1. Facebook Marketplace Connector - Overview

You can now extend your Shopify store to Facebook Marketplace and list your products on Facebook Shop, making the buyers purchase from Facebook without having to leave the Facebook platform.

Leverage the Checkout on Facebook on your Facebook Shop that is available just to the US merchants.

The app empowers you to set-up your Facebook shop, connect it through the Commerce Manager, and display your existing product catalog onto the Marketplace all with real-time synchronization, seamless order management, and end-to-end customer support.

The prominent features of the App include:

Simplified Listing: Bulk uploads your listings from Shopify to Facebook Marketplace with a single click in no time.

Catalog and Inventory Management: Experience synchronization of price, stock, and other updates at regular intervals and categorization of products appropriately to Facebook's specs.

Order Management: Manage orders from one single dashboard. Orders received on Facebook Marketplace will be adequately synced with the Shopify store.

In this Section.

- How does the App work?(https://docs.cedcommerce.com/cedcommerce/facebook-marketplace-connectoruser-manual/?section=how-doess-the-app-work)
- Facebook Marketplace Requirements(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=facebook-marketplace-requirements)
- Permission and Page Roles Requirements(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=permission-and-page-roles-requirements)
- Installation of Facebook Marketplace Connector(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=installation-of-facebook-marketplace-connector)

1.1. How Does the App Work?

Below is the flow-chart showing the complete working of the Facebook Marketplace Connector App.

1.2. Facebook Marketplace Requirements

eCommerce retailers like you can list their product offerings on Marketplace. The Checkout on Facebook lets people complete purchases from your business without leaving Facebook.

You can offer a checkout to your customers when you connect a catalog of your products in Commerce Manager.

To set-up the commerce manager and enable listing your products on Facebook Marketplace, you need to fulfill the following requirements:

- A federal tax identification number that matches your legal name
- A state tax registration number for every state where you do business
- Your bank account info to get your payouts (currently the US only)
- · Your physical business address and email address
- The category that best describes your business, your business type, and name
- A business representative name, SSN and DOB
- Your delivery options, return policy and customer service email address (shipping within 3 days)

*Note: Along with the above requirements, you should comply with the Commerce Product Merchant Agreement(https://www.facebook.com/legal/commerce_product_merchant_agreement) and the Commerce Policies(https://www.facebook.com/policies/commerce) that explains the terms and policies for putting forth your shop on Facebook Marketplace.

1.3. Permission and Page Roles Requirements

To sell on Facebook Marketplace, you need to adhere to the following Facebook Page requirements:

- You should have "admin"(https://www.facebook.com/help/1206330326045914) access to your Facebook Page.
- Your Facebook Page should be "published" (https://www.facebook.com/help/184605634921611)

Being the "Admin" of the page, you have the "manage_pages permission" that allows your app to retrieve

Page Access Tokens for the Pages and Apps that the app user administers.

*Note: Only with the Admin role in the Page, you will be able to manage page roles and settings. There are 6 types of page roles, Being the "Editor" or "Moderator" of a page, you can only create content, moderate, analyze, and advertise on the Page.

1.4. Installation of Facebook Marketplace Connector

The Facebook Marketplace Connector for Shopify can be downloaded from the Shopify App Store.

Here is the step by step procedure to install the App.

1. Go to the https://apps.shopify.com/ (https://apps.shopify.com/)

(https://apps.shopify.com/)

- 2. Search for the App "Facebook Marketplace Connector" in the search bar and click on the icon.
- 3. Alternatively, you can click on this link to directly download the App: https://apps.shopify.com/facebookmarketplace-connector(https://apps.shopify.com/facebook-marketplace-connector) A window will appear, prompting you to install the App.

Facebook Marketplace Connector will be able to:	
View Shopify account data	View details
Manage products	View details
Manage orders	View details
View other data	View details
To erase your customers' personal information from Facebook Marketplace C After 48 hours, a request will be sent to Facebook Marketplace Connector to e more about data privacy.	onnector, remove the app. erase this data. Learn
Cancel	Install I app

4. Click on "Install the App" to install the App.

Note: The Facebook Marketplace Connector comes free for all the Shopify merchants.

2. Configuration of the App and Onboarding to Facebook Marketplace

After installing the App from the Shopify store, you need to configure the Facebook Marketplace Connector to your existing Shopify store.

To configure the App, there are **three major steps** to complete. As soon as you complete one step you will be moved on to the next step.

- The steps of onboarding to Facebook Marketplace through Facebook Marketplace Connector are:
- Step 1: Connecting the App with Facebook Account
- Step 2: Creating the Commerce Manager Account
- Step 3: Configure Default Mapping of App and Product Import.

*Note: Make sure that you have given permission to CedCommerce from your Facebook Account to manage pages, business, and Catalog. To do so, click here:

https://www.facebook.com/settings?tab=business_tools(https://www.facebook.com/settings?tab=business_tools)

In this section

- Connect the App with the Facebook Account(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=connect-the-app-with-the-facebook-account)
- Connect to your Facebook page(https://docs.cedcommerce.com/cedcommerce/facebook-marketplaceconnector-user-manual/?section=connect-or-create-a-new-facebook-page)
 - If you have an Online Facebook Page
 - If you have an Offsite Facebook Page
 - If you do not have a Page
- Configure Commerce Manager Account(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=configure-commerce-manager-account)
- Configure Default Mapping and Product Import(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=configure-default-mapping-and-product-import)

2.1. Connect the App with the Facebook Account

If you have an existing Facebook account, it will show up as you open the App.

Click the "**Connect**" button. The page will connect to your existing Facebook Account and redirect back to the App.

2.2. Connect your Facebook Page

The next step of the App configuration is the Creation and Configuration of the Commerce Manager Account. To sell on Facebook Marketplace with the onsite checkout feature, you need to have the Commerce Manager account.

Commerce Manager is a set of tools that help you sell products and manage your business across Facebook

and Instagram. Through the Commerce Manager, you can use the Checkout option, which lets the buyers purchase the products without having to leave Facebook.

To create and configure the Commerce Manager, you need to connect your Facebook Page to the App on which you have to configure the Commerce Manager. There could be three conditions:

- If you have an online Facebook Page(https://docs.cedcommerce.com/facebook/facebook-marketplaceconnector-user-manual/?section=if-you-have-an-online-facebook-page)
- If you have an Offsite Facebook Page(https://docs.cedcommerce.com/facebook/facebook-marketplaceconnector-user-manual/?section=if-you-have-an-offsite-facebook-page)
- If you do not have a Page(http://docs.cedcommerce.com/facebook/facebook-marketplace-connector-usermanual/?section=if-you-do-not-have-a-facebook-page)

2.2.1. If you have an Online Facebook Page

After you connect your Facebook Account with the App, the next screen will show up all the Facebook Pages, associated with your account.

You need to "**select**" the required page to which you want to sell and then configure the Commerce Manager account on the same.

Store			Q Search		SK
Home		Facebook Marketplace Connector			by CedCommerce
Orders Products Customers Analytics Nacional			Facebook Shops Authenticate your shops.		
Marketing Discounts			Pages	Re-Sync	
SALES CHANNELS	0		Create your CMS page from here.	Open Facebook CMS Page	
regi Online Store	0		CEDCOMMERCE SANDBOX PAGE This Page Is Authenticated By : CedCommerce	Connect with App	
			CRAZYCOOL007 This Page Is Authenticated By : CedCommerce	Configure CMS	
			HELLO This Page Is Authenticated By : CedCommerce	Configure CMS	

Note: If you have a Facebook Ads Page, you can set-up the Commerce Manager account for that Page, but you will not be able to use your Shop for Ads. In this case, you will have to create a "new-catalog" and configure the CMS account.

2.2.2. If you have an Offsite Facebook Page

In case you have an Offsite Facebook Page, that means you have your Facebook Shop that enables the buyers to either "**Message the seller**" or "**Go to your Website**". The offsite Facebook page cannot be used for the configuration of the Commerce Manager because to sell on Facebook Marketplace, your Facebook page must offer checkout on Facebook.

This is the reason when you move to the next step after connecting your Facebook Account with the App, the options on the next window will be in a "disabled" state.

	Authenticate your Shop(s).	
	• • •	
Pages		Re-Sync Hel
Create your shop for Fa	acebook.	Create a new Facebook Shop
		Disabled
Not Authenticated Yet Make sure you have admin access to t This is offsite checkout type page whit	this page. In can not be used for marketplace product	s

Solution I: To get to the configuration of Commerce Manager, you need to convert your Offsite Facebook Page into an Online Facebook Page. In this situation, if you are managing your Facebook ads through an offsite page, you will have to create a new page and a catalogue for the Shop because Facebook does not allow you to manage both ads and marketplace with the same page.

Solution II: In case you do not manage your Facebook ads through your offsite page, you can proceed with commerce manager setup choosing the existing offsite page and create a new catalogue for it.

2.2.3. If you do not have a Facebook Page

If you are new to the Facebook business and you do not have an existing page on Facebook, you will have to create a new page and then Configure the Commerce Manager account.

You can create a new page for your Facebook account in two ways:

• From the Facebook panel at https://www.facebook.com/pages/create/?ref_type=hc(https://www.facebook.com/pages/create/?ref_type=hc)

• From the Commerce Manager

*Note: To create a new Facebook page for your business, you need the Page type and desired product category to convert the same into a Shop. Check detailed page requirements here(https://www.facebook.com/business/help/1968057156746246?id=939256796236247)

2.3. Configure Commerce Manager Account

1. On the Commerce Manager Page, Click on the "Start Selling" button.

- 2. The following window will ask you, where to sell. From the window, select Facebook.
- 3. In the Facebook section, click "Get Started"

f 🗰 Commerce Manager	earch Q 💌 🗸 🧳 🥹

	Puil name on account	
	You'll be charged a selling fee of 0% per transaction. If a transaction is \$8.00 or less, you'll be charged a flat fee of \$0.40. By clicking Finish, you agree to our Merchant Terms. Payment processors' terms apply, as described in the Merchant Terms. We take you have a transaction and share it with payment processors to support commerce features on Facebook.	
	Go Back Finish Setup	

 $\circ\,$ As soon as you are done with all the details, Click "Finish the Setup".

8. After the complete setup, you now have your Commerce Manager account on Facebook.

Se	ll on Facebook	
ľ	You've Completed Setup! Please review your business information in the right-hand column. If everything looks right, you can go to Commerce Manager to set up your product catalog, learn how to use our selling tools and assign permissions. Go to Commerce Manager	
1	Link Business Accounts You'll answer a few questions about your business and link your Page, so that customers can buy from you.	_
2	Set Your Preferences Set Select the shipping options you offer, set your return policy and enter an email address where customers can reach you.	
3	Set Up Payouts Your payouts will be sent to the bank account you link in this step. You'll need to have your bank routing number and account number on hand. Learn more.	

2.4. Configure Default Mapping and Product Import

The app lets you configure the default settings for Facebook Marketplace so that the app automatically maps with your available Shopify store products and the warehouse location.

Category Mapping

This process helps you select the product category and map the location of the store with the Facebook Business Page.

1. In the next window, select the "Product Category" from the drop-down menu.

Store		Q Search		SK
Home	Facebook Marketplace Connector			by CedCommerce
Crders				
Products				
Customers				
Analytics		Pro Manped to w	filing	
Arketing		mapped to w	alerouse here	
Ø Discounts		•	• •	
🕂 Apps		CATEGORY MAPPING		
SALES CHANNELS		Calented Escaback estances	Annarel & Accessories	
😨 Online Store 💿		Apparel & Accessories/Shoes		
			Apparei & Accessories/sinces	
		MAPPING		
		Facebook Pages	Shopify Locations	
		CedCommerce Sandbox Page	Vishwas Khand 3, Gomti Nagar	

2. A Sub-category can also be assigned under the major category tab. Select the applicable **sub-category** from the drop-down menu.

Location Mapping

For the page you selected, you can map it with your Shopify location

1. To do so, tick-mark the location you want to map to manage your inventory from it.

Store		Q Search		SK
Home	Facebook Marketplace Connector			by CedCommerce
Orders Products		Move to next step		Save
Customers		М	Profiling apped to warehouse here	
H Apps		CATEGORY MAPPING		
SALES CHANNELS		Selected Facebook category Apparel & Accessories/Shoes	Apparel & Accessories Apparel & Accessories/Shoes	:
		MAPPING		
		Facebook Pages	Shopify Locations	
		CedCommerce Sandbox Page	✓ Vishwas Khand 3, Gomti Nagar	

2. Click on the "Save" button to save the default mapping information.

Note: Make sure that you have mapped the correct warehouse location for the Facebook Marketplace, otherwise the uploaded inventories will defer and so orders will not be placed. If you miss-matched the location or changed the warehouse location, you will have to map the location again with the new one before proceeding.

Product Import to the App

As soon as the default mapping of the App is configured:

- The app will automatically start importing all the products from the Shopify store.
- The current status of the products will be available on the Dashboard and under the "Activities" section.

Store			Q Search				SK
Home		Sacebook Marketplace Connector					by CedCommerce
Crders		Dashboard	Profile	Products	Orders	Configuration	Activities

SALES CHANNELS	0			2020-03-14 07:46:01			
쪞 Online Store	0		No Product Found on your	• Shopify Store 20-03-14 07:29:33			
			Currently Running Processes				
			All Processes Completed				

3. Dashboard of the App

The dashboard of the App is an information management tool that tracks, analyzes, and displays information in order to help you monitor the different status of your selling process.

The primary dashboard of the Facebook Marketplace Connector is divided into six different sections.

- Dashboard: Keep records of all the products and orders, also shows recent activities.
- Profile: Keep a record of the configured account details and details of profiles created.
- **Products:** Keep a real-time record of all the products, its status, and notifications.
- **Order:** Keep a real-time record of the orders received, sync it between Shopify and Facebook Marketplace.
- **Configuration:** Keep the tabs for an account, location, or profile configuration.
- Activities: Keep a real-time record of recent activities and to-do actions.

In this section:

 Dashboard Tab of the App(https://docs.cedcommerce.com/cedcommerce/facebook-marketplaceconnector-user-manual/?section=dashboard-tab-of-the-app)

- Profile Tab(https://docs.cedcommerce.com/cedcommerce/facebook-marketplace-connector-usermanual/?section=profile-tab)
- Products Tab(https://docs.cedcommerce.com/cedcommerce/facebook-marketplace-connector-usermanual/?section=product-tab-2)
- Orders Tab(https://docs.cedcommerce.com/cedcommerce/facebook-marketplace-connector-usermanual/?section=order-tab-2)
- Configuration Tab(https://docs.cedcommerce.com/cedcommerce/facebook-marketplace-connector-usermanual/?section=configuration-tab)
- Activities Tab(https://docs.cedcommerce.com/cedcommerce/facebook-marketplace-connector-usermanual/?section=activities-tab)

3.1. Dashboard Tab of the App

A dashboard tracks orders and keeps the record of products imported and uploaded along with all the recent activities.

The dashboard displays-

- The recent activities performed by the application.
- The status of the products that have been imported or uploaded on Facebook Marketplace.

Dashboard	Profile	Products	Orders	Configuration	Activities
	Welcome,				
	Product(s)	Recent Activit	ies		
		ported 2020-05	ok product(s) upload completed 5-06 08:10:09		
		Facebo 2020-05	ok product(s) upload completed 5-06 08:00:04		
	Order(s)	Facebo 2020-05	ok product(s) upload completed 5-06 07:32:25		
		inceled ending nipment ror		View All Activities	

You can view the complete activities that took place in the while on your App by clicking on "View All Activities"

3.2. Profile Tab

Profiling helps in the categorization of products. In case you wish to set a particular template or conditions for several products, you can set a profile for the same. While uploading the products from the App to the Marketplace, these profiles help you upload as you want.

Store		Q Search				SK
Home	Facebook Marketplace Con	by CedCommerce				
Orders	Dashboard	Profile	Products	Orders	Configuration	Activities
Products Customers Analytics Marketing		Import Profiles			Create Profile	
Discounts Apps					Total 0 profiles	
SALES CHANNELS				Re	set Filters O Columns	
La onine store o		Action Name	Source	Query Items	Detail	
			Er (-	npty Result		

Profiling saves your time by assigning the values and uploading the products in sets rather than doing it individually.

3.3. Product Tab

This section will provide all the information to you regarding your products. It keeps records of all products, it's status and reflects notification.

After all the products are imported on the app, you can upload them to Facebook Marketplace. The app allows you to upload your products in three forms namely, **bulk uploading, profiles based product uploading, and selective uploading.**

by CedCommerce
tivities

In this section

- How to upload products in bulk?(https://docs.cedcommerce.com/cedcommerce/facebook-marketplaceconnector-user-manual/?section=how-to-upload-products-in-bulk)
- How to upload products based on profile?(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=how-to-upload-products-based-on-profile)
- How to upload selective products?(https://docs.cedcommerce.com/cedcommerce/facebook-marketplaceconnector-user-manual/?section=how-to-upload-selective-products)

3.3.1. How to Upload Products in Bulk?

Through the app, you can upload all the products on Facebook Marketplace at once.

In order to upload the products on Facebook Marketplace:

1. Click on "Bulk upload" to upload products all at once.

Dashboard	Profi	ile	Products	Orders	Configuration	Activities
	Produ ⇔ Sync wit	ICTS th Shopify			🕑 Bulk Upload	
	Shop	pify		Showing 0 to 2	0 of 8823 main products Total Variants 8823

		i i	Made With Love" 3-Piece Rectangular Red Baker Set	0 in Stock	Finished	0

This is the "By default" setting of the App.

3.3.2. How to Upload Products Based on Profile?

You have an option to upload a specific set of products as well. You can categorize a set of products under profile and upload it in the form of sets.

To upload the products:

- Select the "profile" while uploading.
- Click "Bulk Upload"

Dashboard	Profile	Products	Orders	Configuration
		Mass Upload		X 💮 Bulk Upload
	Shopify	Please Note Select a profile before uploading, by d	efault it will upload by default profile

3.3.3. How to Upload Selective Products?

Other than the mass uploading and profile-based product uploading, the app also facilitates you to upload selective products.

In order to upload selected products, follow these steps:

- 1. You need to "Select the products" and click the "Action Required" button.
- 2. Click "Upload", to upload the products manually.

3.4. Order Tab

In order to provide flexibility to its users, the app provides auto-synchronization; where you can easily receive all the orders placed on Facebook Marketplace, to your app, and then on the Shopify store.

This tab enables you to manage your orders, acknowledgments, cancellations, and shipment. The status for each of them is reflected on Facebook Marketplace in real-time.

The app facilitates you with this important information that you can view from a single dedicated panel.

• Facebook Order ID: This column explains the details about an order in the form of a Facebook Order ID through which the order has been placed.

- Managed By: This column shows who is managing that particular order. You can either manage the order through the App or by Shopify.
- Emails: The column of email-address shows the email addresses of the buyers to reach out to them when needed.
- Payments: This is the amount that a buyer pays for an order displayed beside the email address.
- Quantity of products: The quantity being ordered is also displayed in the app.
- Status of order: The status of the order is displayed that signifies whether the order is in a pending state, shipped, or canceled.
- Action: You can manage and view the orders by clicking on the "View" option from the Action tab.

219781482444079	Shopify(2223939420245)		USD 16.25	3	• canceled	View

When you click on "**View**" you can get complete information about an order. As soon as you click on "View", you will be informed about the details of an order, its status, price, and seller's information.

Different order statuses reveal the true condition of the orders placed, as:

- Pending: The order is pending, it is yet to be fulfilled.
- Skipped: Order skipped from the panel, need to be acknowledged.
- Error: There is an error in the order creation.
- Canceled: The order has been canceled.
- Shipment: The order is in shipment.

In this section

- How to manage orders in a pending state?(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=how-to-manage-pending-orders)

- How to fulfill the orders?(https://docs.cedcommerce.com/cedcommerce/facebook-marketplace-connectoruser-manual/?section=how-to-fulfill-the-orders)

3.4.1. How to Manage Pending Orders?

The order is said to be in pending status when the order is placed on Facebook Marketplace and the product is available on the App, in all cases, the app automatically acknowledges the order from Facebook and creates it on Shopify.

When you click on the "**View**" option of the order, the next screen will feature order details to manage the order from the app.

3.4.2. How to Manage Skipped Orders?

The order is in the skipped status when:

The order is placed on Facebook Marketplace, but the product is not available on Shopify and has been directly created on the Marketplace.

The orders which are in the "Skipped" state, can be managed by mapping the products for which the order has been placed to the available product on the Shopify store.

Order Mapping

This feature enables you to map the existing product on the App with the product for which the order has been created.

To do this,

- Click on the "View" option.
- On the next window, locate the "Map it" button to map that product.
- After you map the product, you can then "**Acknowledge**" the same from the App to manage it from Shopify.

< Orders View Order Acknowledge Cancel				Mark as fulfil

3.4.3. How to Cancel the Order?

As long as the order is in the pending state, the dashboard of the app facilitates you to cancel the order, in case you want to cancel it.

To cancel the order, click on the "**Cancel**" button located at the top left corner. The order will be canceled and it will not be created.

Note: After you mark order to fulfill you cannot make any alterations, both the "Cancel" and "Mask as fulfill" button will be inactive.

3.5. Configuration Tab

The Configuration tab displays three tabs that display your account setting and all the information related to your profile like User Details, Default Profile, and Facebook account.

In the Configuration setting, you can see details of default mapping, manage various settings on the Facebook business page, and manage your Shopify and Facebook account.

In this section

- Managing your General Setting.(https://docs.cedcommerce.com/cedcommerce/facebook-marketplaceconnector-user-manual/?section=manage-your-general-setting)
- Managing your Facebook Shop Setting.(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=manage-your-facebook-shop-setting)
- Managing your Account Setting(https://docs.cedcommerce.com/cedcommerce/facebook-marketplaceconnector-user-manual/?section=manage-your-account-setting)

3.5.1. Manage your General Setting

This tab shows the "User Details" that include the Username and the email address that you used while connecting to the app.

Dashboard	Profile	Products	Orders	Configuration	Activities

				save	

The "Category Mapping" section reflects the selected product category, you can choose/change it from the dropdown menu and click on the "Save" option.

3.5.1.1. Attribute Mapping

To make your products even more discoverable across Facebook commerce surfaces, the app now features a new update called the "**Attribute Mapping**". With the help of attribute mapping, you can enhance your catalog with more product information.

Enhanced catalogs make it easier for buyers to consider a broad range of items and find the exact product they want by enabling discovery through search, filters, and recommendations. By enhancing your catalog, you can also add attributes like age group, color, gender, brand, size material, and so on.

You can complete the attribute mapping of your product category either at the time of on-boarding or from the **"Configuration"** section.

Note: If you sell under two different product categories, you can complete the attribute mapping of one category right while on-boarding while the attribute mapping for another category can be done by creating a new profile and thereafter mapping the attributes for those products.

Under the "General Tab" of the Configuration section, locate the "Default Profile" section.

- Managing products auto-delete on Marketplace(https://docs.cedcommerce.com/cedcommerce/facebookmarketplace-connector-user-manual/?section=manage-products-options)

3.5.2.1. Manage Products-Options

Product Auto Update

If this feature is enabled, any changes that you make in the products feed on Shopify, then it will be automatically reflected for that particular product on Facebook Marketplace.

Product Auto-Create

(If enabled) If any new product is added to the Shopify store, then that product would be automatically added on Facebook Marketplace.

Cancel Order

Your order will be automatically canceled on Facebook if the product is unavailable on your Shopify store. This situation usually occurs when the auto-delete setting is disabled.

Product Auto-Delete

With this setting, the product would be automatically deleted from Facebook once it is deleted from Shopify.

3.5.3. Manage your Account Setting

This tab shows the current Shopify store that is connected to your Facebook Shop.

Currently Running Process: All the tasks running in progress.

4. Frequently Asked Questions with Answers

This is a compilation of all the relevant questions, issues, and most sought information regarding the Facebook Marketplace. You can get help from these if you are stuck in mid-ways.

i. I am not from the US, can I still sell on Facebook Marketplace with Checkout? Ans: CedCommerce API Integration is only available for US sellers. But if you have a US entity, US address, US bank account, US warehouse, then you can onboard through the Commerce Manager.

ii. How long does it take to get Facebook Marketplace approval? Ans: It may take a week for your listings to get live on Marketplace. Your catalog will be reviewed against quality guidelines during this time.

iii. Why is my form approval rejected by Facebook?

Ans: Facebook may reject your approval from selling on Marketplace due to certain conditions, some of them are:

You do not have the admin access for your page.

You have a problem while configuring the payment details.

You have the Facebook Ads Page with a Catalog.

You shop is in the "Local Business" category, change the same to "**Shopping and Retail**"

I have my Facebook Page, but it is not showing up in the App?

Ans: You need to have the "Admin" access for the page. The App requires permission to view, and manage your page. Make sure you have given permission for access to CedCommerce.

Check out this link: https://www.facebook.com/settings?tab=business_tools(https://www.facebook.com/settings?tab=business_tools)

and click on the "CedCommerce icon.

What is the difference between an Offsite Page and an Onsite Page?

Ans: Offsite Page: All those Facebook pages/shops that surface the offsite checkout option, which means "**Send seller a Message**" option that lets the buyers send the seller a message or redirect to the website to make a purchase.

Onsite Page: All those Facebook pages/shops that feature a "**Checkout on Facebook**" option that facilitates the buyers to make the purchase within the App itself.

Will my products start reflecting on the Facebook Marketplace after Shop approval? Ans: Soon after you get the approval, your products will pass through the manual quality check conducted by Facebook and as it qualifies, it will start reflecting on the Marketplace. How many shops can I have with one company and one bank account?

Ans: You can have only one Shop per bank account and per entity. Facebook doesn't allow you to create more than one shop.

I am unable to connect my page to the App. What is the reason?

Ans: There may be more than one reason if you are unable to connect your page to the App. Some of them are:

Ads Page: If you use your Facebook Page for advertising, then you can authenticate that page for the Marketplace, only by connecting another new catalog. You will have to discontinue the current ads you were running through that account, else you need to create a new page.

Offsite Page: If your page/shop features an Off-site checkout option, then also you will be unable to connect the page. However, you can convert the same page into Onsite Page by creating a new catalog. Reach out to us to know how to do it.

I have mapped another warehouse location with the App, but now I have changed my

location. What to do?

Ans: You will have to do the remapping of your warehouse location. Contact us for the same.

What happens if the order is placed for an item that is not on my Shopify store? Ans: You have the option to either "Cancel" that order or you can "Map" the order with any available item in your store. Check out the "Order Panel" for more information. Is it mandatory to create profiles before uploading the products to Facebook

Marketplace?

Ans: No, it is not necessary to make a profile while uploading your products. You can "bulk upload" your products directly on Facebook or you can do it by creating profiles or alternatively selecting the products one-by-one.

What are the ways to discover the products with the checkout option on the Marketplace?

Ans: There are two ways to discover products enables with checkout on the Marketplace :

Through Search: Only the seller can search through the shop name. **Through Browse:** Products will be available in the usual manner on the Marketplace.

m. What are the catalog field requirements on the Marketplace? Why do my products have this issue?

Ans: The Marketplace only allows the Catalog fields that are required on the Marketplace, these requirements can be found here: https://developers.facebook.com/docs/commerce-pl atform/catalog/fields#model(https://developers.facebook.com/docs/commerce-platform/catalog/fields#model)

n. Why is my order reflecting pending state? What should I do?

Ans: The orders will be reflecting to be at the "pending" stage when the order is acknowledged and has not been shipped till now. In another condition, it can happen if the order is placed for an item that is not available on your Shopify store and is directly created on the Marketplace. (You have the option to "map" the product with the existing product on the App.)
