1. Overview

Founded in 2011, Wish is a mobile e-commerce application based company in San Francisco, California operating globally with a large presence in North America, Europe, Brazil, and China. **It is the 6th largest e-commerce company in the world.**

Wish.com is competing with the companies such as Walmart and Amazon. **Wish currently works with thousands of merchants serving millions of users globally.**

Wish Integration for Magento 2 is an advanced API integration that helps the Magento 2 store owners to integrate their store with Wish and to synchronize inventory, price, and other product details for the product creation and its management between the Magento 2 store and the Wish marketplace. The Wish Integration for Magento 2 extension interacts with the Wish Marketplace to integrate the synchronized product listing between the Magento and the Wish retailers. After installing the extension, the merchant can create the Wish Categories and the dependent attributes on the Magento 2 store.

The process enables the merchant to configure the desired product category into Magento for automatic submission of the selected product to the same Category on Wish.

Key Features are as follows:

- **Profile-based product upload:** Admin can create a profile, map the Wish category and attributes to the Magento category and attributes, and then after assigning the products to the profile can easily upload products to Wish.com
- **Bulk Upload System:** The merchant has the flexibility to upload any number of products on Wish.com using bulk product upload feature.
- **Synchronized Inventory*:** Auto synchronization of the inventory at regular intervals and the listing of the products along with all the details is established between Magento and Wish.com
- **Enable and Disable Products*:** Merchants can close and reopen the products on Wish.com using Enable and Disable feature.
- **New Order Notifications*:** Whenever a new order is fetched from Wish.com, the admin receives a notification.
- **Rejected Products Notification:** If any product containing some invalid details is rejected, then its information is fetched from the automatic synchronized requests along with the error due to which it is rejected.
- **Simple and Configurable Product Upload:** Admin can upload the Simple and Configurable type of Magento product on the Wish website.

2. Configuration Settings

To set up the Configuration Settings in the Magento 2 Admin panel

- Go to the **Magento 2 Admin** panel.
- On the left navigation bar, point to the **Wish Integration** menu, and then click **Configuration**.

- On clicking it, you will be navigated to the configuration page which appears as:

Configuration

Enabled [global] Yes

Wish Account Merchant Type [global] USD Merchant

Api Mode [global] Production

Client ID [global] 73
You will get this detail from merchant.wish.com Account > Setting > API Setting . If you have not created app then create it and fill detail.

Client Secret [global] e...d
You will get this detail from merchant.wish.com Account > Setting > API Setting . If you have not created app then create it and fill detail.

Redirect URI [global] ht...ode
Redirect URI Of Your App should be www.yourdomain.com/wish/config/getcode/

Generate Code Generate Code
If button Seems not working then please make sure popup is enabled in browser. After click please wait it will redirect to wish.com

