1. Overview

Google Shopping is a service by Google allowing customers to search, view, and compare products. It was launched as Froogle on February 12, 2002. Google Shopping is a service and program that allows customers to search, compare and shop for physical products across different retailers who have paid to advertise their products. For the longest time, around a decade to be more accurate, Google Shopping was simply a place where products were simply indexed based on Keywords.

Magento Integration for Google Shopping Feed is a solution for sellers to help boost their business growth. This innovative integration is the tool for all the sellers to automate their selling process with its exclusive features. Uploading your products, managing inventory, and much more is possible on a single dashboard with this handy tool.

Key Features:

- The sellers can easily upload/update products in bulk on the Google Shopping marketplace.
- The sellers can easily manage simple products easily via profiles with Google Shopping Feed integration.
- The feed section helps sellers to track the products sent to Google.
- Managing multiple google account stores from a single Magento 2 store is now much easier.
- The embedded crons automatically synchronize the inventory and price of the products at a regular interval of time.
- Deleting of product in bulk is now easier with the Google Shopping Feed integration for Magento

2. Configure Merchant Account

To configure your Merchant Account

Please

visit <http://console.cloud.google.com/apis/credentials>(<http://console.cloud.google.com/apis/credentials>) link to configure it with your merchant account,

1. Go to above link **Create a new project**,

Select a project

Search projects and folders

RECENT

ALL

Name	ID
<input checked="" type="checkbox"/> My Project 55934 	caramel-gate-249106

CANCEL OPEN

2. Select **OAuth consent screen**.

OAuth consent screen

Choose how you want to configure and register your app, including your target users. You can only associate one app with your project.

User Type

Internal ?

Only available to users within your organization. You will not need to submit your app for verification. [Learn more](#)

External ?

Available to any test user with a Google Account. Your app will start in testing mode and will only be available to users you add to the list of test users. Once your app is ready to push to production, you may need to verify your app. [Learn more](#)

CREATE

3. In **User Type** select **External**.
The tab appears as shown in the following figure:

The screenshot shows the Google Cloud Platform console interface. The top navigation bar includes 'Google Cloud Platform', 'My Project 55934', and a search icon. The left sidebar shows navigation options: 'Dashboard', 'Library', and 'Credentials'. The main content area is titled 'Credentials' and has three tabs: 'Credentials', 'OAuth consent screen', and 'Domain verification'. The 'OAuth consent screen' tab is selected and highlighted with a red box. A red arrow points from the 'Credentials' tab in the sidebar to the 'OAuth consent screen' tab in the main content area. Below the tabs, there is a text block explaining the consent screen's purpose. To the right, there are sections for 'About the consent screen', 'OAuth verification' (with a bulleted list of requirements), and 'Scopes for Google APIs'.

These email addresses are for Google to notify you about any changes to your project.

SAVE AND CONTINUE

CANCEL

The screenshot shows the Google Cloud Platform interface for configuring OAuth 2.0 credentials. The 'Authorized domains' section is active, showing a list of domains: 'openid', 'cedcommerce.com', and 'example.com'. Below this, there are input fields for 'Application Homepage link', 'Application Privacy Policy link', and 'Application Terms of Service link'. The 'Token grant rate' section indicates a current limit of 100 grants per minute. The 'Raise limit' section has buttons for 1h, 6h, 1d, 7d, and 30d, with '1d' selected. At the bottom, there are 'Save', 'Submit for verification', and 'Cancel' buttons.

4. In the **OAuth Consent Screen**, do the following steps:

- In the **Application Name** box, enter your shop name or domain name of your store,
- In the **Application Logo** box, upload your application logo that will help to recognize your app.
- In the **Support Email** box, enter your support email.
- In the **Authorized Domain** box, enter your website domain.

Example: *cedcommerce.com*

- In the **Application Homepage link** box, enter your store homepage link.
- In the **Application Privacy Policy link** box, enter your store application privacy policy link.
-

In the **Application Terms of Service link** box, enter your store application terms of service link.

5. In **Developer Contact Information**, the seller can enter multiple email Id.

6.

Then click on the **Save button** to save the **OAuth consent screen** information.

OAuth user cap

While publishing status is set to "Testing", only test users are able to access the app. Allowed user cap prior to app verification is 100, and is counted over the entire lifetime of the app. [Learn more](#)

7. Then comes to the **Credentials** Tab & click on **Create Credential Button** & select **OAuth Client ID**
The tab appears as shown in the following figure:

← Client ID for Web application DOWNLOAD JSON RESET SECRET DELETE

Client ID	[REDACTED]
Client secret	D70woLm_xOvhQUMhPfmX34TI
Creation date	Aug 7, 2019, 12:16:04 PM

Name ?

Web client 1 OAuth consent screen

Restrictions
 Enter JavaScript origins, redirect URIs, or both [Learn More](#)
 Origins and redirect domains must be added to the list of Authorized Domains in the [OAuth consent settings](#).

Authorized JavaScript origins
 For use with requests from a browser. This is the origin URI of the client application. It can't contain a wildcard (https://*.example.com) or a path (https://example.com/subdir). If you're using a nonstandard port, you must include it in the origin URI.

https://demo.cedcommerce.com 🗑️

https://www.example.com
 Type in the domain and press Enter to add it

Authorized redirect URIs
 For use with requests from a web server. This is the path in your application that users are redirected to after they have authenticated with Google. The path will be appended with the authorization code for access. Must have a protocol. Cannot contain URL fragments or relative paths. Cannot be a public IP address.

[REDACTED] 🗑️

https://www.example.com
 Type in the domain and press Enter to add it

8. In the **Credentials** sections, do the following steps:
 - a. In the **Name** section, enter the name of **OAuth Client ID** name.
 - b. In the **Authorized JavaScript origins** box, enter your store application domain name.
 - c. In the **Authorized redirect URIs** box, do the following steps:-
 - i. Go to the **Magento Admin Panel**
 - ii. Then go to **Google Shopping Actions Configuration Settings**
 - iii. Copy the Redirect URL and Paste it on **Authorized redirect URIs**
 The tab appears as shown in the following figure:

GXpress Cron Settings

- d. Then click on the **Save Button** to save the Credentials information.
- e. Once you **Save** it then you can download the **JSON file** from there which you can use as a secret key file.

The tab appears as shown in the following figure:

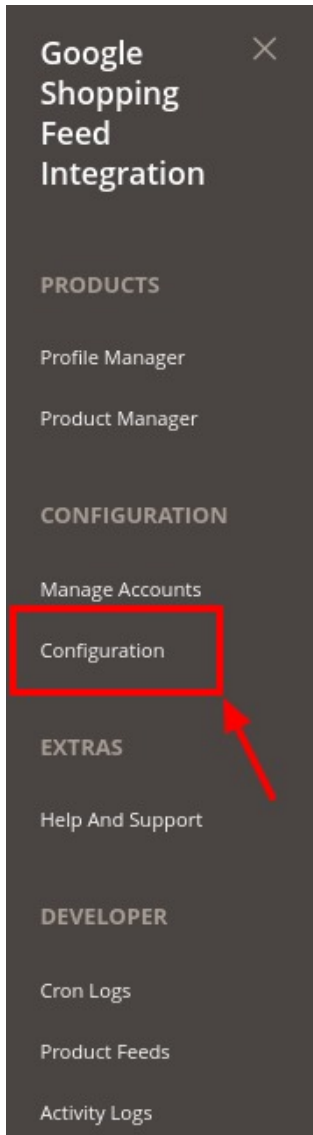

- f. Once you download the JSON File (Secret File). Go to the **Magento Admin Panel**.
- g. Go to **Google Shopping Actions Configuration Settings**.
- h. Then Client needs to be **Enable** Content Shopping API.
The tab appears as shown in the following figure:
- i. Click on **Enable Shopping API** section, to enable the Google Shopping API. The tab appears as shown in the following figure:

3. Configuration Settings

To set up the Configuration Settings,

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Configuration**.

The **Configuration** page appears as shown below:

4. Click on **Google Shopping Redirect/Account Settings**. The tab expands as:

Google Shopping Redirect/Account Settings

Google Shopping Redirect URL name
[global]You need to enter same url in Redirect URI on
<https://console.cloud.google.com/apis/credentials>Primary Account
[global]

Please select the Account

Create Merchant Account

Enable Shopping Api

5. Under **Google Shopping Redirect/Account Settings** do the following steps:
 - In **Google Shopping Redirect URL Name**, the URL will be displayed that you will be copying in your seller account.
 - In **Primary Account**, a Profile will automatically create for the selected account. Different profiles are created for different accounts so if you are creating a new profile then you have to select the dedicated account for that profile.
 - Click on **Create Merchant Account**, to create a new merchant account.
 - Click on **Enable Shopping Api**, to enable the Shopping API from the merchant center.
6. Scroll down to **Google Shopping Cron Settings**, the tab is expanded as:

Google Shopping Cron Settings

AutoUpload Cron
[global]

Enable

7. Under **Google Shopping Cron Settings**, do the following steps:
 - In **Auto Upload Cron**, select **Enable** if you want to enable the upload cron.
8. Now scroll down and click on **Google Shopping Product Upload Setting**, the tab is expanded as:

Google Shopping Product Upload Setting

Upload Format <small>[global]</small>	API Format	▼
Debug Mode <small>[global]</small>	No	▼
Product Price <small>[global]</small>	Default Magento Price	▼
	<small>Select to send different product price to shopping.google.com</small>	
Product Chunk Size <small>[global]</small>		
	<small>Enter the size of a chunk</small>	
Sale Price <small>[global]</small>	No	▼
Tax Price Settings <small>[global]</small>	No	▼
Use MSI Feature For Inventory <small>[global]</small>	No	▼
	<small>Use MSI feature to send the Inventory to google Adwords. By default : Default Stock is used.</small>	
Use Buffer Quantity For Inventory <small>[global]</small>	No	▼

9. Under **Google Shopping Product Upload Setting** do the following steps:

In **Upload Format**, select the format for the product upload.

In the **Debug mode**, select **Yes** if you want to enable the debugging mode.

In **Product Price**, select one of the following options:

Increase by Fixed Price: If selected, then the Modify by Fix Price field appears.

Increase by Fixed Percentage: If selected, then the Modify by Percentage Price field appears.

Enter the numeric value to increase the price of Google Shopping Feed product price by the entered value % of Magento 2 store price.

For Example,

Magento 2 price + 5% of Magento 2 price.

Magento 2 Price = 100

Select Increase By Fixed Percentage option

Modify by Percentage Price = 5

$100 + 5\% \text{ of } 100 = 100 + 5 = 105$

Thus, Google Shopping Feed Product Price = 105

Decrease by Fixed Price: If selected, then the Modify by Fix Price field appears.

Decrease by Fixed Percentage: If selected, then the Modify by Percentage Price field appears.

Enter the numeric value to decrease the price of the Google Shopping Feed product price by the entered value % of Magento 2 store price

For Example,

Magento 2 price – 5% of Magento 2 price.

Magento 2 Price = 100

Select Decrease By Fixed Percentage option

Modify by Fix Price = 5

$100 - 5\% \text{ of } 100 = 100 - 5 = 95$

Thus, Google Shopping Feed Product Price = 95

In the **Product Chunk Size**, enter the default size of a chunk.

Sale Price
[global]

Sale Price Expires on
[global]

Tax Price Settings
[global]

Tax Percentage Rate
[global]

enter Tax Rates applied on shipping (in %)

In **Sale Price**, select **Yes** if you want to enable the sale price (special price).
 In **Sale Price Expires on**, enter the date on which the special price will end.
 In the **Tax Price Settings**, select **Yes** if you want to enable the tax on the price.
 In the **Tax Percentage Rate**, enter the tax rates.
 In **Use MSI Feature For Inventory**, select **Yes** if you want to send the inventory to Google Adwords.
 In **Use Buffer Quantity For Inventory**, select **Yes** if you want buffer quantity.

Buffer Attribute
[website]

Map Product Identifier for **Adwords**

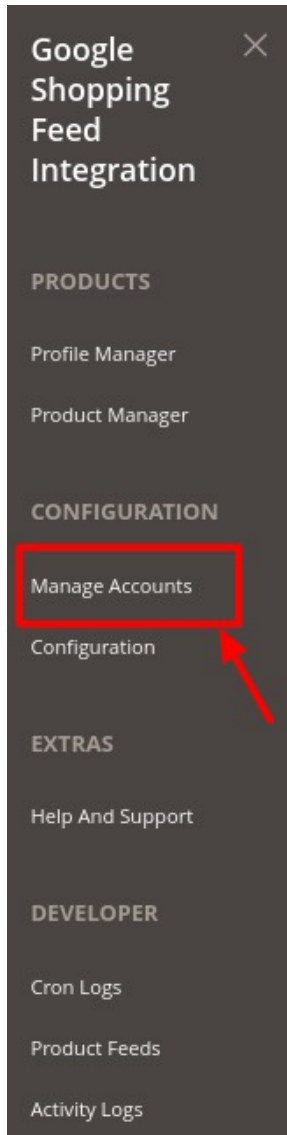

Then in **Buffer Attribute**, select the buffer attribute to map product identifier for the Google Adwords.

10. Click on the **Save Config** button.
The configuration will be saved.

4. Manage Google Shopping Feed Account

To Manage Accounts

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Manage Accounts**.

The **Manage Account** page appears as shown below:

The screenshot shows the 'Manage Account' page. At the top right, there is a search icon, a notification bell with '1', and a user profile icon. Below these is a red 'Add Account' button, highlighted with a red box and a red arrow. A yellow banner below the button contains the text: 'If you want any help or need to manage google shopping orders, please contact with cedcommerce.' Below the banner are controls for filters, default view, and columns. The main content area shows '2 records found' and a table with the following data:

ID	Account DataFeed File	Account Code	Account Status	Account Token	Account Environment	Magento Store	Actions (Edit/Fetch)
3	No need for URL		Enabled	PLEASE FETCH TOKEN	Production	Default Store View	
4	No need for URL		Enabled	PLEASE FETCH TOKEN	Production	Default Store View	

- Click on **Add Account** button, to add a new account.
The **New Account page** appears:

- Under **Account Information**, do the following steps:
 - In the **Account Code**, enter any code as per your choice as it is for the internal use only. **(Note: You can not use space and special characters in the Account Code.)**
 - In the **Account Environment**, select the environment from the list.
 - In the **Merchant Id**, enter the seller id.
 - In the **Account Status**, choose the status of the account.
 - In the **Account Store**, select the store view.
 - In the **Client Secret File**, choose the file from the system(<https://docs.cedcommerce.com/magento-2/google-shopping-feed-magento-2-integration-user-guide/?section=configure-merchant-account>)
 - The **Token** section reflects the token once it gets verified.
- Then click on **Additional Settings**, the section is expanded as shown below:

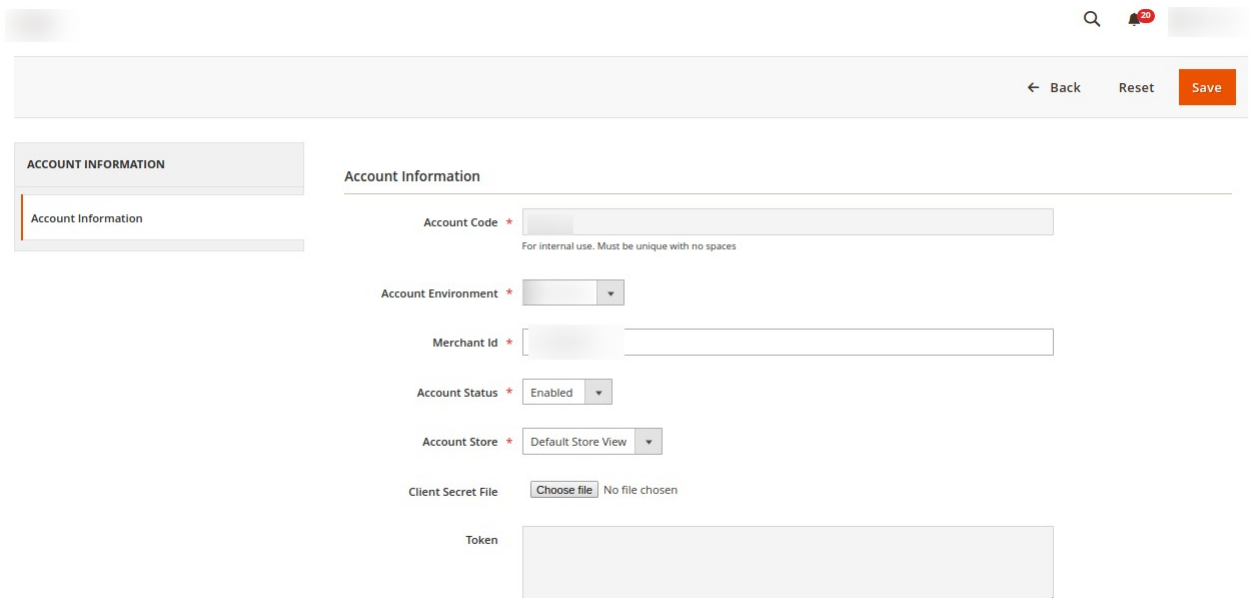

7. Under **Additional Settings**, do the following steps:
 - In the **Content Language**, select your preferred language for your selected target country.
 - In **Target Country**, select the country for which you want to list your product
 - In the **Included Destination**, select the destinations from the list.
8. Click on the **Save** button.
A new account will be created.

To Edit an Account,

- Select the account you want to edit.
- Click on the **Edit** button under the **Actions** column.

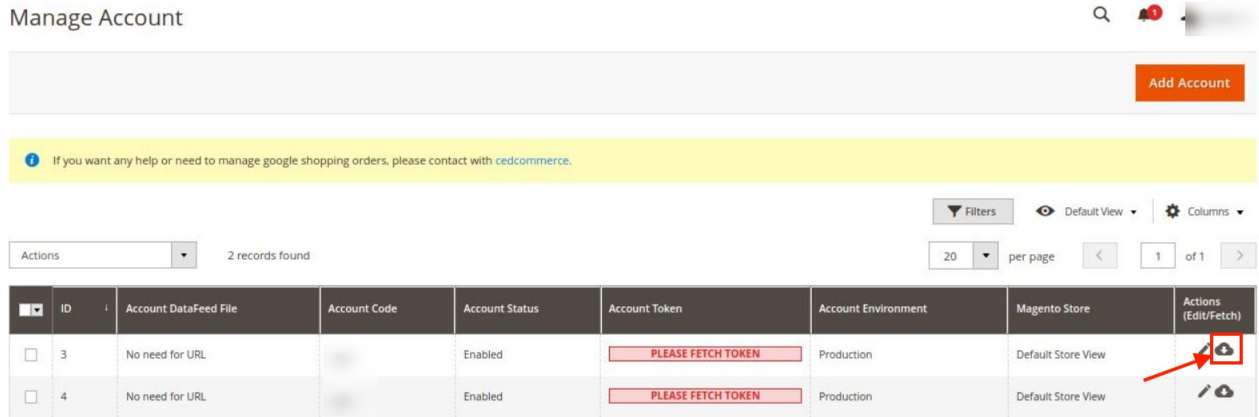

- The **Edit Account** page appears as shown below:

- Do the required changes in the account.
- Click on the **Save** button.
The changes will be saved.

To Fetch Token,

- Select the account you want to edit for which you want to fetch tokens.
- Click on the **Fetch Token** button under the **Actions** column.

- After clicking on the **Fetch Token** button the google account will be verified and the token will be automatically saved.

5. Manage Profile

Admin can do the following tasks in the Manage Profile Section:

- Add New Profile
- Edit the existing Profile
- Delete Profile
- Perform Bulk Actions

5.1. Add New Profile

To Add New Profile

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Profile Manager**.
The **Manage Profile** page appears as shown below:

- Click on **Add New Profile** button.
The **New Profile** page appears:

New Profile

← Back Delete Reset Save and Continue Edit Save

We couldn't find any records

13. Since no products as assigned to the profile, there are no products listed in the table.

14. Click on the **save** button present on the top right corner and the new profile will be saved.

5.2. Edit Existing Profile

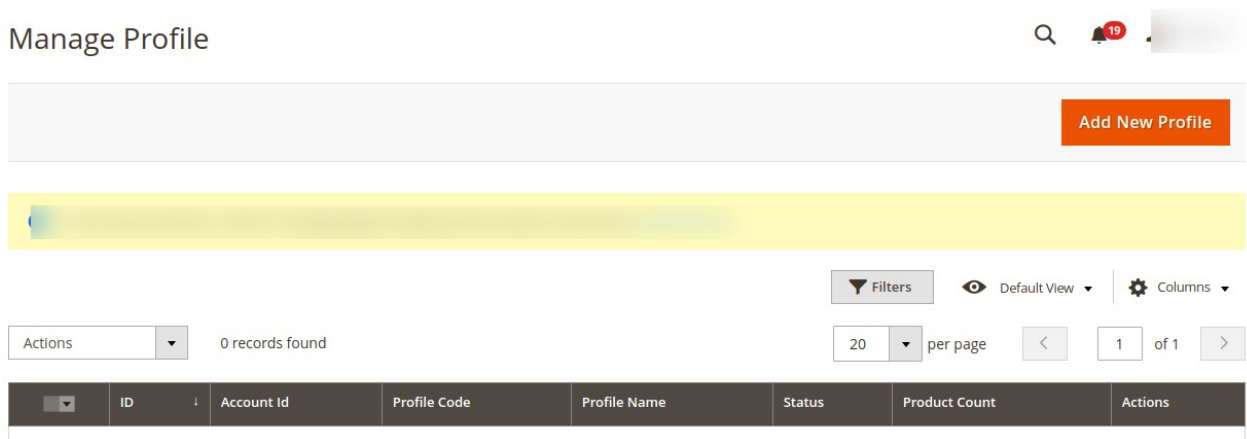

To Edit Existing Profile

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Profile Manager**

4. The **Manage Profile** page appears as shown below:

5. On this page, all the available profiles are listed.
6. Click the required row of the profile that the admin wants to edit.

<input type="checkbox"/>	ID	Account Id	Profile Code	Profile Name	Status	Product Count	Actions
<input type="checkbox"/>	1				Enabled	2	

7. The **Edit Profile page** will appear. Make the required changes in the profile.
8. Click the **Save** button.
9. The changes will be saved.

5.3. Delete Profile

To Delete Profile

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Profile Manager**

4. The **Manage Profile** page appears as shown below:

5. On this page, all the available profiles are listed.
6. Click the required row of the profile that the admin wants to delete.
7. In the **Actions**, column click on the **Delete** button.
The selected profile will be deleted.

5.4. Submit Actions On the Manage Profile Page

To submit actions in bulk

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Profile Manager**
4. The **Manage Profile** page appears as shown below:

Manage Profile

The screenshot shows the 'Manage Profile' page. At the top right, there is a search icon, a notification bell with '19', and a user profile icon. Below this is a light gray bar with an orange 'Add New Profile' button. A yellow horizontal bar is present below. The main content area includes a 'Filters' button, 'Default View' (with an eye icon), and 'Columns' (with a gear icon). Below these is an 'Actions' dropdown menu, '0 records found', a '20 per page' selector, and pagination controls showing '1 of 1'. At the bottom, a table header is visible with columns: ID, Account Id, Profile Code, Profile Name, Status, Product Count, and Actions.

5. On this page, all the available profiles are listed.

To Delete Profiles,

1. Click on the checkboxes of the profiles you want to delete.
2. On the **Actions**, tab click on the dropdown. Click on **Delete** in order to remove the profiles.

3. A Pop-up is displayed to confirm your choice. Select **OK** to Delete the profile.
4. The selected profiles will be deleted.

To Disable Profiles,

1. Click on the checkboxes of the profiles you want to disable.
2. On the **Actions**, tab click on the dropdown. Click on **Disable** in order to disable the profiles.

3. A Pop-up is displayed to confirm your choice. Select **OK** to Disable the profile.
4. The selected profiles will be disabled.

To Enable Profiles,

1. Click on the checkboxes of the profiles you want to enable.
2. On the **Actions**, tab click on the dropdown. Click on **Enable** in order to enable the profiles.

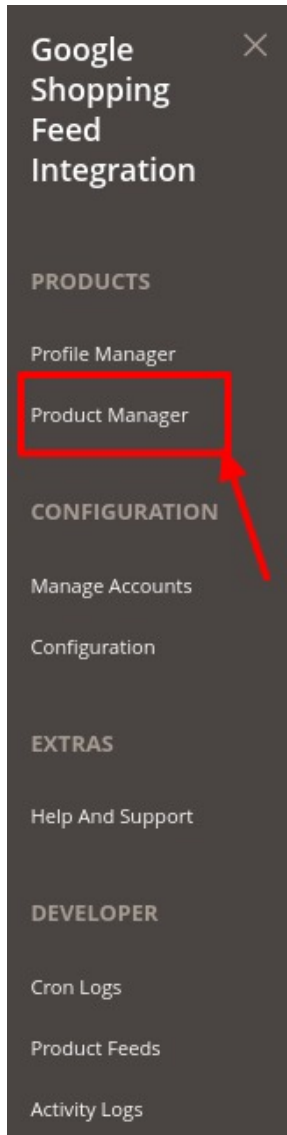

3. A Pop-up is displayed to confirm your choice. Select **OK** to Enable the profile.
4. The selected profiles will be enabled.

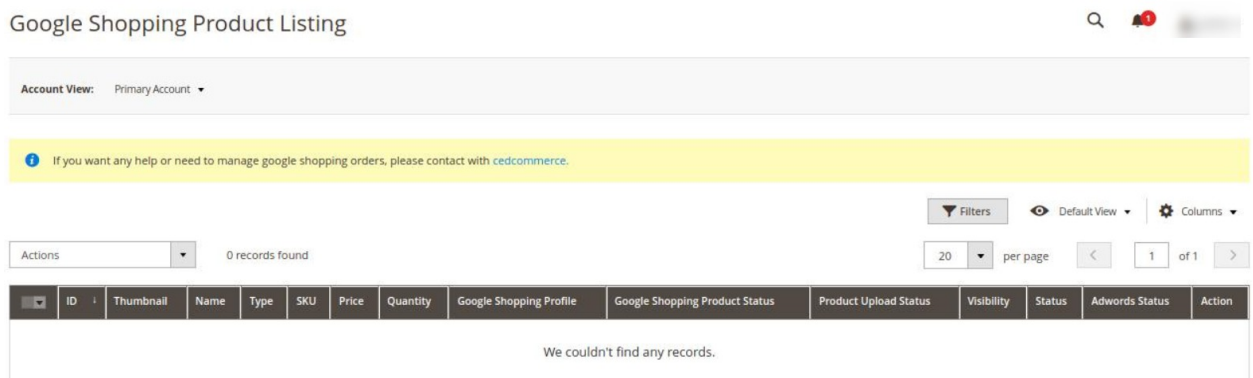

6. Manage Product

To Manage Products

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Product Manager**.
The **Product Listing Page** appears as shown below:

To Upload Product,

- Select the products which you want to Upload by checking the corresponding boxes.
- Click the **Arrow** button next to the **Actions** list, and then click **Selected Product Upload**.

- The selected products will be uploaded.

To Delete Product,

- Select the products which you want to Delete by checking the corresponding boxes.
- Click the **Arrow** button next to the **Actions** list, and then click **Delete Product**.

- The selected products will be deleted.

7. Developer Options

The Developer Section covers the following sections:

- Cron Logs
- Products Feeds
- Activity Logs

7.1. Cron Logs

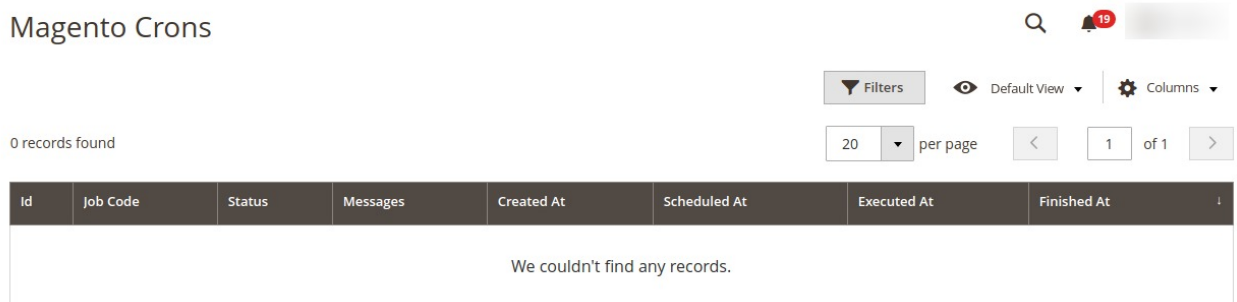

To View Cron Logs

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Cron Logs**.

The **Crons Page** appears as shown below:

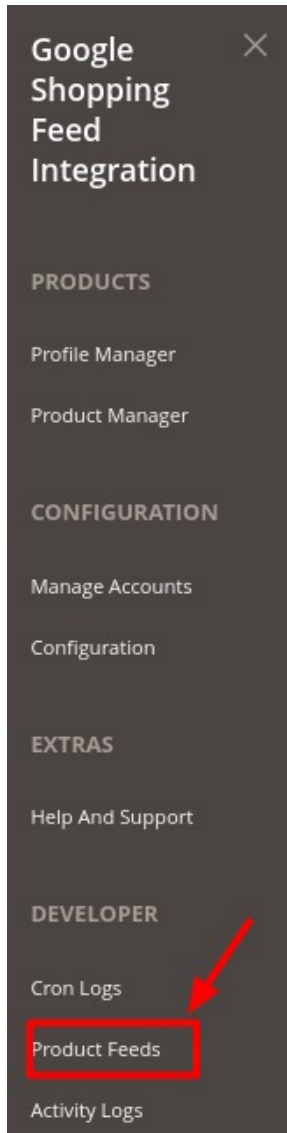

4. The crons will be displayed on this page.

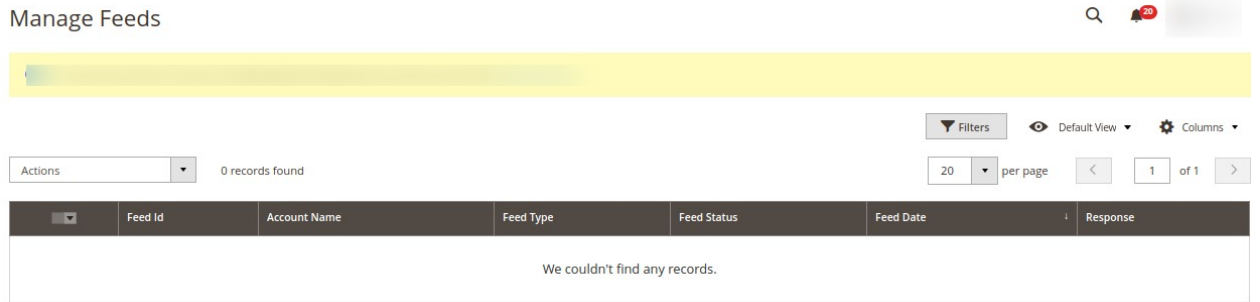

7.2. Product Feeds

To View Product Feeds

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Product Feeds**.
The **Feeds** Page will appear as:

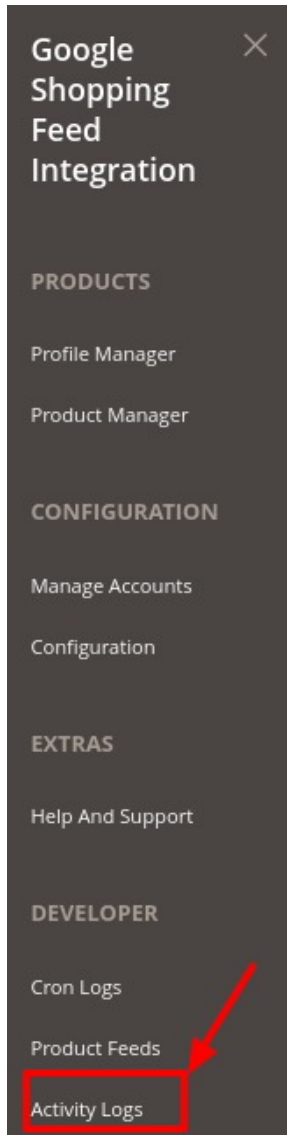

4. You can manage the feeds from here.

7.3. Activity Logs

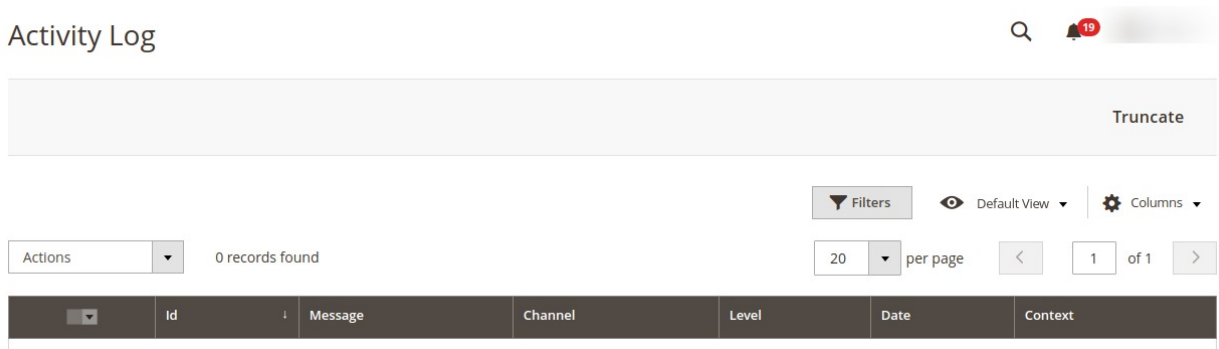

To View Activity Logs

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Activity Logs**.

The **Activity Log page** appears as shown below:

4. The Id with the messages will be displayed here.

5. You can delete the records by clicking on **Delete** under the **Actions** option.

6. The selected records will be deleted.

8. Help & Support

To view the Help & Support Section

1. Go to the **Magento 2 admin panel**.
2. On the left navigation bar, click on the **Google Shopping Feed Integration** option.
The menu appears as shown below:

3. Click on **Help & Support**.
The **Help and Support** page appears as shown below:
