## 1. Overview

Founded in 2011, Wish is a mobile e-commerce application based company in San Francisco, California operating globally with a large presence in North America, Europe, Brazil, and China. **It is the 6th largest e-commerce company in the world.**

Wish.com is competing with the companies such as Walmart and Amazon. **Wish currently works with thousands of merchants serving millions of users globally.**

Wish Integration for Magento 2 is an advanced API integration that helps the Magento 2 store owners to integrate their store with Wish and to synchronize inventory, price, and other product details for the product creation and its management between the Magento 2 store and the Wish marketplace. The Wish Integration for Magento 2 extension interacts with the Wish Marketplace to integrate the synchronized product listing between the Magento and the Wish retailers. After installing the extension, the merchant can create the Wish Categories and the dependent attributes on the Magento 2 store.

The process enables the merchant to configure the desired product category into Magento for automatic submission of the selected product to the same Category on Wish.

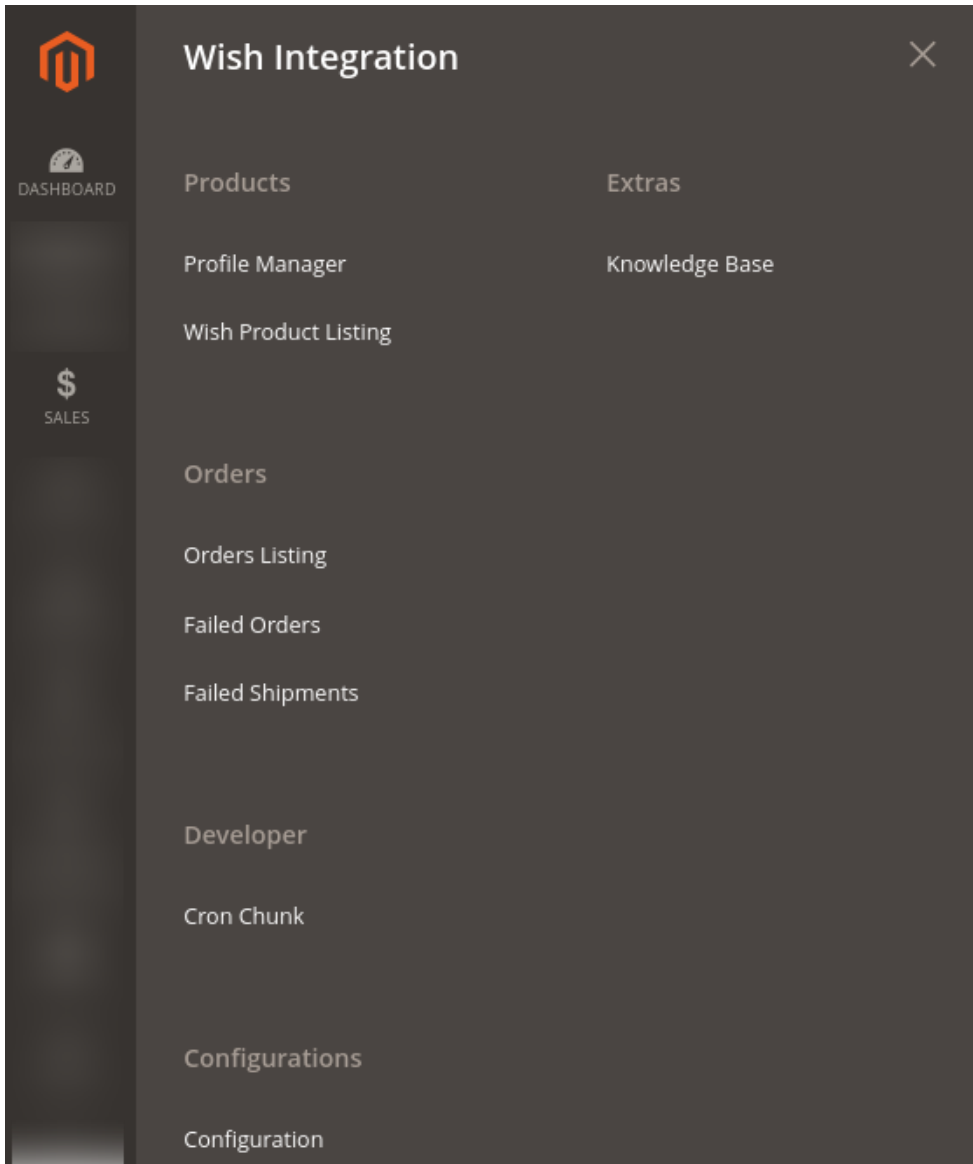

### **Key Features are as follows:**

- **Profile-based product upload:** Admin can create a profile, map the Wish category and attributes to the Magento category and attributes, and then after assigning the products to the profile can easily upload products to Wish.com
