## 1. Overview

The Magento® 2 store owners can now integrate their Magento® 2 stores with Catch marketplace with the help of CedCommerce and can increase the sale of their business.

**Catch Integration for the Magento® 2 Stores** enables the admin to manage the Catch orders in their Magento® 2 stores without making any significant changes to the operational functionalities.

Admin gets the authority to create Catch Categories and the dependent attributes on the Magento® 2 store. It also enables the store owners to establish a mapping of the desired product category on the Magento® 2 stores for automatic submission of the selected product to the same category on the Catch marketplace.

**Catch Integration** is an amazing API integration that helps Magento® 2 store owners to synchronize inventory, price, and other product details for product creation and management between Magento® 2 stores and the Catch marketplace.

Hence, this extension interacts with the Catch Marketplace to integrate the synchronized product listing between Magento® 2 store and the Catch retailers.

### *Key Features of Catch Integration Extension by CedCommerce:*

- **Real-Time Synchronization of Inventory and Price:** Auto synchronization of the inventory and Price at regular intervals and product listings along with all the details is established between Magento® 2 store and Catch.com.
- **Crons:** Cron job automates the process for Inventory, Price, and Order management.
- **Notifications:** Whenever a new order is fetched from Catch, or whenever Stock diminishes lower than the threshold, then the admin receives the corresponding notifications.
- **Automated Shipment Process:** Admin can automate the shipment process with ShipStation, ShipWorks, Stamps.com, Linnworks, XTENTO, ShipRush.
- **Auto Acknowledgement of Order:** Admin receives an acknowledgment of Orders automatically as soon as orders are created.
- **Bulk Upload System:** Admin has the flexibility to upload any number of products on Catch using the bulk product upload feature.
- **Profile Based Products Upload:** Enables the admin to create a profile based on single category and then assign the products to the profile to automate the product upload.
- **Product Category Mapping:** Follows many-to-one category mapping philosophy. Admin can map many categories of the Magento® 2 stores to the single category of Catch.
- **Creation of Magento 2 Store Orders:** The newly placed orders on Catch are automatically created in the Magento® 2 store with all the required details as they are on Catch.
- **Low Stock Notifications:** Whenever the stock diminishes lower than the threshold, a notification is sent informing the status of the same.
- **New Order Notifications:** Whenever a new order is fetched from Catch.com, the admin receives a notification.
- **Rejected Products' Notification:** If any product containing some invalid details gets rejected, its information is fetched along with the error due to which it is rejected.

## 2. Installation of Catch Integration Extension

### *To install the extension*

1. Log in the **ftp**, and then go to Magento 2 root folder (generally present under the [public\\_html](#) folder).
2. Create a new folder named **code** under the [app](#) folder; under **code** folder, create a folder named **Ced**.
  - Upload or Drag and Drop [app/code/Ced/Catch](#) directory.

- After successfully uploading the directory, the extension will be installed or upgraded.
- Now run the following upgrade command in `cmd`  
`php bin/magento setup:upgrade.`
- For SDK mapping, add the below-mentioned line in the composer.json of Magento root :  
`CatchSdk\": "app/code/Ced/catch-sdk/src"`

### 3. Retrieve API Credentials from the Catch Seller Account

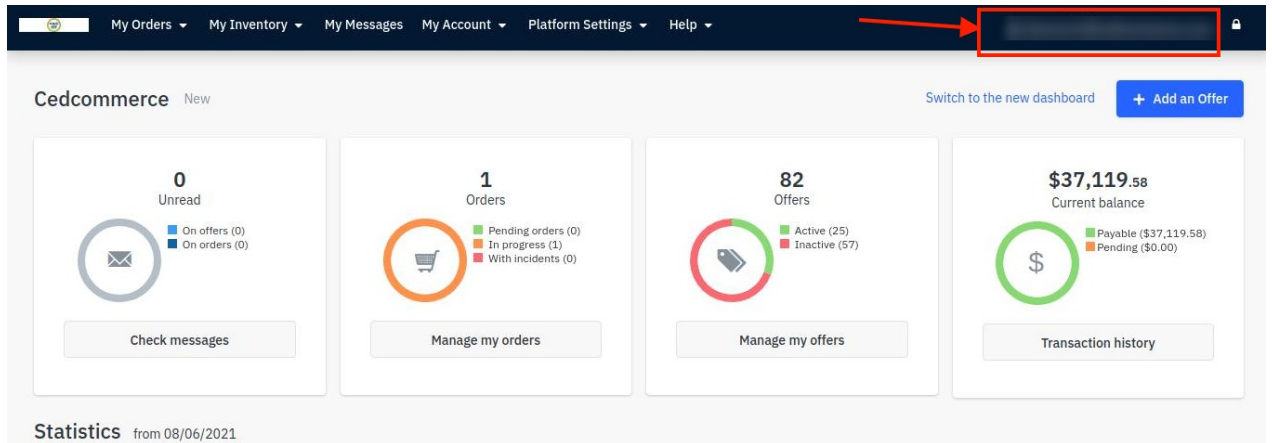

Once the extension is successfully installed in the Magento 2 store, the **CATCH INTEGRATION** menu appears on the left navigation bar of the Admin Panel. The store owner has to fill out the retrieved **API Key** value in the respective field displayed on the **Catch Configuration** page of the admin panel.

#### To retrieve the API Key from the Catch Seller Account

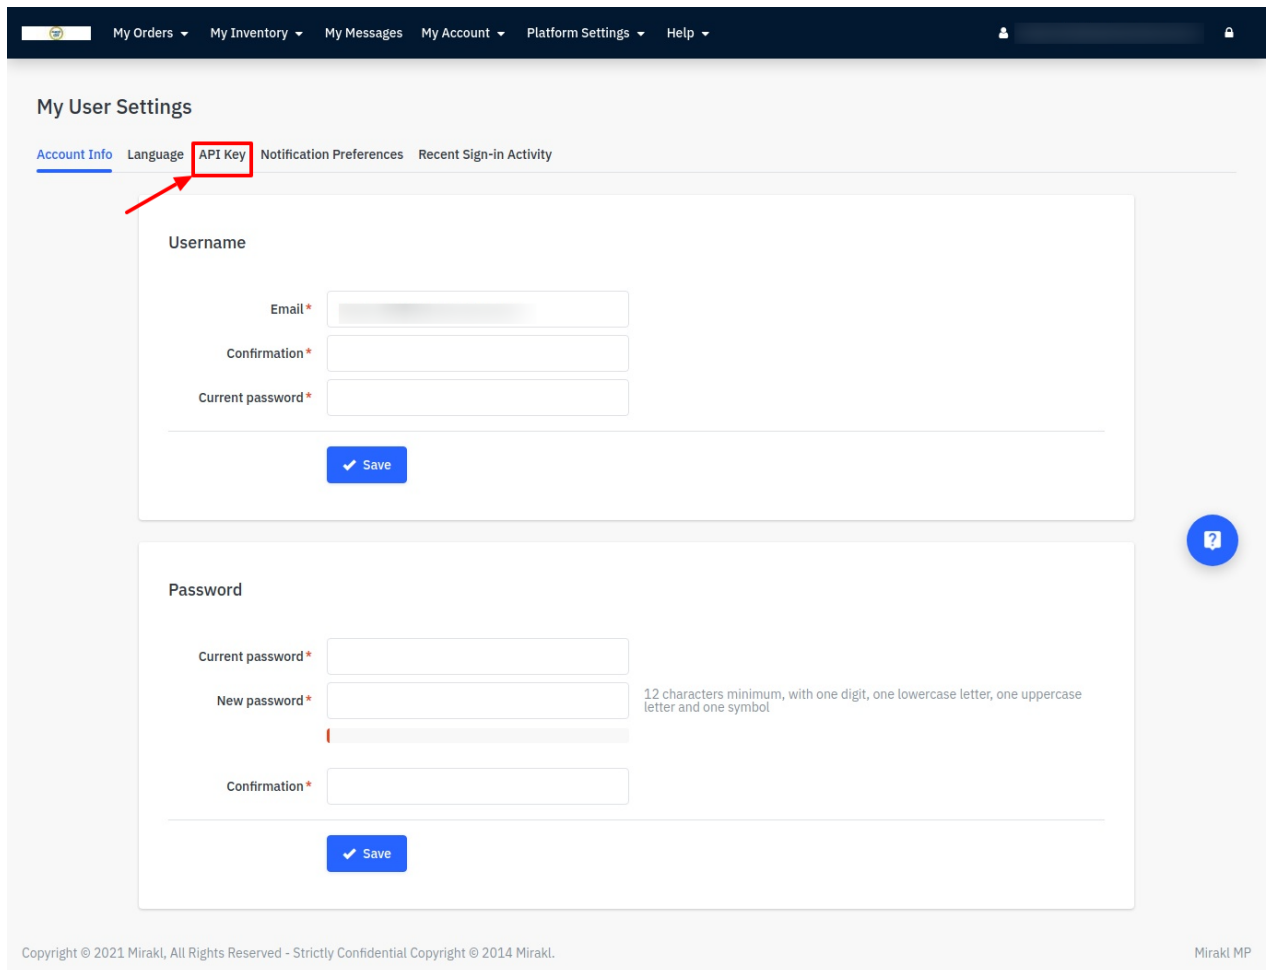

1. Go to the <https://catch-dev.mirakl.net> link for Sandbox Mode. Or Go to the <https://marketplace.catch.com.au/login> link for Live Mode. *(It should be in accordance with the Mode that you will be choosing while doing the Configuration).*

The Login page appears as shown in the following figure:

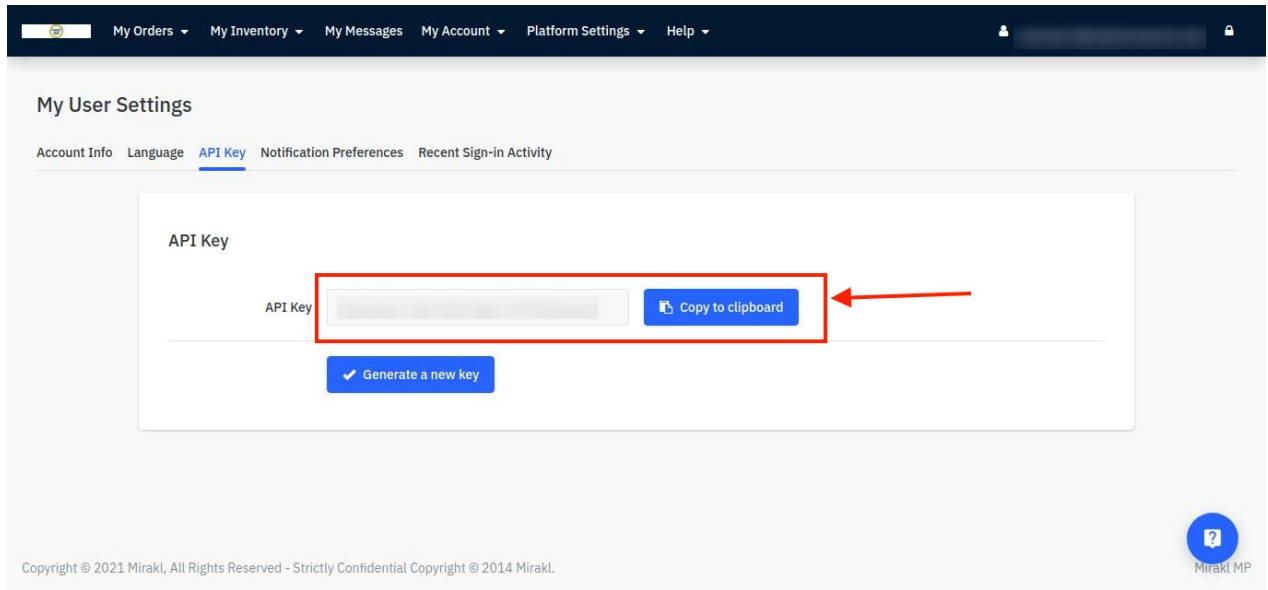

2. Enter the login credentials, and then click the **Sign In** button.  
The page appears as shown in the following figure:

3. Click the **username** as highlighted in the above figure.  
The page appears as shown in the following figure:

4. In the navigation panel on top, click the **API Key** menu.  
The **API Key** value appears in the right panel as shown in the following figure:

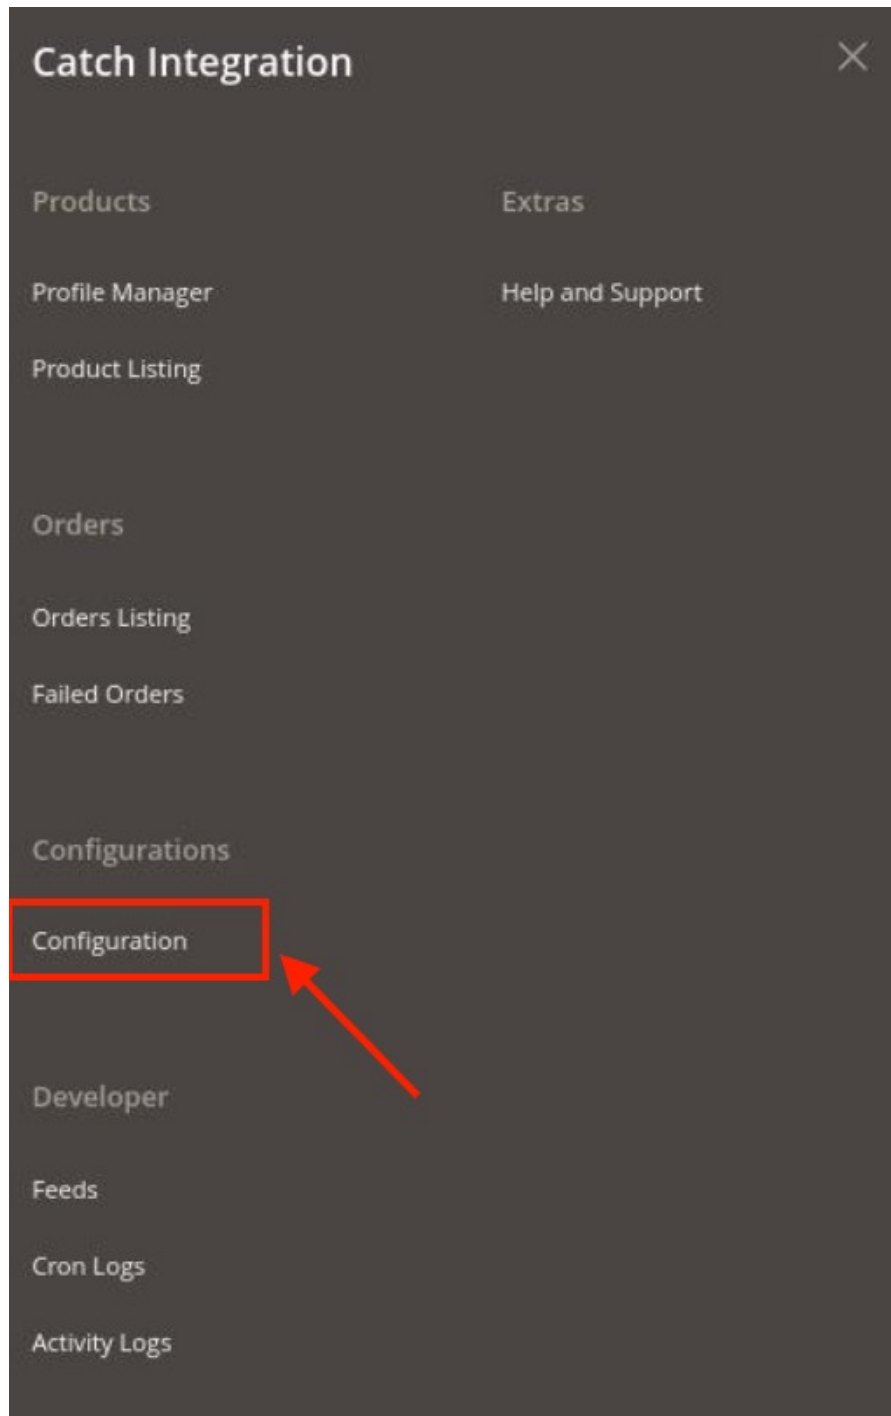

5. Click the **Copy to clipboard** button to copy the API key value.
6. Save the corresponding value in some text editor or the in Word file to use later on while setting up the configuration in the Magento 2 store admin panel.

## 4. Catch Configuration Settings

Once the extension is successfully installed in the Magento 2 store, the **CATCH INTEGRATION** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the Catch seller panel. Once the seller account is created and is approved by Catch, the Magento 2 store owners have to obtain the API Key value from the Catch Seller account, and then the Magento® 2 store owners have to paste it in the respective field displayed on the **Catch Configuration** page of the admin panel.

### *To set up the configuration settings in the Magento 2 Admin panel*

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Configuration**.

The Configuration page appears as shown in the following figure:

The screenshot shows the 'Configuration' page in Magento 2. On the left, a sidebar lists 'CEDCOMMERCE' with a sub-menu containing 'General Setting', 'Catch Configuration', and 'Catch Configuration'. The 'Catch Configuration' option is selected and highlighted. On the right, the 'Catch Seller/Developer Settings' tab is expanded, showing a list of settings: 'Catch Seller/Developer Settings', 'Catch Product Settings', 'Catch Order Settings', and 'Catch Cron Settings'. Each setting has a dropdown arrow to its right. An orange 'Save Config' button is located in the top right corner.

4. In the right panel, click the **Catch Seller/Developer Settings** tab.  
The **Catch Seller/Developer Settings** tab is expanded and the relevant fields appear as shown in the following figure:

The screenshot shows the 'Catch Seller/Developer Settings' configuration page. It features several fields for configuration:

- Enabled** [global]: A dropdown menu set to 'Yes'.
- Version** [store view]: A text input field containing '1.0'.
- Mode** [global]: A dropdown menu set to 'Sandbox'.
- Default Service Url** [global]: A dropdown menu set to 'Sandbox API URL'.
- Api Key** [global]: A text input field containing '549617c1-1548-440a-a191-f77d16140a69'.
- Select Store** [global]: A dropdown menu set to 'Default Store View'.
- Debug Mode** [global]: A dropdown menu set to 'Yes'.

5. Under **Catch Seller/Developer Settings**, do the following steps:
- In the **Enabled** list, select the **Yes** option.
  - In the **Mode** list, select the **Sandbox** option.
  - In the **Default Service Url** list, select the **Sandbox API URL** option.
  - In the **Api Key** box, enter the **API Key value** copied from the Catch seller account.
  - In the **Select Store** list, select the required store.
  - In **Debug Mode**, select Yes if you want the log to be created.
6. Click the **Save Config** button to save the entered values.
7. Scroll down to the **Catch Product Settings** tab, and then click the tab.  
The **Catch Product Settings** tab is expanded and the expanded section appears as shown in the following figure:

## Catch Product Settings

- ⌵ Catch Price Settings
- ⌵ Catch Inventory Settings
- ⌵ Other Product Settings

8. Under **Catch Products Settings**, do the following steps:

a. Click the **Catch Price Settings** tab.

The **Catch Price Settings** tab is expanded and the section appears as shown in the following figure:

### ⌵ Catch Price Settings

**Product Price**  
[global]

Default Magento Price

Select to send a different product price to **MPCatch**

b. Under **Catch Price Settings**, do the following step:

i. In the **Product Price** list, select one of the following options:

**Increase by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.

**Increase by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.

Enter the numeric value to increase the price of the **Catch**, product price by the entered value % of Magento 2 price.

### ⌵ Catch Price Settings

**Product Price**  
[global]

Increase By Fixed Percentage

Select to send a different product price to **MPCatch**

**Modify by Percentage Price**  
[global]

Numeric value Required for **Add/subtract % on Magento price** 5 for Example: Magento price +/- 5% of Magento price.

*For Example,*

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select **Increase By Fixed Percentage** option

**Modify by Percentage Price** = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Catch Product Price = 105

**Decrease by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.

**Decrease by Fixed Percentage:** If selected, then the **Modify**

by **Percentage Price** field appears.

Enter the numeric value to decrease the price of the **Catch** product price by the entered value % of Magento 2 price

*For Example,*

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select **Decrease By Fixed Percentage** option

**Modify by Fix Price** = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Catch Product Price = 95

- ii. Click the **Catch Inventory Settings** tab.

The **Catch Inventory Settings** tab is expanded and the section appears as shown in the following figure:

### **Catch Inventory Settings**

Set Inventory on Basis of Threshold  
[global]

Disable

Choose yes to send inventory on mpcatch by condition

- iii. Under **Catch Inventory Settings** tab, do the following steps:

- i. In the **Set Inventory on Basis of Threshold** list, select the **Enable** option if required to set the inventory based on a threshold.

**Note:** Only when the admin selects **Enable**, the other fields appear. Threshold Inventory is the minimum count of an item that the store owner wants to keep in stock.

The section appears as shown in the following figure:

- ii. In the **Inventory Threshold Value** box, enter the required value.
- iii. In the **Send Inventory for Lesser Than Threshold Case** box, enter the required value.
- iv. In the **Send Inventory for Greater Than Threshold Case** box, enter the required value.

- iv. Now click on Other Product Settings, the tab is expanded as shown below:

⏮ Other Product Settings

**Attributes to skip validation**  
[global]

Activity
AFN Reserved Quantity
AFN Total Quantity
Feed Errors
Amazon Status
amazon product url
Amazon Profile Id
amazon review url
Validation Errors
ASIN

These attributes will skip from configurable product validation and upload.

**Use Parent Product Info**  
[global]

Internal SKU
Product title
Product reference type
Product reference value
Image 7
Image 8
Image 9
Image 10
Size chart
Description

Select all attribute which you want from configurable parent product.

**Merge Parent Product Images**  
[global]

No

**Upload Config As Simple**  
[global]

No

v. Under **Other Product Settings**, do the following steps:

In **Attributes to Skip Validation**, select the attributes that will skip from configurable product validation and upload.

In **Use Parent Product Info**, select all attribute which you want from configurable parent product.

In **Merge Parent Product Images**, select Yes if you want to merge the parent product image.

In **Upload Config as Simple**, select Yes if you want to upload the configurable products as simple products.

9. Click the **Save Config** button to save the entered values.

10. Scroll down to the **Catch Order Settings** tab, and then click the tab.

The tab is expanded and the section appears as shown in the following figure:

## Catch Order Settings

Catch Order Id Prefix [global]   
Prefix for Catch Increment ID

Order Notification Email [global]

Auto Accept Order [global]

Hold Order Until Shipping [global]

Enable Default Customer [global]

Refund Order On Catch [global]    
Complete item will refund on catch.

11. Under **Catch Order Settings**, do the following steps:

- In the **Catch Order Id Prefix** box, enter the required order Id prefix.
- In the **Order Notification Email** box, enter the required email Id.
- In **Auto Order Accept**, select **Yes** if you want the orders to be accepted automatically.
- In **Hold Order Until Shipping**, select **Yes** if want to hold on to the orders till shipping.
- In the **Enable Default Customer** list, select the **Yes** option to enable the default customer.
- In the **Default Customer** list, select the required customer name.

Default Customer [global]

- In **Refund Order on Catch**, select **Yes** for the item refund on Catch marketplace.

12. Click the **Save Config** button to save the entered values.

13. Scroll down to the **Catch Cron Settings** tab, and then click the tab.

The tab is expanded and the section appears as:

## Catch Cron Settings

Order Cron [global]    
Order Fetch Cron

Order Sync Cron [global]    
Order Sync Cron

Inventory|Price Cron [global]    
Inventory Sync Cron

Feed Cron [global]    
Feed Sync Cron

Full Offer Sync Cron [global]    
Full Offer Sync Cron

Order Shipment Cron [global]    
Completed magento order will automatically ship

14. Under **Catch Cron Settings**, do the following steps:

- a. In the **Order Cron** list, select the **Enable** option to enable the fetch order cron.
  - b. In **Order Sync Cron**, select **Enable** to enable the order syncing cron.
  - c. In the **Inventory | Price Cron** list, select the **Enable** option to enable the Inventory & Price Sync cron.
  - d. In **Feed Cron**, select **Enable** option to enable the feeds syncing through cron.
  - e. In **Full Offer Sync Cron**, select **Enable** option to full offer syncing through cron.
  - f. In **Order Shipment Cron**, select **Enable** Option to ship Magento orders automatically.
15. Click the **Save Config** button to save the entered values.

## 5. Manage Catch Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 attributes to the Catch attributes. These attributes are applicable to all the products that are assigned to the profile.

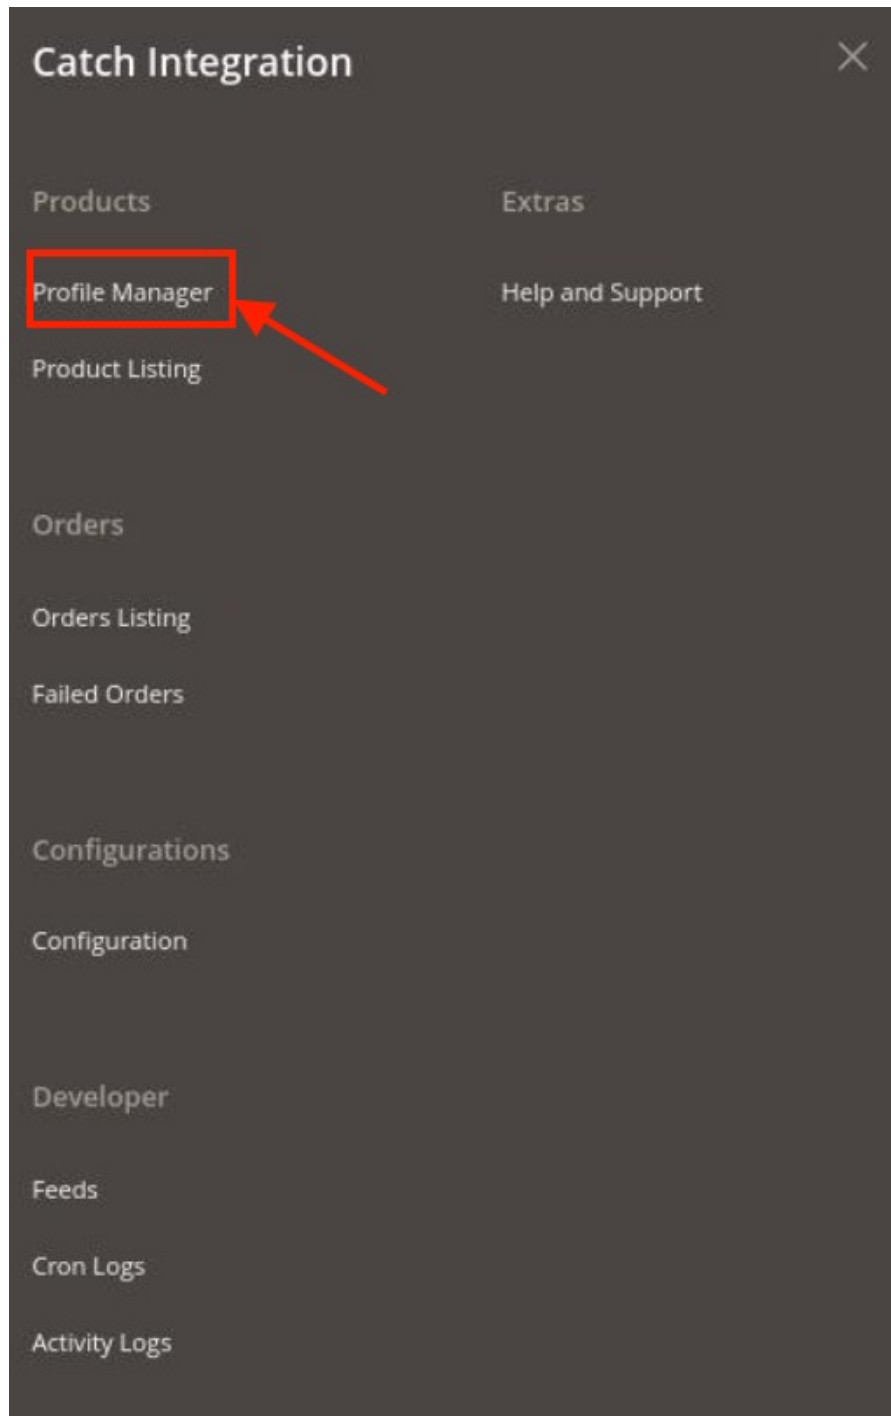

### *Admin can do the following tasks:*

- Add new profile(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=add-a-new-profile-28>)
- Edit the existing profile(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=edit-the-existing-profile-38>)
- Bulk Action on the Selected Profiles(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=submit-bulk-action-on-the-selected-profiles-6>)

### 5.1. Add a New Profile

#### *To add a new profile*

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.  
A menu appears as shown in the following figure:

3. Click **Profile Manager**.

The **Manage Profile** page appears as shown in the following figure:

3. On this page, all the available profiles are listed.
4. To delete the selected profiles, do the following steps:
  - a. Select the profiles that are no more required.
  - b. Click the **Arrow** button next to the **Actions** field.  
The **Actions** list appear as shown in the following figure:

- c. Click the **Delete** option.  
A confirmation dialog box appears.
  - d. Click the **OK** button.  
The selected profiles are deleted.
5. To disable the selected profiles, do the following steps:
  - a. Select the required profiles.
  - b. Click the **Arrow** button next to the **Actions** field.  
The **Actions** list appear as shown in the following figure:

- c. Click the **Disable** option.

The selected profiles are disabled.

- 6. To *enable the selected profiles*, do the following steps:

- a. Select the required profiles.
- b. Click the **Arrow** button next to the **Actions** field.

The **Actions** list appear as shown in the following figure:

- c. Click the **Enable** option.

The selected profiles are enabled.

- 7. To *assign products to the selected profiles*, do the following steps

- a. Select the required profiles.
- b. Click the **Arrow** button next to the **Actions** field.

The **Actions** list appear as shown in the following figure:

- c. Click on **Assign Products**.

The products will be assigned in bulk on the selected profiles.

## 6. Catch Product Listing

On this page, admin can view, edit, and validate the individual product. Also, the admin can view the error message if any error exists in any product details. After uploading the product on Catch or after updating the product inventory or the product price, the user can check the status of the feed, Also, can view the feed error if any. The admin can also submit certain actions on the selected products available on the **Catch Product Listing** page.

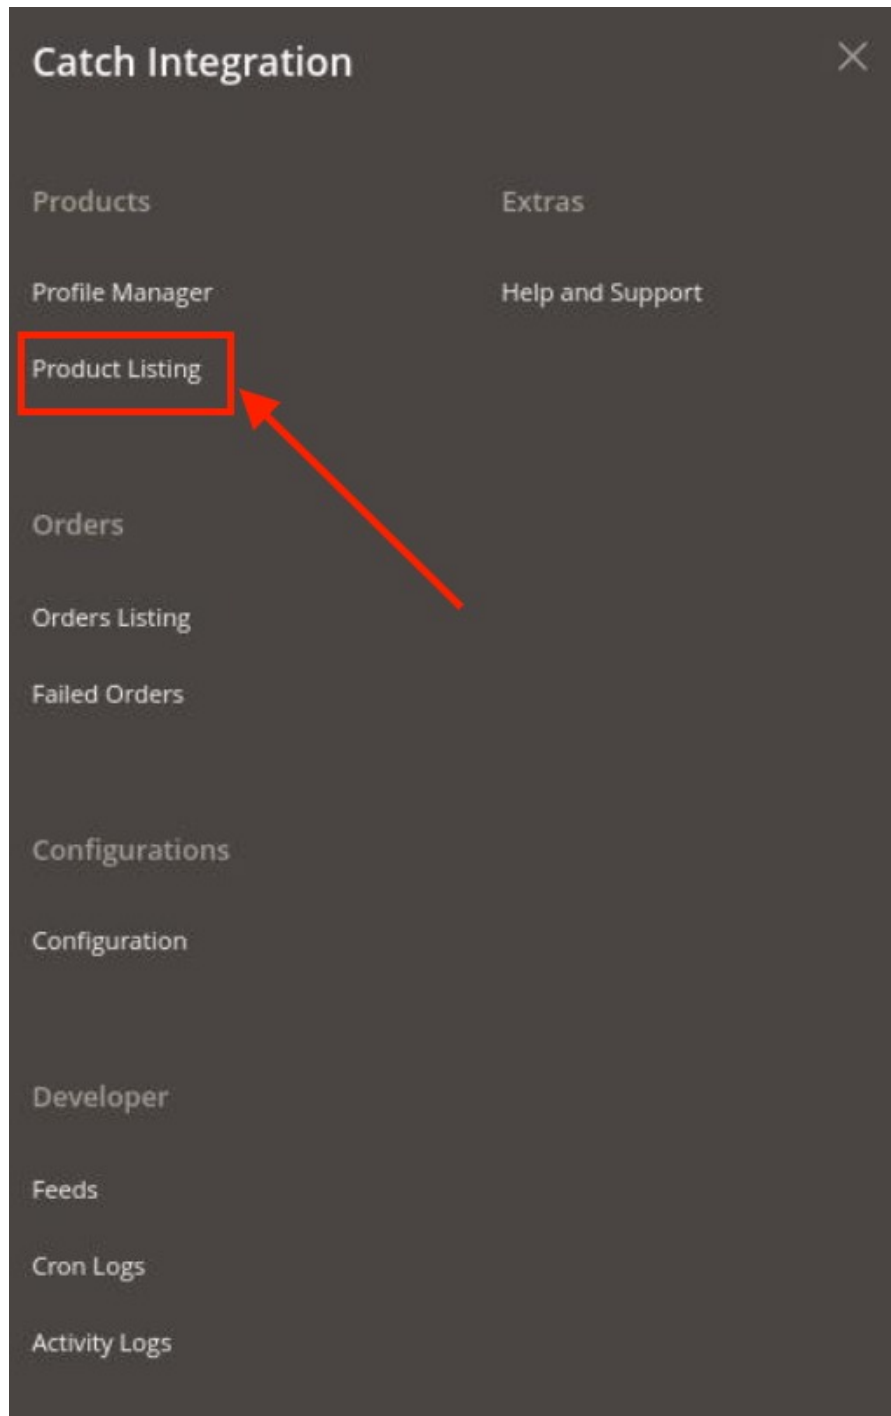

*This section covers the following topics:*

- View the Product Details(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=view-the-product-details-6>)
- Edit the Catch Products(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=edit-the-catch-products>)
- Validate the Single Product(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=validate-the-single-product-5>)
- Submit Bulk Action on the Selected Products(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=submit-bulk-action-on-the-selected-products-6>)

## 6.1. View the Product Details

### *To view the product details*

1. Go to the **Magento 2 Store Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Product Listing**.

The **Catch Product Listing** page appears as shown in the following figure:

4. Scroll down to the required product row.

5. In the **Action** column of the respective row, click the **Validate**

icon.

If the product is validated successfully and a success message appears on the top of the page.

If there is an error, then an **INVALID** button appears in the Validation column of the respective product row.

6. To view the cause of product invalidation, click the respective **INVALID** button.

A dialog box appears as shown in the following figure, which displays the errors related to the product.

MPCatch Product Details		
Sl. No.	SKU	Errors
24-MB02	24-MB02	<b>brand</b> : Required attribute empty or not mapped. [brand]

7. Correct the issues and then again click the **Validate** icon to validate the product.

## 6.4. Submit Bulk Action on the Selected Products

**Admin can perform the following tasks through the Bulk Action feature:**

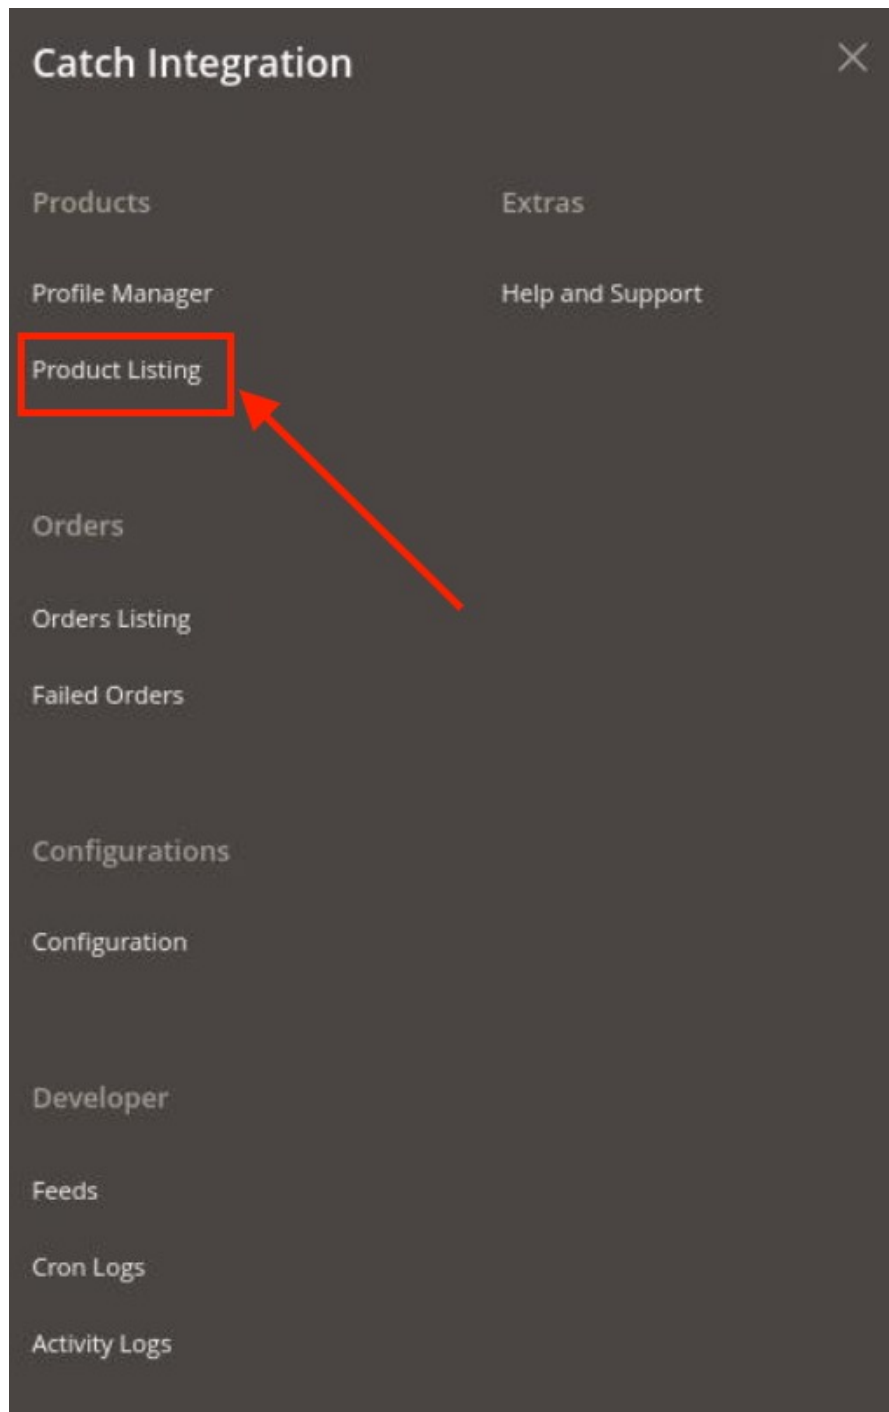

- **Validate Product:** To validate the selected products before uploading to the Catch website. It displays the corresponding validation error if any. If there is no error, it confirms that the product is ready to upload.
- **Upload Products:** To validate and upload the selected products to the Catch website. It displays the corresponding validation error if any. If there is no error, then the selected products are validated and

uploaded, and a success message appears.

- **Update Inventory & Price:** To update the inventory and price of the selected products on Catch. This action completes the entire job related to the product inventory and also it manages the quantity related issues. *For example*, if the user has changed the product price on the Magento 2 store and also wants to change the price on Catch then this action is applicable. The price is updated when the user submits this action for the selected product.

**To submit the selected bulk action on the selected products**

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.  
The menu appears as shown in the following figure:

### 3. Click **Product Listing**.

The **Catch Product Listing** page appears as shown in the following figure:

## Responses

Total 1 Batch(s) Found.  
 ✔ 2 Product(s) Updated successfully  
 ✔ 1 of 1 Processed.  
 ✔ 1 product batch(s) successfully validated.  
 Finished product mass validation.

The prices and the inventories of the selected products are updated on the Catch website.

e. Click the **Back** button to go back to the **Catch Product Listing** page.

7. To upload product with the offer of the selected products, do the following steps:

a. Select the checkboxes associated with the required products.

b. In the **Actions** list, click the arrow button.

A list appears as shown in the figure:

c. Click **Upload Product With Offer**.

A confirmation dialog box appears.

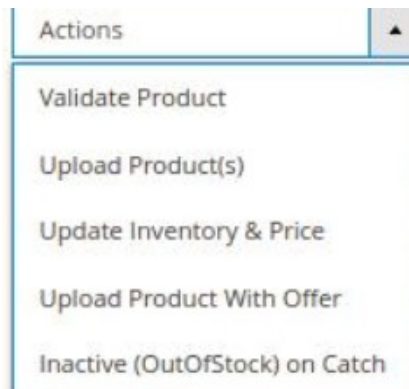

d. Click the **OK** button.

8. To inactive the out of stock selected products, do the following steps:

a. Select the checkboxes associated with the required products.

b. In the **Actions** list, click the arrow button.

A list appears as shown in the figure:

c. Click on **Inactive(OutOfStock) on Catch**.

A confirmation dialog box appears.

d. Click the **OK** button.

## 7. Manage Catch Orders

***Admin can do the following tasks while managing the Catch orders:***

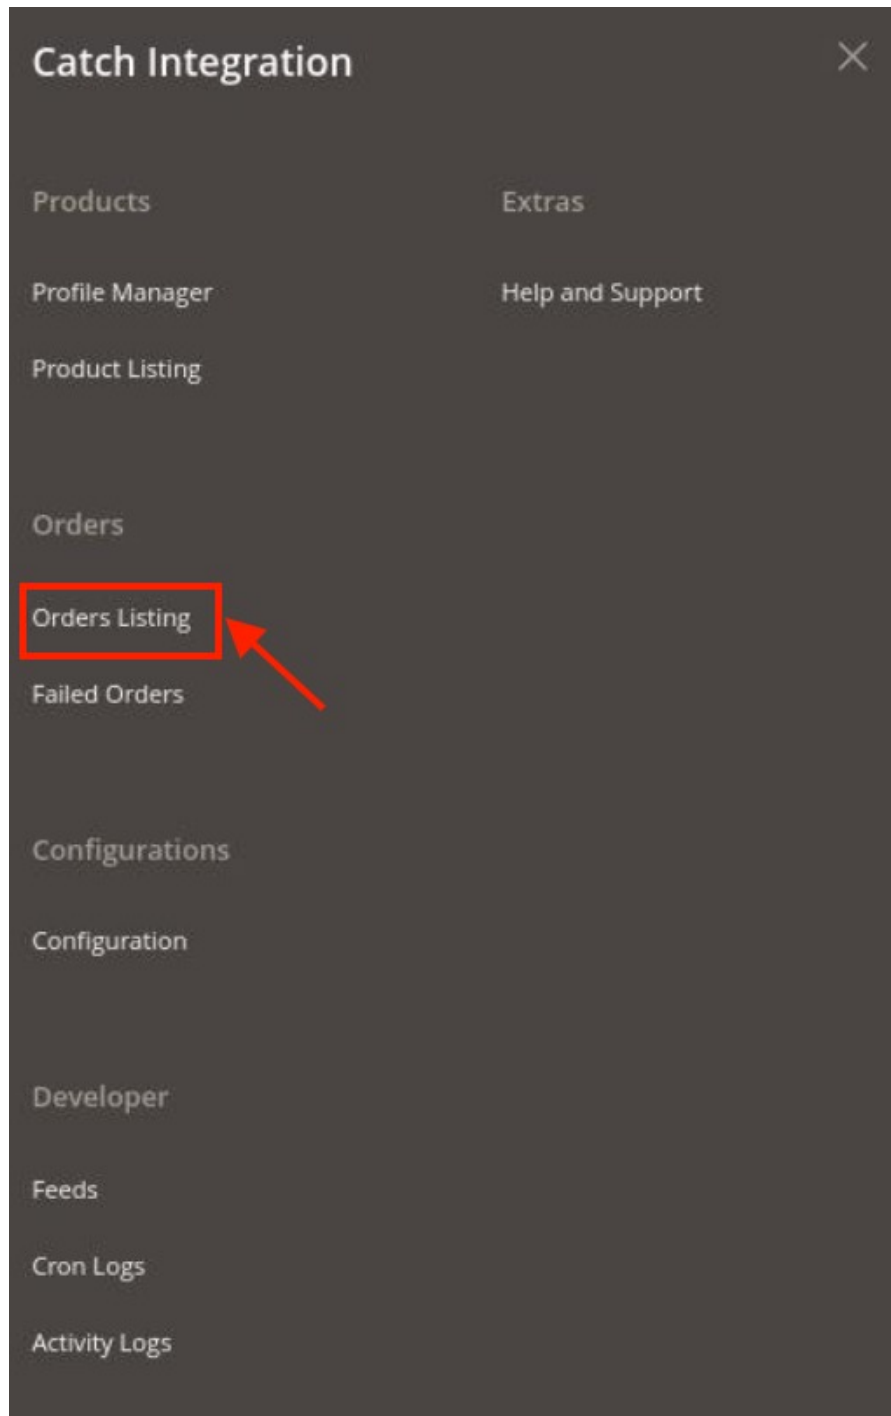

- Fetch, View, Ship, and delete the Catch Orders(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=ship-and-delete-the-cdiscount-orders-2>)
- View and delete the Failed Orders(<https://docs.cedcommerce.com/magento-2/catch-integration-user-guide/?section=view-and-delete-the-failed-orders-4>)

## 7.1. Ship and Delete the Catch Orders

The Magento 2 store owners can fetch the new orders and view all the order details fetched from Catch. They can also ship the required orders and can delete the orders those are no more required.

***To fetch and view new orders***

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Order Listing**.

The **Catch Order List** page appears as shown in the following figure:

4. Click the **Fetch Catch Orders** button.

If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.

**Notes:**

- Orders are automatically imported through CRON in every 10 minutes.
- Whenever the latest orders are imported from Catch, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento 2 store admin panel.
- If no Order is imported, then check the Failed orders listed on the **Catch Failed Order** page.
- Order are auto-rejected on Catch in the following conditions:
  - When Catch Product SKU does not exist in Magento 2 store.
  - When Product is Out of Stock in Magento 2 store.
  - When a product is disabled in Magento 2 store.

**To ship the Catch order**

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu, and then click **Order Listing**.  
The **Catch Order List** page appears as shown in the following figure:

3. To delete the single order, do the following steps:
  - a. Scroll down to the order row no more required.
  - b. In the **Action** column of the respective row, click the **Delete** icon.  
A confirmation dialog box appears.
  - c. Click the **OK** button.  
The order is deleted from the Catch Marketplace.
4. To delete the selected Catch orders in bulk, do the following steps:
  - a. Select the check boxes associated with the orders those are no more required.
  - b. Click the **Arrow** button next to the **Actions** list.  
A menu appears as shown in the following figure:

- c. Click **Delete Order(s)**.  
A confirmation dialog box appears.
- d. Click the **OK** button.  
The selected orders are deleted from the Catch Marketplace.

## 7.2. View and Delete the Failed Orders

The users can view the list of failed Catch orders on the Catch Failed Orders page.

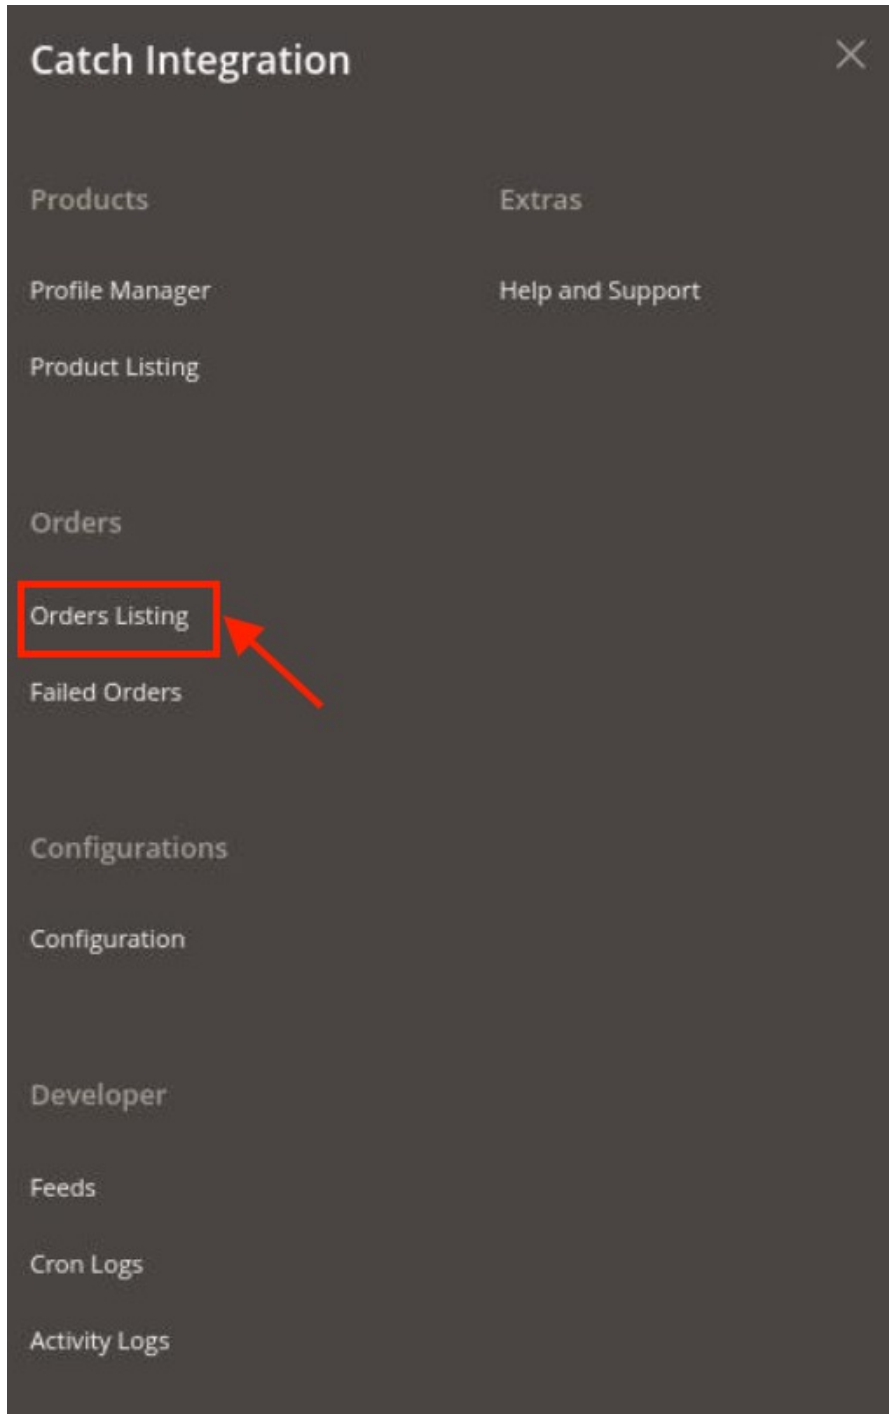

**In the following conditions, Orders are not imported from Catch:**

- If any product in the Catch Order is Out of Stock in the Magento 2 store.
- If any product in the Catch Order is disabled in the Magento 2 store.

- If any Product does not exist in Magento 2 store or is deleted from the Magento 2 store after uploading on Catch.
- If the selected Payment Method in Catch System Configuration Setting is not available in the Magento 2 store.

**To view Catch failed orders**

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CATCH INTEGRATION** menu.  
The menu appears as shown in the following figure:

3. Click **Failed Orders**.

The **CatchFailed Order** page appears as shown in the following figure:
