1. Overview

The **Cdon Integration For Magento 2** by CedCommerce is a handy tool that helps the Magento® 2 store owners to boost their business and generate the revenue as it interacts with Cdon API's to connect the Magento® 2 store to Cdon. It provides an opportunity to cover a wide range of customers.

Admin gets the authority to create Cdon Categories and the dependent attributes on the Magento 2 store. It also enables you to establish a mapping of the desired product category on the Magento 2 store for automatic submission of the selected product to the same category on Cdon.com.

This extension interacts with the Cdon Marketplace to integrate the synchronized product listing between Magento® 2 Store and the Cdon.com retailers.

It enables the admin to manage the Cdon orders on the seller's Magento® 2 stores without making any significant changes to operational functionalities.

Synchronizing orders, products, pricing, and inventory is possible through establishing the communication between Cdon APIs and the Magento® 2 stores.

Key Features are as follows:

- **Product Upload Based on Profile:** Enables the admin to create a profile based on a single category, and then assign the products to the profile to automate the product upload.
- **Bulk upload Methodology:** Admin gets the authority to upload bulk products on Cdon but just selecting the products and upload in one go.
- **Magento Order creation:** The newly placed orders on Cdon.com are automatically created in the Magento® 2 stores with all the required details as it is on Cdon.com.
- **Product Data Validation:** The extension enables validating the product information in accordance with Cdon standard and values.
- **Auto synchronization:** Auto synchronization of the product listing, order, inventory, and pricing at regular intervals is established between Magento® 2 Store and Cdon .com.
- **Product category mapping:** Follows category mapping philosophy. Admin can map any category of the Magento® 2 stores to the single category of Cdon.
- **Email Notification:** Admin receives the notification through the mail on new order creation, low stock and if the product is rejected from Cdon.
- **Auto-shipment procedure:*** Provides admin an ability to automate the process of shipment with Shipstation, Shipwork, Stamps.com, Linnworks, Xtento, ShipRush.

2. Cdon Integration Extension for Magento 2 store- Installation

To install the extension

1. Log in the **ftp**, and then go to the **Magento 2** store root folder (generally present under the **public_html** folder).
2. Create a new folder named **code** under the **app** folder; under **code** folder, create a folder named **Ced**.
 - a. Upload or Drag and Drop **app/code/Ced/Cdon** directory.
 - b. After successfully uploading the directory, the extension will be installed/upgraded.
 - c. Now run the following upgrade command in **cmd**
php bin/magento setup:upgrade.

3. Retrive API credentials from Cdon

Once the extension is successfully installed in the Magento 2 store, the merchant has to enter the **API Key details** in the respective fields displayed on the **Cdon Configurations** page while setting up the configurations.

To get the API Key Details from the Cdon:

1. Go to the (<https://integration-admin.marketplace.cdon.com>)
This page will open up.

2. Log In to your seller account.
3. On the top panel click on help as shown in the figure below:

4. From here you can retrieve your API Key & Source Id.

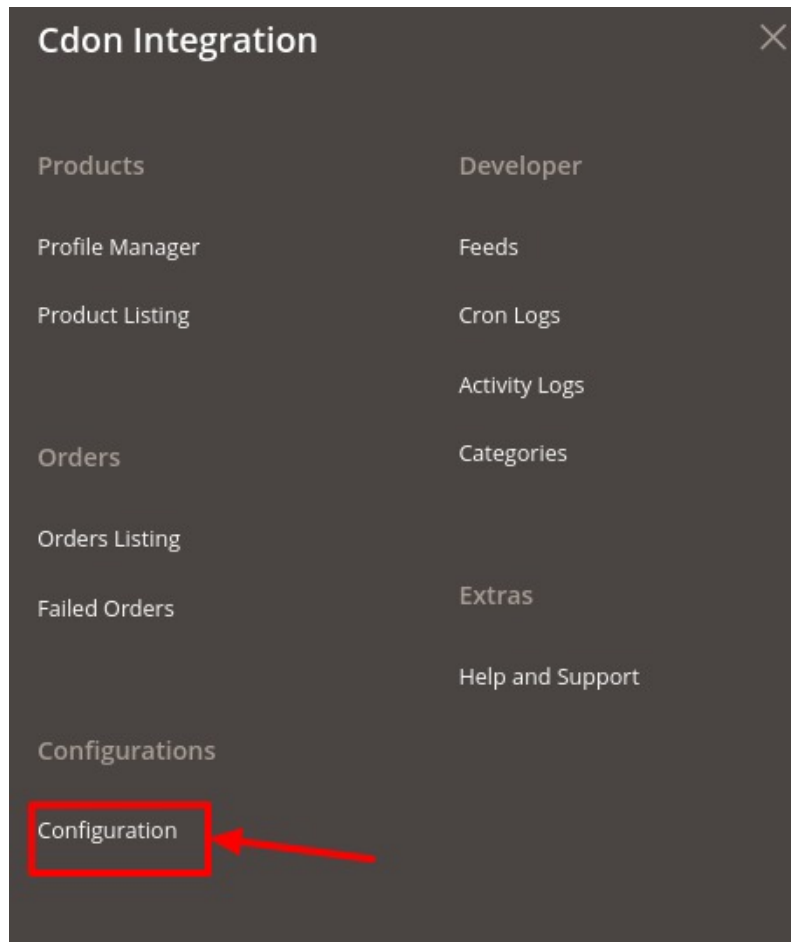

Now move back to cedcommerce configurations page for further process.

4. Cdon Configuration

Once the extension is successfully installed in the Magento 2 store, the **CDON INTEGRATION** menu appears on the left navigation bar of the Magento 2 Admin panel. The merchant has to first create a seller account in the **Cdon** seller panel. Once the seller account is created and is approved by Cdon, then the Magento 2 store owners can use the **Cdon API credentials provided by Cdon** while setting up the Cdon Configuration settings in the **Magento 2 Admin** panel.

To set up the configuration settings in the Magento 2 Admin panel

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CDON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Configuration**.
The **Cdon** Configuration page appears as shown in the following figure:

 - In the **Inventory | Price Cron** list, select the **Enable** option to enable the Inventory & Price Sync corn.
 - In **Product Upload**, select **Enable** if you want to upload products through cron.
- Click the **Save Config** button to save the entered values.
- The configuration settings are saved and a success message appears on the page.

5. Manage Cdon Profiles

Admin can create a new profile and assign the required products to the profile. While creating and editing the profile, admin can map the Magento 2 store attributes to the Cdon attributes. These attributes are applicable to all the products that are assigned to the profile.

Admin can do the following tasks:

- Add a new profile
- Edit the existing profile
- Bulk Action on the Selected Profiles

5.1. Add A New Profile

To add a new profile

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CDON INTEGRATION** menu, and then click **Profile Manager**.
The **Manage Profile** page appears as shown in the following figure:

3. Click the **Add New Profile** button.
The **New Profile** page appears as shown in the following figure:

4. In the right panel, under **Profile Information**, do the following steps:
 - a. In the **Profile Code** box, enter a profile code.
Note: It is only for the internal use. Use the unique profile code with no spaces. Start with small letters.
 - b. In the **Profile Name** box, enter the name of the profile.
Note: Use the unique name to identify the profile.
 - c. In the **Profile Status** list, select **Enabled** to enable the profile.
Note: The Inactive option disables the profile.
5. Click the **Save** button.
6. In the left navigation panel, click the **Product Basic Mappings** menu.
In the right panel, the page appears as shown in the following figure:

7. Manage Cdon Orders

Admin can do the following tasks while managing the Cdon orders:

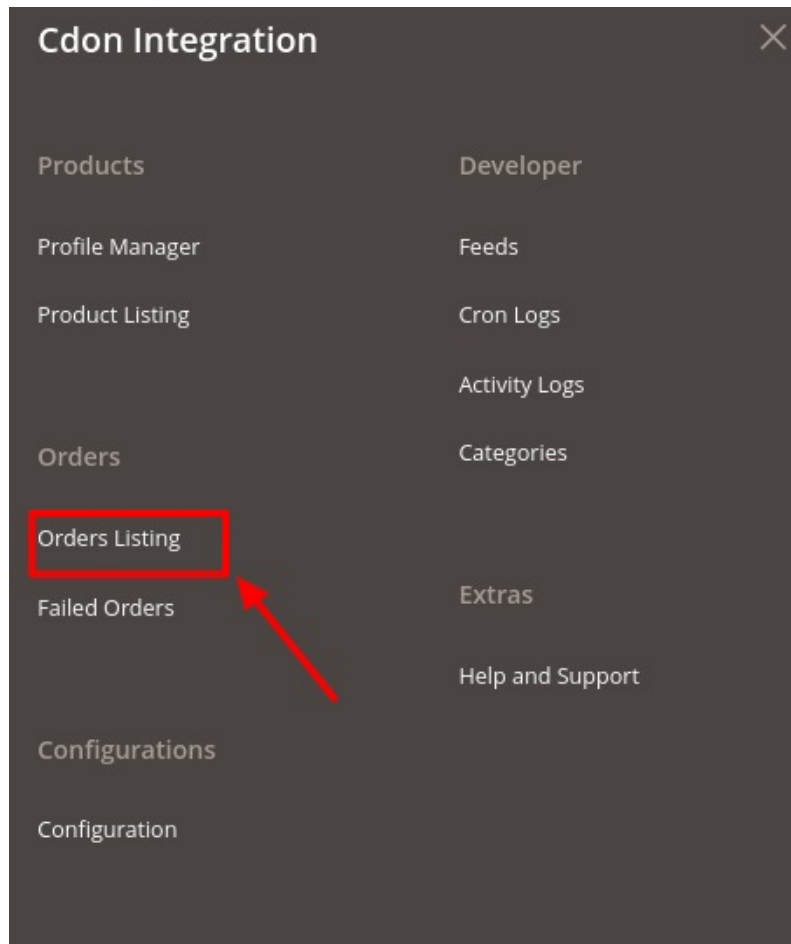

- Fetch, View, Ship, and delete the Cdon Orders
- View and delete the Failed Orders

7.1. Fetch, View, Ship, and Delete the Cdon Orders

The Magento 2 store owners can fetch the new orders and view all the order details fetched from Cdon. They can also ship the required orders and can delete the orders those are no more required.

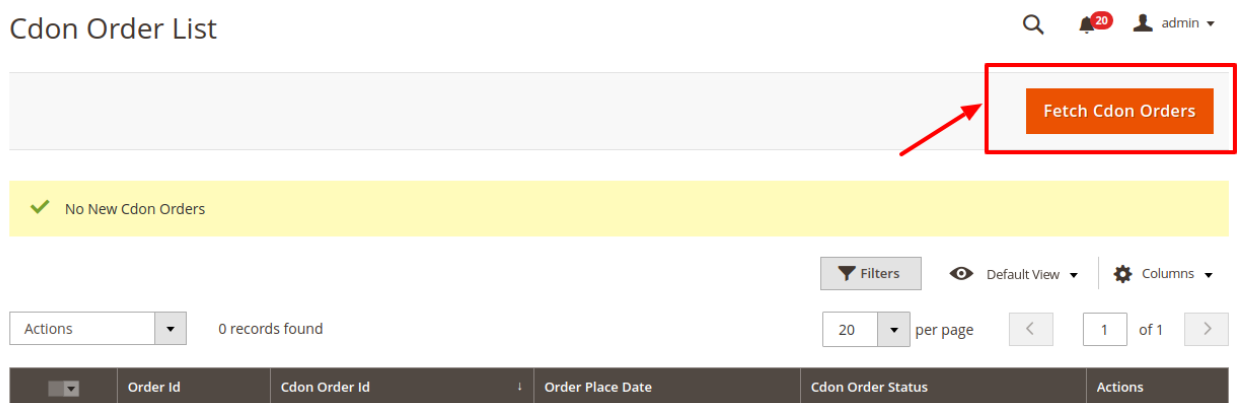

To fetch and view new orders

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CDON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Orders Listing**.

The **Cdon Order List** page appears as shown in the following figure:

4. Click the **Fetch Cdon Orders** button.

If the order is imported successfully then, a new record is found in the Orders Grid table as shown in the figure.

Notes:

- Orders are automatically imported through CRON in every 10 minutes.
- Whenever the latest orders are imported from Cdon, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are

imported into the Magento store admin panel.

- If no Order is imported, then check the Failed orders listed on the **Cdon Failed Order** page.
- Order are auto-rejected on Cdon in the following conditions:
 - When Cdon Product SKU does not exist in Magento store.
 - When Product is Out of Stock in Magento store.
 - When a product is disabled in Magento store.

To ship the order

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CDON INTEGRATION** menu.
A menu appears.
3. Click **Orders Listing**.
The **Cdon Order List** page appears as shown in the following figure: (!@#\$\$%^&*()) PICTure Cron Order List !@#\$\$%^&*()
4. Scroll down to the required row of the order to ship.
5. In the **Actions** column of the respective row, click the **Edit** link.
The Order view page appears
6. In the left navigation panel, click the **Cdon** menu.
The page appears in the right panel as shown in the following figure:

(!@#\$\$%^&*()) PICTure Cron Order !@#\$\$%^&*()

7. Under the **Cdon Order Information** section, do the following steps:
 - a. In the **Shipping Provider** list, select the required carrier.
 - b. In the **Tracking Number** box, enter the required value.
 - c. Scroll down to the **Shipment Order Items** section, and then do the following steps.
 - i. In the **Quantity to Ship** box, enter a value.
The number of a quantity that the user can ship. The value cannot be greater than the **Qty Available for Ship** value.
 - ii. In the **Quantity to Cancel** box, enter a value.
The number of a quantity that the user wants to reject. The value cannot be greater than the **Qty Available for Ship** value.
 - d. Click the **Submit Shipment** button.
The success message appears if the order is shipped successfully.

To delete the Cdon Orders

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CDON INTEGRATION** menu.
A menu appears.
3. Click **Orders Listing**.
The **Cdon Order List** page appears as shown in the following figure: (!@#\$\$%^&*()) PICTure Cron Order List !@#\$\$%^&*()
4. *To delete the single order*, do the following steps:
 - a. Scroll down to the order row no more required.
 - b. In the **Action** column of the respective row, click the **Delete** link.
A confirmation dialog box appears.
 - c. Click the **OK** button.
The order is deleted from the Cdon Marketplace.
5. *To delete the selected Cdon orders in bulk*, do the following steps:
 - a. Select the check boxes associated with the orders those are no more required.
 - b. Click the **Arrow** button in the **Actions** list.
A menu appears as shown in the following figure:

- c. Click **Delete Order(s)**.
A confirmation dialog box appears.
- d. Click the **OK** button.
The selected orders are deleted from the Cdon Marketplace.

7.2. View and Delete the Failed Orders

The users can view the list of failed Cdon orders on the **Cdon Failed Orders page**.

In the following conditions, Orders are not imported from Cdon:

- If any product in the **Cdon** Order is Out of Stock in the Magento 2 store.
- If any product in the **Cdon** Order is disabled in the Magento 2 store.
- If any Product does not exist in Magento 2 store or is deleted from the Magneto 2 store after uploading on **Cdon**.
- If the selected Payment Method in **Cdon** System Configuration Setting is not available in the Magento 2 store.

To view, Cdon failed orders

1. Go to **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CDON INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Failed Orders**.

The **Cdon Failed Order** page appears as shown in the following figure:

Cdon Failed Order

The page appears as shown in the following figure:

9. Cdon Crons Details

To view Cdon Cron Details

1. Go to the **Magento 2 Admin** panel.
2. On the left navigation bar, click the **CDON INTEGRATION** menu.
A menu appears as shown in the following figure:

3. Click **Cron Logs**.

The **Cdon Cron** page appears as shown in the following figure:
Cdon Crons

The screenshot shows the 'Cdon Crons' page. At the top right, there is a search icon, a notification bell with '20', and a user profile 'admin'. Below this is a 'Truncate' button. The main content area shows '5 records found' and a table of cron job details. The table has columns for Id, Job Code, Status, Messages, Created At, Scheduled At, Executed At, and Finished At. There are also 'Filters' and 'Columns' buttons above the table. At the bottom right of the table, there is a pagination control showing '20 per page' and '1 of 1'.

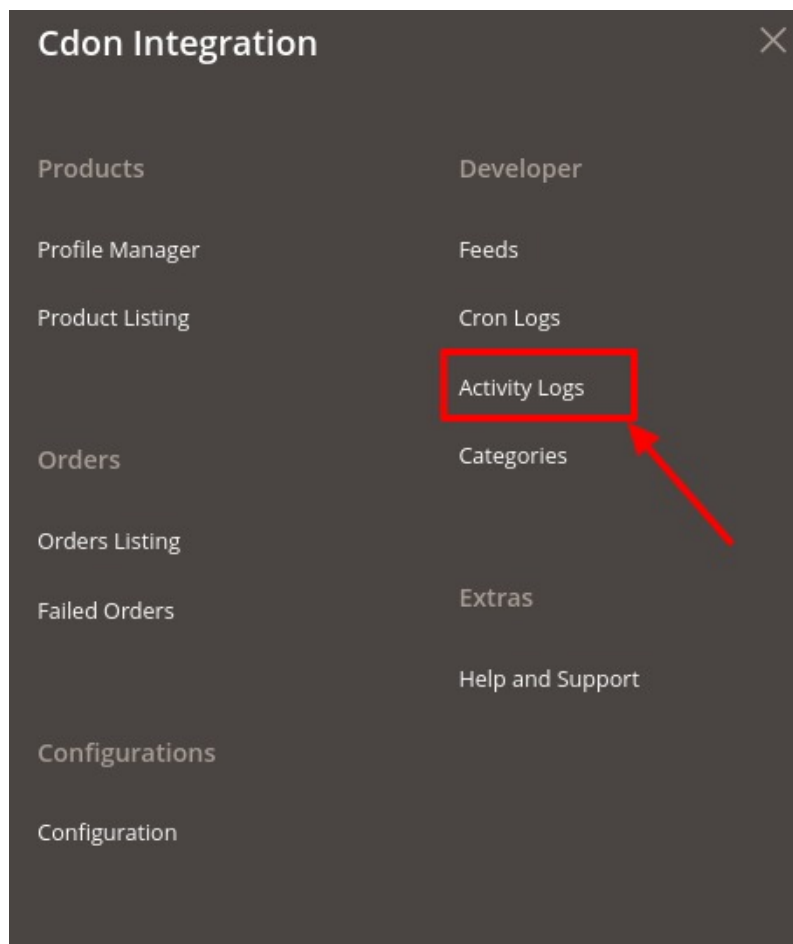

Id	Job Code	Status	Messages	Created At	Scheduled At	Executed At	Finished At
5512	ced_cdon_all_product_upload	pending		2018-11-29 08:38:34	2018-11-29 08:45:00		
5513	ced_cdon_all_product_upload	pending		2018-11-29 08:38:34	2018-11-29 08:50:00
