1. Overview

Onbuy, a marketplace launched in 2016, works around the concept of keeping its buyers and sellers first.

It deals in categories such as Arts, Crafts & Sewing, Health & Beauty, Books, Toys & Games and more. Thus, it provides a fair platform for the sellers wishing to sell in almost any niche.

One of the best-known marketplaces of the U.K., it plans to expand itself globally to provide its sellers with worldwide recognition. With its simple interface, it provides for customers to navigate for as long as they desire before they settle themselves for that "*perfect purchase*."

Onbuy serves as a competitive yet reasonable marketplace which prioritizes the quality of products so that each purchase feels like a treat to the buyers.

Having come up with an Integration app to connect this marketplace with Shopify has been a wonderful experience for CedCommerce.

Role of OnBuy Marketplace Integration app:

To facilitate selling at OnBuy.com, CedCommerce offers an integration app enabling Shopify sellers to connect their stores with OnBuy.com, move the products from their Shopify store to OnBuy and manage orders that they receive from OnBuy.com.

1. All the data in one-go at OnBuy.com

With this app simply choose the products you want to list on OnBuy.com and upload them in one go. Not only this, map the product categories and Shipping template of items in Bulk with respective OnBuy product categories and shipping regions. Also, you can enter the value of inventory, barcodes, prices of the items in bulk through the CSV upload method.

2. All the changes in Real-time

The app synchronizes your Shopify Store with OnBuy.com, so whenever you make any changes in items – Product Information Change, Inventory status updates – or, receive orders from OnBuy.com. Everything is synchronized in real-time.

3. Get Instant Notifications

For every order that you will receive from OnBuy, you will receive a notification email. Also, if you want the notification for fewer inventory products then you can get that on your App Dashboard.

4. Inventory Threshold

Set a limit on inventory under which you want the product to be shown as Out-of-Stock on the Marketplace. This will help users to avoid the situation of getting orders for 0 inventory.

5. Shipping Template

You can create the Shipping template on the global level or at the product level.

6. Category Template

You can create the Category template on the global level or at the product level to map your products from Shopify with the categories from OnBuy.

7. Manage Order

With this app, you can easily manage orders and ship the in-stock products. The order will automatically get created on your store and as soon as you will ship the order from your store, shipping details will get synced to the OnBuy Marketplace.

You can always find the latest version of the software, full documentation, demos, screenshots and reviews at apps.cedcommerce.com/integration/(https://apps.cedcommerce.com/integration/)

2. How to Install the OnBuy Marketplace Integration

Selling on OnBuy is a seamless process but one has to apply for the seller account by filling the details required.

You can click on the given link to apply for the Seller account: https://www.onbuy.com/gb/sell/interest/(https://www.onbuy.com/gb/sell/interest/)

Once you fill these details and submit them, you will receive the invitation from OnBuy, to connect your PayPal account details with your OnBuy Seller account.

To install OnBuy Marketplace Integration app

This section of the manual is aimed to train you to install the OnBuy Marketplace integration app.

- 1. Go to the OnBuy-marketplace-integration link.
 - The page appears as shown in the following figure:
- 2. Once you click Install, you're redirected to your Shopify Store Login Page (as seen in the figure below):

	- direction
Log in to mana	ge your store
A	
Log	in
Remember me	Forgot password?
🛐 sha	opify

- 3. Enter the Login credentials, and then click the **Log in** button. The page appears as shown in the following figure:
- 4. Click the **Install app** button. The app is successfully installed in the Shopify store and the Registration page appears in the right panel.

Now that the app is installed, you're redirected to OnBuy Configuration steps:

3. App Configuration Steps

Now that the app is installed, it's time to register and then configure the products to be pushed to Etsy for sale. The entire procedure concerning this process will be explained in this section.

The configuration has the following 2 steps:

1). Connect with OnBuy(https://docs.cedcommerce.com/cedcommerce/onbuy-integrationguide/?section=connect-with-etsy-4)

2). Product Import.(https://docs.cedcommerce.com/cedcommerce/onbuy-integrationguide/?section=product-import-10)

3.1. Connect with OnBuy

<u>Step 1:</u> To complete this step, you need to follow the below steps:

1). Login to your OnBuy Account(https://seller.onbuy.com/login/)

and visit your OnBuy Account as shown below:

Selle	er Login		
Email Address:			
Password:			
		Ø	
Forgotter	n Your Password?		
	Log In		

***NOTE** – If you don't have OnBuy Seller Account, you can register HERE(https://www.onbuy.com/gb/sell/interest/)

2). To connect your OnBuy Account with Integration app, follow the steps below:-

- Listing & Products.
- Import and Integration.
- Enable OnBuy API.

	URL	https://api.onbuy.com/v2/		
Live Product Create	Seller ID	1000		
Approved	Seller Entity ID	-		
Test Orders	Site IDs	1. State 1. State 1.		
Create test orders to use with the API test account.		Live	keys	
CREATE TEST ORDER	Consumer Key	a contraction of the second second		
CREATE TEST ORDER	Secret Key	a sa trianta mena		
Test Order Emails		Test	(eys	
Order emails for both you and the buyer will be sent to this email address.	Consumer Key			
	Secret Key			
SAVE ADDRESS				
	API Usage			
		Method	Current Hour	Current Day

3). Copy your "Live API Keys" and Paste them in the respective fields of the App at Step-1.

	Connect with Onbuy
1	Onbuy Seller ID
	Enter your Onbuy Seller ID here
2	Onbuy Consumer Key
	Enter your Onbuy Consumer Key here
3	Onbuy Secret Key
	Enter your Onbuy Secret Key here
	✓ I agree with the terms and conditions Read Here
	Connect with Onbuy

This will connect your OnBuy account with the app and Step-1 will be successfully completed at this point.

3.2. Product Import

<u>Step 2</u>: "Import Products" page appears as shown in the following figure:

	Product Import	
	0 2	
Note :: Switch to Custom Paid Plan to Impr	rt more than 10K SKUs.	
Import Product Options Select import options		

In the Import Product Options list, select one of the following options:

All products: It enables the store owners to import all the Shopify store products in the app.

<u>Published Products</u>: It enables the store owners to import only those products which are available at the Shopify store front-end.

Filter Options to Import: It enables the store owners to import only those products which they want to upload from their Shopify store to the app.

-> If selected the "Filter Options to Import" option, then the page appears as shown in the following figure:

Import Product Options			
Apply filter for			

Product type

- Product vendor
- Smart collection
- Oustom collection

You can select one of the above-mentioned options to import:

*Product Type – Import the products on the basis of "Product Type" assigned in your Shopify Store.

*Product Vendor – Import the products on the basis of "Vendor" from your Shopify Store.

*Smart Collection - Import the products on the basis of "Auto Collection" created in your Shopify Store.

*Custom Collection – Import the products on the basis of "Manual Collection" created in your Shopify Store.

-> Once selected the desired option, proceed ahead.

Your products will be imported in the app at this step and you'll need to proceed further by pressing the "**Next**" button.

4. Dashboard of the App

When you are done with both the "Configuration Steps", you'll be ready to explore the app.

Starting from the "**Dashboard**" of the App, i.e., "**Home**" on the left menu tab. The Dashboard of the app has several sections which are described below:

						RT Welcome
 Home Profiling Templates ✓ Products 	Welcome, Check out t		in your store. Click here to refres	sh the dashboard	FILTER DATA	This Week 💌
Orders ⑤ Payment ⑥ Setting ⑧ Contact Us	Total Order(S) O	\sim	Total Product(S) 15	\sim	SALES ANALYTICS	AUD 0
SERVICES NEW	Awaiting Dispatch	0	Not Uploaded	4	0.8	
Store Customization	Dispatched	0	Active	0	6.0 E(USD)	
🛱 Digital Marketing	Completed	0	Inactive	11	GG 0.6 90 0.5 0.5 0.4	
	Failed	0	Item Processing	0	0.3 0.2 0.1	
		View Report		View Report	0	

App Dashboard will display the following information:

Product Information: To view the total count of the products present in the application and along with the total count you can also get the information about how many products are currently Active, Not uploaded, Inactive and Item Processing on OnBuy. As shown in the following figure:

.5	\sim
Not Uploaded	4
Active	0
Inactive	11
Item Processing	0
	View Report

2. <u>Order Information</u>: To view the total count of your orders from the OnBuy Marketplace. You can also get to know about how many order you have **Completed**, how many are in **Awaiting Dispatched**, how many are in **Dispatched** and how many are **Failed**. As shown in the following figure:

0	\sim
Awaiting Dispatch	0
Dispatched	0
Completed	0
Failed	0
	View Report

3. <u>Sales Chart</u>: To view the sales analytics for your products from OnBuy in a graphical chart. You can apply the filter to view the timed data for the same and the section appears as follows:

<u>4. Account Information</u>: It shows the overview about the current subscription for the application and the section appears as follows:

Account Info

Plan statusPaidExpiring onOctober 5, 2020Product
limit2401 / 5000 available

Order limit 807 / 3000 available

5. Trending Apps: Check out the trending apps from CedCommerce on Shopify Store

6. Your Profile Information: You can take a glimpse at your Profile by clicking on 'Account' button which is on the top most bar of the app, it appears like this:

Note:- Discuss queries	related to Etsy Sched	ule a meeting			AS Welcome,

5. Profiling

With the help of **Profiling**, you can apply certain set of rules and customization to your products related to **Category, Inventory, and Pricing.** Profiling helps you to manage your bulk products to be **Category mapped** and **Attribute mapped** all at once such that in future if any product of the same Product type or Vendor (or following any condition(s) that you have set in Profile) is added, it automatically gets mapped in the respective profile.

"Profiling" section contains the following fields:

- 1. All Profiles(https://docs.cedcommerce.com/cedcommerce/onbuy-integration-guide/?section=all-profiles-4)
- 2. Category

Template(https://docs.cedcommerce.com/cedcommerce/onbuy-integration-guide/?section=shipping-template-8)

3. Inventory

Template(https://docs.cedcommerce.com/cedcommerce/onbuy-integration-guide/?section=inventory-template-8)

4. Price

Template(https://docs.cedcommerce.com/cedcommerce/onbuy-integration-guide/?section=price-template-7)

5.1. All Profiles

Under the "**Profiling**", you can see the option to "**All Profiles**" where you can see all your created profiles. The page appears as follows:

					Ranger kk
Home	Profiles			[Add New Profile
 Templates Products Orders Payment 	Q Search Profile Name				Search
② Setting 산 Contact Us	Showing 1-3 of 3 items.				« 1 of 1 »
SERVICES NEW	ENABLE PROFILE	PROFILE NAME demo_1	Complete	CREATED AT 2020-06-01 16:23:15	ACTIONS

A	Digital Marketing		Please Select	•
		Delivery Template *	Existing and future products that match the conditions you set will automatically be added to this profile.	
		Inventory Template	View Products	
		\$ Price Template		

Here you can see two options "Automated" and "Manual". If you choose "Automated", then the products will automatically be assigned to the profile when imported new products with the same condition. If you choose "Manual", then you'll need to manually add the products in the profile when imported new products.

Select the properties over which you want to create the profiles, it may be either **Product type or Vendor or Tags or Title**. The next you'll need to complete the mapping part for the products.

-> Category Template -

OnBuy Marketplace Category – In the mapping section, select the respective **OnBuy marketplace category** in which **your Shopify product** will come under. You need to go to the **root category** for the product. Note-> Here in the App you can directly choose the Preexisting Category template or create a new one.

			+	唐	Copy of Copy o	f Copy of of auto	omated	Not Uploaded : 4	52 in stock	Skis	\mathcal{O}

You can perform the following tasks from the bulk action:

- **<u>Publish Listing</u>**: List the products on OnBuy.com by selecting them.
- Sync from Shopify: Synchronize the product details from the Shopify store to the App.
- **Update Price & Inventory:** Update the price & inventory of the products on OnBuy.com by selecting them.
- **<u>R-Publish Listing</u>**: Re-Publish the listing after making changes or if the listing is removed.

