## 1. Overview

Customer mobile Login developed by Ced Commerce for Magento® 2.x enables the customer to log in to their account using their mobile number and password. The customer's can login into their account using:

1 Email id-Consist of valid email id.

2 Mobile number-Consist of valid mobile number.

**The key features of the modules are as follows:**

1. The customer is allowed to login only with the registered mobile number.
2. Customers can change their mobile number from their "My Account" section, but that number should not be used by any other customer.
3. Customer's mobile number should be unique while registering.
4. Admin can see the registered mobile number of the customer from the back-end.

## 2. Settings and Configuration

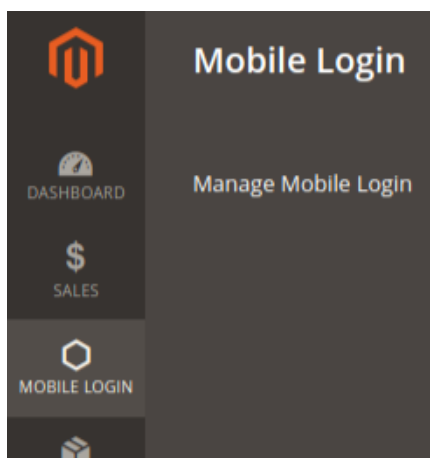

The Admin has got all the privileges to enable or disable the modules

**To set up the configuration settings**

Go to the **Admin panel > Stores > Configurations > Mobile Login > Manage Mobile Login**

or

Go to the **Admin panel > Mobile login > Manage Mobile Login**

The Admin would be redirected to the Manage Mobile Login page

## Manage Mobile Login

**Enable Mobile Login** [store view]

**Mobile Number Validation** [store view]   
Enter number of digits require in mobile number

The following fields need to be configured as follows:

1. **Enable Mobile Login:** The admin needs to choose options from the drop-down list, whether to enable mobile login or not.
2. **Mobile Number Validation:** The admin here needs to enter the length of the mobile number for which the validation would be applicable.

Save Config

## Manage Mobile Login

**Enable Mobile Login** [store view]

**Mobile Number Validation** [store view]   
Enter number of digits require in mobile number

Once, admin selects his choices, he clicks on the “Save Config” button. This button allows saving the settings made by the administrator.

✓ You saved the configuration.

## 3. Customer's Registration

In order to create a customer from the frontend, the customer has got two ways :

1. Click on "Create an Account" from the top navigation bar

2. Click on "Sign In" from the top navigation bar followed by "Create an Account"

## Customer Login

### Registered Customers

If you have an account, sign in with your email address / mobile number.

### 4. Customer's Login

The registered user can able to log in from frontend as follows:

1 Click on the Sign-in button present at the top navigation bar

2. The customer would be redirected to the “Customer Login page”

# Customer Login

## Registered Customers

---

If you have an account, sign in with your email address / phone number.

Email / Phone \*

Password \*

[Forgot Your Password?](#)

The following fields need to be filled by the customer in order to sign up to his account:

1. Email/Phone: Enter either the registered mobile number or email id

2. Password: Enter the password already set by the customer

Once, the customer has filled the values, click on the “**Sign In**” button.

Once the customer clicks on the account page he would be redirected to **My Account** page, when “**Redirect Customer to Account Dashboard after logging in**” is enabled from the admin side.

To enable this setting, go to **admin > Stores > Configuration > Customer > Customer Configuration > Login Option > set Redirect Customer to Account Dashboard after logging in to Yes.**

Search entire store here...
