1. Overview

Amazon Affiliate Program extension for Magento 2, developed by CedCommerce enables the Magento users to connect with Amazon Affiliate program to advertise or offer its products on their website and earn commissions.

With the help of this extension, the store owner can easily setup different prices offered at Amazon, such as Sale Price, Offer Price, or Regular Price. In case of product variations, this extension provides a flexibility to fetch all the variants of the products such as color, size, fabric, and so on.

Since, adding the products one by one makes a lengthy and difficult process; using this extension the store owner can easily import all the products in bulk. Adding the products to the cart from the Magento store redirects the product purchasing process to the Amazon's website and the store owners do not have to bother about the checkout and payment process.

Thus, the extension in accordance with Affiliate APIs of Amazon, enables the Magento 2 store owners to perform all the activities that facilitates the fetching of the Amazon product data to their websites, advertising the products, and then redirecting the purchase process back to the Amazon website. Hence provides a very good opportunity to earn the commissions through the advertisements.

Key features are as follows:

- Imports items information such as description, images, and reviews.
- Enables products import in bulk from Amazon.
- Imports products based on ASIN, Keywords, category-wise.
- Separate Cart for Amazon and Magento Products.
- Though the front-end users are allowed to add items to the Shopping Cart on the Magento store, the checkout is processed on Amazon.
- Synchronization of product price, image, description, and availability of products.
- Enables fetching of Product variation data such as color, size, fabric, and so on.

2. Retrieve Amazon Product Affiliate API Access Key and Secret Key

Once the Amazon Affiliate Program for Magento 2 extension is successfully installed on the Merchant's store, Amazon Affiliate tab appears on the left navigation bar of the Magento Admin Panel. The merchant has to retrieve and fill-in the API credentials in the Amazon Affiliate Configuration page of the admin panel.

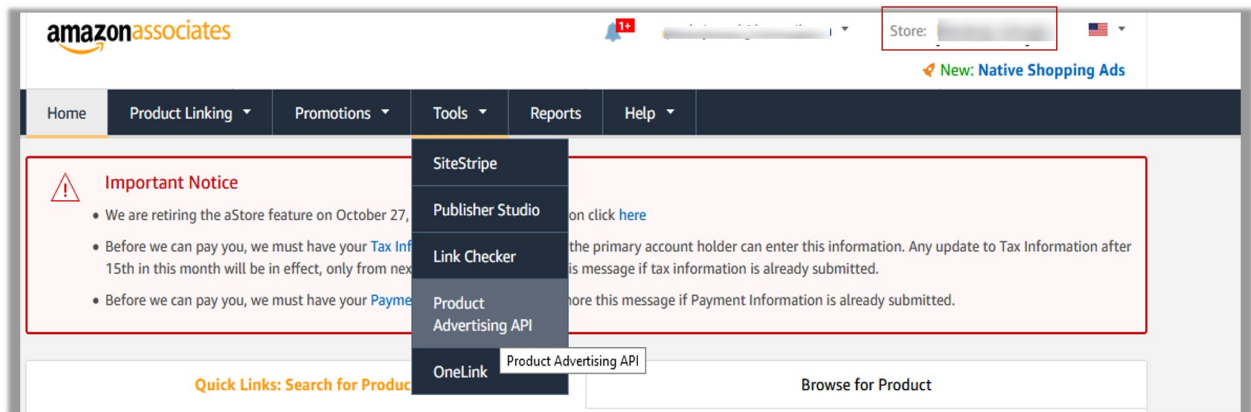

The admin has to log in the Amazon Affiliate Program account to obtain the following API credentials:

Magento Admin Panel	Amazon Affiliate
Amazon Affiliate Api key	Access Key ID
Amazon Affiliate Tag key	Store ID
Amazon Affiliate Secret Key	Secret Access Key

The admin needs these API Key and Secret key credentials to build up the communication between the Amazon marketplace and the Magento 2 store.

To retrieve Amazon API Access Key and Secret Key

1. Access the <https://affiliate-program.amazon.com>(<https://affiliate-program.amazon.com>) link.
2. Log in with the registered credentials.
The page appears as shown in the following figure:

3. Copy the Id appearing next to the **Store** field as highlighted in the figure.
Note: Keep the ID ready to paste it in the **Amazon Affiliate Tag key** while setting up the configuration setting in the Magento 2 Admin panel.
4. On the **Tools** menu, click **Product Advertising API**.
The page appears as shown in the following figure:

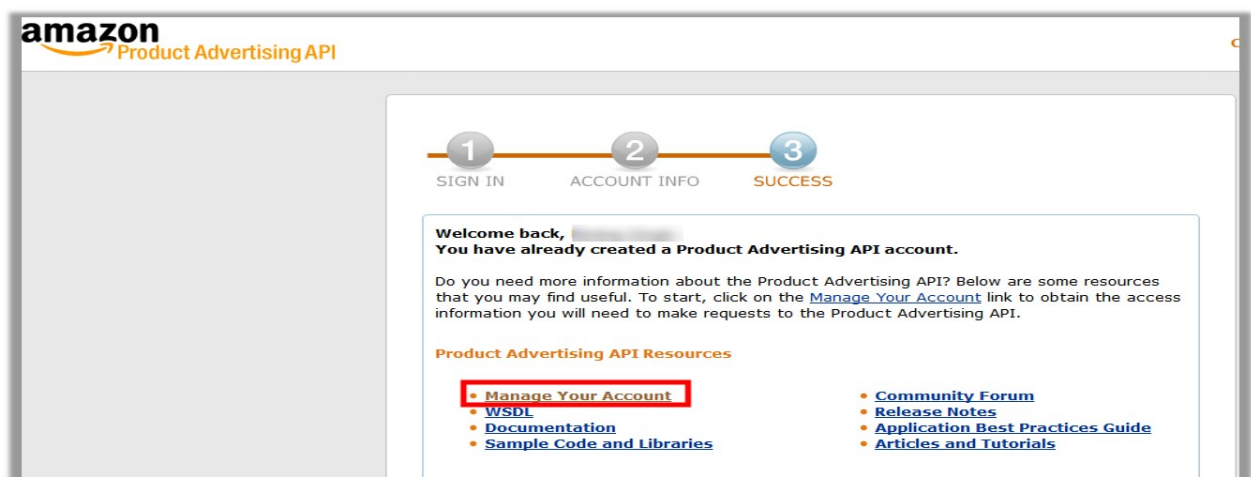

5. Click the **Sign Up Now** button.
The **Sign in** dialog box appears as shown in the following figure:

The image shows the Amazon sign-in page. At the top is the Amazon logo. Below it is the heading "Sign in". There are two input fields: "Email (phone for mobile accounts)" and "Password". To the right of the password field is a link "Forgot your password?". Below the input fields is a yellow "Sign in" button. Underneath the button is a checkbox labeled "Keep me signed in." with a link "Details" and a dropdown arrow. At the bottom, there is a link "New to Amazon?" and a button "Create your Amazon account".

6. Enter the login credentials and then click the **Sign in** button.
The page appears as shown in the following figure:

7. Click the **Manage Your Account** link.
The **Manage Your Account** page appears as shown in the following figure:

amazon Product Advertising API

Developer Resources

- Resource Center
- Developer Forums
- Best Practices Guidelines
- Technical Documentation
- Code Samples
- WSDL
- Product Advertising API License Agreement

Manage Your Account

The Product Advertising API uses Amazon Web Services infrastructure for account management and other Product Advertising API resources. We've created an AWS account for you, where you will sign in to retrieve your AWS account security credentials.

Security Credentials

You will use your AWS account security credentials to make calls to the Product Advertising API, authenticate requests, and identify yourself as the sender of a request.

To retrieve your AWS account security credentials:

1. Sign in your AWS account at [AWS Security Credentials Console](#). Use the same email address and password.
2. A pop-up message appears. Click **Continue to Security Credentials**.
3. Click **Access Keys (Access Key ID and Secret Key)**.
4. Click **Create New Access Key**, and then click **Show Access Key** or **Download Key File** to retrieve the credentials.
5. Save the access key information in a safe location. You will use these credentials to make calls to the Product Advertising API.

Important

You can access the secret access key only when you first create an access key pair. For security reasons, it cannot be retrieved at any later time. Ensure that you save both the access key ID and its matching secret key. If you lose them, you must create a new access key pair.

IAM roles are not currently supported. You must use the root account credentials.

8. Click the **AWS Security Credentials Console** link.
A dialog box appears as shown in the following figure:

amazon
web services

Sign In or Create an AWS Account

What is your email (phone for mobile accounts)?

E-mail or mobile number:

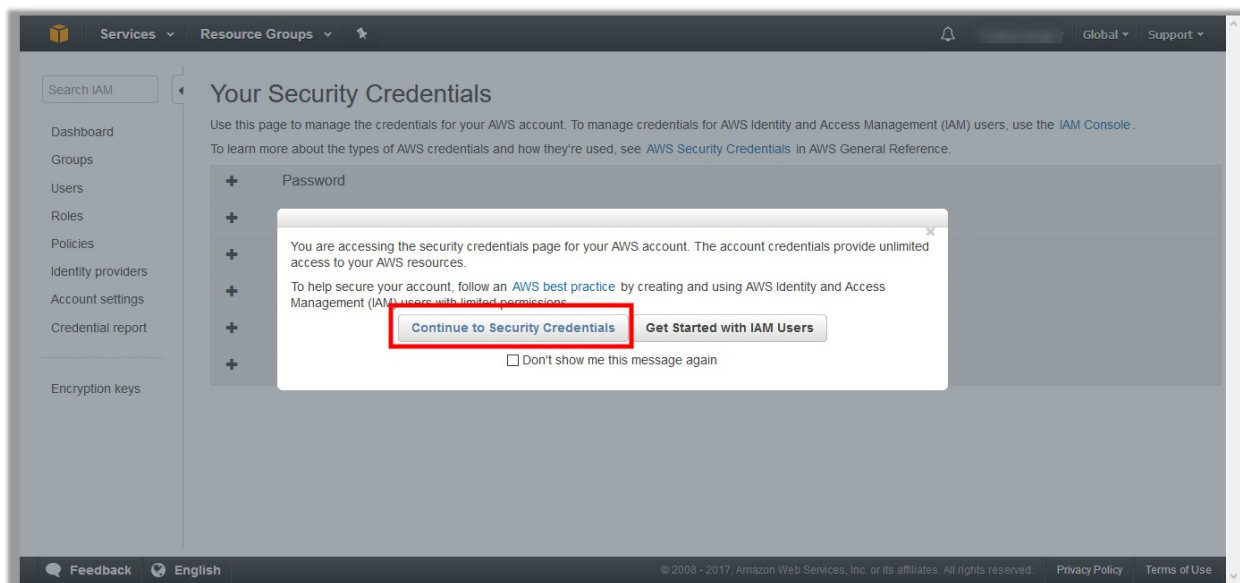

☐ **I am a new user.**

☒ **I am a returning user and my password is:**

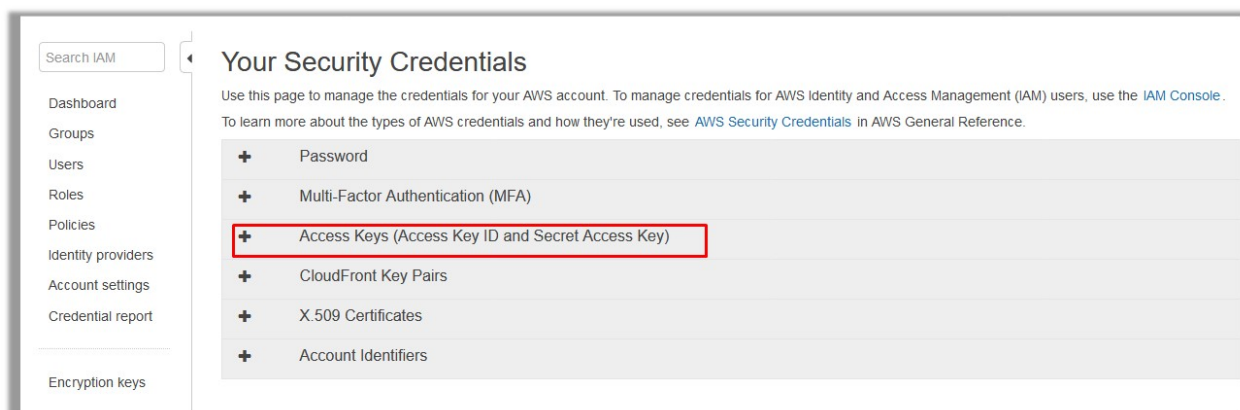

Sign in using our secure server

[Forgot your password?](#)

9. Enter the login credentials, and then click the **Sign in using our secure server** button.
The dialog box appears as shown in the following figure:

10. Click the **Continue to Security Credentials** button.
The page appears as shown in the following figure:

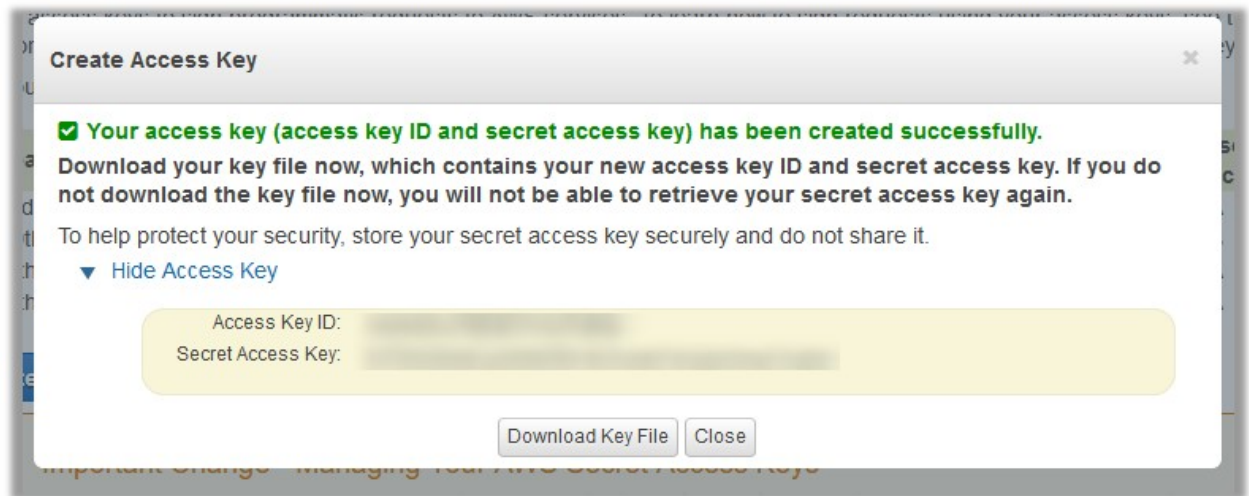

11. Click the **Access Keys (Access Key ID and Secret Access Key)** tab.
The tab is expanded and the page appears as shown in the following figure:

12. Click the **Create New Access Key** button.

The **Access Key ID** and the **Secret Access Key** are created and appears as shown in the following figure:

Note: Copy and keep the Access Key ID and the Secret Access Key ready to use it while setting up the configuration setting in the Magento 2 Admin panel.

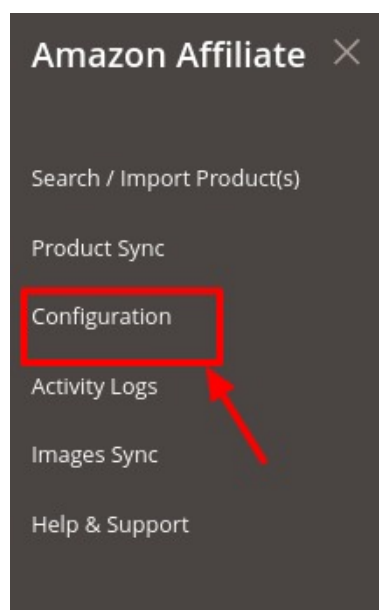

3. Amazon Affiliate Configuration Settings

After retrieving the Amazon Affiliate API credentials, the store owner can use them while setting up the configurations through the Admin panel.

To set up the Amazon Affiliate Configuration

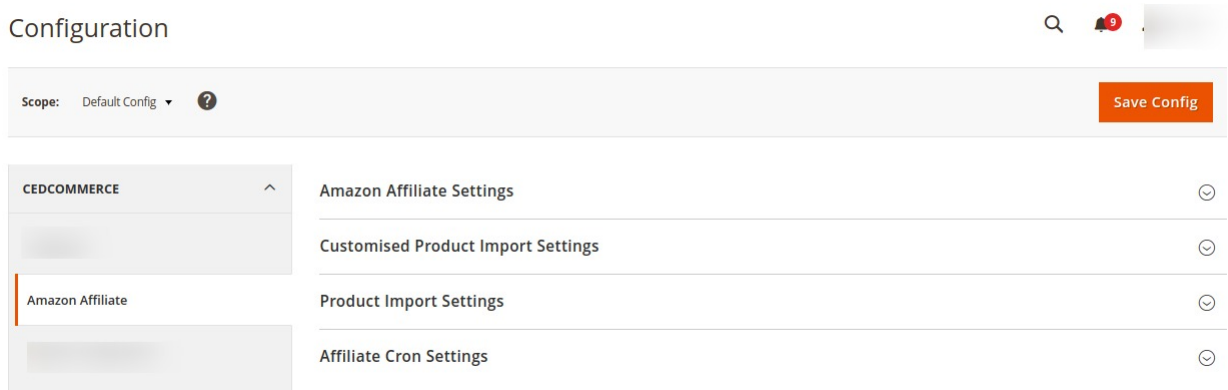

1. Go to the Admin panel.
2. On the left navigation bar, click the **AMAZON AFFILIATE** menu.

The menu appears as shown in the following figure:

3. Click **Configuration**.

The **Configuration** page appears as shown in the following figure:

4. In the right panel, click the **Amazon Affiliate Settings** tab.

The tab is expanded, and the section appears as shown in the following figure:

5. Under **Amazon Affiliate Settings**, do the following:

- In the **Amazon Affiliate Api Key** box, paste the **Access Key ID** copied from the Amazon Affiliate account.
- In the **Amazon Affiliate Tag Key** box, paste the **Store ID** copied from the Amazon Affiliate account.
- In the **Amazon Affiliate Secret Key** box, paste the **Secret Access Key** copied from the Amazon Affiliate account.

6. Now Click on **Customised Product Import Settings**, the tab is expanded as:

Customised Product Import Settings

Shipping Type [global]

Quantity Must Not Below [global]

Enter Custom Price Lower Range [global]

Enter Custom Price Upper Range [global]

Map Brand Attribute [global] ?

Add Default Attribute For Brand. **Brand Attribute In Amazon**

7. Under **Customised Product Import Settings**, do the following steps:
 - In **Shipping Type**, select the type of shipping from the menu.
 - In **Quantity Must Not Below**, select the quantity.
 - In **Enter Custom Price Lower Range**, enter the price for the lower range products.
 - In **Enter Custom Price Upper Range**, enter the custom price of the upper range products.
 - In **Map Brand Attribute**, add the brand attributes in Amazon.
8. Scroll down to the **Product Import Settings** tab, and then click the tab.
The tab is expanded, and the section appears as shown in the following figure:

Product Import Settings

Set Default Qty for Products [global] ☒ Use system value

Enable Imported Products [global] ☒ Use system value

Set Product Visibility [global] ☒ Use system value

Set Throttle Limit [global] ☒ Use system value
Set Time in Seconds

Set Product Push Limit [global] ☒ Use system value

9. Under **Product Import Settings**, do the following steps:
 - a. In the **Set Default Qty for Products** box, enter the required number of products.
 - b. In the **Enable Imported Products** list, select the **Yes** option to enable the imported products.
 - c. In the **Set Product Visibility** list, select the required option to set the area where the product is visible.
 - d. In the **Set Throttle Limit** box, enter the time in seconds.
Tip: To change the value, clear the Use System value check box.
 - e. In **Set Product Push Limit**, either enter the limit or select the system value.
10. Now scroll down and click on **Affiliate Cron Settings**, the tab is expanded as:

Affiliate Cron Settings

All Inventory Price Cron <small>[global]</small>	<div>Disable</div> <div>▼</div>
	Syncing Cron Status
Push All product Ids Cron <small>[global]</small>	<div>Disable</div> <div>▼</div>
	Push Product Ids in Table for process
Process All product Ids Cron <small>[global]</small>	<div>Disable</div> <div>▼</div>
	Process all Product Ids in Table

11. Under **Affiliate Cron Settings**, do the following steps:
 - a. In **All Inventory/Price Cron**, select **Enable** to sync the inventory and price through crons.
 - b. In **Push All Product Ids Cron**, select **Enable** to push the products in the table.
 - c. In **Process All Product Ids through Cron**, select **Enable** to process the product ids.
12. Click the **Save Config** button.
The Configuration settings are saved and a success message appears.

4. Search and Import Products from Amazon

This extension allows the admin to search and import the products through the three different criteria as follows:

- S(<http://docs.cedcommerce.com/magento-2/amazon-affiliate-program-magento-2?section=search-and-import-products-through-keywords>)
e(<http://docs.cedcommerce.com/magento-2/amazon-affiliate-program-magento-2?section=search-and-import-products-through-keywords>)
arch / Import via Keywords(<http://docs.cedcommerce.com/magento-2/amazon-affiliate-program-magento-2?section=search-and-import-products-through-keywords>)
- Search / Import via ASIN(<http://docs.cedcommerce.com/magento-2/amazon-affiliate-program-magento-2?section=search-and-import-products-through-asin>)
- Search / Import via Amazon Node Id(<http://docs.cedcommerce.com/magento-2/amazon-affiliate-program-magento-2?section=search-and-import-products-through-amazon-node-id>)
- Import Products Through Amazon Product Link(<https://docs.cedcommerce.com/magento-2/amazon-affiliate-program-magento-2?section=import-products-through-amazon-product-link>)

4.1. Search and Import Products through Keywords

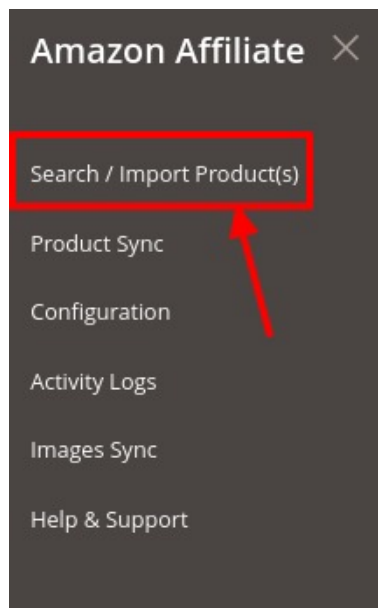

To import the products based on keywords, the admin can follow any of the following tasks:

- Search the products based on the defined criteria and then import the selected products
- Import all the products based on the defined criteria

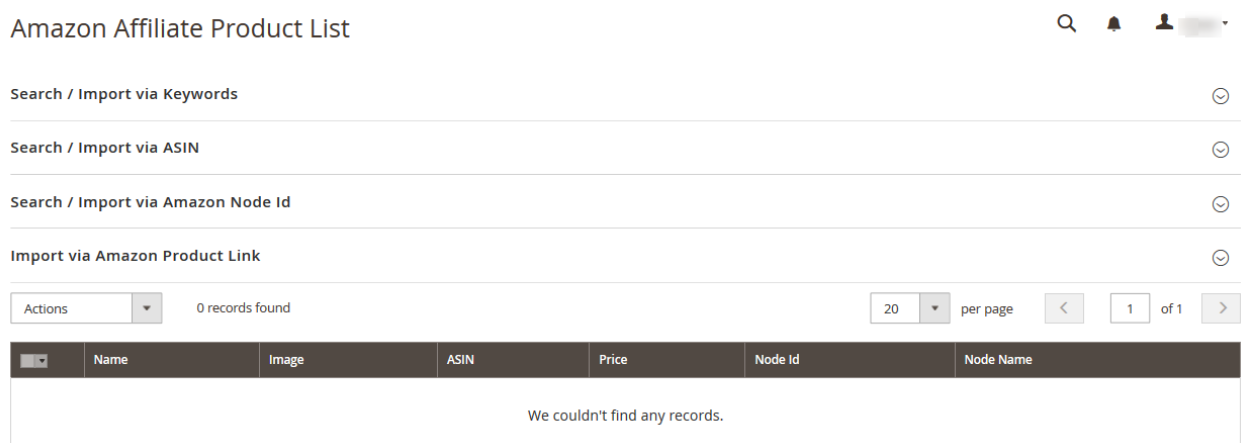

The admin can also set up the Magento Import Settings; based on which the products are imported. Otherwise, the default settings are implemented.

To import the products based on keywords

1. Go to the Admin panel.
2. On the left navigation bar, click the **AMAZON AFFILIATE** menu.
The menu appears as shown in the following figure:

3. Click **Search / Import Products(s)**.
The **Amazon Affiliate Product List** page appears as shown in the following figure:

4. Click the **Search / Import via Keyword** tab.
5. *To set up the **Magento Import Settings**, click the **Magento Import Settings** tab.*
The tab is expanded and the fields appear as shown in the following figure:

Amazon Affiliate Product List

Search / Import via Keywords

Set Product Visibility

Category Id

Enter "," separated category id's where product will be assigned . E.g : 104,205,106

Set Imported Product Default Qty

If field left blank, default quantity 10 will be set

Product Status

Website

Note: If the Magento Import Setting is not defined, then it is set to the default settings.

- a. In the **Set Product Visibility** list, select the required option.
 - b. In the **Category Id** box, enter the required category ids separated by comma.
For example: 102,103,204,205
 - c. In the **Set Imported Product Default Qty** box, enter the number of products that the admin wants to import.
Note: If the field is left empty, then the default quantity is set to 10.
 - d. In the **Product Status** list, select the required status of the product.
 - e. In the **Website** list, select the required website.
6. To display the **search result and then import all the selected products**, click the **Search** tab.
 The tab is expanded and the fields appear as shown in the following figure:

Search / Import via Keywords

Search Import **Magento Import Settings**

Enter Keyword *
Enter Product name or title to search E.g. Xbox 360