7.1.1. Edit the Product Information

To edit the product information go through the following steps:

- 1. Go to the "OnBuy Marketplace Integration" App.
- 2. Click on the "Products" in the left panel. The "Products" page appears as follows:

	y .	Welcor web stor
Home Profiling Templates	All Not Uploaded Active Inactive Item Processing

	V + 🔊 C	Copy of Copy of of Bull Ho	automated	Not Uploaded : 4	52 in stock	Skis	00

On this page, all the products are listed with all the details.

- 3. Select the "**Checkbox**" on the left side of the product grid corresponding to the products that you want to list on OnBuy.com, for selected products.
- 4. If you want to select all the products of the page to upload to OnBuy then click on the checkbox on the top as shown in the above image but this will select only 25 Products on the page (as per 'Products per page'), if you want to select all your products click on "Select all 25+ Products".
- 5. After selecting the products, select "Publish Listing" from the "Choose bulk action" drop-down.
- 6. Click on "Action" button.

The Product Upload page appears as shown in the following figure:

	\bigcirc	
	100% PROCESSED.	
Yay! The	e action has been successfully execu	ted!
\odot	1 item(s) are successfully processed.	
	Back	

The product upload process is executed and the status appears. *Note: If there is an error in the product upload process, then it appears on the page. Otherwise, a success message appears with the process status.

7.1.3. Synchronize the Products With the Shopify Store

To synchronize the products details from the store to the App

- 1. Go to the "OnBuy Marketplace Integration" App.
- 2. Click on the "Products" in the left panel. The "Products" page appear as follows:

Home	Filter 🔻 🔍 S	earch product id, listing id, profile na	me, sku, vendor, pro	duct type, tags			Search

Tigital Marketing	Cancel Sync Cancel Sync Copy of Bull Horn Bars automated Not Uploaded : 4	48 in stock Skis

- 5. Select the checkboxes associated with the required fields.
- 6. Click the 'Update' button.

The **"Sync from Shopify"** page appears as shown in the following figure: The Products synchronization with the store is executed and the status appears.

The products are synchronized from the store to the App.

*Note: If there is an error in the product synchronization process, then it appears on the page. Otherwise, a success message appears with the process status.

7.1.4. Sync With OnBuy

If you are already selling on OnBuy and have products on OnBuy, you can synchronize the product status from the OnBuy.com to the App

- 1. Go to the "OnBuy Marketplace Integration" App.
- 2. Click on the "Products" in the left panel. The "Products" page appears
- 3. You can sync the product status by clicking on the "Sync with OnBuy" button as shown below:

							Welcon web sto
 Home Profiling Templates Products 	Products ↑ Export ↓ Import ♀ Syr	nc with Onbuy

Select the fields in which you want to make changes and click on the "**Export**" button. A CSV file will be generated.

5. Save the CSV file and make the desired changes after opening it.

Оре	ning product.csv	+ ×			
You have chosen to open:					
? product.csv					
which is: applicati	on/csv type				
from: https://apps	.cedcommerce.com				
What should Firefox d	o with this file?				
Open with Li	breOffice Calc (default)]			
O <u>S</u> ave File					
Do this <u>a</u> utomatically for files like this from now on.					
	Cancel OK				

6. After done with the changes, click on the "Import" button.

7. Click on the "Browse" button and select the CSV file in which you've made changes.

Import updated product csv	\times
Browse No file selected. After updating details, Import csv here.	
	Cancel Import

The changes will be updated in the app after importing the CSV file at this point.

8. Import New Products

On the left section, under "Products", you can see "Import New Products"

"Import New Products" section is used when you've added new products in the Shopify store and want to import them in the "OnBuy Marketplace Integration App". The "Import Products" page appears as follows:

	CEDCOMMERCE OnBuy		Welcome, web store
	Home Profiling Templates Products	Import New Products O Note :: Switch to Custom Paid Plan to Import more than 10K SKUs.	
\$ \$ \$ \$	All products Import new product(s) Feed Process Orders Payment Setting	Import Product Options Select import options	
SER B F	Contact Us VICES NEW Store Customization Digital Marketing	Select import options Import all products Import published products Apply filter for	
		Copyright © 2020 CEDCOMMERCE All Rights Reserved.	

You can select the products you want to import in the app and consists of the following options:

<u>All products</u>: It enables the store owners to import all the Shopify store products in the app.

<u>Published Products</u>: It enables the store owners to import only those products which are available at the Shopify store front-end.

<u>Filter Options to Import</u>: It enables the store owners to import only those products which they want to upload from their Shopify store to the app.

*NOTE: If you have more than 10,000 products (including variants) then you need to contact us or import selected

products that count less than 10,000.

-> If selected the "Filter Options to Import" option, then the page appears as shown in the following figure:

Import Product Options	 	 	÷
Product type			
Product type Product vendor			
Smart collection			
O Custom collection			
		Refresh	Go to profiling

You can select one of the above-mentioned options to import:

*Product Type – Import the products on the basis of "Product Type" assigned in your Shopify Store.

*Product Vendor – Import the products on the basis of "Vendor" from your Shopify Store.

*Smart Collection – Import the products on the basis of "Auto Collection" created in your Shopify Store.

*Custom Collection – Import the products on the basis of "Manual Collection" created in your Shopify Store.

-> Once selected the desired option, choose the respective value & click on the "**Start Import**" button to import the selected products from Shopify to our app.

9. Feed Process

On the left section, under "Products", you can see "Feed Process"

"Feed process" section is used when you've have uploaded some new products on OnBuy, the product details from app are sent in form of feed on OnBuy, which is then processed by onBuy. In this section you can check whether your feed is processed or not. If the Feed is processed successfully then you products will get live on

OnBuy, or else you will get an error in the feed.

The "Feed Process'	' section looks like below:
--------------------	-----------------------------

						Welc
Home			-

-> All Feeds:- In This section you will see all the feeds sent on OnBuy.

-> **Pending:-** In This section all the pending feeds will appear, the feed which are still under review or process by OnBuy.

-> Success:- In This section all the successfully processed feed will appear.

-> **Completed:-** In this section all the processed feeds will appear but they might have some error in them.

-> Failed:- In this section all the feeds with error will appear, the feeds failed to process because of the missing data like: images.

10. Orders

Any new orders created on OnBuy.com are instantly fetched by the "**OnBuy Marketplace Integration**" app. The Same order is created on the Shopify store so that merchants can view the details and fulfill them easily in their native order processing system.

The page appears as follows:

					Welcome web store
Home Profiling Templates Products	all awaiting_dispat	ch dispatched completed failed			Search
Orders Orders Payment Setting	Showing 1-25 of 31 it	ems.		25 ¢ per page	
Contact Us ERVICES	ORDER ID	ORDER NAME (SHOPIFY) #1511	CREATED AT May 23, 2020, 1:55 PM	STATUS awaiting_dispatch	ACTIONS
Store Customization	T5VVRW	#1513	May 23, 2020, 1:55 PM	error awaiting_dispatch error	
	TSVVFB	(not set)	May 23, 2020, 12:25 PM	failed	
	T55YH2	(not set)	May 21, 2020, 1:35 PM	failed	
				failed	

The Order Grid consists of 4 sections:

All: All the orders that you received will be shown here.

Awaiting Dispatched: It contains all the orders that are yet to be fulfilled.

Dispatched: It contains orders which have been dispatched but yet not delivered to customer.

Completed: It contains all the orders that you have completed successfully.

Failed: It contains all those orders that were not able to be processed due to some reason. The reason can be viewed for the "Failed Order" by clicking on the (

error

) icon.

11. Settings

Once the store owners have installed the app in the store and completed the two steps procedure of OnBuy API Configuration & Product Import, they have to proceed further with the other configuration settings through the app.

To set up the other configuration settings. Go to the **"OnBuy Marketplace Integration"** app. The page appears as shown in the following figure:

						Welc
Home Profiling Templates Products	Welcome Check out to		your store. Click here to refresh cest	the dashboard	FILTER DATA	This Week 💌

	NEW ustomization Marketing	Order Management]	Consumer Key consumer key on onbuy. Secret key secret key on onbuy.	
			Copyright © 2020 CEDC	OMMERCE All Rights Reserved.	

The Settings are divided in three sections:

1). OnBuy API Settings: From this section User Id and API keys and be checked.

2). Product Management: This section give you an option to change the setting for the product syncing.

3). Order Management: This section will allow you to alter the setting regarding order management from the app.

11.1. Etsy API Settings

OnBuy API Settings

These are the API details of your OnBuy App and appears as follows:

			Welcome, web store
 ☐ Home È→ Profiling Templates 	Settings		
 ✓ Products ✓ Orders 	🔅 API Settings	Shop details	Seller Id
 Payment Setting Contact Us 	Product Management		Seller Id on onbuy. Consumer Key
SERVICES NEW Store Customization ① Digital Marketing	Order Management		consumer key on onbuy. Secret key
			secret key on onbuy.
		Copyright	© 2020 CEDCOMMERCE All Rights Reserved.

Seller Id: This shows the OnBuy seller id of the account which is connected with the Integration App. **Consumer Key:** This shows the consumer key of the connected OnBuy Account. **Secret Key:** This shows the secret key of the connected OnBuy Account.

11.2. Product Management

Product Management

The "Product Management" settings are divided into 5 sections, the page appears as:

				Welcome, web store
Home Profiling Templates	Settings			
 Products Orders Payment Setting Contact Us 	 API Settings Product Management 	Product Upload	Upload each variant a	is simple product
SERVICES NEW	Order Management	Auto Sync	 ✓ Automatic sycing from ✓ Select All 	n shopify to app
			✓ Title✓ Sku✓ Tags	✓ Variant Title✓ Image✓ Inventory
			Veight نوب العود الع العود العود الع	Price

Product Upload: By enabling this setting you can list all variations as a simple product on OnBuy.

<u>Auto Sync</u>: In the "Auto Sync" area, select "Enable" from the list to enable the Product synchronization between the Shopify store and the OnBuy Marketplace Integration app. Select the checkbox associated with the "Select All" option to synchronize all the attributes of the products.

OR

Select the checkboxes associated with the required product attributes to get synchronized with the store.

<u>Product Creation</u>: Enabling this setting will bring the recently created product in Shopify to the app. If you created a new product in your Shopify the app will automatically bring that in the app.

You can select anyone among these three options to specify the Import type:

i). All (to add every product automatically when creation)

ii). Published (to add every Published product on Shopify)

iii). Custom (to add the products on the basis of specific product type or vendor)

From these settings, you can manage your products accordingly.

11.3. Order Management

Order Management

The section appears as:

				come, store
Home Image: Profiling Templates Image: Products Image: Orders Image: Payment Image: Setting Image: Contact Us	Settings API Settings Product Management Order Management	Order management	 Manage orders from the app Check to enable order syncing from Onbuy to Shopify Ship orders on onbuy without the tracking number Allow to ship order on onbuy without sending the tracking number 	
Store Customization		Send order notification to the customer(Shopify)	 When order will be created on Shopify, customer will be notified Allow to send mail on new order creation on the app Notify customer when order is fulfilled from shopify store Allow to send mail to new order shipment on the Onbuy 	

<u>Order Management</u>: If you want the app to manage the orders for you, you can **Enable** the Setting. If you Enable this, the order when fetched from OnBuy will be sent to your Shopify store so that you can fulfill the order. If you **Disable** this setting, the app will not send the orders to your Shopify Store.

<u>Send notification to the customer</u>: If you enable this setting, then as soon as you will be received & fulfill the order from Shopify an notification will sent to customer.
