1. Overview

Etsy Integration for Magento 2 at CedCommerce involves the integration of the Magento® 2 store with the Etsy marketplace.

The **Etsy Integration for Magento 2** extension helps the store owner to synchronize the product listing between the **Magento 2** store and the Etsy retailers. The **Magento 2** store owner can also manage the Etsy orders on the **Magento 2** stores without making any significant changes in the operational functionalities.

The **Magento 2** store owner has an ability to synchronize the orders, products, pricing, and inventory through establishing the interaction between the Etsy API and the **Magento 2** store. One of the most important features is that it enables the merchant to create the Etsy Categories and its dependent attributes on the **Magento 2** store. Thus, it helps to configure the desired product category to the **Magento 2** store for automatic submission of the selected product to the same category on Etsy marketplace.

Key Features are as follows:

- **Product Upload Based on Profile:** Enables the admin to create a profile based on a single category, and then assign the products to the profile to automate the product upload.
- **Synchronized Inventory:** Auto synchronization of the inventory at regular intervals and the listing of the products along with all the details are established between Magento 2 and Etsy.com.
- **Product Category Mapping:** Follows many-to-one category mapping philosophy. Admin can map many categories of the Magento store to the single category of Etsy.
- **Bulk Upload System:** The merchant has the flexibility to upload any number of products on Etsy.com using the bulk product upload feature.
- **Creation of Magento Orders:** The newly placed orders on Etsy.com are automatically created in the Magento store with all the required details as it is on Etsy.com.
- **New Order Notification:** A notification is sent to the admin if an order is placed on Etsy marketplace for the product after it gets fetched from Etsy to Magento 2.
- **Shipment Automation:** Admin can automate the shipment process with Shipstation, Shipwork, Stamps.com, Linnworks, Xtento, ShipRush.

2. Etsy Integration Extension Installation

To install the extension

1. Log in the **FTP**, and then go to Magento 2 root folder (generally present under the *public_html* folder).
2. Create a new folder named *code* under the *app* folder; under *code* folder, create a folder named *Ced*.
 - Upload or Drag and Drop *app/code/Ced/Etsy* or *app/code/Ced/Integrator*
 - After successfully uploading the directory, the extension will be installed or upgraded.
 - Now run the following upgrade command in *cmd*

```
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
chmod -R 777 generated/
chmod -R 777 pub/
chmod -R 777 var/
```

3. Install Etsy PHP SDK

Once the extension is successfully installed on the Magento 2 store, the **ETSY INTEGRATION** menu appears on the left navigation bar of the Magento 2 Admin Panel. Following the below steps to install the Etsy PHP SDK –

To Install Etsy PHP SDK

1. Go to the <https://github.com/cedcommerce/etsy-php>(<https://github.com/cedcommerce/etsy-php>) link.
2. Scroll down to the **Etsy PHP SDK** section.
The page appears as shown in the following figure:

Etsy PHP SDK build passing

Based on [Etsy Rest API description](#) output, this wrapper provides a simple client with all available methods on Etsy API (thanks to the `__call` magic PHP method!), validating its arguments on each request (Take a look to [for full list of methods and its arguments](#)).

I'm looking for help

Lately, I couldn't dedicate the time I think this repo deserved, so I'm looking for help!

Requirements

Note: I will be working on remove this dependencies

- cURL devel:
 - Ubuntu: `sudo apt-get install libcurl4-dev`
 - Fedora/CentOS: `sudo yum install curl-devel`
- OAuth pecl package:
 - `sudo pecl install oauth`
 - And then add the line `extension=oauth.so` to your `php.ini`

3. Make sure that the mentioned requirements are fulfilled.
4. After fulfilling the requirements, Now run the following command for installing the SDK ***composer require cedcommerce/etsy-php***

4. Retrieve the Etsy API Credentials

The merchant has to first create a seller account in the Etsy seller panel. Once the seller account is created and is approved by Etsy, the store owner has to retrieve the API Credentials. The merchant has to enter these **API Key details** on the **Etsy Developers** page.

To retrieve API Key Details from the Etsy

1. Go to the <https://www.etsy.com/developers>(<https://www.etsy.com/developers>) link.
The page appears as shown in the following figure:

2. Enter your Username and password to sign up your Etsy account.
3. Once get logged in, then Register as a developer
The page appears as shown in the following figure:

4. Once registration is done, your App has been made.
5. Then, get the API key credentials,
 - o Key string
 - o Shared Secret
 The page appears as shown in the following figure:

5. Etsy Configuration Settings

After obtaining the **API credentials** from the Etsy Developer account, the Magento 2 store owner has to paste them into the respective fields displayed on the **Etsy Configuration** page of the admin panel.

To set up the configuration settings in the Magento 2 Admin panel

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **ETSY INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click on the **Etsy Configuration**.

The **Configuration** page appears as shown in the following figure:

4. In the right panel, click on the **Etsy Merchant/Developer Settings**

The tab is expanded and the expanded section appears as shown in the following figure:

The screenshot shows the 'Etsy Merchant/Developer Settings' configuration page. It features several text input fields, each with a help icon (question mark): 'Keystring [global]', 'Shared Secret [global]', 'Access Token [global]', 'Access Token Secret [global]', 'Verifier Code [global]', 'User Name [global]', and 'Shop Name [global]'. Below these fields are two buttons: 'Fetch Token' and 'Fetch Category'. There are also three dropdown menus: 'Country [global]' (set to 'The Netherlands'), 'Etsy Store Language [global]' (set to 'English'), and 'Select Store [global]' (set to 'English').

5. Under **Etsy Merchant/Developer Settings**, do the following steps:

- In the **Etsy Key String** box, paste the corresponding value copied from the Etsy Developer panel.
- In the **Shared Secret Key** box, paste the corresponding value copied from the Etsy Developer panel.

6. Click the **Fetch Token** button. The page appears as shown in the below figure:

An application would like to connect to your account.

You are signed in as **ethanhunt@cedcommerce.com**.
Not you? [Sign in as someone else.](#)

The application **cedcommerce** is trying to connect to your account.

You should be seeing this message because you're using an Etsy App. If you didn't come to this page through an Etsy App, or if you followed a link in an email or chat, close this window now.

If you proceed, you will be subject to cedcommerce's privacy policy, and cedcommerce will have permission to do the following on your behalf:

- Connect to your account and know your member name
- Know your email address
- See your inactive and expired listings
- Create and edit listings in your shop
- Delete listings in your shop
- See your sales and purchases
- Update your sales and purchase info
- See your Etsy bill charges and payments
- See your Etsy profile data
- Update your avatar and, in the future, your Etsy profile data
- See your delivery addresses
- Update your delivery addresses
- See, add to and remove from your favourite listings and shops
- See your private shop data and Edit your shop, including description, policies, sections and banner
- See, add to and remove from the listings in your basket
- See your recommended listings
- See your feedback
- See your Treasuries (including drafts and private) and Treasury comments
- Create and update your Treasuries, and post Treasury comments

You can revoke this access at any time by visiting [Your Account](#). Note: when using Etsy Apps, all the normal fees for creating and changing listings on Etsy apply.

If you close this browser window, no access will be granted.

[Allow Access](#)

Click on the **Allow Access** button, after a click Access Token, Access Token Secret, Verifier Code will get filled automatically.

For Username and Shop name, you first need to login in Etsy developer account, Click on Profile Button: The page appears as shown in the following figure:

7. In the **User Name** box, enter the User Id from the Etsy Developer panel account.
 - a. The page appears from where you get the username as shown in the following figure:

- b. In the **Shop Name** box, enter the Shop Name from the Etsy Developer panel account. The page appears from where you get the Shop name as shown in the following figure:

- c. In the **Country Name** list, select the required country.

- d. In the **Etsy Store Language** box, select the language of your Etsy store.
 - e. In the **Select Store** list, select the single store.
 - f. Click on the **Fetch Category** button, then the category is fetched from Etsy and a success message appears on the page.
8. Scroll down to the **Product Upload Settings** tab, and then click the tab.
The tab is expanded and the expanded section appears as shown in the following figure:

Product Upload Settings

Who Made <small>[global]</small>	<input type="text" value="i did"/>	▼
When Made <small>[global]</small>	<input type="text" value="made - to - order"/>	▼
State <small>[global]</small>	<input type="text" value="Draft"/>	▼
Product Price <small>[global]</small>	<input type="text" value="Default Magento Price"/>	▼
	Select to send different product price to etsy.com	
Select Shipping Template <small>[global]</small>	<input type="text"/>	▼
Select Shop Section <small>[global]</small>	<input type="text"/>	▼
Product Inventory <small>[global]</small>	<input type="text" value="Default Magento Qunatity"/>	▼
	Select to send different product inventory to etsy.com	
Use MSI Feature For Inventory <small>[global]</small>	<input type="text" value="No"/>	▼
	Use MSI feature to send the Inventory to etsy.com	
Do you have Water mark image <small>[global]</small>	<input type="text" value="No"/>	▼
	Set yes if you want to send water mark image on etsy.com	

9. Under **Product Upload Settings**, do the following steps:
- a. In the **Who Made** a list, select the appropriate option.
 - b. In the **When Made** list, select the appropriate option.
 - c. In the **State** list, select the appropriate option.
 - d. Click the **Product Price** tab,
 - i. The **Product Price** tab is expanded and the section appears as shown in the following figure:

Default Magento Price	▲
Default Magento Price	
Increase By Fixed Price	
Increase By Fixed Percentage	
Decrease By Fixed Price	
Decrease By Fixed Percentage	
set individually for each product	

ii.