- **Bulk Upload System:** The merchant has the flexibility to upload any number of products on Wish.com using bulk product upload feature.
- **Synchronized Inventory\*:** Auto synchronization of the inventory at regular intervals and the listing of the products along with all the details is established between Magento and Wish.com
- **Enable and Disable Products\*:** Merchants can close and reopen the products on Wish.com using Enable and Disable feature.
- **New Order Notifications\*:** Whenever a new order is fetched from Wish.com, the admin receives a notification.
- **Rejected Products Notification:** If any product containing some invalid details is rejected, then its information is fetched from the automatic synchronized requests along with the error due to which it is rejected.
- **Simple and Configurable Product Upload:** Admin can upload the Simple and Configurable type of Magento product on the Wish website.

## 2. Configuration Settings

### **To set up the Configuration Settings in the Magento 2 Admin panel**

- Go to the **Magento 2 Admin** panel.
- On the left navigation bar, point to the **Wish Integration** menu, and then click **Configuration**.

- On clicking it, you will be navigated to the configuration page which appears as:

## Configuration

Store View: Default Config  

<b>CEDCOMMERCE</b> ^	<b>General</b> ⌵
Wish Configuration	Wish Product Settings ⌵
MARKETPLACE v	Wish Order Settings ⌵
HUBSPOT v	Wish Cron Settings ⌵
GENERAL v	Wish Chunk(Batch) Settings ⌵
CATALOG v	

### General

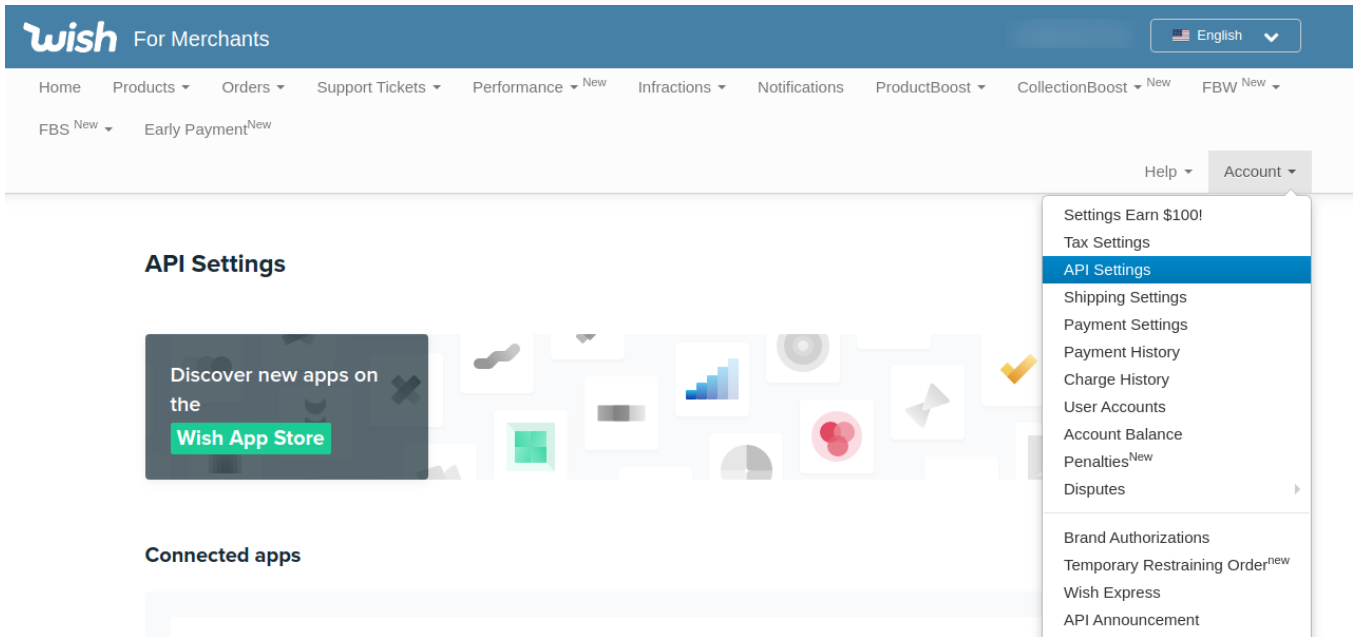

- Click **General** and the section will expand as:

The screenshot displays the 'Configuration' page for the 'CEDCOMMERCE' integrator. At the top, a yellow banner indicates a system message: 'One or more indexers are invalid. Make sure your Magento cron job is running.' The page title is 'Configuration' and the user is logged in as 'admin1'. The 'Store View' is set to 'Default Config'. A 'Save Config' button is visible in the top right.

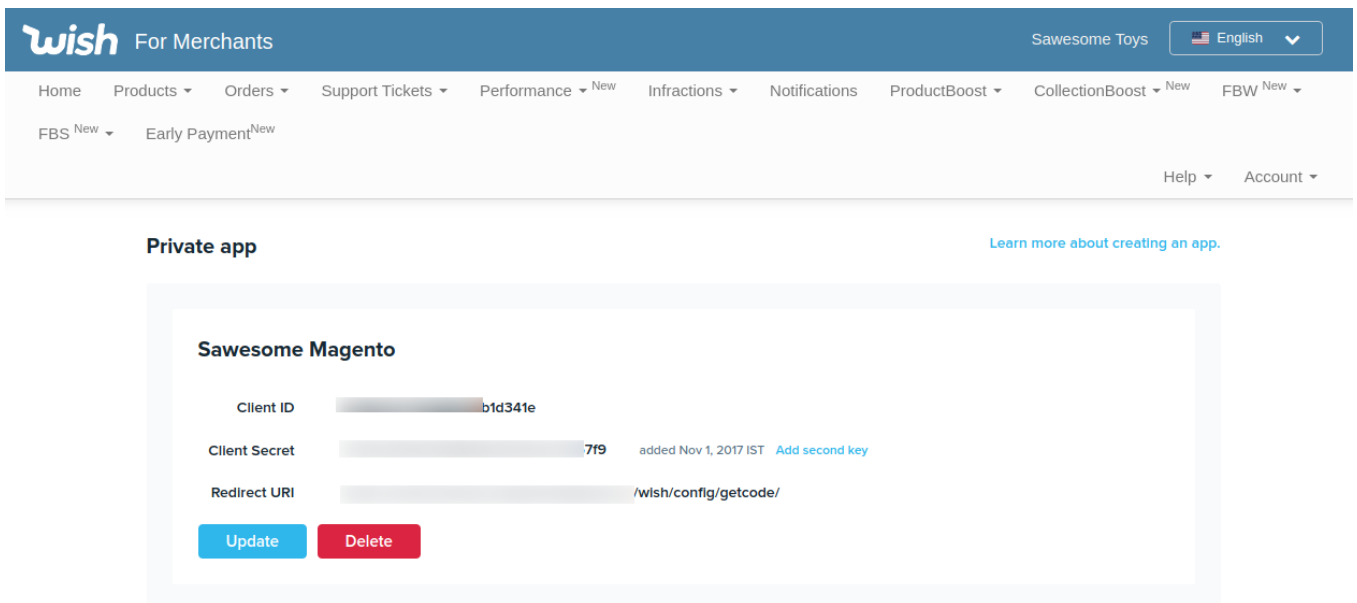

The left sidebar shows the navigation menu with 'CEDCOMMERCE' selected, and sub-items for 'Integrator' and 'General Setting'. The main content area is titled 'General' and contains the following settings:

- Enabled** (global): Yes
- Wish Account Merchant Type** (global): USD Merchant
- Api Mode** (global): Production
- Client ID** (global): 5e1: 73  
You will get this detail from merchant.wish.com Account > Setting > API Setting . If you have not created app then create it and fill detail.
- Client Secret** (global): e: id  
You will get this detail from merchant.wish.com Account > Setting > API Setting . If you have not created app then create it and fill detail.
- Redirect URI** (global): http://www.yourdomain.com/wish/config/getcode/  
Redirect URI Of Your App should be www.yourdomain.com/wish/config/getcode/
- Generate Code**: Generate Code button  
If button Seems not working then please make sure popup is enabled in browser. After click please wait it will redirect to wish.com
- Code** (global): 5bb646e
- Access Token** (global): 7c1: d5bc
- Access Token Expiry Date** (global): 2:00
- Refresh Token**: Refresh Token button  
To Refresh Token at any point of time.
- Refresh Token** (global): da658: b35
- Enable Logging** (global): Yes  
Set Yes to Start Wish Integration in debug mode. It will capture log for debug process..

- In **Enabled**, select **Yes** to enable the extension.
- The next step is **Choose Account Merchant Type** where you have to choose whether you are a USD merchant or not.
- In **API Mode**, select from **Sandbox/Production** as per your requirement.
- In **Sandbox/Production Client ID**, you need to enter the ID that you may get from your Wish seller panel.
- For that, click on the link as has been highlighted in the red box in the above image.
- On clicking it, you will be asked to login to your Wish account and once you have logged in, you will be navigated to the page as shown below. If you have already logged in, the page will appear to you as:

- On this page, you may see your client id and you may copy it from here to paste it in the configuration section in the Magento 2 admin panel.
- In **Client Secret**, enter the secret which also you can get from the Wish seller panel as shown in the image above.
- To get it, you may also click on the link below the **Client Secret** box after which you'll be taken to the page as:

- You may see your client secret and you may copy it from here to paste it in the configuration section in the Magento 2 admin panel.
- In the **Redirect URL**, enter the redirect URL which you get from the same section where you get your Client ID and Client Secret, as shown in the images above.
- In **Generate Code**, click on **Generate Code** button and the code will be generated.
- The **Access Token** will appear automatically after taking the mentioned steps.
- You may refresh the token by clicking on **Refresh Token** button.

- In **Enable Logging**, select **Yes** to Start Wish Integration in debug mode. It will capture log for debug process.
- One done, you may move on to the next section.

### **Wish Product Settings**

- On clicking the **Wish Product Settings**, the section will expand and appear as:

#### Wish Product Settings

**Product Price** [global]  ▼  
Select to send a different product price to **Wish**

**Select Store** [global]  ▼

**Wish Default Tags** [global]   
1 to 10 Tags separated by comma(,)

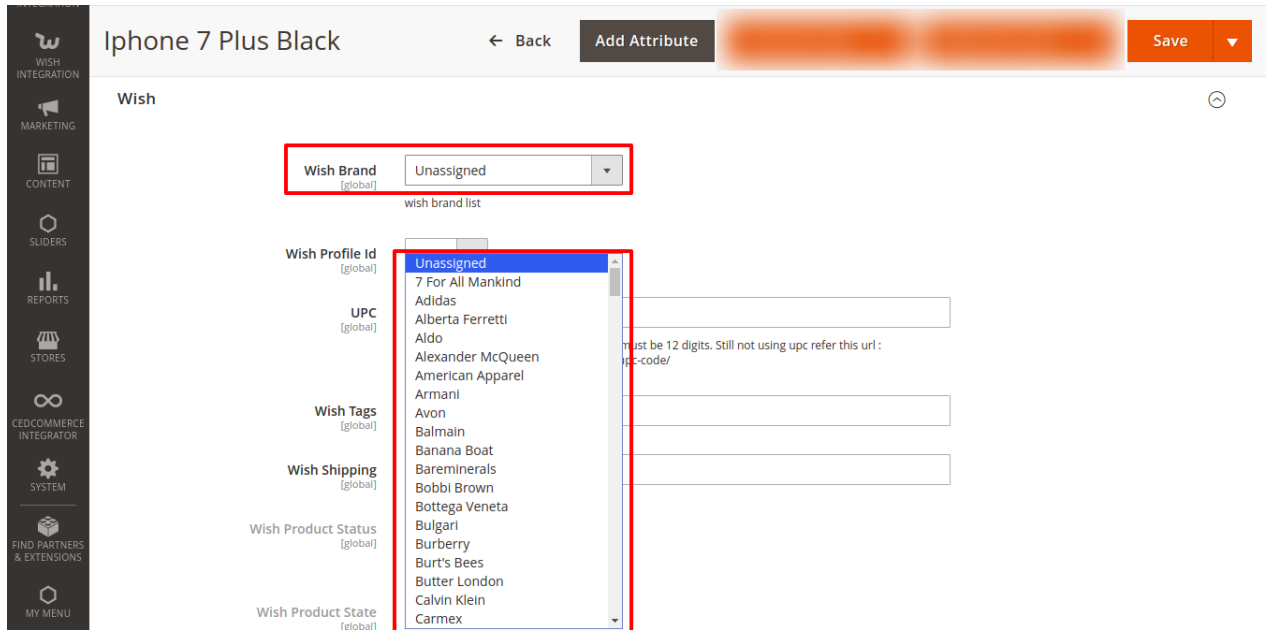

**Wish Default Shipping** [global]   
Default Shipping cost for all products who will have shipping filed empty.

**Auto Update Product** [global]  ▼  
If product is deleted or updated then auto disable and update product on wish

**Fetch Brands**

- On Clicking **Fetch Brands** button all the brands will be visible on the catalog page.
- A success message will appear.
- You can see this fetched brands on the catalog page.

- Now come back to the configuration page and proceed with the remaining settings.
- In **Product Price**, you may keep the option **Default Magento Price** or may select from the options as shown below:

- **Increase by Fixed Price:** You may choose this option if you want the price of your Magento 2 product to be increased on Wish by a particular amount. If selected, then the **Modify by Fix Price** field appears as:

**Product Price** [global]  ▼  
 Select to send a different product price to **Wish**

**Modify by Fix Price** [global]

- Now suppose your product is for \$100 on Magento 2 store and if you enter 50 in the Modify by Fix Price, then the price for your products that will reflect on Wish marketplace will be \$150 as you have chosen **Increase** option and have entered 50, so that is the price that will be added to your Magento 2 store product price and will reflect on Wish. However, the price will be same on Magento 2 store.
- **Increase by Fixed Percentage:** You may choose this option if you want the price of your Magento 2 product to be increased on Wish by a particular percent. If selected, then the **Modify by Percentage Price** field appears as:

**Product Price** [global]    
 Select to send a different product price to **Wish**

**Modify by Percentage Price** [global]   
 Numeric value Required for **Add/subtract % on Magento price** 5 for Example: Magento price +/- 5% of Magento price.

- Now suppose your product is for \$100 on Magento 2 store and if you enter 20 in the Modify by Percentage Price, then the price for your products that will reflect on Wish marketplace will be \$120 as 20% of 100 is 20 and it'll be added to 100. However, the price will be same on Magento 2 store.
- **Decrease by Fixed Price:** You may choose this option if you want the price of your Magento 2 product to be decreased on Wish by a particular amount. If selected, then the **Modify by Fix Price** field appears as:

**Product Price** [global]    
 Select to send a different product price to **Wish**

**Modify by Fix Price** [global]

- Now suppose your product is for \$100 on Magento 2 store and if you enter 50 in the Modify by Fix Price, then the price for your products that will reflect on Wish marketplace will be \$50 as you have chosen **Decrease** option and have entered 50, so that is the price that will be deducted to your Magento 2 store product price and will reflect on Wish. However, the price will be same on Magento 2 store.
- **Decrease by Fixed Percentage:** You may choose this option if you want the price of your Magento 2 product to be decreased on Wish by a particular percent. If selected, then the **Modify by Percentage Price** field appears as:

**Product Price** [global]    
 Select to send a different product price to **Wish**

**Modify by Percentage Price** [global]   
 Numeric value Required for **Add/subtract % on Magento price** 5 for Example: Magento price +/- 5% of Magento price.

- Now suppose your product is for \$100 on Magento 2 store and if you enter 20 in the Modify by Percentage Price, then the price for your products that will reflect on Wish marketplace will be \$80 as 20% of 100 is 20 and it'll be deducted from 100. However, the price will be same on Magento 2 store.
- In the **Select Store** section, click and the drop-down menu appears. Select the store for which you want to apply these settings
- In **Wish Default Tags**, you may enter 1 to 10 tags separated by commas. These tags are used as the name of the categories that a seller wants for its products.
- In **Wish Default Shipping**, enter the default shipping cost for the products which have the shipping field

empty.

- In **Auto-Update Product**, you select **enable** if you want the product to be updated on Wish if there is any change to its inventory or other details or if the product has been deleted on Magento 2 store. If you don't want to auto-update, select **Disable**.

### Wish Order Settings

- On clicking the Wish Order Settings, the section expands as:

#### Wish Order Settings

Wish Order Id Prefix <small>[global]</small>	<input type="text" value="WISH_"/>
	<small>Prefix for Wish Increment ID</small>
Allow Order Notification <small>[global]</small>	<input type="text" value="Enable"/> ▼
Order Notification Email <small>[global]</small>	<input type="text" value=""/>
Default Customer Email <small>[global]</small>	<input type="text" value=""/>
Auto Cancel Order <small>[global]</small>	<input type="text" value="Enable"/> ▼
	<small>Auto Cancel Order When Stock Not Found</small>
Auto Ship Order <small>[global]</small>	<input type="text" value="Enable"/> ▼
	<small>Auto Ship Order When Tracking Number Has Been Assigned to Shipment</small>

- In **Wish Order ID Prefix**, enter the prefix that you want to be added to each order for your product that has been placed on Wish.
- In **Allow Order Notifications**, select **Enable** if you want to be notified about the orders placed for your products on Wish marketplace.
- In **Order Notification Mail**, enter the email on which you want the notifications to be sent regarding the orders.
- In **Default Customer Mail**, enter the email ID and assign all the Wish order to it in case the customer details are not available.
- In **Auto-Cancel Orders**, select **Enable** if you want the orders to be canceled if they are out of stock. If you don't want such action, select **Disable**.
- In **Auto-Ship Order**, select **Enable** if you want the orders to be shipped automatically if the tracking number has been assigned to them. If you don't watch such action to be taken, select **Disable**.

### Wish Cron Settings

- On clicking it, the section will expand as:

Wish Cron Settings

Order Cron [global]

Inventory Cron [global]

- In **Order Cron**, if you want to Enable the crons to run for Wish orders, select **Enable**. On selecting Enable, a box will appear as:

Wish Cron Settings

Order Cron [global]

Order Cron Time [global]

Order Fetch Cron Time

- In **Order Cron Time**, select the time after which the orders will be synced and updated between Wish and Magento 2 store, periodically.
- In **Inventory Cron**, select **Enable** if you want the inventory to be updated between Wish and Magento 2 store after a particular time interval. On selecting enable, the box will appear below it as:

Inventory Cron [global]

Inventory Cron Time [global]

Inventory Update Cron Time

- In **Inventory Cron Time**, enter the time after which you want the inventory to be synced and updated between Wish and Magento 2 store, periodically.

**Wish Chunk(Batch) Settings**

- On clicking it, the section will expand as:

Wish Chunk(Batch) Settings

Product Validation Chunk Size [global]

Product Upload Chunk [global]

Product Enable/Disable/Sync Chunk [global]

- In **Product Validation Chunk Size**, select the number of products you want to be sent to Wish for validation in one batch.
- In **Product Upload Chunk**, select the number of products you want to be sent to Wish for uploading, in one batch.
- In **Product Enable/Disable/Sync Chunk**, select the number of products you want to be sent to Wish to be Enable/Disabled/Synced, in one batch.

Once you have completed all the actions mentioned above in all the sections, click on Save Config button on the top right of the page. The configuration will be completed successfully.

### 3. Profile Management

Under **Profile Manager** section, the following actions be taken,

- Adding a new profile(<https://docs.cedcommerce.com/magento-2/wish-integration-magento-2-manual/?section=add-a-new-profile-30>)
- Editing the existing profile(<https://docs.cedcommerce.com/magento-2/wish-integration-magento-2-manual/?section=edit-the-existing-profile-43>)
- Disabling/Enabling the profile(<https://docs.cedcommerce.com/magento-2/wish-integration-magento-2-manual/?section=enable-disable-profile-5>)
- Deleting a profile(<https://docs.cedcommerce.com/magento-2/wish-integration-magento-2-manual/?section=deleting-a-profile-4>)

#### 3.1. Add a New Profile

##### To Add a New Profile.

- Go to your Magento 2 admin panel.
- On the left navigation bar, click **Wish Integration** and when the menu appears as shown below, click on **Profile Manager**.

- On clicking, you will be navigated to the page as shown below:

## Manage Profile

[Add New Profile](#)

Filters | Default View | Columns

Actions | 4 records found | 20 per page | 1 of 1

ID	Profile Code	Profile Name	Status	Action
1	default	First Mapping	Enabled	<a href="#">Edit</a>
6	test	test	Enabled	<a href="#">Edit</a>
7	final	final_Profi	Enabled	<a href="#">Edit</a>

- Click on **Add New Profile** button as shown in the above image and you will be navigated to the page as shown below:

## Edit Profile

[← Back](#) [Save](#)

**PROFILE INFORMATION**

- General Information
- Attribute Mappings
- Profile Products
- Wish Shipping

**General Information**

Wish Shipping

Wish Shipping Price	Country	Price	Action
Add Shipping			

You can set multiple countries at once. Each parameter is a country code. Each value is the shipping price (in USD) of this product to the country (max 1000). See Shippable Countries for a list of supported countries.

**Use Product Shipping Countries**

United Arab Emirates  
 Albania  
 Argentina  
 Austria  
 Australia

A string that consists of country codes separated by comma. For example, AU,CA,US. Each country will use the product variation shipping price.

**Disabled Countries**

United Arab Emirates  
 Albania  
 Argentina  
 Austria  
 Australia

A string that consists of country codes separated by comma. For example, AU,CA,US. Users in disabled countries cannot see or buy the product.

**Wish Express Add Countries**

United Arab Emirates  
 Albania  
 Argentina  
 Austria  
 Australia

A string that consists of country codes separated by comma. For example, AU,CA,US. The product must be shipped to a customer in any of those countries within 5 working days. Warning: Wish Express countries cannot be disabled for promoted products. If you make a mistake, you must correct it immediately.

**Wish Express Remove Countries**

United Arab Emirates  
 Albania  
 Argentina  
 Austria  
 Australia

A string that consists of country codes separated by comma. For example, AU,CA,US

- In **Wish Shipping Price**, you may add/remove shipping by clicking on **Add Shipping** button and the section will look as:

## Wish Shipping

### Wish Shipping Price

Country	Price	Action
United Arab Emira <input type="text"/>	<input type="text"/>	<input type="button" value="Remove"/>
United Arab Emira <input type="text"/>	<input type="text"/>	<input type="button" value="Remove"/>
<input type="button" value="Add Shipping"/>		

You can set multiple countries at once. Each parameter is a country code. Each value is the shipping price (in USD) of this product to the country (max 1000). See Shippable Countries for a list of supported countries.

- In **Use Product Shipping Countries**, select the countries in which you will be shipping your products.
- In **Disabled Countries**, enter the countries from where buyers will not be able to see or buy your products.
- In **Wish Express Add Countries**, select the countries where your product must be shipped to a customer within 5 working days.
- In **Wish Express Remove Countries**, select the countries in which you do not want to extend the Wish Express service.

Once you have taken all the steps as mentioned above, click on the **Save** button on the top right side of the page and the success message appears as:

Now you may see your created profile on the Manage Profile page as shown below:

Manage Profile 🔍 🔔 👤

Filters | Default View | Columns

Actions | 5 records found | 20 per page | 1 of 1

<input type="checkbox"/>	ID	Profile Code	Profile Name	Status	Action
<input type="checkbox"/>	1	default	First Mapping	Enabled	<a href="#">Edit</a>
<input type="checkbox"/>	6	test	test	Enabled	<a href="#">Edit</a>
<input type="checkbox"/>	7	final	final_Pro	Enabled	<a href="#">Edit</a>
<input type="checkbox"/>	8	fdg	dfgq	Enabled	<a href="#">Edit</a>
<input type="checkbox"/>	12	test1	test1	Enabled	<a href="#">Edit</a>

## 3.2. Edit the existing profile

### *To Edit an Existing Profile,*

- Go to your Magento 2 admin panel.
- On the left navigation bar, click **Wish Integration** and when the menu appears as shown below, click on **Profile Manager**.

- On clicking, you will be navigated to the page as shown below:

## Manage Profile

[Add New Profile](#)

Filters | Default View | Columns

Actions | 4 records found | 20 per page | 1 of 1

ID	Profile Code	Profile Name	Status	Action
1	default	First Mapping	Enabled	<a href="#">Edit</a>
6	test	test	Enabled	<a href="#">Edit</a>
7	final	final_Profi	Enabled	<a href="#">Edit</a>

- Now click on **Edit** under **Action** column, adjacent to the profile that you want to edit. On clicking it, you will be navigated to a page as:

## Edit Profile

[← Back](#) | [Delete](#) | [Save](#) | [Save and Upload](#)

**PROFILE INFORMATION**

- General Information
- Attribute Mappings
- Profile Products
- Wish Shipping

**General Information**

Profile Code \*

Profile Name \*

Profile Status \*

- Now you may edit and make the changes to the profile section by section from the left navigation bar and once the changes have been made, click on **Save** button from the top of the page.
- On clicking it, you will see a success message on the page as:

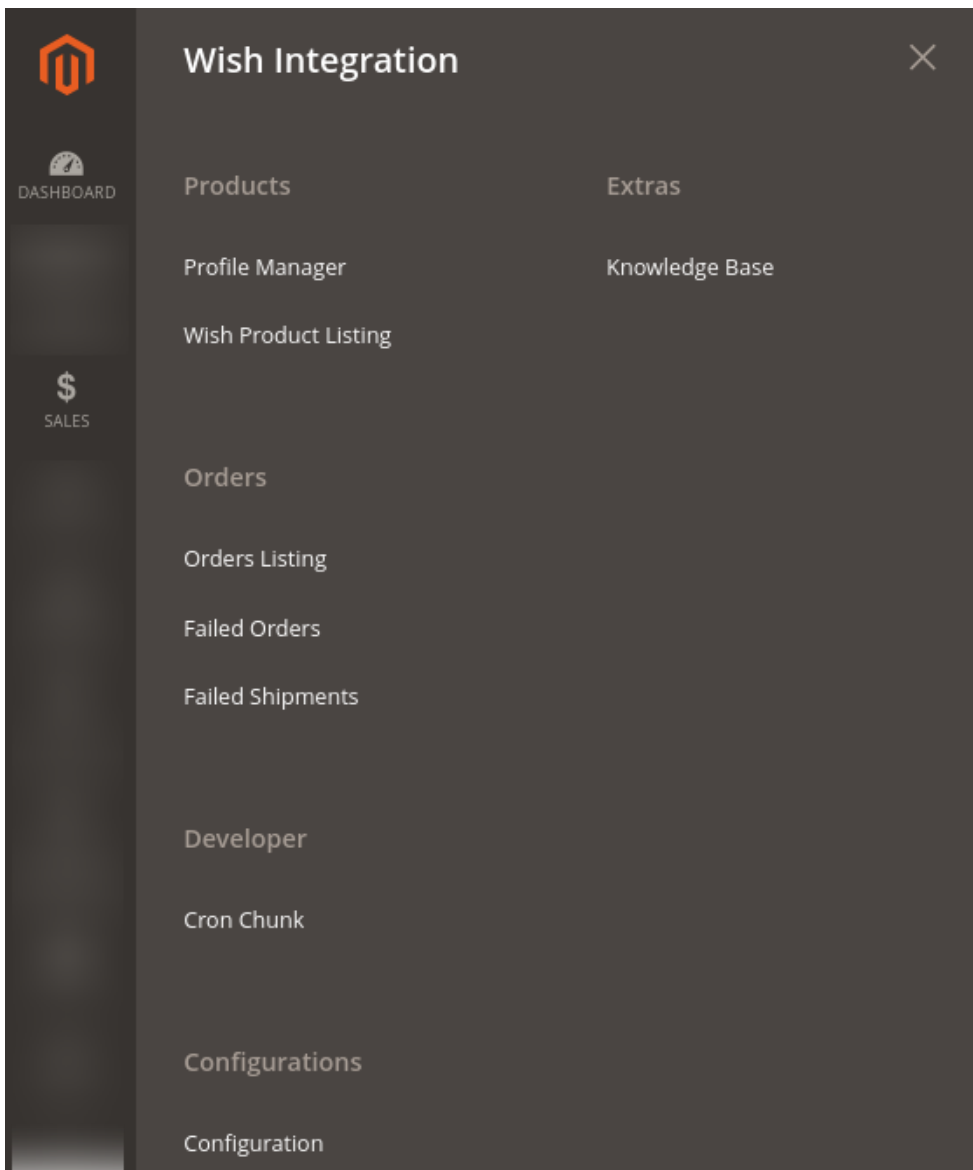

✓ Profile has been saved successfully.

- The changes made will be saved and the profile will be successfully edited.

### 3.3. Enable/Disable Profile

**To Enable/Disable the status of a Profile,**

- Go to your Magento 2 admin panel.
- On the left navigation bar, click **Wish Integration** and when the menu appears as shown below, click on **Profile Manager**.

- On clicking, you will be navigated to the page as shown below:

## Manage Profile

[Add New Profile](#)

Filters | Default View | Columns

Actions 4 records found | 20 per page | 1 of 1

ID	Profile Code	Profile Name	Status	Action