Code [global] 9...46e

Access Token [global] 7c...5bc

Access Token Expiry Date [global] 20...00

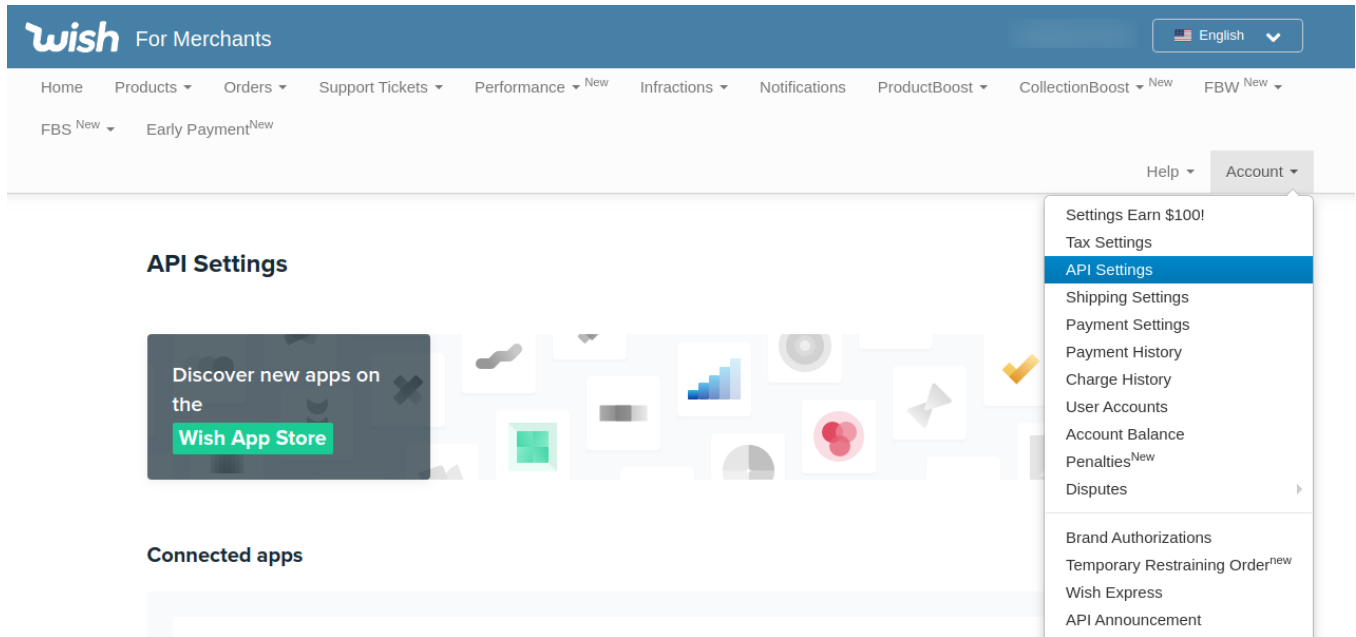

Refresh Token Refresh Token
To Refresh Token at any point of time.

Refresh Token [global] da...35

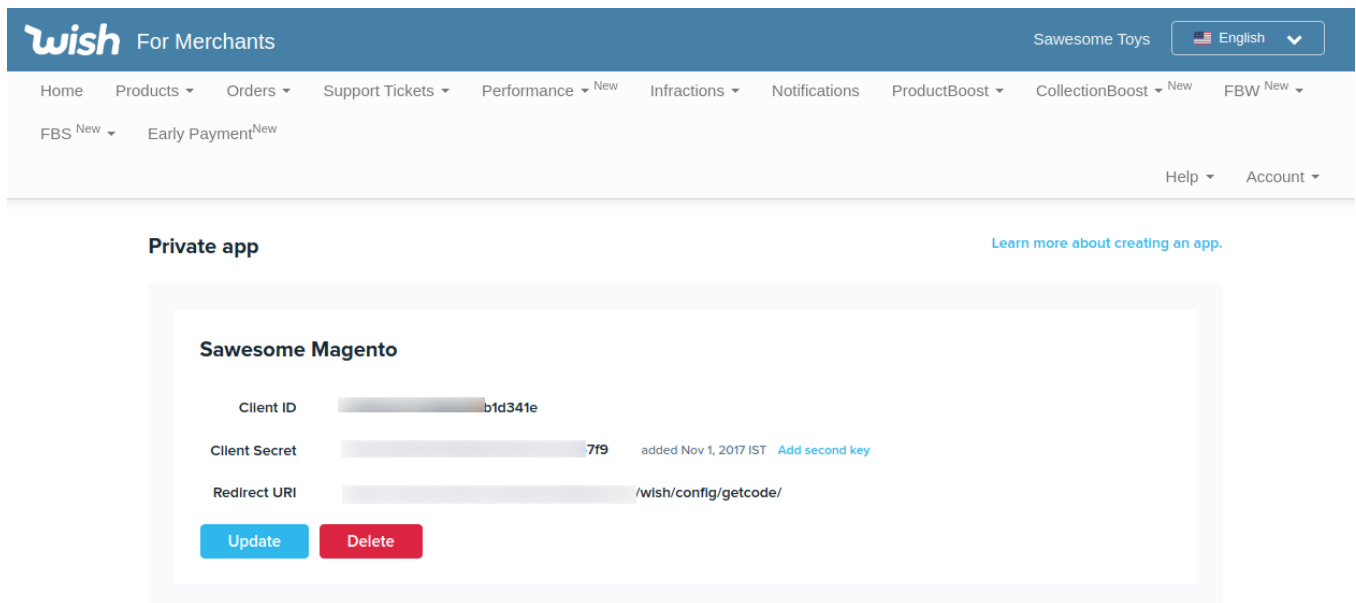

Enable Logging [global] Yes
Set Yes to Start Wish Integration in debug mode. It will capture log for debug process..

Merchant Id [global]

- In **Enabled**, select **Yes** to enable the extension.
- The next step is to **Choose Account Merchant Type** where you have to choose whether you are a USD merchant or not.
- In **API Mode**, select from **Sandbox/Production** as per your requirement.
- In **Sandbox/Production Client ID**, you need to enter the ID that you may get from your Wish seller panel.
- For, that, click on the link as has been highlighted in the red box in the above image.
- On clicking it, you will be asked to log in to your Wish account and once you have logged in, you will be navigated to the page as shown below. If you have already logged in, the page will appear to you as:

- On this page, you may see your client id and you may copy it from here to paste it in the configuration section in the Magento 2 admin panel.
- In **Client Secret**, enter the secret which also you can get from the Wish seller panel as shown in the image above.
- To get it, you may also click on the link below the **Client Secret** box after which you'll be taken to the page as:

- You may see your client secret and you may copy it from here to paste it in the configuration section in the Magento 2 admin panel.
- In the **Redirect URL**, enter the redirect URL which you get from the same section where you get your Client ID and Client Secret, as shown in the images above.
- In **Generate Code**, click on **Generate Code** button and the code will be generated.
- The **Access Token** will appear automatically after taking the mentioned steps.
- You may refresh the token by clicking on the **Refresh Token** button.

- In **Enable Logging**, select **Yes** to Start Wish Integration in debug mode. It will capture the log for debug process.
- In Merchant Id, copy your merchant ID from the Wish seller panel and paste it here.

The screenshot shows the 'Wish For Merchants' dashboard. On the left is a sidebar with navigation links: Login & Security, General Information, Seller Profile, Display Settings, Email Preferences, Notification Preferences, and Vacation Settings. The 'General Information' section is active, displaying several input fields: Merchant Id, Account Manager, Username, Email, and Rev Share. A red arrow points to the 'Merchant Id' field with the text 'copy the merchant id from here'. At the top, there is a yellow banner with a message about vacation mode being on for the account.

- Once done, you may move on to the next section.

Wish Product Settings

- On clicking the **Wish Product Settings**, the section will expand and appear as:

Wish Product Settings

The screenshot shows the 'Wish Product Settings' form. It includes the following fields and options:

- Product Price** [global]: A dropdown menu set to 'Default Magento Price'. Below it, text says 'Select to send a different product price to **Wish**'.
- Select Store** [global]: A dropdown menu set to 'America Store 1'.
- Wish Default Tags** [global]: A text input field containing 'Tags,Deafult tags'. Below it, text says '1 to 10 Tags separated by comma(,)'.
- Wish Default Shipping** [global]: A text input field containing '5.00'. Below it, text says 'Default Shipping cost for all products who will have shipping filed empty.'
- Auto Update Product** [global]: A dropdown menu set to 'Enable'. Below it, text says 'If product is deleted or updated then auto disable and update product on wish'.
- Fetch Brands**: A button labeled 'Fetch Brands'.

- On the Clicking **Fetch Brands** button all the brands will be visible on the catalog page.

- A success message will appear.
- You can see these fetched brands on the catalog page.

- Now come back to the configuration page and proceed with the remaining settings.
- In **Product Price**, you may keep the option **Default Magento Price** or may select from the options as shown below:

- **Increase by Fixed Price:** You may choose this option if you want the price of your Magento 2 product to be increased on Wish by a particular amount. If selected, then the **Modify by Fix Price** field appears as:

- Now suppose your product is for \$100 on Magento 2 store and if you enter 50 in the Modify by Fix Price, then the price for your products that will reflect on the Wish marketplace will be \$150 as you have chosen the **Increase** option and have entered 50, so that is the price that will be added to your Magento 2 store product price and will reflect on Wish. However, the price will be the same on Magento 2 store.
- **Increase by Fixed Percentage:** You may choose this option if you want the price of your Magento 2 product to be increased on Wish by a particular percent. If selected, then the **Modify by Percentage Price** field appears as:

Product Price
[global] Increase By Fixed Percentage ▼

Select to send a different product price to **Wish**

Modify by Percentage Price
[global]

Numeric value Required for **Add/subtract % on Magento price** 5 for Example: Magento price +/- 5% of Magento price.

- Now suppose your product is for \$100 on Magento 2 store and if you enter 20 in the Modify by Percentage Price, then the price for your products that will reflect on Wish marketplace will be \$120 as 20% of 100 is 20 and it'll be added to 100. However, the price will be the same on Magento 2 store.
- **Decrease by Fixed Price:** You may choose this option if you want the price of your Magento 2 product to be decreased on Wish by a particular amount. If selected, then the **Modify by Fix Price** field appears as:

Product Price
[global] Decrease By Fixed Price ▼

Select to send a different product price to **Wish**

Modify by Fix Price
[global]

- Now suppose your product is for \$100 on Magento 2 store and if you enter 50 in the Modify by Fix Price, then the price for your products that will reflect on the Wish marketplace will be \$50 as you have chosen the **Decrease** option and have entered 50, so that is the price that will be deducted to your Magento 2 store product price and will reflect on Wish. However, the price will be the same on Magento 2 store.
- **Decrease by Fixed Percentage:** You may choose this option if you want the price of your Magento 2 product to be decreased on Wish by a particular percent. If selected, then the **Modify by Percentage Price** field appears as:

Product Price
[global] Decrease By Fixed Percentage ▼

Select to send a different product price to **Wish**

Modify by Percentage Price
[global]

Numeric value Required for **Add/subtract % on Magento price** 5 for Example: Magento price +/- 5% of Magento price.

- Now suppose your product is for \$100 on Magento 2 store and if you enter 20 in the Modify by Percentage Price, then the price for your products that will reflect on Wish marketplace will be \$80 as 20% of 100 is 20 and it'll be deducted from 100. However, the price will be the same on Magento 2 store.
- In the **Select Store** section, click and the drop-down menu appears. Select the store for which you want to apply these settings
- In **Wish Default Tags**, you may enter 1 to 10 tags separated by commas. These tags are used as the name of the categories that a seller wants for its products.
- In **Wish Default Shipping**, enter the default shipping cost for the products which have the shipping field

empty.

- In **Auto-Update Product**, you select **enable** if you want the product to be updated on Wish if there is any change to its inventory or other details or if the product has been deleted on Magento 2 store. If you don't want to auto-update, select **Disable**.

Wish Order Settings

- On clicking the Wish Order Settings, the section expands as:

Wish Order Settings

Wish Order Id Prefix <small>[global]</small>	<input type="text" value="WISH_"/>
	<small>Prefix for Wish Increment ID</small>
Allow Order Notification <small>[global]</small>	<input type="text" value="Enable"/> ▼
Order Notification Email <small>[global]</small>	<input type="text"/>
Default Customer Email <small>[global]</small>	<input type="text"/>
Auto Cancel Order <small>[global]</small>	<input type="text" value="Disable"/> ▼
	<small>Auto Cancel Order When Stock Not Found</small>
Auto Ship Order <small>[global]</small>	<input type="text" value="Enable"/> ▼
	<small>Auto Ship Order When Tracking Number Has Been Assigned to Shipment</small>
Refund Reason Order <small>[global]</small>	<input type="text" value="Store is unable to fulfill order, unable to ship (Fo"/> ▼

- In **Wish Order ID Prefix**, enter the prefix that you want to be added to each order for your product that has been placed on Wish.
- In **Allow Order Notifications**, select **Enable** if you want to be notified about the orders placed for your products on the Wish marketplace.
- In **Order Notification Mail**, enter the email on which you want the notifications to be sent regarding the orders.
- In **Default Customer Mail**, enter the email ID and assign all the Wish orders to it in case the customer details are not available.
- In **Auto-Cancel Orders**, select **Enable** if you want the orders to be canceled if they are out of stock. If you don't want such an action, select **Disable**.
- In **Auto-Ship Order**, select **Enable** if you want the orders to be shipped automatically if the tracking number has been assigned to them. If you don't watch such action to be taken, select **Disable**.
- In **Refund Reason Order**, select the reason for the order refund.

Wish Cron Settings

- On clicking it, the section will expand as:

Wish Cron Settings

Order Cron [global]	Disable	▼
Inventory Cron [global]	Disable	▼

- In **Order Cron**, if you want to Enable the crons to run for Wish orders, select **Enable**. On selecting Enable, a box will appear as:

Wish Cron Settings

Order Cron [global]	Enable	▼
Order Cron Time [global]	Every 6 Hours	▼

Order Fetch Cron Time

- In **Order Cron Time**, select the time after which the orders will be synced and updated between Wish and Magento 2 store, periodically.
- In **Inventory Cron**, select **Enable** if you want the inventory to be updated between Wish and Magento 2 store after a particular time interval. On selecting enable, the box will appear below it as:

Inventory Cron [global]	Enable	▼
Inventory Cron Time [global]	Every 6 Hours	▼

Inventory Update Cron Time

- In **Inventory Cron Time**, enter the time after which you want the inventory to be synced and updated between Wish and Magento 2 store, periodically.

Wish Chunk(Batch) Settings

- On clicking it, the section will expand as:

Wish Chunk(Batch) Settings

Product Validation Chunk Size [global]	20	▼
Product Upload Chunk [global]	5	▼
Product Enable/Disable/Sync Chunk [global]	20	▼

- In **Product Validation Chunk Size**, select the number of products you want to be sent to Wish for validation in one batch.
- In **Product Upload Chunk**, select the number of products you want to be sent to Wish for uploading, in one batch.
- In **Product Enable/Disable/Sync Chunk**, select the number of products you want to be sent to Wish to be Enable/Disabled/Synced, in one batch.

Once you have completed all the actions mentioned above in all the sections, click on the **Save Config** button on the top right of the page. The configuration will be completed successfully.

3. Profile Management

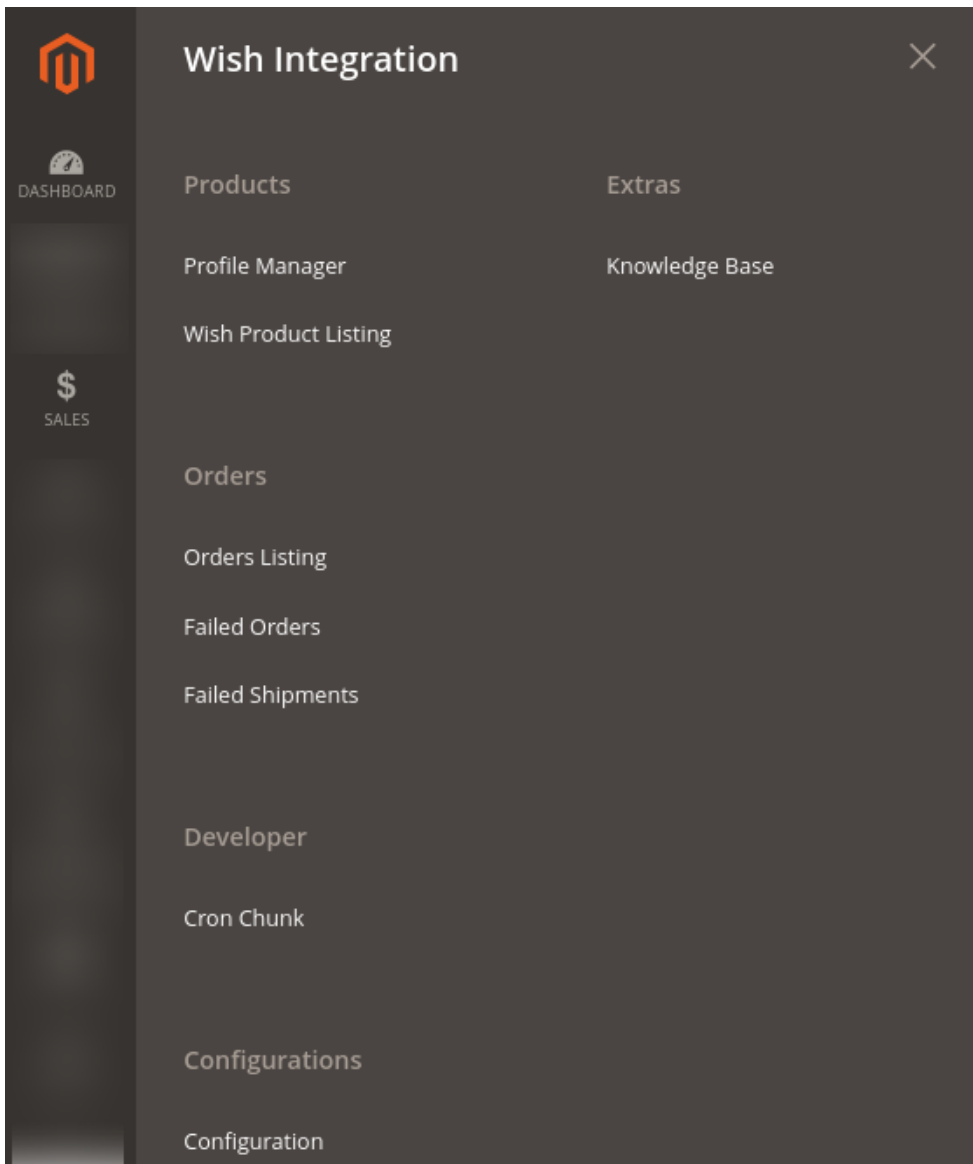

Under **Profile Manager** section, the following actions be taken,

- Adding a new profile(<https://docs.cedcommerce.com/magento-2/wish-integration-magento-2-manual/?section=add-a-new-profile-30>)
- Editing the existing profile(<https://docs.cedcommerce.com/magento-2/wish-integration-magento-2-manual/?section=edit-the-existing-profile-43>)
- Disabling/Enabling the profile(<https://docs.cedcommerce.com/magento-2/wish-integration-magento-2-manual/?section=enable-disable-profile-5>)
- Deleting a profile(<https://docs.cedcommerce.com/magento-2/wish-integration-magento-2-manual/?section=deleting-a-profile-4>)

3.1. Add a New Profile

To Add a New Profile.

- Go to your Magento 2 admin panel.
- On the left navigation bar, click **Wish Integration** and when the menu appears as shown below, click on **Profile Manager**.

- On clicking, you will be navigated to the page as shown below:

Wish Shipping

Wish Shipping Price

Country	Price	Action
---------	-------	--------

Add Shipping

You can set multiple countries at once. Each parameter is a country code. Each value is the shipping price (in USD) of this product to the country (max 1000). See Shippable Countries for a list of supported countries.

Use Product Shipping Countries

United Arab Emirates
Albania
Argentina
Austria
Australia

A string that consists of country codes separated by comma. For example, AU,CA,US. Each country will use the product variation shipping price.

Disabled Countries

United Arab Emirates
Albania
Argentina
Austria
Australia

A string that consists of country codes separated by comma. For example, AU,CA,US. Users in disabled countries cannot see or buy the product.

Wish Express Add Countries

United Arab Emirates
Albania
Argentina
Austria
Australia

A string that consists of country codes separated by comma. For example, AU,CA,US. The product must be shipped to a customer in any of those countries within 5 working days. Warning: Wish Express countries cannot be disabled for promoted products. If you make a mistake, you must correct it immediately.

Wish Express Remove Countries

United Arab Emirates
Albania
Argentina
Austria
Australia

A string that consists of country codes separated by comma. For example, AU,CA,US

- In **Wish Shipping Price**, you may add/remove shipping by clicking on **Add Shipping** button and the section will look as:

Wish Shipping

Wish Shipping Price

Country	Price	Action
United Arab Emira 	<input type="text"/>	<button>Remove</button>
United Arab Emira 	<input type="text"/>	<button>Remove</button>
<button>Add Shipping</button>		

You can set multiple countries at once. Each parameter is a country code. Each value is the shipping price (in USD) of this product to the country (max 1000). See Shippable Countries for a list of supported countries.

- In **Use Product Shipping Countries**, select the countries in which you will be shipping your products.
- In **Disabled Countries**, enter the countries from where buyers will not be able to see or buy your products.
- In **Wish Express Add Countries**, select the countries where your product must be shipped to a customer within 5 working days.
- In **Wish Express Remove Countries**, select the countries in which you do not want to extend the Wish Express service.

Once you have taken all the steps as mentioned above, click on the **Save** button on the top right side of the page and the success message appears as:

✓ Profile has been saved successfully.

Now you may see your created profile on the Manage Profile page as shown below:

Manage Profile