In the **Product Price** list, select one of the following options:

i) **Increase by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.

ii) **Increase by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the Etsy, product price by the entered value % of Magento price.

Product Price
[global]

Increase By Fixed Percentage ▲

Select to send different product price to **etsy.com**

Modify by Percentage Price
[global]

Numeric value Required for **Add/subtract % on Magento price** 5 for Example: Magento price +/- 5% of Magento price.

For Example,

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

Modify by Percentage Price = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Etsy Product Price = 105

iii) **Decrease by Fixed Price**: If selected, then the **Modify by Fix Price** field appears.

iv) **Decrease by Fixed Percentage**: If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to decrease the price of the Etsy product price by the entered value % of Magento 2 price.

For Example,

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

Modify by Fix Price = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Etsy Product Price = 95

iii. Under **Shipping Template**, do the following step:

In the **Select Shipping Template** list, select the required Shipping template.

iv. In the **Select Shop Section** box, select your shop section.

v. Click on the **Product Inventory** tab,

1. The **Etsy Product Inventory Settings** tab is expanded and the section appears as shown in the following figure:

2. Under **Etsy Product Inventory Settings**, do the following step:

- i. **Increase by Fixed Quantity**: If selected, then the **Modify by Fix Quantity** field appears.
- ii. **Decrease by Fixed Quantity**: If selected, then the **Modify by Fix Quantity** field appears.
- vi. In **Use MSI Feature for Inventory**, select **Yes**, if you want to use MSI for the inventory.
- vii. In the **Do You Have Watermark image** box, select the **Yes** option if you want to send a watermark image on Etsy.

- Scroll down to the **Etsy Order Setting** tab, and then click the tab.

The tab is expanded and the expanded section appears as shown in the following figure:

Etsy Order Setting

Order Notification Email [global]

Etsy Order Id Prefix [global]
Prefix for Etsy Order Increment ID

Auto Order Fetch [global]
Cron Will Fetch The Orders From Etsy

Shipping Method of Etsy Orders [global]

Payment Method of Etsy Orders [global]

Create Real Customer [global]

- Under **Etsy Order Setting**, do the following steps:

- a. In the **Order Notification Email** box, enter the required email id.
- b. In the **Etsy Order Id Prefix** box, enter Prefix for Etsy Order Increment id.
- c. In the **Auto Order Fetch** box, select the **Yes** option, to auto-fetch order from Etsy.
- d. In the **Shipment Method for Etsy Orders** box, select the shipment method for Etsy order.
- e. In the **Payment Method of Etsy Order** box, select the payment method for Etsy order.
- f. In the **Create Real Customer** box, select the **Yes** option, to create a real customer of Etsy.

Note: If the admin select **No** option then, another field appears as shown in the figure:

Customer First Name [global]

Customer Last Name [global]

Customer Group [global] ▼

Customer Email [global]

Customer Password [global]

i. Now fill in the following details as shown in the above figure.

- Now scroll down to Etsy Third Party Product Setting, the tab is expanded as:

Etsy Third Party Product Setting

Sync Product On The Basis Of Attribute [global] ▼ 
Select the field

Auto Sync Third Party Products On Etsy [global] ▼ 

- Under **Etsy Third-Party Product Setting**, do the following steps:
 - a. In the **Sync Product On the Bases of Attribute** box, select the option on which basis you need to sync the Etsy Products.
 - b. In the **Auto Sync Third-Party Product** box, select the **Yes** option, to auto-sync third-party products.
- Click on Etsy Cron Setting, the tab is expanded as shown below:

Cron Setting

Auto Inventory Sync [global] ▼ 
Auto Update inventory on Etsy While Product Edit

- Under **Etsy Cron Setting**, do the following steps:
 - a. In the **Auto Sync Inventory** box, select the **Yes** option, to auto-update inventory on Etsy while product edit.
- Click the **Save Config** button.
 The configuration settings are saved.

