1. Overview

Walmart Magento store Integration is an extension, developed by CedCommerce(https://marketplace.walmart.com/k/articles/Article/Integration-Methods-Channel-Partner?c=&q=channel%20partner&l=en_US&kb=) helps to integrate the Magento store with Walmart by establishing the synchronization of products, orders, and refunds with the help of Walmart API.

The CRONs implemented in this extension help to automate the process thereby keeping it up to date.

This extension interacts with Walmart Marketplace to integrate the synchronized product listing between the Magento store and the Walmart retailers. After installing the extension, the merchant can map with multiple Walmart Categories and the dependent attributes on the Magento store.

The process enables the merchant to configure the desired product category into the Magento store for automatic submission of the selected product to the same Category on Walmart.

The features of the Walmart Integration with Magento store extension are as follows:

- Profile Based Product Upload
It allows you to Create a particular profile and Upload Products on the basis of the profile
- Easy Walmart Category and Attribute mapping
Choose among multiple categories and map attributes on the basis of categories Selected
- Manage Walmart Product and Upload Product (directly from the grid and bulk upload all products)
- Product Synchronization
 - An automatic process on each product edit
 - Manual synchronization process
- Review Product/Inventory/Price Feeds
Debug Mode Enables you to Check the feeds corresponding to every SKU Updated
- Automated Order Import & Acknowledgement
This works on the basis of Crons(Automated Programs)
- Shipment and Cancellation of Orders
Ship/Cancel Your orders In one Click
- Automated Shipment with Shipworks/Shipstation
Our Extension is completely compatible with Shipworks/Shipstation
- Multiple Shipment of an Order
Ship Multiple orders from Magento store itself
- Create Refund
Refunds Are also fetched and worked at Magento store level
- Upload Configurable Product(s)
You can upload configurable products along with proper attributes
- Bulk Product Upload/Publish
This feature allows you to upload products in a bulk
- Retire/Unpublish Selected Product(s)
With, this You can Select and Retire products as you need
- CRON Facility
Crons are working for Order, Inventory, Price Auto-sync
- Knowledge Base

- Third-party Product

Caution

: Extension is heavily dependent on Crons for running various automated processes. So, make sure that Cron Job is properly configured and working on the server.

2. Walmart Installation for Magento

To install the extension.

1. Log in the **SFTP**, and then go to Magento 2 root folder (generally present under the *public_html* folder).
2. Create a new folder named *code* (if not exists) under the *app* folder.

a. Extract the Ced.zip on your system and then Drag and Drop *app/code/Ced/Walmart* and *app/code/Ced/Integrator* directory inside *code*.

b. To install Walmart SDK

- i. You have to download the *SDK Zip file* from the Cedcommerce account.
- ii. Now upload the zip inside the *vendor* folder on Magento root and then unzip it by using the command:

```
unzip codewalmart-sdk.zip
```

- c. Update composer.json file by adding the code written below and as shown in the image:

“Walmart\”: “vendor/cedcross/walmart-sdk/src/Walmart”

```

2.2.8 composer.json
This configuration file contains list of Composer dependencies
16 "magento/magento2-functional-testing-framework": "2.3.13",
17 "phpunit/phpunit": "~6.2.0",

50             "Magento\\TestFramework\\Inspection\\": "dev/tests/static/framework/Magento/TestFramework/Inspection/"
51         }
52     }
53 },
54 "autoload-dev": {
55     "psr-0": {
56     }
57 }

```

- d. Now run the following upgrade command in *cmd*

- i. *composer dump*
- ii. *php bin/magento setup:upgrade*
- iii. *php bin/magento setup:di:compile*
- iv. *php bin/magento setup:static-content:deploy*

- e. After successfully uploading the directory, the extension will be installed/updated.

You may also refer to the video in the link(<https://docs.cedcommerce.com/magento-2/walmart-magento-2-integration-guide-0-0-1/?section=video-tutorial>) to install the extension.

3. Walmart Configuration Settings

Once the extension is successfully installed on the Merchant's store, the Walmart menu appears in the Magento store Admin Panel. The merchant has to fill in the API credentials in the **Walmart Configuration** page of the admin panel.

There are two techniques for the user to log in the Walmart Seller account to obtain the following API credentials:

Technique 1:(To be Deprecated)

- **Consumer Id**
- **Private Key**

After obtaining the Consumer Id and the Private Key by technique 1, the merchant has to copy all of them one by one from the Walmart Seller account and paste it one by one to the Configuration page of the admin panel of the merchant.

To follow the process of copying and pasting of the consumer ids and private keys, open the Walmart Seller account and the Magento store Admin Panel in two different tabs or windows of the browser. Thus, copy the keys from the Walmart Seller account and paste them one by one to the Magento store Admin Panel.

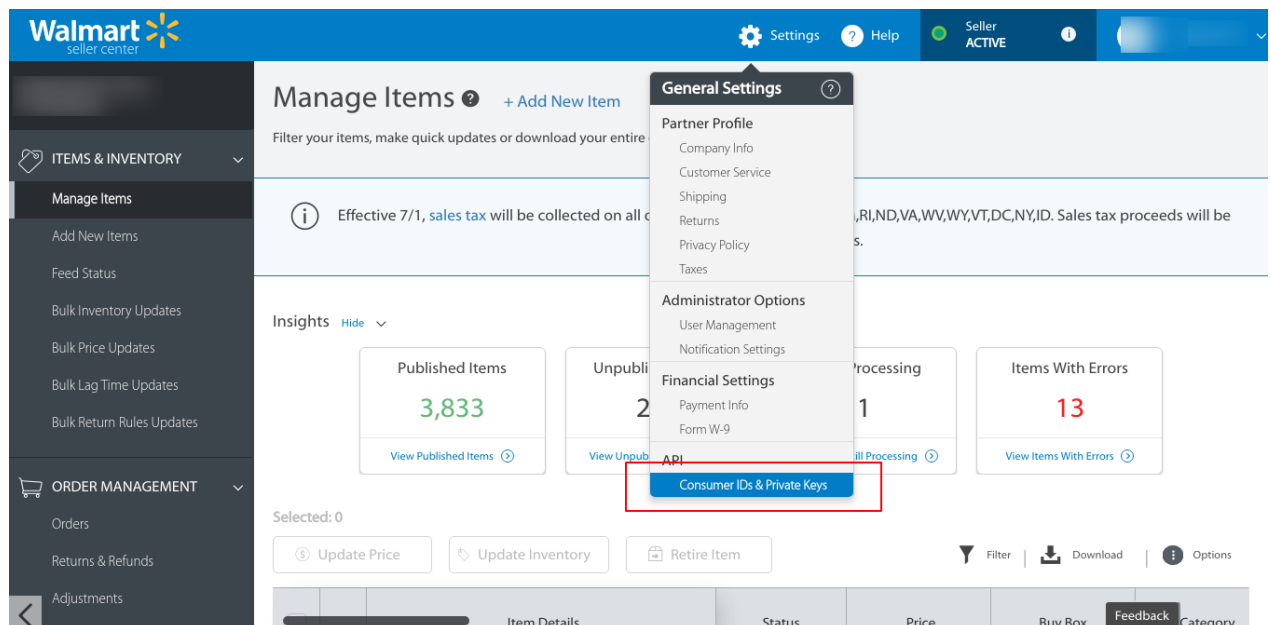

To copy the API Credentials from the Walmart Seller account by the first technique

1. Open the **Walmart Seller** account.
2. Click the **Settings**

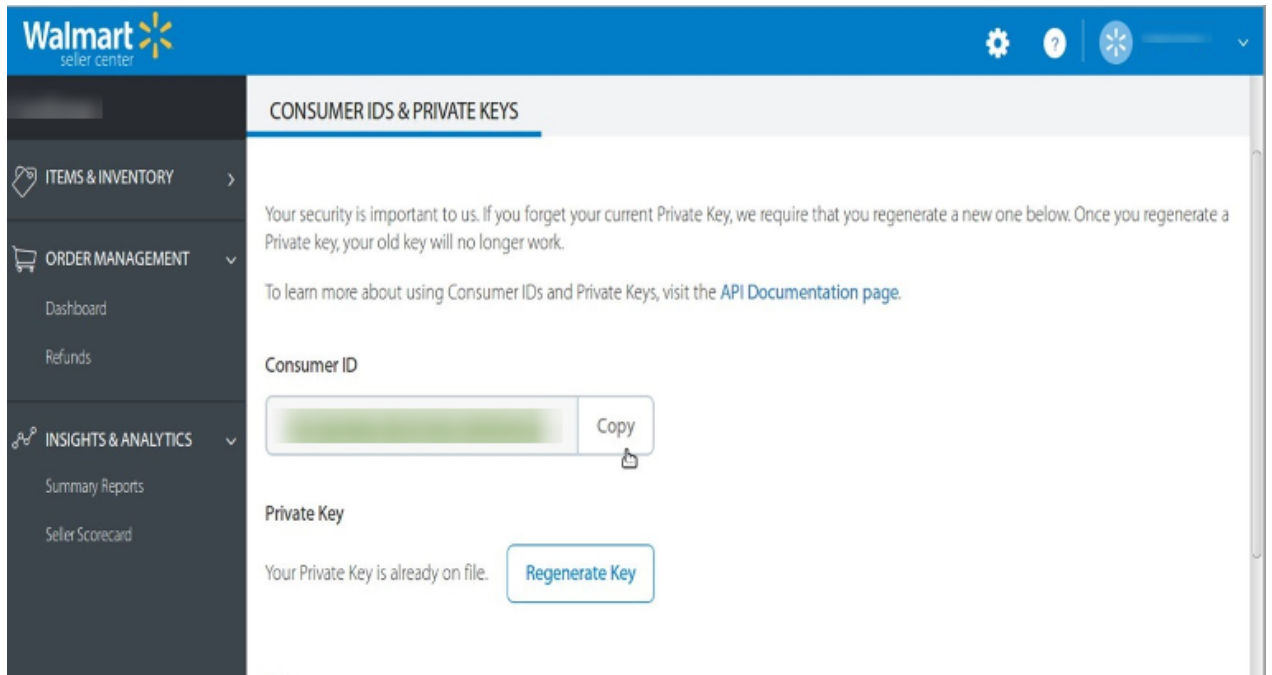

icon.

The **General Settings** menu appears as shown in the following figure:

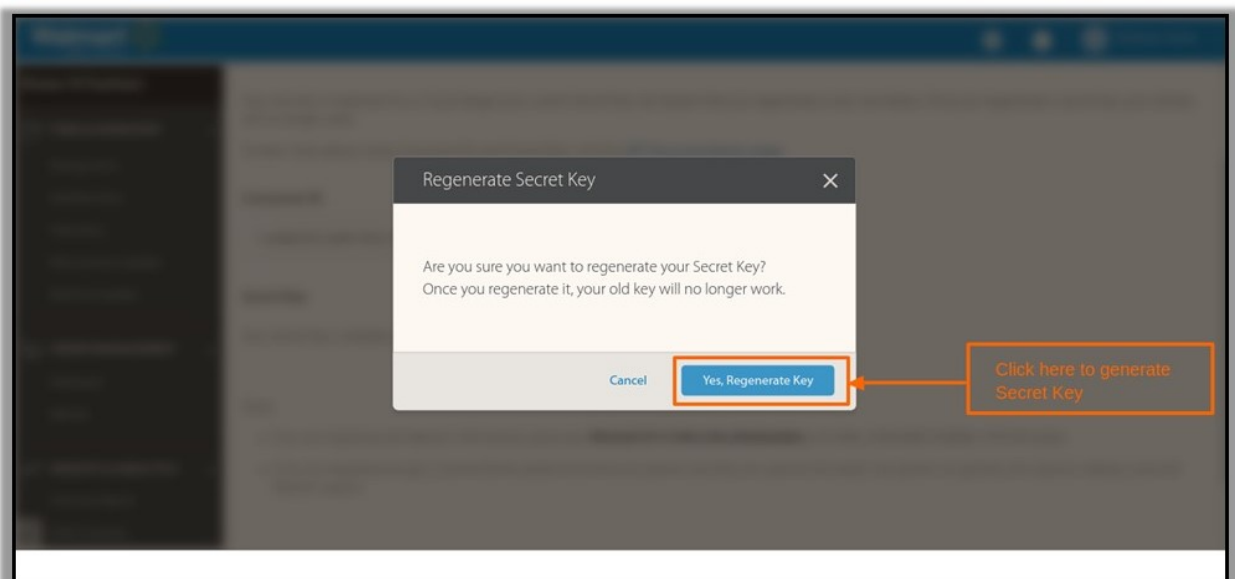

3. Under **API**, click **Consumer IDs & Private Keys**.
The page appears as shown in the following figure:

4. Under **Consumer ID**, click the **Copy** button.

5. Under **Private Key**, click the **Regenerate Key** button.

The **Regenerate Secret Key** dialog box appears as shown in the following figure:

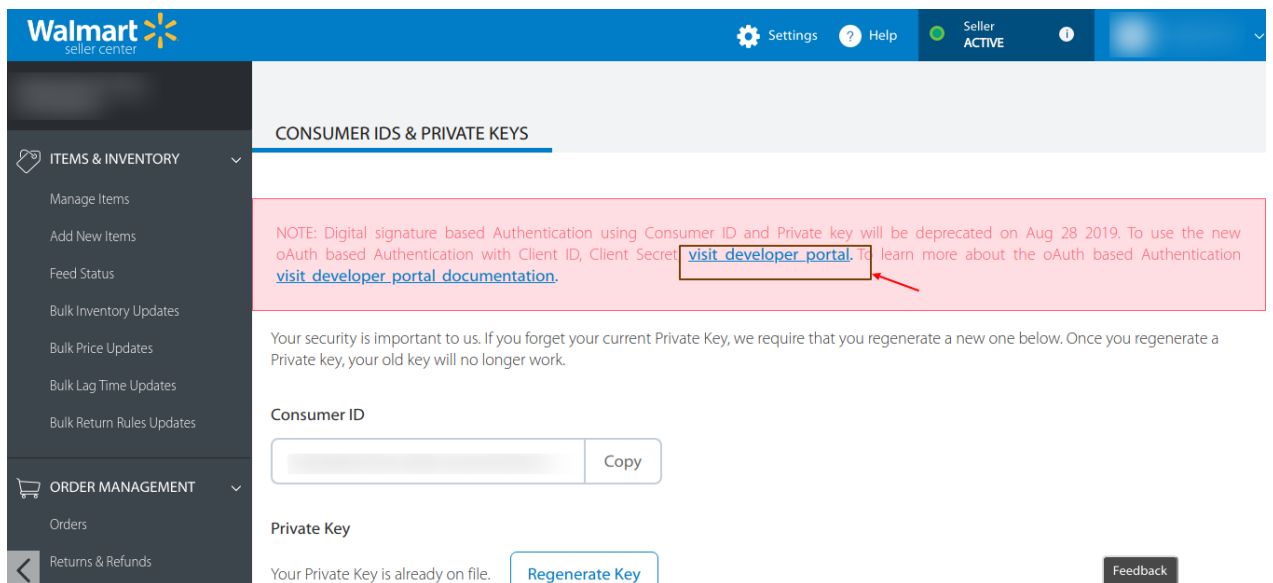

6. Click the **Yes, Regenerate Key** button.

The key is generated. Copy the generated key.

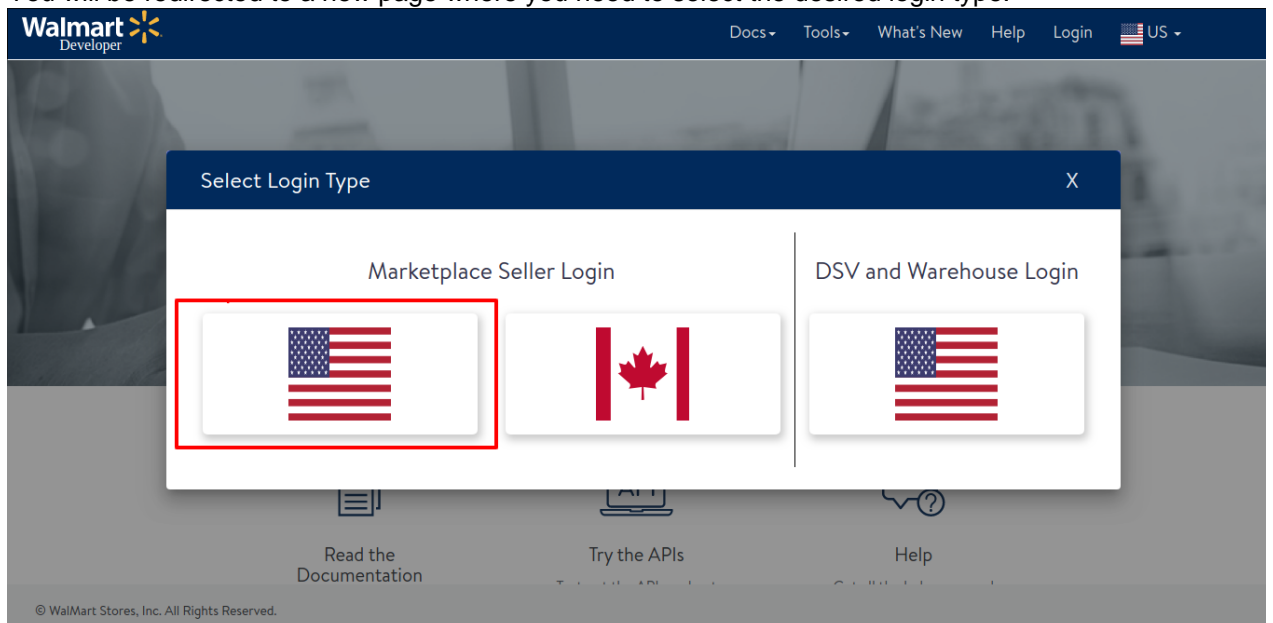

Technique 2:

To copy the API Credentials from the Walmart Seller account:

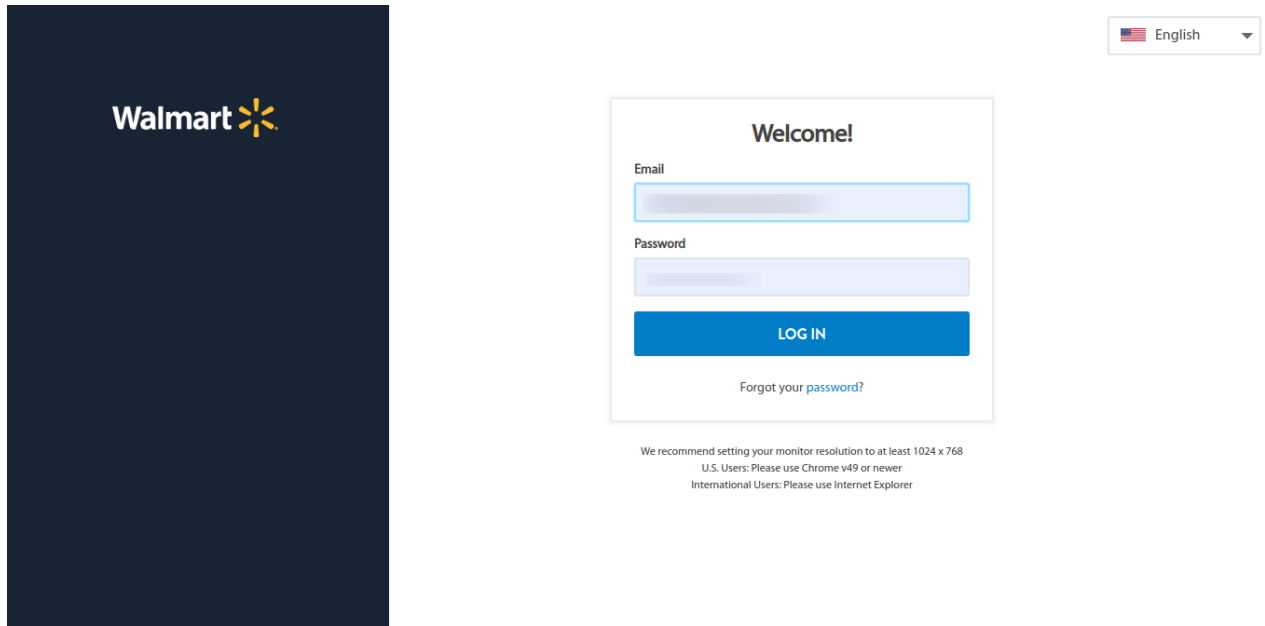

1. Click on **Consumer Id and Private Key** under Settings similarly (as explained in technique 1).

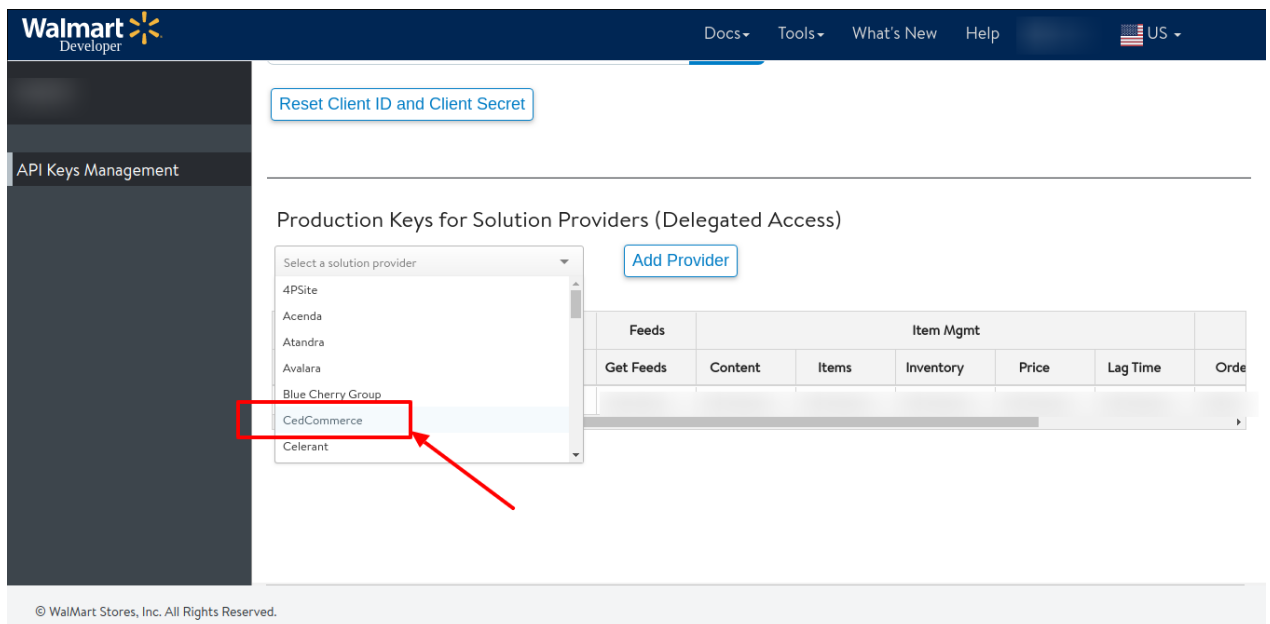

2. Under the heading Consumer IDs & Private Keys, click on the **visit developer portal**,
3. You will be redirected to a new page where you need to select the desired login type.

4. Click on the *'US option'* to proceed ahead.
5. Once you choose the US as the desired marketplace login, you'll be redirected to a new page where you need to enter your seller ID.

6. After logging in, the **Client ID and Client Secret Key** which are generated in the Oauth Access Tokens are for your use as a seller.
7. Now scroll down to the heading **Production Keys for Solution Provider** and select **CedCommerce** from the dropdown list and **add as the Provider**.

8. Now to retrieve the **API credentials** by assigning the **highest access** to all the options in the Cedcommerce then **Click on API Key**.

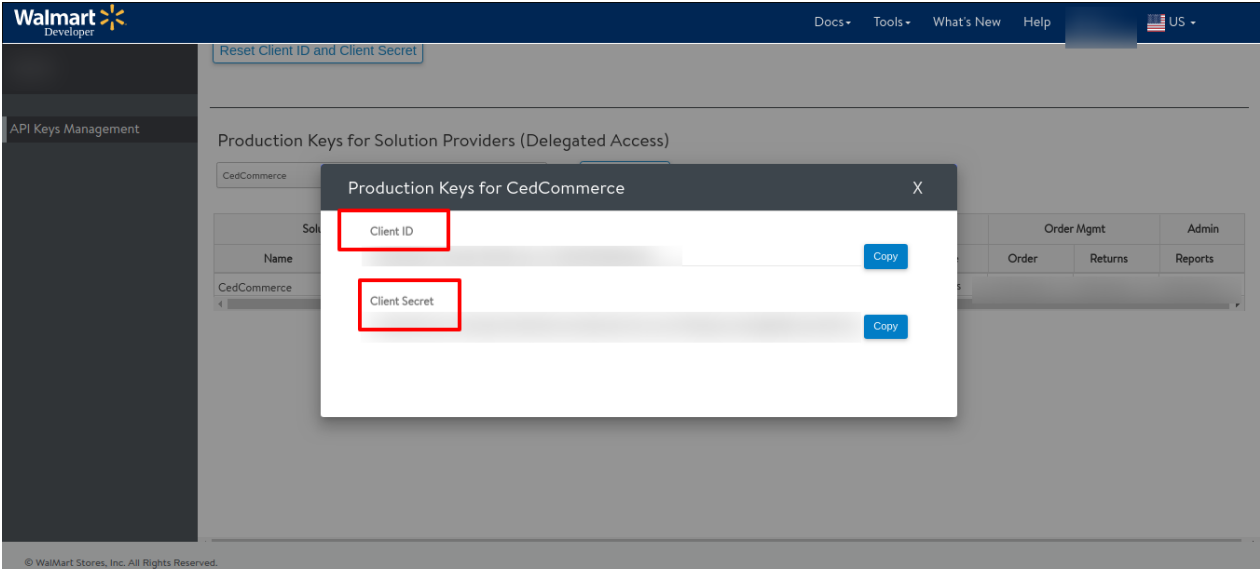

Production Keys for Solution Providers (Delegated Access)

CedCommerce ▼ Add Provider

Solution Provider		Feeds		
Name	Keys	Get Feeds	Content	Items
CedCommerce	API Key  	View Only ▼	Full Access ▼	Full Access

9. The **Production keys** will be generated that is required by the CedCommerce.

To Set up the Configuration settings in the Magento store Admin panel

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Configuration**.

The **Configuration** page appears as shown in the following figure;

Configuration

Store View: Default Config ? Save Config

CEDCOMMERCE ^	Walmart Api Settings ⌵
General Setting	Product Global Settings ⌵
Integrator	Order Settings ⌵
Walmart Configuration	Walmart Inventory Rules(Throttling) ⌵
Installed Extensions	Walmart Cron's ⌵
	Chunk Size Setting ⌵
	API Calling Switch ⌵
GENERAL ∨	

4. Click on **Walmart API Settings**, the section expands as shown below:

Walmart Api Settings ⌵

Enabled <small>[global]</small>	Yes ⌵
Token-based Authentication <small>[global]</small>	No ⌵
Consumer Id <small>[global]</small>	<input type="text"/>
Private Key <small>[global]</small>	<input type="text"/>
Orders Fetch Start Date <small>[global]</small>	<input type="text"/> Select Date
ImgBB API Key <small>[global]</small>	<input type="text"/>
Debug Log <small>[global]</small>	No ⌵
Select Store <small>[global]</small>	Default Store View ⌵

5. In the right panel, under **Walmart API Settings**, do the following steps:

a. In the **Enabled** list, select **Yes**.

Note: The **No** option hides all the relevant fields that appear under the **Walmart API Settings** section. The **WALMART INTEGRATION** menu does not appear on the left navigation bar.

b. If you are using **technique 1** then in Token-based Authentication you need to select the **'NO'** option.

And if you are using technique 2 then select **'YES'**.

c. In the case of **'NO'** In the **Consumer Id** box, paste the corresponding **Consumer ID** copied from the **Consumer IDs & Private Keys**.

In the case of **'YES'** paste the corresponding Consumer ID copied from the **Client ID and Client Secret keys** from the page of the **Walmart Seller Account**.

Token-based Authentication [global] Yes ▼

Client Id [global]

Client Secret [global]

- d. In the **Orders, Fetch Start Date** box, click the calendar icon, and enter the date.
The date from when the user starts to fetch the order.
 - e. In **ImgBB API Key**, enter the image bb key from the seller panel.
 - f. In the **Debug Log** list, select **Yes** to capture the log.
It captures the log for the debug process.
 - g. In **Select Store**, select your store.
6. Click the **Product Global Settings** tab.
The tab is expanded and the relevant fields appear as shown in the following figure:

Product Global Settings

Please set the global settings for Walmart.com

Walmart Product Price [global] Default Magento Price ▼
Select to send a different product price to **walmart.com**

Inventory Fulfillment Lag Time (Default) [global] 1
DEFAULT : 1 (Days to Ship the Order once it is **placed** Please Enter Default Value)

Inventory Fulfillment Lag Time (From Product Attribute) [global] activity ▼
Days to Ship the Order once it is **placed** Please Select Attribute. [High Priority over Default Value]

Product Tax Code [global]
Global Tax Code to be applied on each product for **walmart.com**

Select Taxcode

Shipping Override Rules [global]

Enabled	Region	Method	Attribute	Default	Action
Add Rule					

Walmart Product Id Override [global] Disable ▼
Enable to Override Walmart Product Identifier . Keep It disabled until it is specifically needed.

Walmart Product SKU Override [global] Disable ▼
Enable to override product SKU on Walmart

Enable Swatches for Configurable Product [global] Disable ▼

Enable Vacation Mode [global] Disable ▼
Enable Vacation Mode . If this setting is enable then zero (0) inventory will be sent to Walmart.com.

Use Secure Image Uri [global] Disable ▼
Enable to send https product images uri

Product Image Source [global] Default (Child) Image ▼
This setting is used to control which images are sent with product i.e. if you want to upload only Parent product images or both Parent and Child images (Option 1 -> Default : product image, 2-> Use Parent Image: Send only parent images, 3-> Child Image Does Not Exist Then Use Parent : Send Parent Image if child does not have images 4-> Use Child And Parent Images : Send both parent and child images.)

7. Under **Product Global Settings**, do the following steps:

- In the **Walmart Product Price** list, select the required option.
 - **Walmart Product Price:** This is to set a different price for all the products as shown in the following figure:
User can set the price on the following basis: –
 - **Increase by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.
 - **Increase by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.
Enter the numeric value to increase the price of the the Walmart product price by the entered value % of Magento price
For Example: Magento price + 5% of Magento price.
Magento Price = 100
Select **Increase By Fixed Percentage** option
Modify by Percentage Price = 5
 $100 + 5\% \text{ of } 100 = 100 + 5 = 105$
Thus, Walmart Product Price = 105
 - **Decrease by Fixed Price:** If selected, then the **Modify by Fix Price** field appears.
 - **Decrease by Fixed Percentage:** If selected, then the **Modify by Percentage Price** field appears.
Enter the numeric value to decrease the price of the Walmart product price by the entered value % of Magento price
For Example: Magento price – 5% of Magento price.
Magento Price = 100
Select **Decrease By Fixed Percentage** option
Modify by Percentage Price = 5
 $100 - 5\% \text{ of } 100 = 100 - 5 = 95$
Thus, Walmart Product Price = 95
- In the **Inventory Fulfillment Lag Time (Default)** box, enter the number of days to fulfill the inventory when the product is out of stock.
- In the **Inventory Fulfillment Lag Time(From Product attribute)** box, select the attribute for the number of days to fulfill the inventory when the product is out of stock.
- In Product Tax Code, enter the tax to be applied for the product.
- In the **Shipping Override Rules** field, click the **Add** button.

Shipping Override Rules [global]

Enabled	Region	Method	Attribute	Default	Action
Yes ▾	▾	▾	--pl ▾	▾	🗑️
Add Rule					

- a. In **Enabled**, select **Yes**.
 - b. Select the shipping region in the **Region** field.
 - c. Select the **shipping method** in the next field.
 - d. Select the **Attribute Code** in the next field.
 - e. In **Default**, enter the default method.
 - f. In **Action**, select Delete if you want to delete it.
- In the **Walmart Product Id Override** list, select the required option.
Note: Enable to Override Walmart Product Identifier. Disable it until it is specifically needed.

- In the **Walmart Product SKU Override** list, select the required option.
- **Note:** **Enable** to Override Product SKU on Walmart.
- In the **Enable Swatches for Configurable Product** list, select the required option.
- a. On selecting **Enable**, a field appears as:

Enable Swatches for Configurable Product [global]

Enable

Swatches Attributes [global]

- color
- size
- assembledProductWidth
- material
- shoeSize
- clothingSize
- sportsTeam
- sportsLeague
- capacity
- shape

- b. Select the swatch attributes from the list given.
- c. Then is the **Enable Vacation Mode** which is for the purpose if you are going on a vacation then the inventory won't be uploaded.
- d. **Use Secure Image URL** to secure the images which can be **Enabled** or **Disabled**.
- e. The **Product Image Source** in this section allows you to set the source of images that will be sent with product.

8. Click the **Order Settings** tab and the section will expand as:

Order Settings

Walmart Order Id Prefix [global]

Prefix for Walmart Increment ID . Enter "PO" to have Walmart Purchase Order ID as your Magento Order ID .

Customer Email [global]

Enter the Email for which new customer would be created for Walmart Orders.

Shipping [global] -- Please Select --

Payment [global] -- Please Select --

- a. In the **Walmart Order Id Prefix** box, enter a text as a prefix for Walmart Increment ID.
- b. In the **Customer Email** field, enter the email for which customer will be created for Walmart Orders.
- c. In the **Shipping** field, select the shipping method from the options.
- d. In the **Payment** field, select the payment method from the options.

9. Click the **Walmart Inventory Rules** tab and the tab expands as:

Walmart Inventory Rules(Throttling)

Send Inventory on the Basis of Threshold [global]
Choose yes to send inventory on walmart by condition .

- a. In the **Send Inventory on Basis of Threshold** list, select **Enable** to send the inventory based on the threshold.
- b. **Note:** Only when the admin selects **Enable**, the other fields appear.
- c. The section appears as shown in the following figure:

Walmart Inventory Rules(Throttling)

Send Inventory on the Basis of Threshold [global]
Choose yes to send inventory on walmart by condition .

Inventory Threshold Value [global]
Threshold of comparison with base inventory

Send Inventory for Lesser Than Threshold Case [global]
Send this Quantity to Walmart for those products, whose inventory is LESSER than the inventory threshold.

Send Inventory for Greater Than Threshold Case [global]
Send Quantity to Walmart for those products, whose inventory is GREATER than the inventory threshold.

- d. In the **Inventory Threshold Value** box, enter the required threshold value of the products you wish to choose.
 Note: The threshold value decides what number of products are sent on the Walmart website based on the number of products you currently have.
- e. In the **Send Inventory for Lesser Than Threshold Case** box, enter the value you wish to send when the total number of products is less than the threshold value entered by you earlier.
- f. In the **Send Inventory for Greater Than Threshold Case** box, enter the value you wish to send when the total number of products is greater or becomes equal to the threshold value entered by you earlier. Let's take an example to make things clear:
 Suppose, you have entered the threshold value for your inventory to be 50.
 The Greater value set is 100 and the lesser value is set as 25.
 If you have a product whose quantity is 63, then the number of products available on the Walmart website will be shown as 100.
 In case another product whose count is 47, then the number of the product available will be shown as 25.

10. Click on the **Walmart Crons** tab and the tab will expand as:

Walmart Cron's

Order Cron [global]
Order Fetch Cron

Price Cron [global]
Price Sync Cron

Inventory Cron [global]
Inventory Sync Cron

Shipment Cron [global]
Shipment Sync Cron

Feed Sync Cron [global]
Feed Sync Cron

- i. In the **Order Cron** list, select **Enable** to enable the order fetch cron.
- ii. In the **Price Cron** list, select **Enable** to enable the price sync cron.
- iii. In the **Inventory Cron** list, select **Enable** to enable the inventory sync cron.
- iv. In the **Shipment Cron** list, select **Enable** to automatically generate the shipment cron.
- v. In the **Feed Sync Cron** list, select **Enable** to automatically sync feeds.

11. Click the **Chunk Size Setting** tab and it will expand as:

Chunk Size Setting

Validation Size <small>[global]</small>	<input type="text" value="10"/>
	<small>Chunk size for validate Product .</small>
Upload <small>[global]</small>	<input type="text" value="10"/>
	<small>Chunk size for Upload Product .</small>
Inventory Update <small>[global]</small>	<input type="text" value="1"/>
	<small>Chunk size for Inventory Update .</small>
Price Update <small>[global]</small>	<input type="text" value="10"/>
	<small>Chunk size for Price Update .</small>
Retire Product <small>[global]</small>	<input type="text" value="10"/>
	<small>Chunk size for Retire product execution.</small>
Sync Status <small>[global]</small>	<input type="text" value="10"/>
	<small>Chunk size for Product Status Sync.</small>

- a. In the **Validation Size** field, enter the chunk size for the products. The products that will get validated before being uploaded on Walmart would be the same as the number you enter in this field.
- b. In the **Upload** field, enter the number of products that you want to upload in one go from Magento to Walmart.
- c. In the **Inventory Update** field, enter the chunk size of the products. The inventory will be updated in one batch for the number of products that you enter in this field.
- d. In the **Price Update** field, enter the chunk size for the number of products. The price will be updated in one batch for the number of products that you enter in this field.
- e. In the **Retire Update** field, enter the chunk size of the products. The number of products that you will be able to retire on Walmart would be the same as the number that you enter in this field.
- f. In the **Sync Status** field, enter the chunk size of the products. The number of products that you will be able to sync the status for would be the same as the number that you enter in this field.

12. Click the **API Calling Switch** tab and it will expand as:

API Calling Switch

Price and Inventory By Post <small>[global]</small>	<input type="text" value="Yes"/>
	<small>Update Price and Inventory By Post Request</small>

- a. In the **Price and Inventory By Post** field, select **Yes** if you want the price and inventory to be updated by a post request.

13. Once you have taken all the steps mentioned above, click on the **Save Config** button on the top right side

of the page. The configuration will be saved.

4. Manage Products

On this page, admin can view, edit, and upload the individual product. Also, the admin can view the error message if any error exist in any product details. The admin can also submit certain actions on the selected products available on the **Manage Products** page.

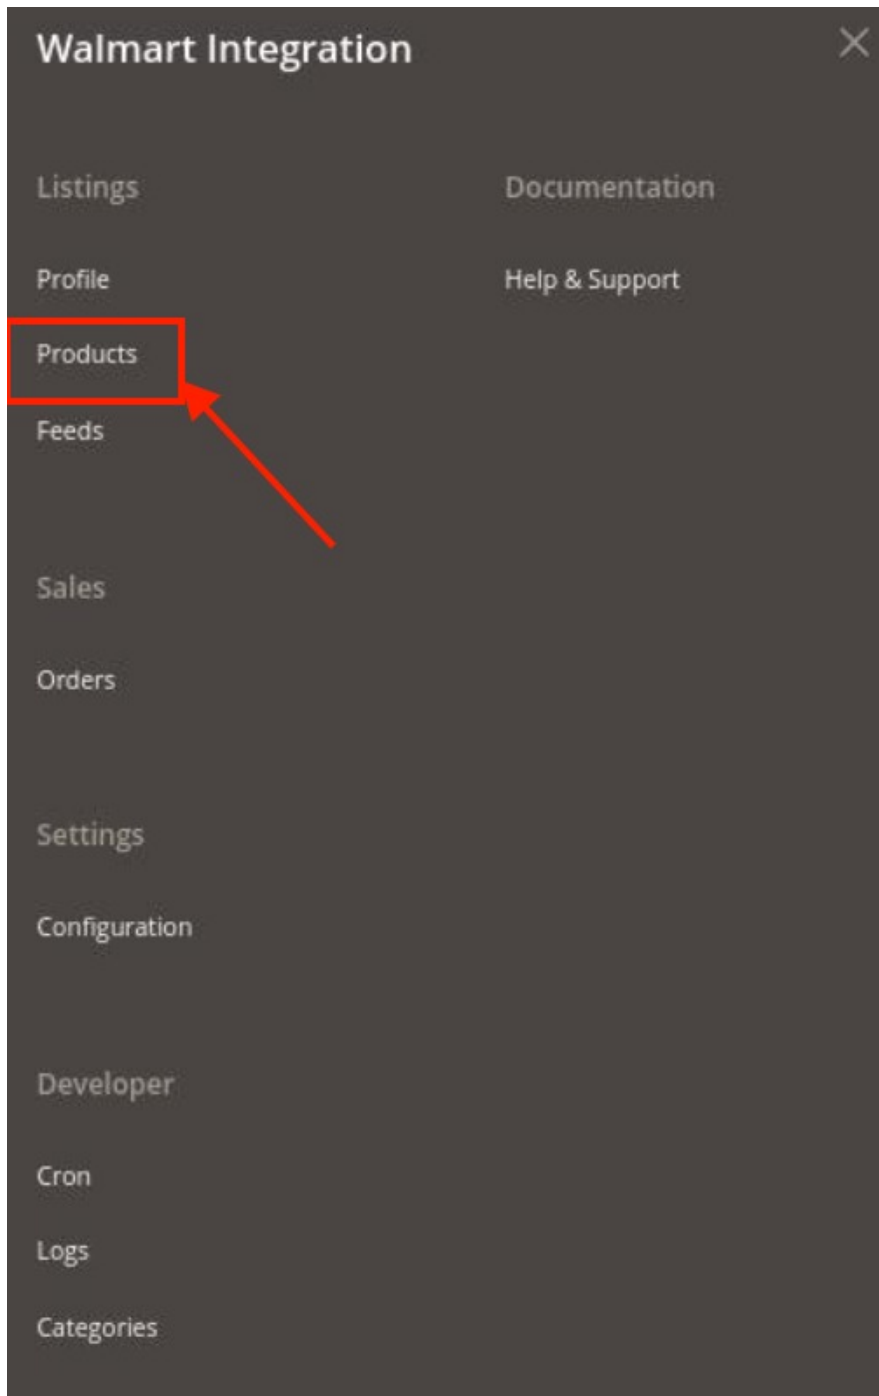

This section covers the following topics:

- View and Edit Single Product(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=view-and-edit-single-product>)
- Upload Single Product(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=upload-single-product>)
- View Error Log(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=view-error-log>)
- Submit Actions on the Manage Products Page(<http://docs.cedcommerce.com/magento-2/walmart-magento-2-integration/walmart-magento-2-integration-guide-0-0-1?section=submit-actions-on-the-manage-products-page>)

4.1. View and Edit Single Product

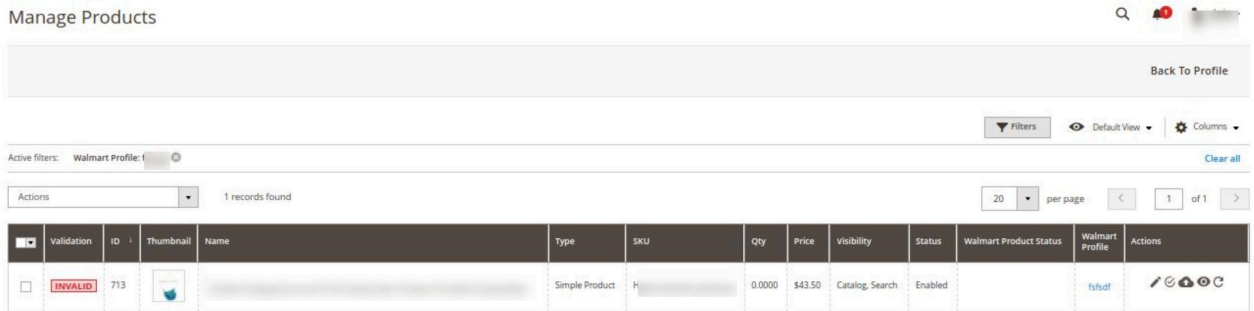

To view the product information,

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART INTEGRATION** menu.
The menu appears as shown in the following figure:

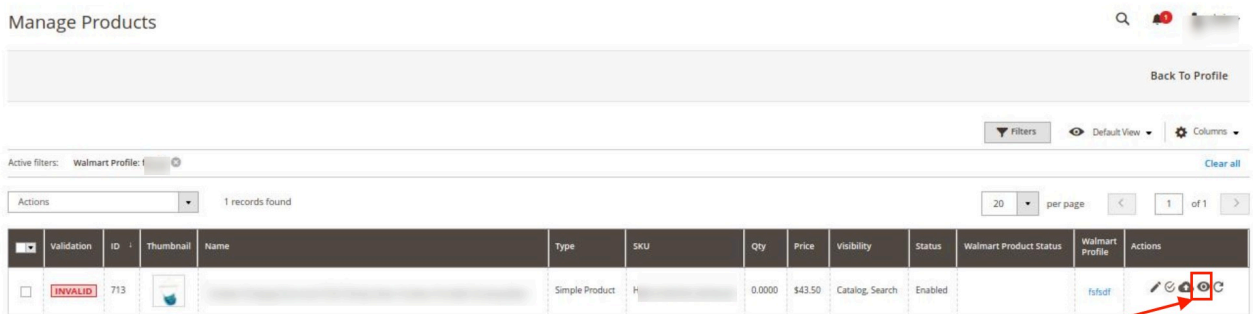

3. Click **Products**.

The **Manage Products** page appears as shown in the following figure:

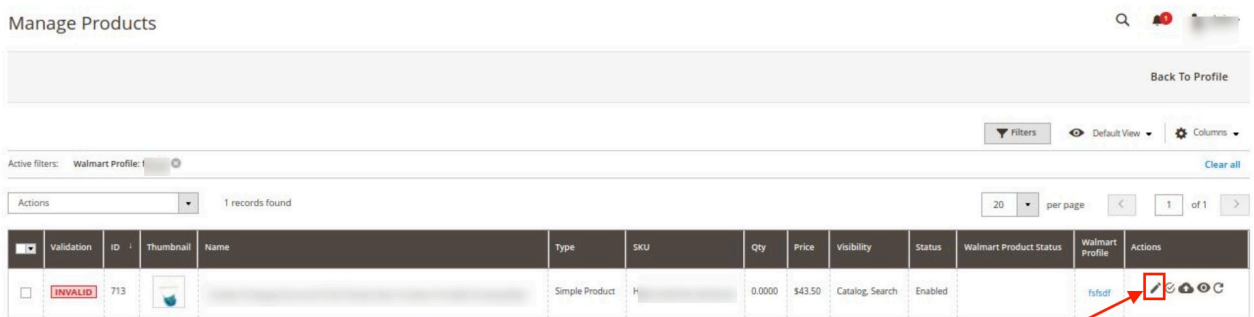

- All the available products are listed on this page.
- 4. Scroll down to the required product.
- 5. In the **Action** column, click the **View** button.

- 6. The product information will appear.

To edit the product,

- 1. Click the **Edit** button adjacent to the product under the **Actions** column.

The required product page appears as shown in the following figure:

2. Scroll down to the **Walmart** tab, and then click the tab.
The tab is expanded and the relevant fields appear:

Walmart ⊙

Walmart Product Id Type Type of unique identifier used in the "Product ID" field. Example: UPC; GTIN; ISBN; ISSN; EAN

Walmart Profile Id walmart profile id

Walmart Product Id 1 to 14 characters, Alphanumeric ID that uniquely identifies the product.

Walmart Brand 1 to 4000 characters

Walmart Product Tax Code 1 - 10 characters, Code used to identify tax properties of the product

Walmart Product Status Walmart Product Status

Walmart Product Validation Walmart Product Validation

Walmart Product Validation Error Walmart Product Validation Error

Walmart Product Uri Walmart Product Uri

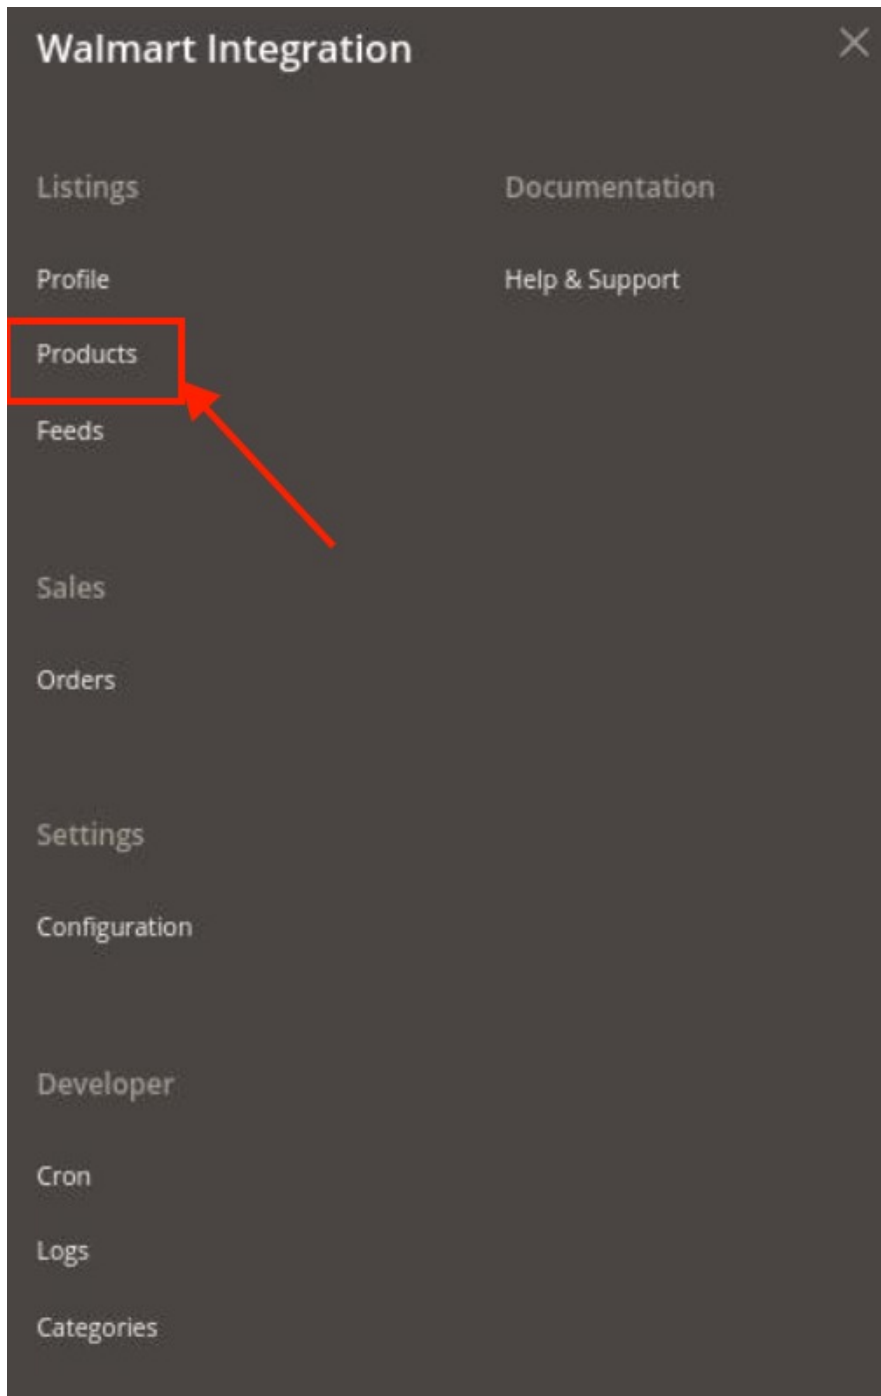

Walmart Lag Time Walmart Lag Time

3. Enter the required information, and then click the **Save** button.
4. To sync the Magento store Product with Walmart, click the **Arrow** button next to the **Walmart Sync button**, and then click **Sync With Walmart**.
5. To validate the product for Walmart, click the **Arrow** button next to the **Walmart Sync button**, and then click **Walmart Product Validate**.

4.2. Validate a single product

To validate a single product.

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Products**.

The **Manage Products** page appears as shown in the following figure:

6. The product validation message will appear.

4.3. Upload Single Product

To upload a single product.

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART INTEGRATION** menu.
The menu appears as shown in the following figure:

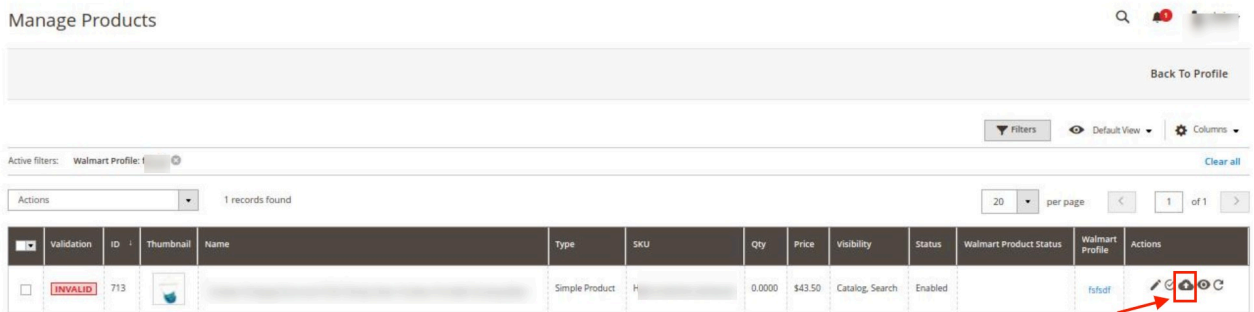

3. Click **Products**.

The **Manage Products** page appears as shown in the following figure:

4. All the available products are listed on this page.
5. Scroll down to the required product.
6. In the **Action** column, click the upload button.

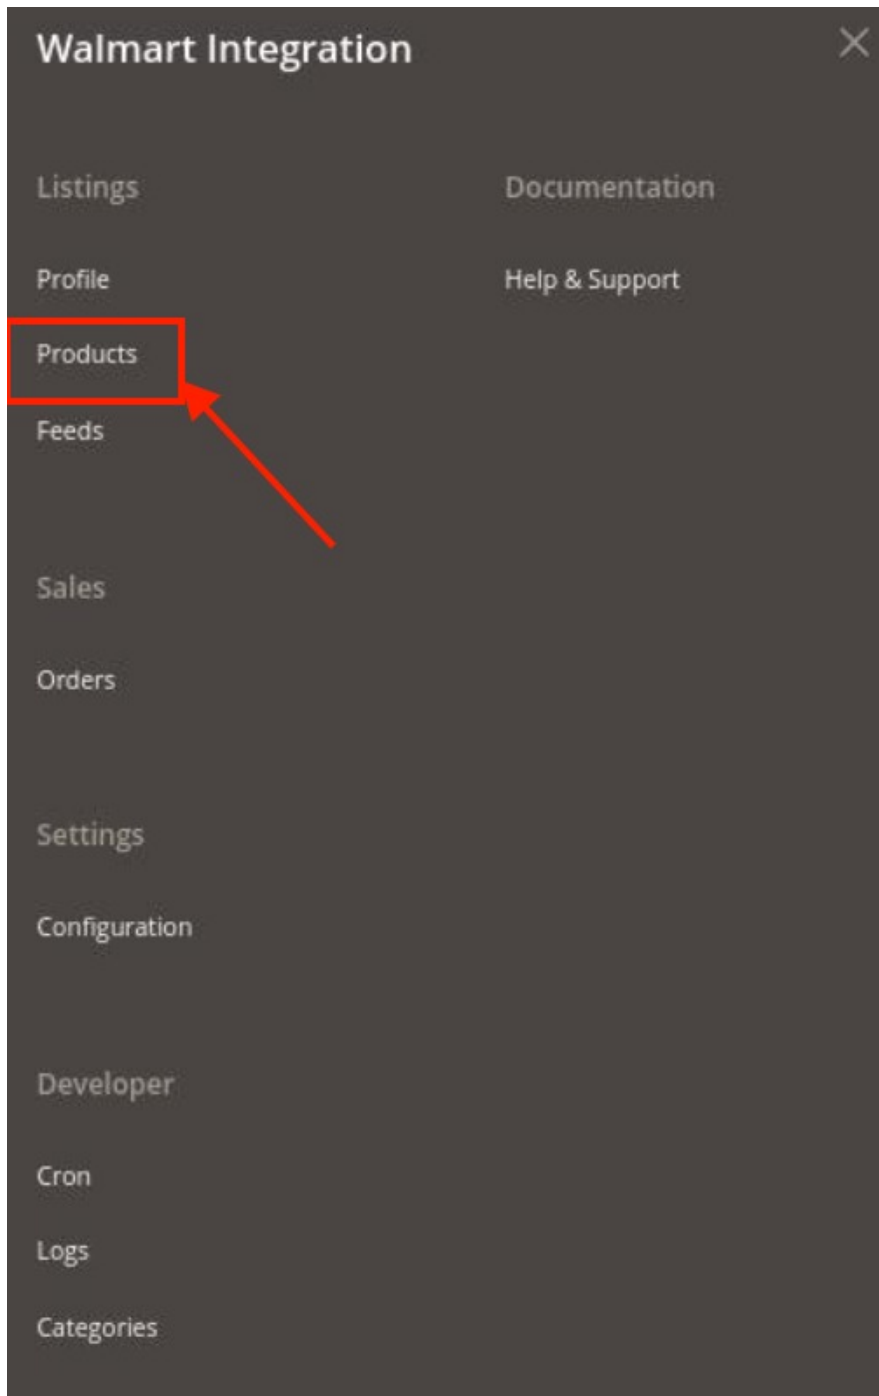

7. If the product is uploaded successfully, then the success message appears on the top of the page.
If there is an error, then the error message appears on the top of the page.

4.4. To sync a single product

To sync a single product between Magento and Walmart,

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar, click the **WALMART INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Products**.
The **Manage Products** page appears.
4. Scroll down to the required product.
5. In the **Action** column, click the **sync** button.

8. Walmart Orders

Admin can do the following tasks while managing the Walmart orders:

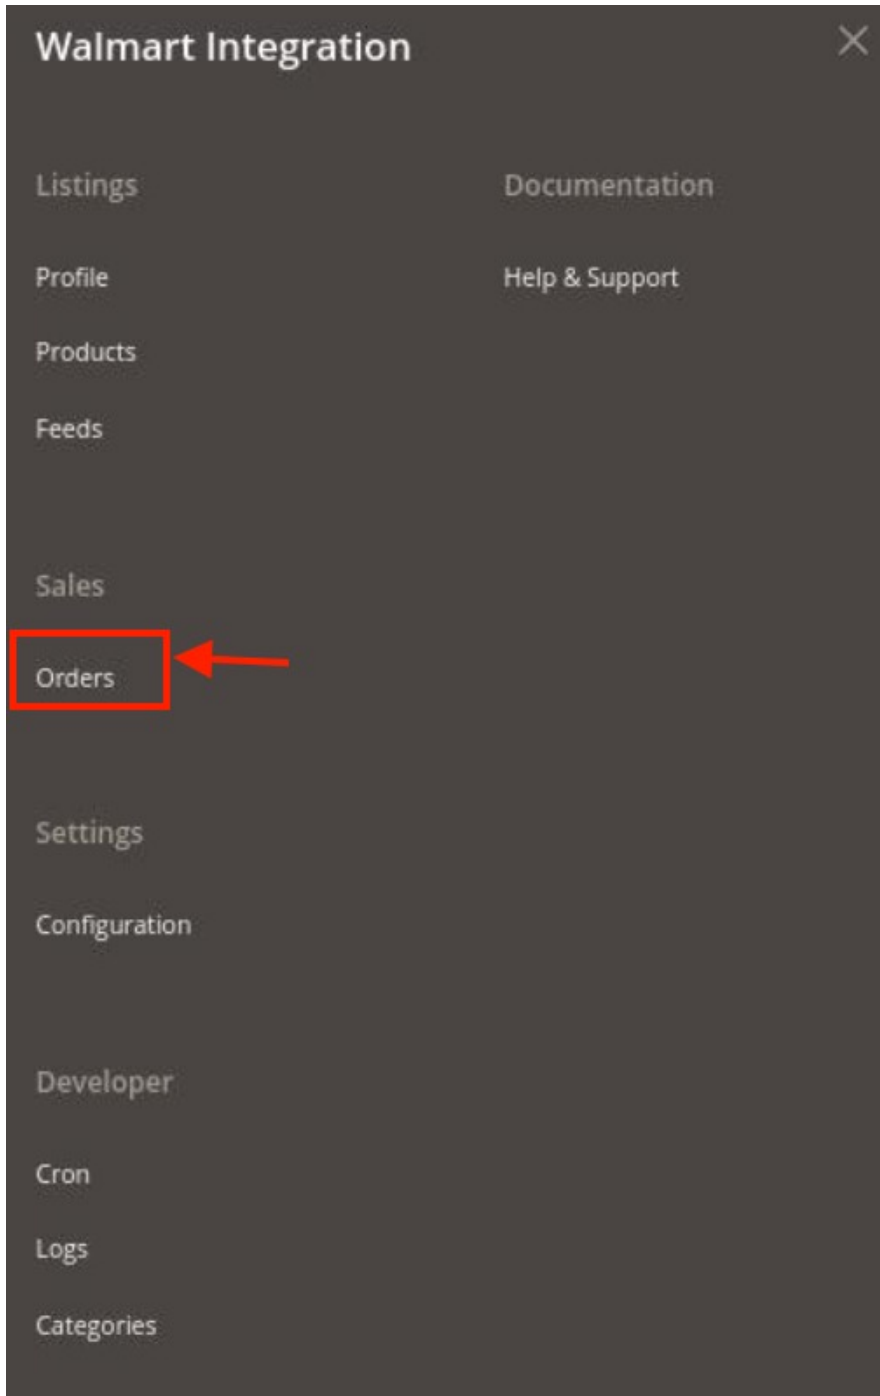

- View Walmart Orders
- View Failed Imported Orders

8.1. View Walmart Orders

The user can fetch and view all the order details fetched from Walmart.

To view Walmart Orders.

1. Go to **Magento Store Admin Panel**.
2. On the left navigation bar, click the **WALMART INTEGRATION** menu, and then click **Orders**.

The **Orders Grid** page appears as shown in the following figure:

Magento Order id	Merchant Order Id	Purchase Order Id	Order Place Date	Magento Order Status	Status	Bill-to Name	Ship-to Name	Grand Total (Base)	Deliver By	Entity Id	Reason	Actions
We couldn't find any records.												

3. Click the **Fetch New Orders** button.

If the order is imported successfully then, a new record is found in the **Orders Grid** table.

Notes:

- Orders are automatically imported through CRON every 10 minutes.
- Whenever the latest orders are imported from Walmart, a Notification appears in the notification area of the Admin panel for those orders and they are Auto-Acknowledged as soon as they are imported in the Magento Store admin panel.
- As per Walmart's Policy, orders should be acknowledged within 60 minutes.
- If no Order is imported, then check the Failed order log on the **Failed Walmart Orders Import Log** page.
- Order are auto rejected on Walmart in the following conditions:
 - When Walmart Product SKU does not exist in Magento Store.
 - When Product is Out of Stock in Magento Store.
 - When the product is disabled in Magento Store.

4. In the **Magento Order id** column, click the link associated with the required order.

Geanette Gomez 8267 Tibbets Way	Geanette Gomez 8267 Tibbets Way

Notes:

- a. Order **Shipment** is sent to Walmart.
- b. Order **Invoice** and **Shipment** are created automatically in the Magento Store.
- c. Order **Status** changes to **Complete** on Walmart.
- d. The **status** of order changes to **Completed** on the Magento store.

8.2. View Failed Imported Orders

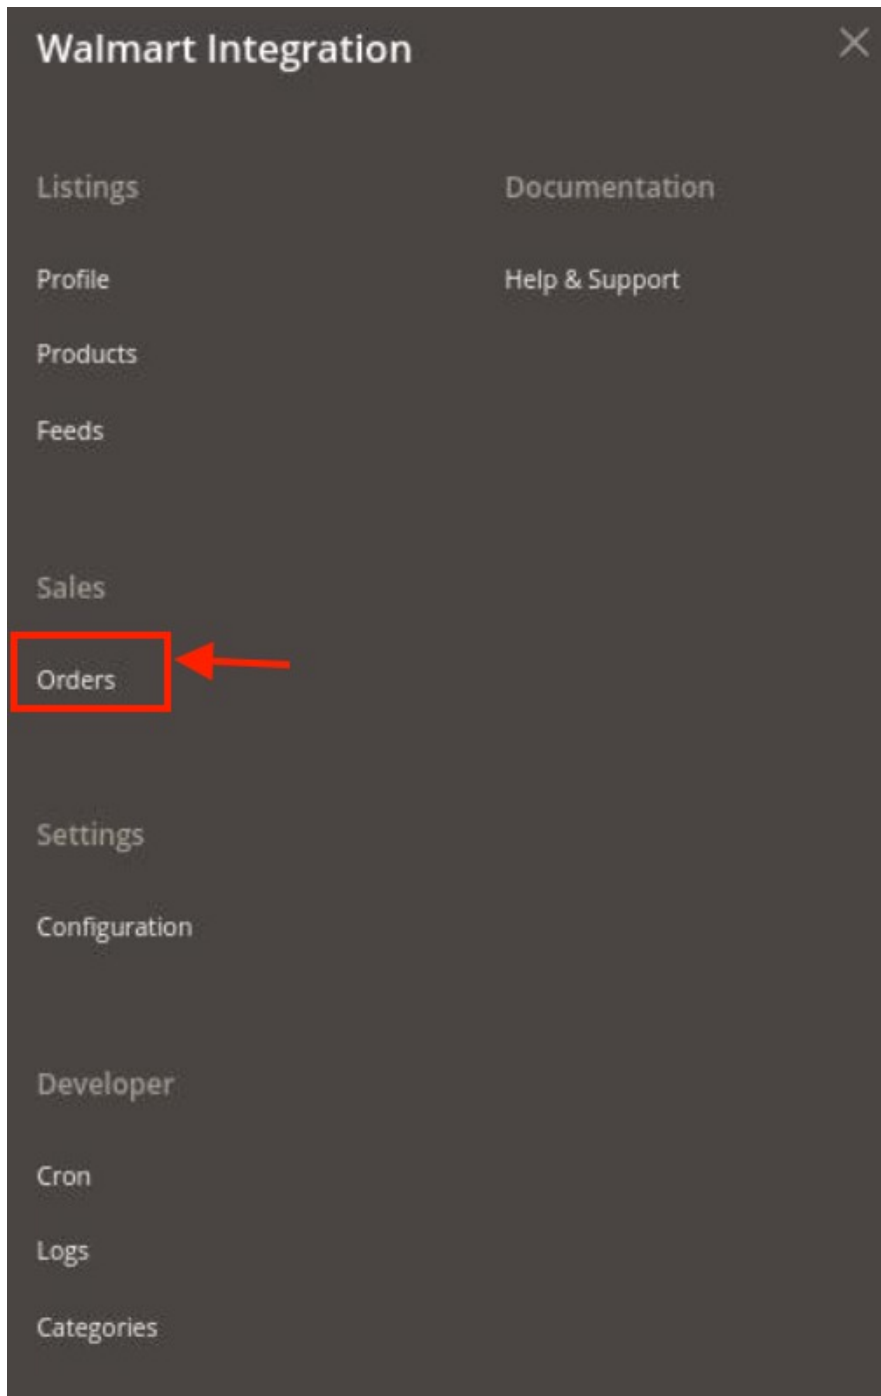

The users can view the list of failed Walmart orders on the **Failed Orders Grid** page.

In the following conditions, Orders are not imported from Walmart:

- If any product in the Walmart Order is Out of Stock in the Magento store.
- If any product in the Walmart Order is disabled in the Magento store.
- If any Product does not exist in Magento or is deleted from the Magneto 2 store after uploading on Walmart.
- If the selected Payment Method in Walmart System Configuration Setting is not available in the Magento store.

To view, Walmart failed orders

1. Go to the **Magento Store Admin** panel.
2. On the left navigation bar click the **WALMART INTEGRATION** menu.
The menu appears as shown in the following figure:

3. Click **Orders**.

The **Failed Orders Grid** page appears as shown in the following figure:

The screenshot shows the 'Orders Grid' interface. At the top, there is a search bar and a 'Fetch New Orders' button. Below the search bar, there are filters and a 'Clear all' button. The main content is a table with 14 columns: Actions, Merchant Order Id, Purchase Order Id, Order Place Date, Magento Order Status, Status, Bill-to Name, Ship-to Name, Order Import Status, Source, Deliver By, Grand Total (Base), Entity Id, Magento Order Id, and Actions. The table displays 5 rows of failed orders, each with a red 'ERROR' message in the 'Order Import Status' column. The 'Actions' column for each row contains icons for view, delete, and refresh.
