4. Dropshipping vidaXL Orders	8
5. vidaXL Logs	9

1. Overview

vidaXL marketplace is an international ecommerce retailer having its headquarters in The Netherlands. This marketplace offers a variety of categories to sell online like home & garden, furniture, sporting goods, etc. It sells in 27 European countries, United States, Australia to expand its reach to customers.

vidaXL Dropshipping Extension for Magento 2 is developed by CedCommerce for merchants to dropship on the vidaXL marketplace and earn a good commission amount. This extension is made keeping in mind to make the shipping process easier for the sellers. The various features of this extension have made the dropshipping process smoother.

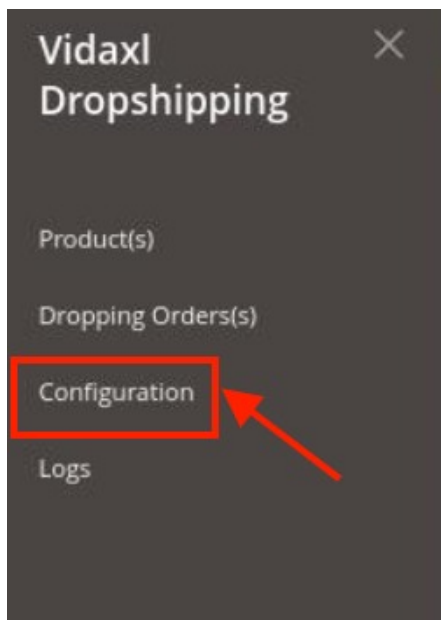

Key Features

- **Bulk Product Import-** The extension helps you to import products in bulk from the marketplace saving time.
- **Centralised Order Management-** It enables the sellers to manage vidaXL orders on their Magento stores through a single dashboard.
- **Price Markup-** The sellers can change the price of vidaXL products very conveniently by changing it by a fixed amount or by a fixed percentage.
- **Cron Scheduler-** With the cron feature in the extension sellers can automate and regulate the tasks.
- **Shipment Automation-** All the shipment information is updated in real time on the Magento 2 store.

2. Configuration Settings

To set up the configuration settings

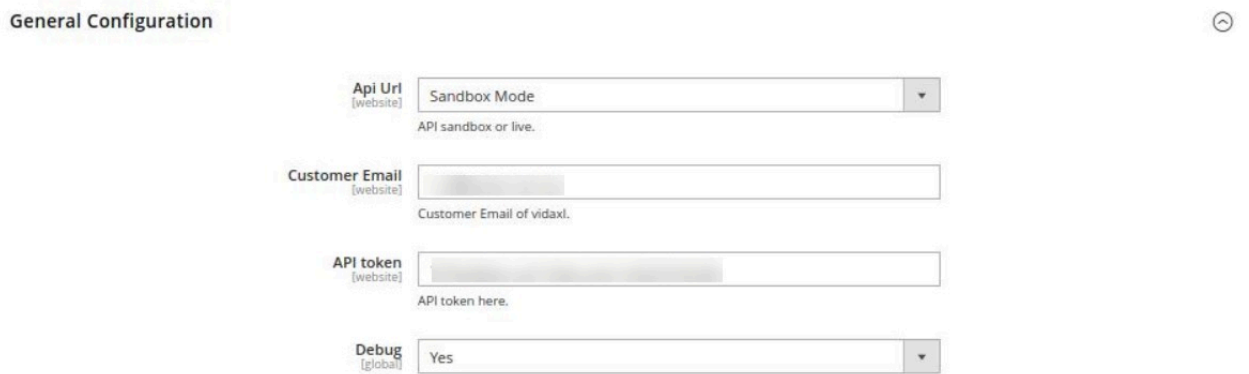

1. Go to the **Magento Admin Panel**.
2. On the left navigation panel, click on the **vidaXL Dropshipping** menu.

3. Click on **Configuration**.
The **Configuration** page appears as shown below:

4. In the right panel click on **General Configuration**, the section is expanded as shown below:

5. Under **General Information**, do the following steps:
- In **Api Url**, select the mode of the store, i.e., **Sandbox** or **Live**.
 - In **Customer Email**, enter the email id of the vidaXL customer.
 - In the **API token**, enter the token copied from your dropship panel of vidaXL.
