1. Overview

CedCommerce Allegro Extension helps in connect your Prestashop catalog, auto-sync inventory and order management system, Shipment management, in just one click.

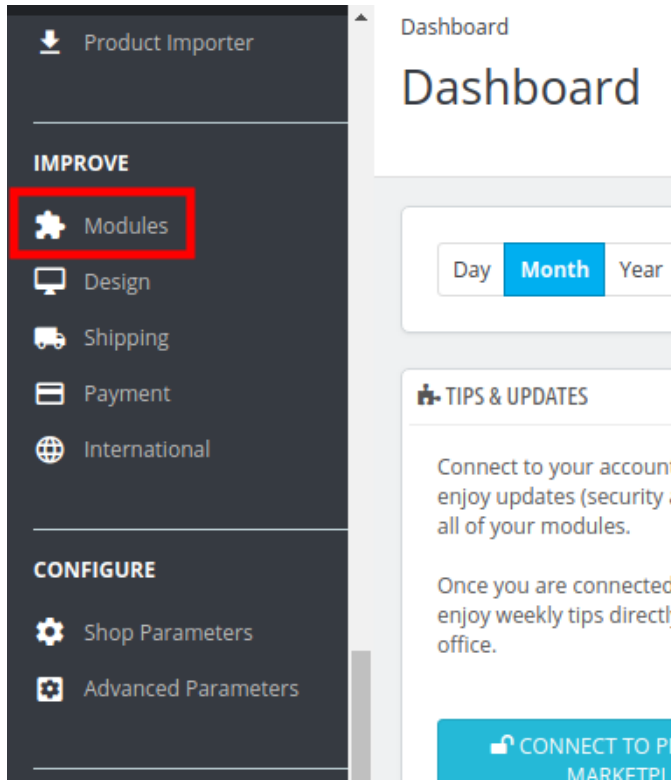

Key features:

- Profile-based product upload: This feature allows to map your store category with Allegro and categorize into one profile and upload to Allegro.
- Allegro Order Management: Whenever any order placed on Allegro store it will get imported into your store and create into the order section.
- Inventory Management: Auto synchronization of product inventory from your Prestashop store to Allegro marketplace.
- Synchronization: Auto synchronization of the product listing, order, inventory, return and refund, and pricing at regular intervals is established between Prestashop and Allegro.
- Category Mapping: Store owners can map your store category with the Allegro product category on which they need to send products.
- Bulk Upload System: Bulk product upload service from CedCommerce is your ultimate solution to be spared from the hassles of operational overload in product uploading.

2. Allegro Integration Installation

To install the extension:

1. Go to the **Prestashop Admin panel**.
2. On the left navigation bar, point cursor to the **Modules and Services**.
The menu appears as shown in the following figure:

3. Now click the **Modules Manager** menu, and you will come across a page like shown below.

4. Now you need to click on **Upload a Module** on the top of the page.
 5. In doing so, the page opens a section like shown in the image below:

6. Now in the Module File tab, choose the package file of Allegro marketplace from your system.
 7. Once selected, click on the **Upload this module** button.
 8. On the same page, scroll down and in the Modules list, search for VidaXL and it will be listed on the right as shown in the image below. You have to click on the **Install**.

9. Once you click on the **Install** button, you can see a message like shown below, on the same page, asking you if you wish to proceed with the installation. You may click on **Proceed with the installation**.

- The module will be installed and you will be navigated to the **Configuration** page for further steps to be taken.

3. Allegro Configuration Settings

Once the module gets installed, you get navigated to the Configuration page.

To perform Configuration settings:

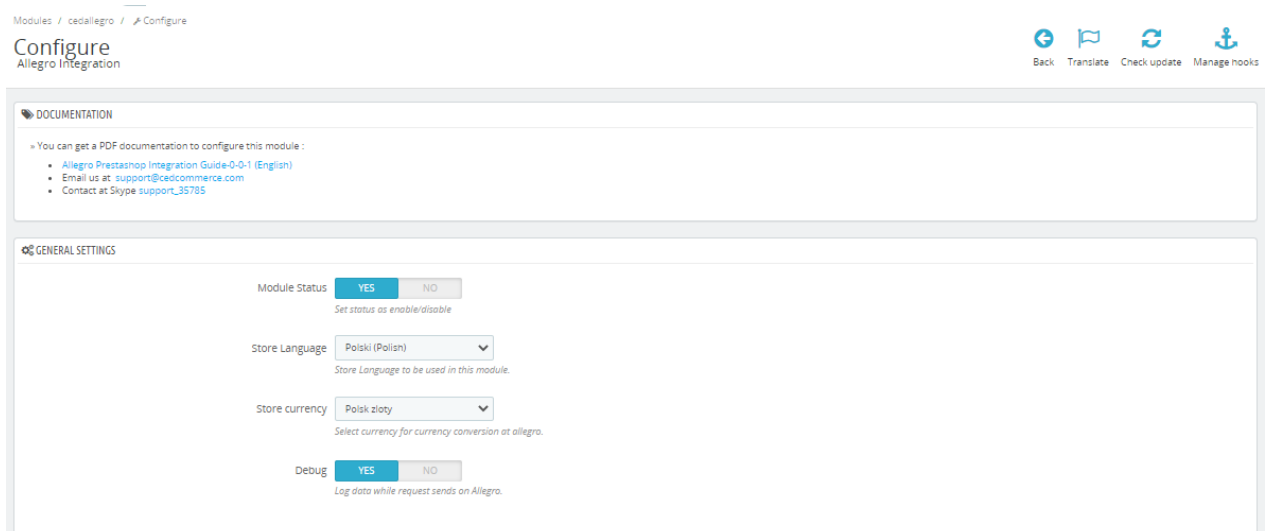

- Go to the **Prestashop Admin** panel.
- In the left navigation panel, place cursor on **Allegro Integration** and the section expands as:

- Go to **Configuration**

- First, go to General Settings

The page appears as shown in figure:

- In **General Settings**, do the following steps:

- In the **Module Status**, select 'Yes' to enable the status of the module.
- In the **Store Language**, choose the language which you want to use in the module.

- c. In the **Store currency**, choose the currency which you want to use in the module.
 - d. In the **Debug module**, select 'Yes' to enable the debug mode to check the issues of the module in the Log section.
6. Now move to another section, API settings,
The tab appears as shown below:
