerce.com/magento-2/amazon-integration-magento-2-user-guide/?section=ship-and-delete-the-amazon-orders>)

7.1. Ship and Delete the Amazon Orders

The Magento 2 store owners can fetch the new orders and view all the order details fetched from Amazon. They can also ship the required orders and can delete the orders those are no more required.

To fetch and view new orders

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click on **Orders**.

The **Manage Amazon Orders** page appears as shown in the following figure:

Amazon Orders

Id	Order Id	Marketplace	Account Id	Amazon Order Id	Amazon Status	Magento Status	Bill-to Name	Ship-to Name	Grand Total (Base)	Failure Reason	Actions	Store	Purchase Date	Created Date
1					Pending				€0.00					
5		DE			Failed				€0.00				2019-06-24 00:00:00	
3		FR			Canceled				€0.00				2019-06-20 00:00:00	
2		FR			Failed				€0.00				2019-06-20 00:00:00	
4		ES			Pending				€0.00				2019-06-19 00:00:00	

4. Click the **Import Orders** button.

If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.

Notes:

- Orders are automatically imported through CRON every 10 minutes.
- Whenever the latest orders are imported from Amazon, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento 2 store admin panel.
- If no order is imported, then check the Failed orders listed on the **Amazon Failed Order** page.
- Order is auto-rejected on Amazon in the following conditions:
 - When Amazon Product SKU does not exist in Magento 2 store.
 - When Product is Out of Stock in Magento 2 store.
 - When a product is disabled in Magento 2 store.

5. **To View the Amazon order, do the following steps:**

- a. Scroll down to the required order row.
- b. In Actions column of the respective row, click the **View** icon.

Id	Order Id	Marketplace	Account Id	Amazon Order Id	Amazon Status	Magento Status	Bill-to Name	Ship-to Name	Grand Total (Base)	Failure Reason	Actions	Store	Purchase Date	Created Date

4. Do the Shipment from the navigated panel. The shipped orders will be synced with the crons.

To delete or Sync the Amazon Orders in bulk

- To **Sync** the selected Amazon orders in bulk, do the following steps:
 - Select the checkboxes associated with the orders that you want to sync.
 - Click the **Arrow** button next to the **Actions** list.

A menu appears as shown in the following figure:

- Click on **Sync**.
The selected orders will be synced.
- To **delete** the selected Amazon orders in bulk, do the following steps:
 - Select the checkboxes associated with the orders those are no more required.
 - Click the **Arrow** button next to the **Actions** list.

A menu appears as shown in the following figure:

- Click **Delete Order(s)**.
A confirmation dialog box appears.
- Click the **OK** button.
The selected orders are deleted from the Amazon Marketplace.

8. How to Upload a Product

Complete product upload steps is like this:

1. If you are uploading a new product
 - Create a profile and select relevant amazon category, do attribute mapping, assign products, then save
 - Go to Amazon products and upload in this sequence:
 - upload product
 - upload relationship (if the product is configurable)
 - upload image
 - upload qty
 - upload price
2. If the product is already present in your account (assuming SKU is same)
 - Create a profile and select 'Default category' as amazon category, do attribute mapping, assign products, then save
 - upload qty and price from Amazon-> products grid
3. If the product is present in Amazon but not in your account (SKU and barcode(UPC or EAN or ASIN) should be present in Magento)
 - Create a profile and select 'Default category' as amazon category, do attribute mapping, assign products , then save
 - upload product (it will add to your account)
 - upload price
 - upload qty

9. Amazon Feeds

After uploading the product on Amazon or after updating the product inventory or the product price, the user can check the status of the feed and sync the selected feeds from the **Amazon Feeds** page.

To view and manage the product feeds

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **AMAZON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Feeds**.

The **Amazon Feeds** page appears as shown in the following figure:
