## 1. Overview

Our Rental Booking System comes with a full range of features that help you take reservations, manage your inventory and grow your rental business — whether you rent out electronic devices, clothes, accommodation, or anything else.

This document will explain the feature and functionality of the **RENTAL BOOKING SYSTEM** extension by CedCommerce for your Magento® Store.

It gives your customer the ability to search the availability of products/services listed by admin/seller in real-time, pricing, and booking confirmation.

- *Real-time availability.*
- *Quick and Easy to use.*
- *Fully secure payment options.*
- *Supports Multiple-Language.*
- *User-friendly interface, easy to navigate.*
- *Increase the efficiency and profitability of your business.*
- *Highly customizable booking system.*
- *Instant reservation confirmation of product/service availability.*
- *Send an email and message to your customers for the best price, offers, and discount coupons.*
- *It's Embeddable, Can be easily integrated into your existing website by using a special embed code.*

## 2. Configuration Settings

A STEP BY STEP GUIDE FOR HOW TO USE THIS SETTING BY ADMIN.

**LOGIN TO ADMIN DASHBOARD-> GOTO-> BOOKING->SETTINGS->BOOKING SETTINGS->ENABLE BOOKING SYSTEM IN FRONTEND->YES->ENABLE RENTAL SERVICES->YES**

**OR**

**LOGIN TO ADMIN DASHBOARD-> GOTO->STORES-> CONFIGURATIONS->BOOKING->BOOKING SYSTEM->ENABLE BOOKING SYSTEM IN FRONTEND->YES->ENABLE RENTAL SERVICES->YES.**

This enables the booking settings so that customer can book their choice of product/services listed by the Admin/seller, Refer to below images;

## RENTAL SETTINGS:

### 1-Enable Rental Services: YES/NO

These features allow the admin to decide whether rental services to be enabled or not if it is enabled then the admin will be able to rent the product on the marketplace, and on the other side customer will be able to choose the product and avail the services.

### 2-Show Rental Top Link: YES/NO

This feature allows the admin to show the rental booking link on the top, which helps easy to navigate and access the content.

### 3-Rental Top Link Title:

This feature allows admin to decide the name of rental from this section which will show on the frontend customer side and the customer will be able to select and redirect to the rental page and select the product and services.

#### **4-Rental Banner:**

A banner is something heading or advertisement image appearing on the webpage in the form of a bar, column, slider, or a box which is the first eye impression for the content. This feature allows the admin to add images supported to PNG, GIF, JPG, and JPEG from their system.

Admin can change, delete, and add new images whenever required. To Change a banner click on **choose file**, a new window will open and ask the image path to select and upload.

#### **5-Banner Image Width:**

This feature allows the size of the width of the banner on display and can be changed to default by their own choice.

#### **6-Banner Height:**

This feature allows the size of the height of the banner display and can be changed to default by their own choice.

#### **7-Remove Shipping From Checkout:**

Shipping means the transport of goods and product from the warehouse to the customer location, this option helps admin to remove any kind of shipping method from the checkout page depending upon the product and shipment.

#### **8-Show End Date For Daily Rental Products:**

This option allows admin to enable the end date for a particular rental product to yes/no, if it is not enabled to **No** then the customer will be able to select only the start date and the no of days only.

#### **9- Maximum Days For Booking For Daily Rental Products:**

This feature allows the admin to set the maximum day for rental products from the current date for which the customer has paid.

#### **10- Start Time For Hourly Rental:**

This feature allows admin to set time the time for products and services available on the website, the start time should be in 12 hours format and use A.M, P.M for segregation of day and night. e.g.; 10 am.

#### **11- End Time For Hourly Rental:**

This feature allows the admin to set the time for the end of the product and services available on the website, the end time should be in 12 hour format and use A.M, P.M for segregation of day and night. e.g; 10 pm.

The screenshot displays the Magento Configuration interface. On the left is a sidebar with navigation links: DASHBOARD, SALES, CED MARKETPLACE, CATALOG, CUSTOMERS, MARKETING, CONTENT, BOOKING, REPORTS, STORES, and a gear icon for settings. The main content area is titled 'Configuration' and shows the 'Scope' as 'Default Config'. A 'Save Config' button is in the top right corner.

The configuration is organized into sections:
 

- MARKETPLACE** (expanded)
- BOOKING** (expanded)

**Any Modification in settings can be checked by the admin on the frontend/customer view page.**

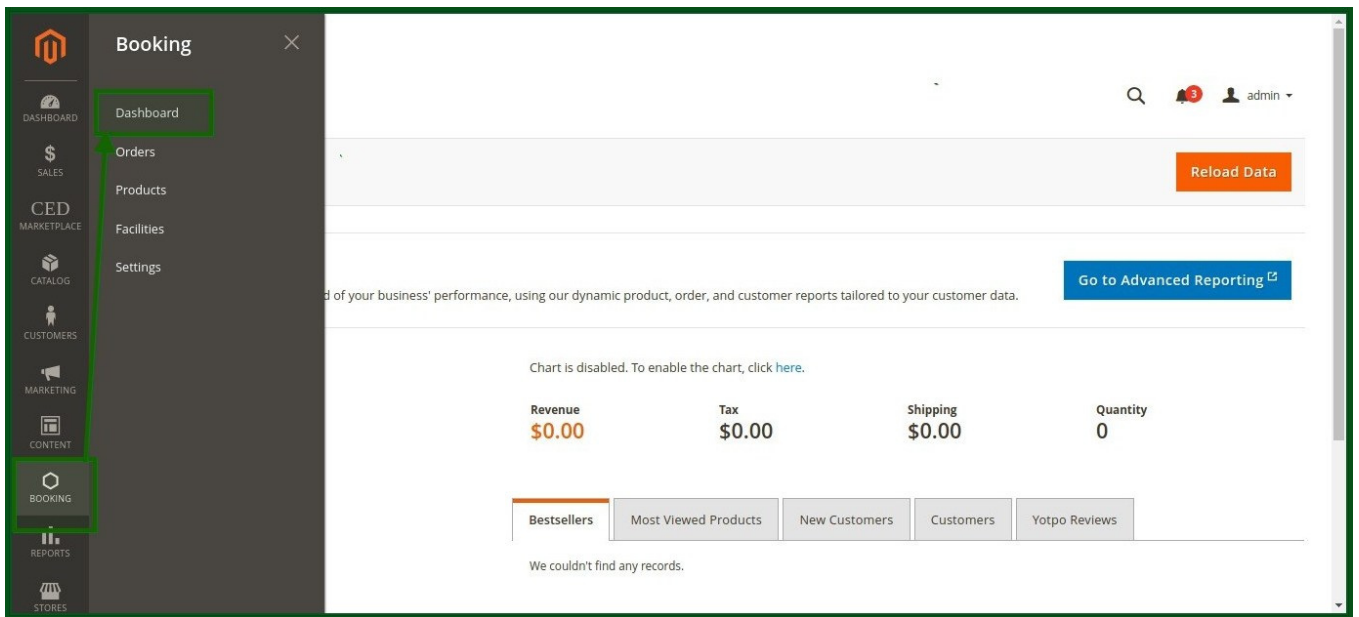

### 3. Dashboard

In this section, the admin will be able to see all the status of the bookings, amount, and sales revenue on the default Magento panel, an admin will be able to swipe up between the dates to see the status of booking, **Total Pending Amount, Total Earned Amount, Total Booking Order Placed, Total Booking Product Sold**. Clicking on the **date booked**, admin is able to view the details of booking like which product is booked and their **status**.

**Admin/account** icon helps in setting the admin account as a change of email address, new password, and customer view helps to switch between admin to customer page.

The **notification icon bell** shows new and unread information. Search bar icon helps admin to search products, pages, orders, customers on all the pages.

**Refer Below Images:**

**Booking Dashboard**

Hello,

From your Dashboard you have the ability to view a snapshot of your total bookings, total sales.

**\$0.00** Total Pending Amount!

**\$0.00** Total Earned Amount!

**0** Total Booking Order Placed!

**0** Total Booking Product Sold!

## 4. Order Management

**ORDER:** This section helps the admin to see the **status** of the order, **purchase date**, **grand total base**, **grand total purchased and action** (upon opening this admin will be redirected to detailed information about the order and account information, for more information visit to the sales section. Admin can also use the **filter** option to filter among the **purchase ID** among different filters available, the Pagination option allows us to move between the pages and search for the order.

The image shows the 'Manage Booking Orders' page. At the top, there's a search bar and user information (admin). Below the search bar, there are filters and pagination controls. The table shows 2 records found. The table has columns: ID, Purchase Date, Grand Total (Base), Grand Total (Purchased), Status, and Action. The footer contains copyright information and links for Privacy Policy, Account Activity, and Report an Issue.

ID	Purchase Date	Grand Total (Base)	Grand Total (Purchased)	Status	Action
000000002	Jul 21, 2020, 11:07:00 AM	2000.0000	2000.0000	Pending	<a href="#">View</a>
000000001	Jul 21, 2020, 11:07:00 AM	220.0000	220.0000	Pending	<a href="#">View</a>

Once an order is placed by a customer from the website the admin will get the notification and also admin can see the order in the order section, select the order placed by the customer, a new window will open up with details about an order placed by the customer, Order and account information, address information, payment & shipping method, items ordered. now admin has rights to **hold** the order, **cancel**, **invoice**, **reorder** and **edit** the order to refer the below images:

**Related Products, Up-sells, cross-sells:** This feature allows the admin to add the products related to an available product.

Once selecting any of the options the products available in the panel will show and the admin can select the product and add it, which will show on the frontend as another option for customers.

**Frontend view:** refer to the below image for more clarity about it on how and where it looks like an option for the customer side.

**Product in website:** Admin/Vendor will be able to select and de-select to show the product on the website.

**Search Engine Optimization:** Search engine optimization is the process of growing the quality and quantity of website traffic by increasing the visibility of a website or a web page to users of a web search engine.

- **Url key:** That describes the product or category. When you create a product or category, an initial URL key is automatically generated based on the name.

- **Meta title:** Tag – This is the text you'll see at the top of your browser. Search engines view this text as the "title" of your page.
- **Meta Keywords** Are a specific type of meta tag that appears in the HTML code of a Web page and helps to tell search engines what the topic of the page is.
- **Meta description:** A brief description of the page.