6. Manage Etsy Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 attributes to the Etsy attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add new profile(<https://docs.cedcommerce.com/magento-2/etsy-magento-2-integration-guide?section=add-a-new-profile-23>)
- Edit the existing profile(<https://docs.cedcommerce.com/magento-2/etsy-magento-2-integration-guide?section=edit-the-existing-profile-33>)
- Bulk Action on the Selected Profiles(<https://docs.cedcommerce.com/magento-2/etsy-magento-2-integration-guide?section=submit-bulk-action-on-the-selected-profiles-3>)

6.1. Add A New Profile

To add a new profile

1. Go to the **Magento 2 Admin**
2. On the left navigation bar, click the **ETSY INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Profile Manager**.

The **Manage Profile** page appears as shown in the following figure:

4. Click the **Add New Profile**

The **New Profile** page appears as shown in the following figure:

The screenshot shows the 'New Profile' page with a navigation bar at the top containing 'Back', 'Delete', 'Reset', 'Save and Continue Edit', and a 'Save' button. On the left is a sidebar with 'PROFILE INFORMATION' and sub-items: 'Profile info', 'Category & Attribute', 'Other Details', and 'Profile Products'. The main content area is titled 'Profile Information' and contains three fields: 'Profile Code' (with a note: 'For internal use. Must be unique with no spaces'), 'Profile Name', and 'Profile Status' (set to 'Enabled').

5. In the right panel, under **Profile Information**, do the following steps:

- In the **Profile Code** box, enter a profile code.
Note: It is only for internal use. Use the unique profile code with no spaces. Start with small letters.
- In the **Profile Name** box, enter the name of the profile.
Note: Use the unique name to identify the profile.
- In the **Profile Status** list, select **Enabled** to enable the profile.
Note: The Inactive option disables the profile.

6. Click the **Save and Continue**.7. In the left navigation panel, click the **Category & Attribute**

In the right panel, the page appears as shown in the following figure:

The screenshot shows the 'New Profile' page with the 'Category Mapping' section active. The sidebar now highlights 'Category & Attribute'. The main content area is titled 'Category Mapping' and contains seven dropdown menus: 'Root Level Category' (Accessories), 'Level 1 Category' (Scarves & Wraps), 'Level 2 Category' (Bandanas), 'Level 3 Category' (category have no leaf category), 'Level 4 Category' (Please select level 4 category), 'Level 5 Category' (Please select level 5 category), and 'Level 6 Category' (Please select level 6 category).

8. Under **Category Mapping**, do the following steps:
 - a. In the **Root Level Category list**, select the required category.
If the selected category has subcategories, then the next category level field is activated.
 - b. In the **Level 1 Category list**, select the required subcategory.
Similarly, if this sub-category consists of next level of subcategory, then the next category level is activated.
 - c. Select the categories until the last level of the selected category.
9. Scroll down to the **Etsy-Magento Required Attributes Mapping** section.

Etsy-Magento Required Attributes Mapping

Etsy Attribute	Magento Catalog Attribute	Default Value	Action
Product Name	Product Name		
SKU	SKU		
Description	Description		
<input type="button" value="Add Attribute"/>			

10. Under **Etsy-Magento Required Attributes Mapping**, do the following steps:
 - a. In the **Magento Catalog Attribute column**, select the required Magento attribute from the corresponding list to map it with the corresponding Lazada attribute.
 - b. Repeat the mapping of all the required Magento attributes listed with the corresponding Etsy attributes.
11. Click the **Save and Continue** button.
12. In the left navigation panel, click the **Other Details** menu.
In the right panel, the page appears as shown in the following figure:

The selected profiles are enabled.

7. Etsy Product Listing

On this page, all the products listing available in the Magento 2 store are listed. If the store owners have their products listed in the Etsy store and want to get those item listing ids in the Magento 2 store, then they can use a feature provided by this extension to map them with the corresponding products listed on the Etsy Product Listing page. They can also upload the selected products on the Etsy website.

The admin can do the following tasks:

- Get the Etsy item listing Id(<https://docs.cedcommerce.com/magento-2/etsy-magento-2-integration-guide?section=get-the-etsy-item-listing-id>)
- Upload the Selected Products on Etsy(<https://docs.cedcommerce.com/magento-2/etsy-magento-2-integration-guide?section=upload-the-selected-products-on-etsy-2>)

7.1. Upload and Edit the Selected Products on Etsy

To upload the selected products on Etsy

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **ETSY INTEGRATION** menu.
The menu appears as shown in the following figure:

3. **Click Etsy Product Listing.**

The **Etsy Product Listing** page appears as shown in the following figure:
